Many failures in melon growing are due to lack of care, the impression being fostered by some people that melons can be grown as easily as corn. We have not found this to be the case and from our experience and observation we would say that in the corn belt melons cannot

**We Breed 7 Varieties of SEED CORN**

We raise every ear of corn sold by us for seed on our own farms. We cultivate 7 large farms; each of them produces a pure variety of seed corn. Our plan of cultivation insures your getting pure bred corn, the best varieties.

We have increased the yield of certain varieties from 35 to 90 bushels per acre on the same land. That shows what breeding will do. If you want some of that kind of seed corn send your name for catalog. We sell hundreds of bushels of seed corn to our neighbors annually; they tell us it is the best they can find anywhere. That's proof that our seed is what you want

Box 16 **W. W. VAN SANT & SONS** Farragut, Iowa.

**Seed Corn**

Prof. Holden of Ames College, Iowa, told us Feb. 7th that he regarded Goddard's "Silver King White Dent" as a remarkable corn. One of the very best. We control 1906 crop of "Silver King" grown in this county (Winnebago) by the man who perfected and named "Pride of the North." Let us send you history of this wonderful corn. We grow all standard varieties. How Northern Grown Seeds. Get our catalog. **THE ADAMS SEED CO., Decorah, Iowa.**

## WATCH AND SPRAY

The worms will often destroy a crop of gooseberries or currants in forty-eight hours' time. The insecticide should be at hand for immediate application, and it isn't best to wait for the appearance of the enemy. Put it on when he is due.

Many consider Paris green the best thing to use, and usually one good spraying is enough. The worms come so early that there is no danger in the use of the fruit which comes later.

The main point is to be ready, not to be taken by surprise, and not to let the enemy get the first move.

## THE YELLOW TRANSPARENT.

This apple is not yet appreciated. It comes so early and its quality is so high that there is no need to have any of the crop wasted. Sort out the best samples and have your grocer put them in his show window. They will sell readily, two for a nickel, to the hungry boys, and to the girls also.

Of course the fruit must be hand-picked, and free from bruises to be attractive.

## SENATOR DUNLAP.

The Senator Dunlap strawberry is holding its own well, in popular favor. We incline to the opinion that it is now the most widely planted variety. Its large even-sized fruit and very vigorous growth, are qualities that win. Still, everyone who plants it should bear this in mind: The rows must be restricted in growth. If the season is favorable for plants you will find about August that you have enough and too many runners. A row of plants eighteen inches wide, and four inches apart in the row is enough. Then cut and pull the runners for dear life. Your crop depends on it.

## THE BLACKBERRY.

This fellow is an expansionist. He is like the colored race in general—very

prolific. If permitted to have his way he will annex all neighboring territory to his empire.

For this reason allow plenty of room when planting it. Many a man has put it in the center of a small garden, only to find in a very few years, that he had a continual fight to keep it in bounds. It is that or a whole garden of blackberries.

The ideal place for the blackberry is a strip of land between a grove on one side and a meadow or pasture lot on the other. Then there should be stone walls ten feet thick at each end.

## OUT WORMS.

The successful method of fighting the cut worm is based on the fact that he is fond of sweets. The sweet tooth is as well developed as that of any candy loving boy.

Into a pint of molasses or any sirup stir thoroughly a heaping teaspoonful of Paris green. Mix this with a pail full of bran, or other finely ground feed. Scatter a little of the mixture in the hills or along the rows, where the worms are at work.

They will eat it and be killed, if you have been careful to secure good fresh Paris green.

Currants are hardy, easily cultivated, standing neglect well and liberally respond to cultivation and generous treatment. Set four feet apart in rich ground; cultivate well or mulch heavily; prune out old wood, so that each remaining shoot will have room to grow; if the currant worm appears, dust with hellebore.

Are the breeding ewes getting the exercise due them? Lack of sufficient exercise will bring you a weaker lot of lambs and more trouble at lambing time than almost any other one thing.

Don't let the pregnant ewes jump over a low sill or similar obstacle to get into the barn or in and out of the lot. Such things are sure to be conducive to more or less abortion.

## DAY BY DAY

Agricola

There may be no such thing as luck, and again there may be luck and want of luck, according to what the speaker means by the word, but in farming and gardening the weather is not made by man and in his plans he may or may not run in harmony with weather changes which he can not foresee.

How deep, for instance, should we plant corn? If we knew what the weather would be we could answer wisely and authoritatively, but without that knowledge the answer must be what the scientists call "tentative," when they have no other word handy. If dry, we plant much deeper than when wet. Agricola's rule is to plant just as shallow as will insure sufficient moisture to swell the kernel and enable the vital force in it to change the starch of the kernel into sugar for food for the germ.

But Agricola is in luck this morning, and through no learned foresight or any other sight. Yesterday afternoon he set out strawberry plants. It had been bright, clear and dry for a long time, just the three conditions unfavorable for transplanting, but the time had come for that job, the time to do it could be spared, and the plants had come. There was no alternative—they must be set out.

Transplanting can be done in a dry time with good success by one who knows how and is not too lazy to do it right, but the ideal time is in still, warm, cloudy weather. This morning a light shower fell and the sky remains overcast. This is Nature's guarantee for life for the plants—life and vigor. They could be made to live had the dry weather continued much longer, but vigorous growth requires favorable conditions.

And how deep should sod be broken? For old ground the rule is to plow shallower in the spring than in the fall. A neighbor reverses this in plowing sod ground for corn, and I shall try this plan this spring.

I have heard an agricultural professor teach that the cream of the soil is in the top two inches of sod ground. From this he deducted the principle of very shallow plowing—just as shallow as the plow would turn the sod over, or as little more than two inches as practicable. I tried this plan, and with gratifying success when fall plowed, provided the sod rotted well before planting time.

When unrotted sod has to be prepared for planting, and is broken shallow, then there is just as tedious a job on hand as Agricola cares to tackle, and more so, if there is a way to avoid it. This neighbor avoids it. He hitches four horses abreast before an ordinary walking breaking plow, makes the right hand horse walk on the plowed land, the next horse in

the furrow, and the other two on unplowed land, and turns it over smooth and deep. There is loose soil on top then, and he can disk without turning up sods, can harrow it smooth, and secures a seed-bed fit for onions or sugar beets, and his corn—well, it fairly revels in glee, and no matter whether planted early or late, it delights in showing how it can "get there" before frost.

There is a little risk in manuring land in the spring for corn if the season should prove drouthy, but with the manure spreader this risk is reduced to a minimum, and the benefits are practically assured. The reason, of course, is that the machine breaks up all the lumps and tangles and the connection between the subsoil and surface soil is not broken by a strawy mass which arrests water from beneath on its way to the surface by capillary attraction.

I have good success in topgrafting fruit trees which do not bear good fruit. I cleft graft—split the stock, whittle the scion wedge shaped, insert with the bark of scion and of stock together, cover the exposed part with wax, and look for it to grow with as much confidence as for a planted potato to grow.

Oslar was hardly the original prophet who saw that man may live and look flourishing from a near view after his glory has really departed. If our readers will refer to some of the speeches of "The Noble Red Men" when his country was young they will find this sentence,—"Brethren, I am an aged hemlock—I am dead at the top."

To appreciate this fully, one should have in his personal memory the appearance of a hemlock forest, with the tops of the old hemlocks bare and dead, while the lower limbs were green and growing. From beneath the tree seemed still progressing upwards; from a distant hill the observer discerned that it was at a standstill, that no new upward growth was possible, that death was a present actuality, and that it was as dead at the top as it ever would be. So with our great men, even if, unlike "Lo, the poor Indian," they refuse to accept the fact.

Beware of the man who boasts that he never does and never did anything wrong.

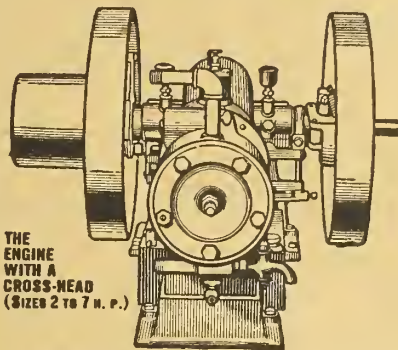

The field is now the best equipped gymnasium to be found, and the appliances provide all that is needed for physical training.

Agricola does not second the motion proposed by certain clergymen, that all churches should run a gymnasium in connection with the church, and locate it on a street car line, so the young generation can get to it without walking.

A milk cow should never be driven home from the pasture at a faster walk than a horse is driven when John is taking Mary home from church.

Sponging on the old folks does not put the right kind of stuff in the physical and intellectual make-up of a young

## Trustworthy Help

THE ENGINE WITH A CROSS-HEAD (SIZES 2 to 7 H. P.)

is a gasoline engine that can be trusted to run hour in and hour out, day in and day out, winter and summer, with very little attention. This trustworthiness you find in the

man. It is better to push him out of the nest, as do the eagles, if he will not test his wings voluntarily.

## Cyclopedia of Architecture.

Architecture, carpentry and building appeal strongly to the young man. From every community, whether country or town, there go out numbers of its young men who enter these trades and in time come to fill responsible and lucrative positions. There are right at this time hundreds of young men who are anxious to prepare themselves for a career in some of the building trades, but who have not the means to take the schooling necessary to fit them for the best positions.

To such we would recommend a Cyclopedia of Architecture, Carpentry and Building, recently compiled by about forty of the leading authorities of the United States on these subjects. A few of the numerous subjects comprehensively illustrated and explained are carpentry, reinforced concrete, plumbing, electric wiring, cornice work, roofing, steam fitting, gas fitting, mechanical and architectural drawing, specifications, strength of materials, and kindred subjects. All these subjects are set forth by the most practical and successful men of the times. Four thousand pages with approximately 200 full-page and over 3,000 lesser illustrations are contained in the set of ten massive volumes which are being offered at a special low price by the American School of Correspondence to acquaint young men with the merits of their instruction in the trades. Libraries should have a set of these books for the use of readers both old and

## When You Buy a Fence

It's just common business sense to look for the fence that gives you the most for your money—the Anchor Fence will do it. Send for free fence book 12. Anchor Fence & Mfg. Co., Cleveland, Ohio.

**WANTED** Herdsman of experience to care for small herd of Short-horns, headed by Gloster Marshal. Preferably married man. Wish to show. Write O. O. Smith, Des Moines, Iowa.

young. The set will be of invaluable service to farmers, as it contains specifications and plans of buildings, concrete work and plumbing. Contractors, carpenters, masons, painters and members of every building trade must be prepared technically to the best of their capacity nowadays to rise above the average. To such men who have a good general working knowledge these books make a strong appeal. The student will find every imaginable aid to help him master the essentials of the instruction given. The book is a leader in the highest sense. The special price is for a limited time and is made by the American School of Correspondence, 3365 Armour Ave., Chicago. See page 5 for the offer.

## GOOD DAIRY INFORMATION.

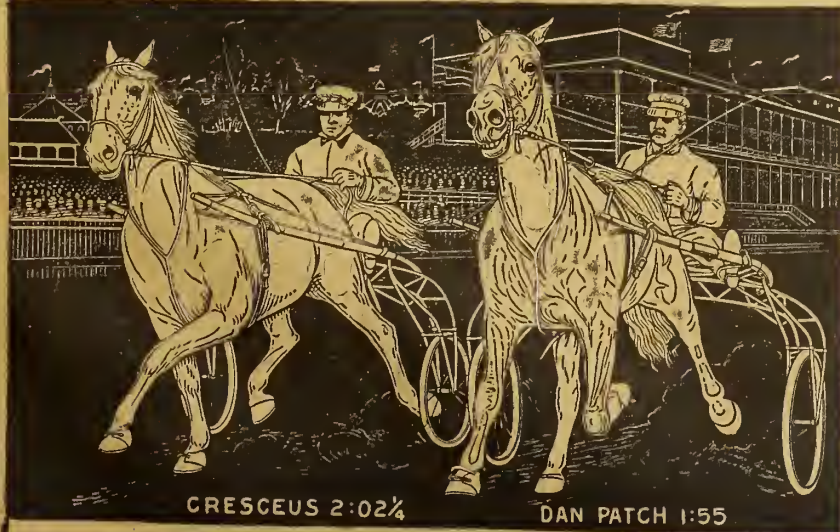

The De Laval Separator Company have just issued a very neat and comprehensive cream separator catalog. Besides setting forth the description and merits of the different makes of this machine, it contains numerous points of value on questions of interest to the dairyman. The popularity of the De Laval Cream Separator is testified to by 800,000 users. Since the innovation of the cream separator the De Laval has been a prominent make in the field. They have secured numberless awards at all the leading expositions held since 1879. In their catalog they devote one page to a reproduction of some of the most important of these awards. The De Laval cream separator commends itself to the investigation of every farmer or dairyman or factory which has use for the highest type of this machine. Those interested in knowing the merits of this separator should ask for this catalog at their local agency or dealer. Should it not be possible to secure it in this way, write to the De Laval Separator Company, Randolph and Canal Sts., Chicago, Ill.

CLARK COUNTY, KANSAS, FARM FOR SALE.

Mr. I. A. Walton, of Wellington, Kan., elsewhere in this issue is offering for sale at a very low figure 480 acres of good improved land in Clark county, Kansas. Mr. Walton has been a resident of this portion of Kansas for the past thirty-six years and is thoroughly acquainted with soil conditions. Look up his advertisement and see what he can sell you for \$22 per acre. Please mention this paper when writing him.

INTERNATIONAL STOCK FOOD CO.,  
MINNEAPOLIS, MINN., U. S. A.

## THE WORLD'S MOST FAMOUS HARNESS HORSE FARM.

International Stock Food Farm of seven hundred acres, owned by M. W. Savage, is generally acknowledged to be the most famous harness horse farm in the world because it owns the Four World Champion Stallions, Dan Patch 1:55, Champion Pacer and Fastest Harness Horse in the world; Cresceus 2:02 1/4, the champion trotting stallion of the world; Arlen 2:07 1/4, the champion 2 and 3-year-old trotting stallion to high wheel sulky; Directum 3:05 1/4, the champion 4-year-old trotting stallion. Also Roy Wilkes 2:08 1/4, the first stallion to beat 2:10 and world's champion for four years. All of these stallions and the one hundred brood mares and their colts are fed "International Stock Food" every day. You are specially invited to visit this farm at Savage, 10 miles from Minneapolis, and see the every day, practical results of feeding "International Stock Food." 2¢ per Pound for One Cent. We always welcome visitors.

## POULTRY DEPARTMENT.

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

## THE PHEASANT BEING INTRODUCED

Following the example of Illinois and Kansas, Colorado now is releasing the pheasant, the farmer's friend, and before many years have passed the entire state will have been stocked with them. The pheasant is the chief enemy of the insect pests which destroy grains and fruits and the worms which destroy the roots and bodies of plants.

While the pheasant cannot be domesticated like the common chicken, its eggs can be hatched successfully under the common hen. As soon as they are

grown the pheasants will take readily to the fields, there to busy themselves consuming the numerous pests that make the farmer's life most miserable. The greatest benefits are to be derived from the propagation of these birds. They are gorgeous in plumage, the best game bird in the world, and its flesh is considered one of the greatest of table delicacies.

In the aviaries in City Park, Denver, there are several hundred pheasants, introduced by W. F. Kendricks, a wealthy mining man, who will stock Colorado with the birds free of cost to the state. The aviaries are so placed that thousands of visitors see the birds every day, the public thus being educated as to the value of the birds and the methods adopted in propagating them. In plumage the pheasant rivals the bird of paradise, and it probably is the only game bird that can be successfully reared in captivity.

## Selling Day Old Chicks.

To the Editor of The Homestead:

This is practically a new departure in poultry culture in this country. Three or four years ago it was almost unheard of; no one thought of shipping newly hatched chicks hundreds of miles and expecting them to arrive in good condition. This, however, is what is being done at the present time with perfect satisfaction to the buyer.

Dozens of breeders throughout the country have taken up this branch of the poultry industry during the past two years and so far as I have been able to ascertain, they are doing a thriving business. This branch of the chicken industry has been carried on in England and China for several years. The chicks are usually shipped in shallow wooden boxes, about six inches deep, with small holes cut in the sides near the top for ventilation. The chicks are taken from the incubator as soon as dry and packed somewhat closely in these boxes, and can be shipped 1,000 miles or more in perfect safety. Owing to the fact that little chicks do not require any feed from forty-eight to sixty-four hours after they emerge from the shell, it is possible to ship them any distance that does not require a greater length of time than this and by the time they arrive at their journey's end they are ready for their first meal. This is a very suitable and profitable business for those who have neither room or time to raise the chicks after hatching them. Profits are good considering the amount of capital that is necessary to invest in such a business. Subscriber.

## Farmers As Poultry-Men.

One of the most serious handicaps that the American farmer has to carry is the regular annual hen strike. Just as often as the sun crosses the autumnal equinox, just so often Mrs. Hen refuses to do any more business, and leaves Mrs. Farmer with no pin or grocery money. From that time until the sun warms the north side of the barn, there is very little "doing" in fresh eggs, and prices soar. We are quite inclined to take this regular yearly "shut down" as necessary, and put up with it, just as we do with the high price of coal. But it's a mistake; there is no more need of suffering that loss than there is of standing any other sort of "bunco" game. Mrs. Hen can be made to understand and do her full duty if you do your duty by her. Did you ever observe your hens closely during this "off" period? If not, suppose you do next time it occurs. You will find them dull, listless, logy and slowly shedding their feathers. Now molting is a natural and necessary period in the round of the hen year, but it need by no means be a time of total loss, and if you intend to get your share of the profit sure to come from a constantly-increasing demand, you must cut this non-productive period down as much as possible. The proper thing to do with hens in order to avoid this lost time is to give regularly in small amount of Dr. Hess Poultry Pan-a-ce-a in the morning feed. We do not hesitate to say that there is nothing so well adapted to the poultryman's need as this preparation. Dr. Hess studied every possible phase of the "hen problem" by scientific research and careful experiment under just the conditions which poultrymen are compelled to meet, and Poultry Pan-a-ce-a is the result. If you are not acquainted with Dr. Hess Poultry Pan-a-ce-a and what it does, let us say, first, it is not a stimulant; it does not excite the hen to an unnatural and artificial production of eggs. It does, however, compel every organ to act in a natural and healthy manner by causing the hen to digest and assimilate the largest possible amount of food taken, so that laying becomes a fixed and constant habit. Poultry Pan-a-ce-a makes a rich red blood and supplies the nitrates necessary to assist in throwing off poisonous matter from the system, so that health becomes a natural condition in confinement as well as in liberty. I do not hesitate to say that no flock can be diseased when Dr. Hess Poultry Pan-a-ce-a is regularly given. If this course is begun with young chicks and followed consistently every day, growth will be rapid and loss practically nothing. I have known pullets handled in this way to begin laying in October and continue productive through

the entire winter, and as I said before it shortens the non-productive period for old stock. Dr. Hess & Clark are so certain of the value of their Poultry Pan-a-ce-a that they give a written guarantee with each package; if it does not give results, it costs you nothing. One cent's worth of Poultry Pan-a-ce-a will make a daily feed for thirty fowls. If you use it as directed, and occasionally sprinkle roosts and nest boxes with Instant Louse Killer your success will be ample.

## POINTERS.

—J. M. Janssen, Sibley, Ia., offers Barred Plymouth Rock eggs for sale.

—Black Langshan eggs are offered for sale by H. M. McKeen, Sac City, Iowa.

—White Wyandotte eggs are offered for sale by A. J. Podendorf, Logan, Iowa.

—Barred Plymouth Rock eggs are offered for sale by J. E. Wehr, Portsmouth, Iowa.

—Silver Laced Wyandotte eggs are offered for sale by O. M. Healy, Bedford, Iowa.

—Single Comb White Leghorn eggs are offered for sale by Henry Oelrich, Rolfe, Iowa.

—Barred Plymouth Rock eggs are offered for sale by Mrs. L. C. Reese, Prescott, Iowa.

—Single Comb Rhode Island Reds are offered for sale by P. H. Thiel, Renwick, Humboldt Co., Iowa.

—Arthur White, Red Oak, Iowa, breeds Barred Plymouth Rocks exclusively. Eggs \$1 per fifteen, \$2.50 per 100.

—Mammoth Bronze turkey eggs at \$2.50 per nine. Pekin duck eggs at \$1 per nine. Write Mrs. A. Kitson, Audubon, Iowa.

—H. F. Allen, Blairsburg, Iowa, offers pure-blood White Plymouth Rock eggs for sale at \$1.50 per fifteen, or \$5 per 100.

—Buff Orpington and Golden Buff Rock eggs from high-class stock are offered for sale by Mrs. G. R. Fuller, Rolfe, Iowa.

—Prize-winning Light Brahmas and Barred Rocks scoring 90 to 93 points is what J. Q. Swallow, Nodaway, Iowa, is offering eggs from.

—Large Black Langshan cockerels are offered for sale by Mrs. Geo. Tutt, Marathon, Iowa. She also offers eggs at \$1 per twenty and \$4 per 100.

—Pure-bred White Wyandotte, White Holland turkey and Toulouse geese eggs are offered for sale by the Forest Home Poultry Farm, Box 253-H, Audubon, Iowa.

—Mr. G. M. Grinstead, Mitchellville, Iowa, offers M. B. turkey eggs, \$3 per ten, B. P. Rocks, \$1.25 per fifteen, Pekin duck eggs, \$1.25 per twelve, on this page. Mention this paper.

—Mrs. Eva E. Girard, Schleswig, Iowa, is offering some exhibition Barred Rock cockerels for sale. Read her advertisement and write her. Eggs at reasonable prices, from her best pens.

—Five cents an egg is what Mr. J. T. Molloy, Albion, Iowa, is offering choice sittings for from his flock of prize Barred, Buff and White Rocks and White Wyandottes. Write mentioning The Homestead.

—For eggs for sittings or for incubator from S. C. Brown and White Leghorns which score from 90 to 96, address Mr. Geo. V. Price, Indianola, Iowa. This breeder of poultry writes that his sales have proved very satisfactory to his patrons and his supply of eggs is still choice. Mention The Homestead when you order.

—Mr. W. J. David, of New Hampton, Iowa, offers Barred Plymouth Rock eggs from good, heavy birds, the hens weighing from ten to ten and a half pounds. This flock has been carefully selected and proper attention has been given to type, so that the colorings are of the required standard. List your order with this advertiser at once.

—To move a fine lot of Barred Plymouth Rock chicken and Pekin duck eggs at once, Mr. Fred Post, Moulton, Iowa, is reducing the price from \$2.00 to \$1.50 per sitting. He is filling orders every day with eggs from his fine flock of W. H. turkeys. Place your order at once if you are not supplied, as at these prices they will go quick. Mention The Homestead.

—The necessity of a supply of grit and lime within easy access of fowls is fully known by every poultry breeder. Oyster shells supply both these materials in a desirable form. The Star Poultry Food Co., Minneapolis, Minn., advertise a high grade quality of crushed and sterilized oyster shells on this page. Booklet will be sent on request, mentioning this paper.

—Messrs. Whisler Bros., of Fairmount, Iowa, who have been advertising Mammoth Bronze turkeys, write that they have three fine toms left which they will price reasonably if taken at once. Their sales have been very good this year as their offering has been first-class, and anyone who has not yet supplied himself with a flock header should write them immediately, mentioning this paper.

—The Barred Plymouth Rock eggs which Mr. M. V. Leeper, Redfield, Iowa, advertises on this page he writes are from the same pens from which he has secured such high percentage of fertile eggs this season. These pens contain all of his prize pullets and hens shown at Lohrville last December. Every male bird carries a strong infusion of the choicest pens of Mr. F. H. Shellabarger. White duck eggs and also M. B. turkey eggs are for sale and the flock of turkeys have laid unusually well this year. All eggs at reasonable prices. Write for circular mentioning The Homestead.

—We desire to call the attention of our readers to the advertisement of Mr. S. V. Latham, of Montezuma, Iowa. He writes: "I have bred Barred Plymouth Rocks, M. B. turkeys and Pekin ducks for over ten years. My birds have stood the test in the show room. I breed for size as well as high scoring qualities. They are of the most popular strains in America today. I have eggs of the above breeds for sale. My eggs are hatching fine and a great many of my old customers are ordering eggs. My egg customers are not disappointed when chicks are grown. The following is a sample of the many letters received: 'Ohio, Ill., March 30, 1907. Mr. S. V. Latham, Dear Sir:—You will find enclosed \$1.75 for which please send me thirty Barred Rock eggs. I have

**\$7.00** Buys the Best 120-EGG Incubator

OUR HOME DEPARTMENT.

LETTERS intended for publication should be accompanied by the name and address of the writer, not necessarily for publication, but as a matter of good faith. All communications intended for this department should be addressed to Postoffice Box 727, Kansas City, Mo.

WITH THE EDITOR.

A few weeks ago the editor took an article presumably intended for Among Ourselves and isolated it here With The Editor. The plan worked so successfully that the experiment is to be repeated this week. With The Editor will be with Whittier, as interpreted by Mrs. Victoria Christie, who has spoken Among Ourselves, but always beneath the mask of a nom de plume. By request Mrs. Christie has prepared for our Home Department a synopsis of "Among the Hills," a poem which has had large place among the character forming influences of her life. She has done the work charmingly. Although she offers it apologetically, the editor presents it to readers of the Home Department with full confidence that they will duly enjoy it and with the hope that it will stimulate study of the poem itself:

The prelude to "Among the Mills" begins with the description of a typical August day in the country, and the poet calls to mind old summer pictures of the quiet hills, and human life as quiet, at their feet; feeling as he dreams of the past how rich and restful even poverty and toil become when beauty, harmony, and love sit at the humble hearth, as angels sat at evening in the patriarch's tent; when man makes labor noble, and his farmer's frock the symbol of a Christian chivalry, tender and just and generous to her who clothes with grace all duty. Then comes the other side of the picture—how wearily the grind of toil goes on where love is wanting; how the eye and ear and heart are starved in the midst of nature's plenty; when the house walls seem blistering in the sun, without a tree or vine to cast the tremulous shadow of its leaves across the curtainless windows, from whose panes flutter the signal rags of shiftlessness; where the best room, stifling with cellar damp, shut from the air in hot midsummer, is hookless and pictureless. And in sad keeping with their surroundings are shrill, querulous women, sour and sullen men, untidy, loveless, old before their time, with scarce a human interest save their small economies, or the poor scandal of the neighborhood; churchgoers, but grumbling over pulpit tax and pew rent, saving their souls and winter pork with the least possible outlay of salt and sanctity; showing as little comprehension of Christian love and duty as if the

Sermon on the Mount had been outdated like a last year's almanac. Not such should be the homesteads of a land where whoever wisely wills and acts may dwell in broad-acred state, with beauty, art, taste, culture, books, to make his hour of leisure richer than a life of fourscore to the old time harp. Then comes the story of the poet's drive with his hostess to a certain farmhouse to buy some butter, and on the way home she tells how the farmer's wife was a city girl who came to his home as a summer boarder. One day in jest she told him he needed a wife; not some one acquainted with piano keys, but some fair, sweet girl, with skillful hand and cheerful heart for treasure, and he says he is not in the mood to seek a wife; in learning to love her he has lost the power to love any other girl. He says this proudly, daring her scorn, but she surprises him by declaring nor frock, nor tan can hide the man, and then—the hangbird overhead looked down to see love's miracle, the giving that is gaining. A perfect picture of married life follows. Neighboring homes are cheerier for her sake; the social air is sweeter for her coming. No tenderer hand ministers to the sick; a subtler sense of pleasure feels each rustic sport she graces, her presence lends her warmth and health to all. For larger life and wiser aims the farmer is her debtor; through her his civic service shows a purer toned ambition; no double consciousness divides the man and politician. In party's doubtful ways he trusts her instincts to determine; at the loud polls the thought of her recalls Christ's Mountain Sermon. He owns her logic of the heart, and wisdom of unreason, supplying, while he doubts and weighs, the needed word in season. And if she walks at ease in ways his feet are slow to travel, and if she reads with cultured eyes what his may scarce unravel, still clearer, for her keener sight of beauty and of wonder, he learns the meaning of the hills he dwelt from childhood under. He has his own free, bookless lore, the lessons nature taught him, the wisdom which the woods and hills and tolling men have brought him; the steady force of will whereby her flexible grace seems sweeter; the sturdy counterpoise which makes her woman's life complete; a latent fire of soul which lacks no breath of love to it, and wit, like his native brooks, plays over solid granite. And so, in grateful interchange of teacher and of hearer, their lives, their true distinction keep while daily drawing nearer.

Victoria R. Christie.

HOME AND HOMEMAKING.

LITTLE HELPS BY THE WAY—RECIPE FOR HAPPINESS.

Men have been searching for the fount of eternal life for thousands of years, says Bert Walker. Ponce de Leon thought he found it in the Sunny South several hundred years ago, but he was mistaken. But I have been shown how to be happy, and that beats living forever. A friend of mine who has noticed that I occasionally kick on existing things and am not always a thing of joy and contentment, has handed me the recipe of happiness. It is so good that I hasten to divide it with the brethren. Here it is:

If you have the blues, read the 27th Psalm.  
If your pocketbook is empty, read the 37th Psalm.  
If people seem unkind to you, read the 15th of John.  
If discouraged about your work, read the 126th Psalm.  
When you are out of sorts, read the 12th of Hebrews.  
When you are losing confidence in men, read the 13th of I. Corinthians.  
When you can't have your own way, keep silent and read the 3d of James.

MONTH OF MAY.

Here I am, and how do you do?  
I've come afar to visit you.  
Little children, glad and free,  
Are you ready now for me?  
I'm the month of May!  
I've a store of treasures rare  
Laid away with the greatest care—  
Days of sunshine, song and flowers,  
Earth made into fairy bowers!  
I'm the month of May!

—Selected.

A THOUGHT FOR THE MOTHER.

We prepare our children for most everything which is likely to happen to them, in a measure at least. We are slack about preparing them for marriage and home-making. The mother must do it if it is ever to be done. It ought not to be so, but it is so and may as well be recognized. Teach the girls to work, but don't work them to death. Teach them to think and manage. Do as much for the boys and be strict with them on the subject of temperance, then the chances are good for a happy life for both of them.

USES OF EGGS.

The uses to which eggs may be put are many, aside from their employment in cooking.

A mustard plaster made with the white of an egg will not leave a blister.

The white skin that lines the shell of an egg is a useful application for a boil.

White of an egg beaten with loaf sugar and lemon relieves hoarseness—a teaspoonful taken once every hour.

An egg added to the morning cup of coffee makes a good tonic.

A raw egg with the yolk unbroken, taken in a glass of wine, is beneficial for convalescents.

It is said that a raw egg swallowed at once when a fishbone is caught in the throat beyond the reach of the fingers will dislodge the bone and carry it down.

The white of a raw egg turned over a burn or scald is most soothing and cooling. It can be applied quickly and will prevent inflammation, besides relieving the stinging pain.

One of the best remedies in case of howl trouble is a partly beaten raw egg taken at one swallow. It is healing to the inflamed stomach and intestines, and will relieve the feeling of distress. Four eggs taken in this manner in twenty-four hours will form the best kind of nourishment, as well as medicine for the patient.

A raw egg is one of the most nutritious of foods and may be taken very easily if the yolk is not broken. A little nutmeg grated

# Amatite ROOFING

**WATERPROOF AND REPAIRPROOF**

As a practicable, durable, economical and labor-saving roof, Amatite tops them all.

Let us look into the subject more fully.

With any other roof there is the necessary preparation before you can begin the work.

With shingles—the slow, laborious work of nailing each shingle separately, matching and chalk-lining each row.

With Tin—matching, soldering, painting—then the everlasting keeping it painted, year after year, so it won't leak.

With ordinary ready roofings—paint! paint! paint!

With Amatite—you can nail it down yourself, over your new roof or your old shingled or tin roof, and there you are.

No worry, no fuss, no expense.

Could you possibly find any other roofing to so completely meet every requirement?

And your expense ceases after you have purchased enough Amatite for the job. There need be no saving to repair the barn roof next spring. You will not need it.

Amatite doesn't need to be repaired every year or so; it requires no painting or coating of any kind to make it last from one season to another. Amatite is waterproof, weatherproof and repairproof.

FREE Pair of "Buffalo Calf" Shoes If You Can Tear this Free Test-Tag With Your Fingers

We make this offer to let you prove for yourself, astoundingly, that these test-tags of real leather which we make into our "Buffalo Calf" Shoes show you how strong for wear the leather is. Show you how flexible it is for comfort. Just ask your dealer for a pair and test them on your feet, or write us for a sample "Buffalo Calf" tag.

Try to tear it, and remember as you do that our "Buffalo Calf" Shoes are etched with extra rows of extra strong, waxed thread. They won't break out or wear out the way other shoes do. They last much longer. They are good shape, too, and look first rate for every-day wear.

Ask your dealer for them or write us today for a sample tag. Find out for yourself. It will pay you to find out what good shoes for hard wear our "Buffalo Calf" Shoes really are. Write today or see your dealer.

upon the egg, a few drops of lemon juice added, some chopped parsley sprinkled over it, or some salt and a dash of cayenne pepper, vary the flavor and tend to make it more palatable when taken as a medicine.

The white of a raw egg is the most satisfactory of pastes and is better than any prepared mucilage or paste one can buy. Papers intended to put over tumblers of jelly or jam will hold very securely and be airtight if dipped in the white of an egg.

WHAT TO EAT.

**Cheese Biscuit.**—Roll some puff paste out thin and sprinkle over it a dash of cayenne and dry grated cheese to cover it; double up the paste, roll it out again and cut it with a small round cake cutter. Brush over the biscuit with an egg, lay them on a floured tin and bake in a hot oven to a very pale brown. Any stale bits of cheese may be pleasantly used in this way.

**Japanese Koto.**—Cut five pounds of rhubarb stalks in inch pieces, add five pounds of sugar; let stand over night. In the morning pour boiling water over one and one-half pounds of figs; cut in bits. Add to the plant with grated rind and juice of two lemons. Boil until like thick preserves. Koto is fine with cold meats; also as cake filling.

**Baked Bean Salad.**—Peel and slice very fine four large or eight small onions. Pour cold water over them and press hard with the hand to remove the strong acid taste. Drain well. Place in the salad bowl a pint and a half cold baked or boiled beans, add the onions, a teaspoonful of salt, half a teaspoonful of pepper, two tablespoonfuls salad oil, a teaspoonful white sugar and a small cup vinegar. Toss lightly, then mound on lettuce leaves with a garnish of olives and sliced hard boiled eggs. This is delightfully appetizing for either picnic or supper table.

AMONG OURSELVES.

In this great household there must surely be many gardens in process of making, but we are hearing almost nothing of them. This is not as it should be. Let us hear from the gardeners. Perhaps the request Aunt Belle is about to make will bring those who raise flowers to their feet and taking courage from their vegetable gardeners will give us of their experiences also:

I want to ask a favor. I am very fond of China asters, but do as I may they will not bloom for me until so very late that their season of beauty is very transient. Please give me minute instructions, as I must have them bloom earlier. I have planned and started an old-fashioned flower garden in which I expect to plant hardy blooming plants and shrubs, so that I will have less work in some ways, but yet plenty of flowers. We love bouquets in every room from March until November. Think I shall have my garden set out in straight lines with long narrow paths between. The few annuals I use must be such as cut to advantage. Do any of the sisters have "real" flower gardens? If so, please write about them for the benefit of all and especially of Aunt Belle.

Speaking of flowers a Pausy is raising her shy head Among Ourselves:

At a lecture we had the other evening in our town, the speaker asked: "What is the sweetest thing on earth; can anyone guess?" He said it was a little baby. Now, will someone please tell what the sourest thing on earth is?

All new born things are sweet, but probably most persons will agree that of

SACRED PICTURE FREE.

This beautiful and holy picture of our Savior as "the good shepherd" will be given absolutely free with every three months' trial subscription to The Mother's Magazine at 10 cents. The Mother's Magazine is the hand-illustrated home and family magazine published—artistically illustrated, colored covers, and 48 pages of reading every month. The picture is 16x20 inches in size, is reproduced in many beautiful colors, and is finished with a magnificent litho, facsimile gold and scroll frame. Every Christian man, woman and child loves it, and will be ennobled by having it in the home. Ready for the wall when received. Send 10 cents to-day (stamps or silver) for the Magazine three months, and ask for please number 232. Both will be sent you at once. Money back if you are not delighted. Address, THE MOTHER'S MAGAZINE, ELGIN, ILL.

them all a baby is the sweetest. I wonder if we shall agree as well as to what is the sourest? Let us see.

Several of the friends have risen to wrestle with the definition of love. Oddly enough they are all of the same sex, though of varying ages and different

estate. From internal evidence and private information I have classed four of them in order and present them to you as follows: Aunt Ellen, Mrs. Maria Brown, Mrs. Belle Brasel, and Miss Rosebud:

What is love? It is to regard with affection; it is a natural passion inclining us to delight in an object, a gracious principle of habit wrought in our being by our Creator, which inclines us to delight in, esteem and earnestly desire to enjoy an interest in the happiness of all and especially those of our own household. Love is composed of many elements, forbearance, self-sacrifice, blindness to the faults of those we love whether married or single. Often we hear mothers make flimsy excuses for real wrongs committed by their children. A woman would not do such a thing except for the love she bears her children. For the same love she will place herself between them and extreme danger, forgetting her own peril. So long as a wife can love her husband (and she will love him if he loves and treats her as well as she does him) she never owns that he has a fault. Husbands are not apt to speak of the faults of their wives away from home, but it is the everlasting, unjust, criminating tongue-lashing in the home that crucifies woman's love, and so long as the husband loves his wife he will not do this and then allow himself to feel aggrieved because he does not receive the tender solicitude that love hegets. The male sex is marvelously adroit in the begetting of the love of the opposite sex and could keep it by the same tactics if so inclined, as woman is constituted to love and that ardently and more than herself.

These heartfelt talks on love or the lack of it, which is hate, touch the heart. We are all human and do err. Now, what's to be said to help these heartaches? I believe if your suggestion to talk on love be acted upon, benefit will be derived for all. First,

Economy is practiced, comfort is increased, and work is lessened by MACBETH lamp-chimneys.

They cost less if you figure by the year instead of by the chimney. MACBETH lamp-chimneys add to the brilliancy of the lamp, and it is taken care of with half the bother when fitted with a MACBETH chimney.

There are other reasons. The Index explains them and also tells all about lamps, their proper chimneys and care. It's free.

Address, MACBETH, Pittsburgh.

what is love? God is love, hence the source of all love. Whatever love we bear for husband or wife, for child or friend, is from God. Second, what are its elements? We are told in Gal. 5, 22-23, that the fruits of the spirit are love, joy, peace, long suffering, gentleness, goodness, faith, meekness, temperance. Love never finds fault, hate never commends. Love is blind to or overlooks, the failings; hate is blind to any good qualities. When people are married they should be in love with one another, have faith in each other, be gentle with each other, be meek; that is, consider the other better than yourself, be temperate, and don't think to gain love by these means and keep it by laying every failure at the other's door. A man and woman may love one another (there are degrees in love) and one of them may in a fit of ill humor start a trouble which never ends. Why? Because it is never dropped. Both should practice love; all else is transitory. Wealth, position, fame, health, sickness, friends, all are subject to change, but they twain are one flesh. What a foolish person to find fault with one-half of himself!

Love is an attraction between the sexes, or the attraction of one sex for the other. It is both spiritual and amatory, or mental and physical. The spiritual governs the amatory when it predominates or the reverse. The spiritual calms and pacifies the amatory. The amatory, when not controlled, kills the spiritual along with all of the finer emotions. Love can be killed. The very purest love that ever existed between man and woman can be killed by sensualism.

I am just a school girl of eighteen years, but I am going to try and answer the difficult question which was asked lately: "What is love?" There are several different kinds of love. First, the love for our beloved Christ who died on the cross to save mankind. We must not forget how dearly God loved us; so well that He gave His only begotten Son to save us. His love surely must have been a perfect love. We should always have Him uppermost in our minds and love and obey all of His commandments. Second, the love for our parents. It should be such a strong love that we would mind the minute they spoke to us and then they would not have to scold so much. We should not talk and ridicule them behind their backs as I have heard some boys and girls do. Third, is the love between brothers and sisters. It should be a true love, and they should love one another so well that they would not quarrel and fuss, but try to do everything they know would please each other. Now, the fourth I don't know anything about. But I shall tell what I think it should be. That is, love for the opposite sex. I think it should be a pure true love—one that the man will not criticize his sweetheart or the woman her lover. Now I do not think this love is fully matured until the couple is married, for then they have to face all the trials and troubles of life together, and it makes them nearer and dearer to one another.

There is food for thought in what these friends have given us. Let us read, mark, learn, and inwardly digest it, and meantime let us hear from others. A Missourian comes to propose a couple of questions, answers to which have a close bearing upon the general question:

Some time ago you suggested that a talk on love might be helpful; I wish to start the subject by asking some questions of those who have had experience:

1. What do you think of love at first sight? Is such true love or is love the result of courtship between like-minded people?
2. How can you tell when one is truly in love?

That second question is something of a poser, but even if we cannot answer it explicitly and satisfactorily we may be able to throw some light upon it—I trust the friends will at least make the attempt.

A curious contribution to the discussion regarding dancing lies before me. I have hesitated about laying it before the circle, but have finally decided that verses from the Bible can do no harm even when quoted irrelevantly:

In reference to dancing, as it is carried on today, I consider that the good way to spend the time in dancing would be to instruct each other in the way of righteousness; of our duty to God and to our fellows.

Thus saith the Scripture: "Fear God and keep his commandments, for this is the whole duty of man." "For God shall bring every work into judgment, with every secret thing whether it be good or whether it be evil."

"For ye are bought with a price, therefore glorify God in your body, and in your spirit which is His."

"God is a spirit and they that worship Him must worship Him in spirit and in truth."

"Finally, brethren whatsoever things are true, whatsoever things are honest, whatsoever things are pure, whatsoever things are lovely, whatsoever things are of good report, if there be any virtue and if there be any praise think on these things."

"Is it pleasure of sin for a season?"

"Our pleasure the glorified share."

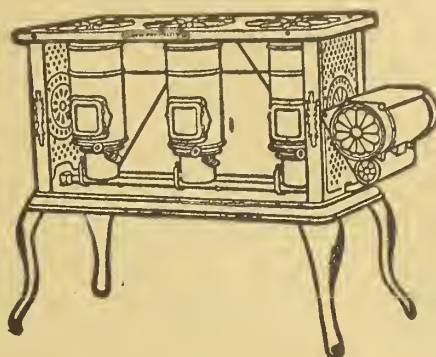

At our next meeting we shall have replies, two at least, in answer to the question: "Should a girl give her mother her confidence with regard to her correspondence and her men friends?"

collar are a variety of new fancies that in a way take the place of the long-favored, (and still favored) "tab." In looking over a line of these that make up a fresh display I noted some simple little things that are easily copied and I think a little thought will enable the home needle-worker to fashion some for herself from a description. To begin with there were a number of turn-overs that were joined to a band shaped after the ordinary hand collar. The turn-overs were of the embroidered kind described at some length in this column some time since. They were intended to close at the back, fastened to the band portion at the front beneath the turn-over were fan-pleated pieces made of very sheer lawn, or of wash silk. These pieces vary in shape, and are trimmed on the edges and some have insertions to correspond, of either lace or very fine embroidery. On one two pieces having very fine pleats in the center of each, were used together, and in length that was half the depth of the waist front. These pleats are drawn closely at the top where they are joined to the collar, but are spread at the bottom in fan shape. Another pleated fancy was made in a shape almost like a fancy handkerchief cut diagonally. Then the bias edge is placed under the edge of the turn-over after it is arranged in a cluster of tiny pleats all turning toward the center. Insertion and edging are on all the outer edges, and on some there was a strip of insertion set in the center and reaching nearly to the point that will be directly at the front. I should have said that when you have your half-handkerchief shaped piece fold it through the middle and cut off the corners having a bias edge. Then you have four edges to trim. I think you will get the idea, and can make these at a trifle of expense compared with the "stors" prices.

be "1st out" when laundered, and the piece ironed flat like a handkerchief.

The fancy blouse 5625 is quite novel in design as well as in finish. It is suitable for

[5625 Fancy yoke blouse, 32 to 40 bust measure.]

any of the materials and as either a separate waist or a suit garment. This yoke is pointed at the back and has an extension at front that reaches the waist line. The novel

sleeves are developed on corresponding lines. Frills of the material finish all the edges. But bandings, pipings or embroidery may be used instead. An exceedingly stylish finish may be given by embroidery done in a design on yoke and extension and on the plain portion of the sleeve and cuff. The pattern provides for a fitted lining, but if the material is of the washable kind this is preferably omitted. The waist closes at the center back, as do very many of the season's waists. Pattern 5625 is cut in sizes for a 32, 34, 36, 38, and 40 inch bust measure.

The sailor blouse suit illustrated in 5632 is still the favorite for the smaller boys, and favor is about equally divided between the fitted knee pants and the knickerbockers.

## How

many Farmers or Farmers' Wives ever think of Taking Their Ease in

## Comfort Free?

At noontime—or when you've done your hard day's work you'll appreciate the kind of easy, restful comfort you can get from just throwing yourself down in a *Comfort Swing Chair*—like this. Fits your tired muscles—Rests your mind and body all over. Makes you "free of care" while you sit in it. Think of it—

**Send No Money—But Just Write a Postal Card**

to us today. We'll send you interesting illustrated "Guide to Country Comfort"—Free. Tell you how easily you can get and try one of these strong, comfortable, chairs. Guaranteed durable and to please you—delivered freight paid to you. Why not in this way for once in your life—have something that will always make you "feel so good"?—Then write today

### The International Sunday-School Lesson.

Second Quarter. Lesson V. Genesis XXI, 38-49. May 5, 1907.

Joseph The Wise Ruler in Egypt.

The transition from winter to spring seems sudden. In the briefest possible time the whole bosom of nature will be garlanded with green. But the conditions which make this lovely phenomenon possible have been slowly forming in nature's secret laboratory. Could we peer into the mystic fountains whence the crude sap and the nutritious juices have been rising for weeks past, we should not say that spring had a sudden coming.

From prison-cell to throne-room is a startling, abrupt transition. But really Joseph had paved every step of the way, and it had taken him thirteen years to do it. He had gotten the honey out of the eater by submitting to chastening providences. He worked out his own salvation with fear and trembling. At the same time, God was working through him those beneficent purposes which have always been His pleasure. He intended to bless Joseph and make him a blessing. And Joseph, by his patience, industry, and piety, put himself in the way of getting and being a blessing.

Joseph's experiences were trying in the extreme: To be torn away from home and kindred; just when he thought himself a prince, to find himself a slave; after ten years of faithful service, to suddenly and most unjustly lose the confidence of his mastery; to stand charged with an odious crime, with no chance of proving innocence. It looked to Joseph as if he had traveled the wide circle of sorrow to find himself in the pit once more from which there was the least possible likelihood of his ever being liberated. "Leave all hope behind, who enter here," might well be inscribed on a demijohn dungeon of Egypt. David says they hurt Joseph's feet with fetters, and laid him in iron. And Stephen joins Amos in speaking pathetically of the "afflictions of Joseph."

How the tempter must have glibed him! "A pretty fulfillment this, of all his brilliant dreams!" It was enough to make heart and flesh fail. The average man would have given up to inanity—

## Examine Fence Carefully

before you buy it and see whether the stays are made of *whole wire* or *short pieces*. It makes a big difference in the strength of the fence and as the *whole wire* fence costs you no more, and is fully twice as strong, why buy the other? Our stay wire is continuous—one piece running continuously up and down across the fence without an end for many rods. Thus we preserve and utilize *all* the strength and service there is in the wire, fully half of which is wasted in cut stay fences—sacrificed to convenience and speed in manufacture. Our method of weaving is a little slower and costs us a trifle more, but it's worth while—it's the only correct way of weaving a fence.

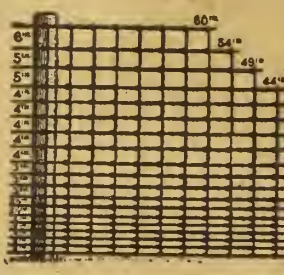

**30 days approval.** But why argue and hesitate? Let us ship you what fence, etc. you need on 30 days approval. We want you to examine and test it. We want to show you the difference between ours—the best made fence on earth, and the other fences that are being offered to you. During the 30 days you can test it thoroughly. You can put up a part of it or all of it and turn your stock against it. Give it any kind of a test you wish. After examining it and comparing its construction with others we will gladly let you be the judge. If you don't like it, send the whole business back and it won't cost you a cent as we will pay freight both ways and refund every cent you paid. 17 years experience with this kind of fence gives us the confidence to make this offer.

**We prepay freight** to any steam railroad station in the United States on 40 rods or more and guarantee the safe delivery of your shipment. Our free Fence Book tells all about Advance Fence. Let us send it to you with freight paid prices on our line.

## Advance Fence Co.,

dress all orders to Sylvia Silverthorne, Muscatine, Iowa.

## The Iowa Gate - FOR THE FARM -

**By sliding this ring back the largest hogs may pass under**

**AND** have the run of two lots. Or raise your gate to drive hogs through, then your larger stock cannot get out.

**RAISING THE GATE** is simple enough but very handy your gate swings on uneven ground or when the outer end drags.

**IOWA** gates will raise up for winter use—are not bothered by wind, rot, or fire. Are easy for women to handle but strong enough for any stock.

**CHEAPER THAN WOODEN GATES** and will outlast a dozen. Write today for our circular.

**IOWA GATE CO.** 9TH ST.  
CEDAR FALLS, IOWA

## Ornamental Fence

Superior to wood—for lawns, churches and cemeteries—also heavy steel picket fence—sold direct to consumer. Catalogue Free.

**WARD FENCE CO.,** Box D, MARION, IND.

would have become a spiritless drudge. But Joseph was quite more than an average man. His fortitude and faith shine brightly against the dark background of Egyptian slavery and imprisonment.

The young Hebrew made the very best of his circumstances. He acquired the language, observed the manners and customs, detected the defects in public administration as no native would have been apt to have done. He managed the considerable estates of Potiphar with such fidelity as to prepare him to administer well the vast empire of Pharaoh. And when his environment narrowed down to prison walls, he availed himself of his enforced seclusion to reflect upon what he had observed. He kept himself unpolluted by the vices incident to prison life. Like a swan, he sailed down the corridors reeking with moral filth, and kept himself unswayed.

Wherefore God highly exalted him, and gave him a name above every name of his age. We say God did it; and we have just said Joseph did it. Paradoxical, but true! There is no clearer example of the co-operation of the Divine and human. Joseph worked and God worked. The result was, the prisoner was metamorphosed into the prince.

**Analysis and Key.**

1. Exaltation of Joseph. Sudden in appearance only. Thirteen years of preparation.
2. Joseph's bitter experiences. Exile. Slavery. Charged with crime. Imprisonment.
3. Joseph's fortitude and faith. Reflection in seclusion.
4. From prison to palace. Prisoner turned into prince.

**The Teacher's Lantern.**

A veritable revelation Egypt was to the alert mind of Joseph. Imagine his first sight of a pyramid. To his wondering eye it must have appeared like a shepherd's tent of Canaan, grown to colossal size, and petrified, with the antiquity of two thousand years already

upon it. What has been aptly called the "reserved grandeur" of the Nile-land architecture must have left its lasting impression upon the shepherd lad. The weird and manifold idealization of animal forms must have excited curiosity, followed by reflection.

More musical instruments than he had ever dreamed of sounded upon the erect ears of the young captive—the harp, lyre, guitar, flute, single and double pipe, tambourine, cymbal, and drum. He saw more industrial arts plying than he knew were in existence—the making of pottery and glassware and metal vessels, arms, and domestic implements, and the weaving of such linen as the modern loom can not match.

Egypt was to Joseph a school-room crowded with object-lessons. He was getting all the advantage of foreign travel and residence. He was coming in contact with one of the eldest and best civilizations of earth. He was reading its literature, studying its laws, observing its customs. That was what Providence sent him to Egypt for.

By contrast he could see the superiority of his ancestral faith. Even if he

had no Scripture, the substance transmitted to him orally shone resplendent in comparison to the religion of that land—the spirituality of Jehovah as compared with the gross materiality of Ra, the hawk-headed man. If he read the Egyptian Bible, the Funeral Ritual or Book of the Dead, he found it, as one affirms, a marvel of confusion and poverty of thought. The very sum and substance of their religion consisted in charm and incantation. An ostentatious disposition of his remains, a big funeral, was the chief thing an Egyptian was taught to live for. How sharp the contrast between that and the command which epitomized the practical religion of the patriarchs: "Walk before me, and be thou perfect."

All that Joseph and his kindred and their descendants saw in Egypt tended to root and ground them in their faith. That was the very object of their transplanting from the hills of Canaan to the Nile Valley.

Dreamed in, dreamed out of prison, Joseph was. The narration of his dreams prophetic of his preferment was the immediate cause of his hard lot. His successful interpretation of Pharaoh's dream was the means of his deliverance. The wonder is that he had not lost confidence in dreams entirely. Thirteen years of servitude were not enough to shake his dauntless faith. Dreams cut no figure in religion nowadays, however. We have a more sure word of prophecy.

As through the thinnest possible veil, so through the tissue of this artless narrative one sees Jesus. Joseph is his type in humiliation, suffering, exaltation. The astonishing agreement has already been shown at several points. At length Joseph was exalted to be a prince and a savior. They actually ran before his chariot, crying, "Savior!" "Savior!" He filled the granaries for famine-stricken Egypt. But Jesus filled the inexhaustible storehouse of mercy with bread of life for a famine-stricken race.

#### INTERSTATE FAIR, SIOUX CITY, SEPTEMBER 7-14.

The premium list and announcement of the live stock fair at Sioux City, Iowa, has been received. Past success has been so gratifying to the management that in planning for this, the fifth successive fair, more premium money and greater and more splendid attractions than ever have been secured. This year the fair will open Saturday and will continue until Saturday the coming week. The second day, Sunday, will be devoted to a sacred concert and on Monday affairs will be in full swing. The attractions during the days following will be Dan Patch, Cresceus and a daily air ship flight. Twenty-four thousand dollars has been provided for speed. Live stock premiums are sufficient to insure a grand collection of all the breeds. A larger machinery exhibit is promised; in fact all departments will be greatly improved which will give to this fair an importance that should command generous public patronage from visitors and exhibitors. The premium list will be sent to anyone writing to Mr. F. L. Wirick, secretary, Sioux City, Iowa.

## OUR SHEEP DEPARTMENT

THIS department is edited by a gentleman who has long made the management of sheep a special study. He will be pleased to answer, in this department, all questions of general interest relating to the care of the flock and other kindred topics. Address inquiries, communications, etc., in relation to sheep to this office.

#### FENCING FOR SHEEP.

Without doubt, a factor largely influential in the past in limiting the number of sheep in the corn belt has been the matter of fences. This is the time of year that many new fences are being put in, or old ones repaired; and we wish to suggest the practicability of putting in tight fences. Good fences are essential in every well ordered farm, and why not have them hog and sheep tight?

The use of thirty-two inch woven wire with three barb wires additional makes one of the most desirable fences for all classes of live stock. The cost of such a fence above that of the ordinary four-wire fence is quickly estimated, being variously from sixteen to eighteen dollars per eighty rods, according to the time the woven wire is purchased. From sixty to seventy dollars will pay the added cost for a mile, or around forty acres, and we dare say that there are few farmers who have not within a few years past, lost in some one year fifty to seventy-five dollars worth of grain, because of down grain in a poorly fenced field. Sheep will utilize such opportunities to the best advantage and bring the loss down to the minimum.

There are, however, many other ways in which the extra fencing will be paid for. The weeds destroyed in a year by fifty sheep will effect the entire cost of the fence, by converting the weeds into salable mutton. There is scarcely any weed that sheep will not destroy though there are four or five weeds distasteful to them. The run of the corn fields for a month or six weeks following silking by a carload of sheep will make the farmer money at both ends, by destroying weeds and making good mutton. Another item worthy of notice is the husking of the corn in a field free from weeds. All these are not great things in themselves, but are important enough to demand attention. If the farmer has arranged so he can take advantage of them, he will be the gainer.

#### PLENTY OF PURE WATER FOR THE FLOCK

A great many people have the idea that sheep do not drink water in the winter time. The reason for this mistaken notion is probably based on the fact that sheep drink less water than any other farm stock. The fact is that in winter sheep will seldom be seen drinking water if the supply is not good, and if there is snow on the ground for them to eat. Just why sheep do not drink as much water as other farm stock we do not know. Nevertheless it is the experience of sheepmen. Sheep are the most particular of all animals regarding the cleanliness of the food which they eat. We have seen them go without water for weeks rather than to drink out of a foul tank or even out of pails that had been tainted with slops. There is absolutely no use in trying to water them in this way. The least dirt or litter in the water will cause them to turn away from it and probably go without it rather than to drink.

Where there is a system of water works on the farm there should be several drinking places provided with floats in them and they should be sufficiently protected to prevent litter and dirt getting into them. Where it is necessary to pump the water by hand and the flock is small it is a good plan to carry the water to them in pails which are used exclusively for that purpose. As soon as they have finished drinking the pails may be hung-up, and in this way one will never be troubled with having to chop ice out of the buckets.

Work of caring for the flock is so light that there is no reason why one cannot afford to be just a little bit careful about these small but very important things.

#### What Breed of Sheep for Wet Land?

To the Editor of The Homestead:  
A subscriber at Royal, Iowa, sends the following inquiry:

For wet land which breed of sheep is the most profitable, Shropshire, Hampshire, or Oxford? I do not refer to swamp land, but rather to land that is level and produces long grass.

Before answering this question directly we would say that land at all in-

Painting with Pure White Lead does not necessarily mean painting white. Any color may be added to Pure White Lead, producing any desired shade of color.

The standing of Pure White Lead Paint is attested by the fact that every other paint pigment is sold either mixed with Pure White Lead, or fraudulently labeled as Pure White Lead, or as a composition of unknown ingredients claimed to be "good as Pure White Lead," "better than Pure White Lead," etc.

For fast-color paint use properly tinted Pure White Lead.

The Dutch Boy trade mark shown below is a positive guaranty of genuine, unadulterated White Lead made by the Old Dutch Process; look for it on the side of the keg.

#### Send for Book

"A Talk on Paint," which gives valuable information on the paint subject. Sent free upon request.

#### NATIONAL LEAD COMPANY

In whichever of the following cities is nearest you:  
New York, Boston, Buffalo, Cleveland, Cincinnati,  
Chicago, St. Louis, Philadelphia (John T. Lewis & Bros. Co.), Pittsburgh (National Lead & Oil Co.)

clined to be wet is not desirable for a sheep pasture; that is, it should never be used as a permanent pasture for sheep, though it could well serve as a change for the flock during the drier seasons. If it is to be used very much as a sheep pasture we would advise draining thoroughly. Flat, damp lands are undesirable as sheep pastures, because parasites infecting sheep thrive too well in such places. Also, there is more or less danger of foot-rot, though the question of parasites is the greater one.

Coming now directly to the question, we would consider either the Hampshire or Oxford in preference to the Shropshire for such conditions. Feeding on the long, rank, luxuriant grass, the Shropshire is apt to become coarse and depart from the breed type. The Oxford would probably be the best breed of the three, as they are a large breed and more accustomed to such conditions. Hampshires should do nearly as well, though, as the Oxfords, and there is a point also in favor of the Hampshires now, which is that there is a strong demand for Hampshires at this time, or, rather, indications of considerable popularity for some time. Taking this into consideration, we believe that Hampshires and Oxfords would prove about equally profitable under the given circumstances, individual tastes making the deciding factor.

We have answered this question as applying to pure-bred sheep. If, however, only high-grade cws of either of the breeds are kept, pure-bred lambs used and the lambs simply raised for market, there would be little choice in the matter, more depending on individual tastes. Any one of the three should do well, if rightly handled.

Story county, Iowa. Ellis Rail.

#### Construction of a Lamb Creep.

To the Editor of The Homestead:

The construction of a creep suitable for feeding lambs is in itself a very simple affair, and if only intended for present use may be very cheaply made. Use something substantial for the four

corner posts, 2x4's will be all right, while the side and end rails to which the uprights are to be nailed should also be substantial enough to make the creep stable. For the top rails 1x6-inch boards will do nicely and four-inch stuff will be strong enough at the bottom. For the uprights any light stuff will do. In lieu of other material, barrel staves will be desirable, though an old sheep trying to get through may break a weak barrel stave.

As to dimensions, two and a half feet will be high enough. Cut the corner uprights this length. The width should be at least six feet at the bottom. The sides may be upright and slope toward each other at the top. The uprights should be placed such a distance apart that lambs several weeks old may pass through easily, but not old sheep. Round the edges of the uprights to prevent pulling the side wool. In England where the creeps are well made the side rails are heavier and the uprights are put in as rollers.

Place the creep where the lambs may have free access to it. Place a low trough in it and keep in the trough a supply of suitable food, such as bran, oats, a little oil meal and after a few weeks, cracked corn. Always clean out the trough daily and supply fresh feed. Nothing will give better returns with lambs so handled that are to go to market in June and July, while for any lambs it is well worth while.

Subscriber.

#### HE GUARANTEES A CURE.

Mr. Ben F. Fout, of London, Ohio, says: "I cured five head of my own horses with Dr. Knoblauch's Internal Fistula Cure. I can guarantee your medicine to be all right." See advertisement of Messrs. Clouse & Stamm, of Geneseo, Ill., on page 21.

#### BARGAINS IN FARM LANDS.

If you want to learn about exceptionally rare bargains in South Dakota farm lands or unusual business opportunities in the new towns in the magnificent new country being opened up by the Minneapolis & St. Louis R. R. extension write for beautifully illustrated descriptive pamphlet on the "New Empire," the farmer's and stockman's paradise. This pamphlet will be mailed free. A postal card will do it. Write at once before edition is exhausted, to A. B. Cutts, G. P. & T. A., Minneapolis, Minn.

## ADDITIONAL FIELD NOTES.

## A VALUABLE CATALOG.

One of the most valuable catalogs which has come to the desk of the writer, a representative of The Homestead, is that of the J. E. Porter Co., of Ottawa, Ill. This firm are well known manufacturers of the "Meadow King" Hay Carriers, used for many years by the most successful farmers. One of the principal reasons why "Meadow King" Hay Carriers give such universal satisfaction is their simplicity. With each succeeding year this company has made improvements in their machinery, so that the improvements made during the past season have been of such a nature that it will pay any farmer to send for the new catalog just issued by this company. Many valuable suggestions are found in this catalog and the large number of illustrations will be of much benefit to all who are interested. Good goods are appreciated and that is the reason this firm have each year increased their business. We are pleased to call the attention of our readers to the catalog just issued by the J. E. Porter Co. and are sure that many valuable suggestions and much help will be received by those who write for this catalog at once, kindly mentioning The Homestead.

## JONES' NATIONAL SCHOOL OF AUCTIONEERING.

We take pleasure in calling the attention of our readers to the Jones' National School of Auctioneering the advertisement of which appears on page 26 of this issue. Col. Carey M. Jones is the president of this school and gives it his personal attention. He has surrounded himself with a very able corps of assistants, each one a success in his particular line of work. This school offers to the young man an unexcelled opportunity to become a successful auctioneer. No business of today is as profitable as the auction business and the increasing demand throughout the entire country for auctioneers has more than exceeded the supply. The auction sales every day in the week at the Union Stock Yards in Chicago afford the students of this school an opportunity to observe the most successful sales. No other auction school offers students such advantages as does this school along these lines. Graduates of Jones' National School of Auctioneering are conducting successful sales throughout the entire country. The following letter from Col. John R. Bradshaw, of Blue Mound, Ill., is one of the many received from those who have attended this school: "Jones' school met my highest expectation, and I consider my time

and money well spent by attending the past term. The methods of teaching are very thorough and the instructors equally proficient in their various works. I highly commend your school to those wishing to enter the auctioneering work, fully realizing that the average practicing auctioneer would be much benefited and more successful in attending your school. I believe that your school will satisfy the long-felt want of the public for an institution of the kind, and that it will serve as a bright star, brightening with its radiant rays the darkness that has so long prevailed with those wishing to enter the auctioneering field. In the future auctioneers of the country at large will consider you, through your institution, their benefactor, and the profession will be greatly elevated." Write for catalog at once, as the next term will open soon, and kindly mention The Homestead.

## A WELL BALANCED EDUCATION.

Drake University, Des Moines, Iowa, offers to the young man or woman opportunities for an education that are drawing bright young people to its classrooms from all over the central West. The fact that in the present enrollment of the school thirty states are represented and the average yearly attendance approximates 1,700 students is sufficient proof of this statement to warrant it. Iowa furnishes a large number from farm and city alike. Every county is represented in the state by one or more young people. This year Drake University will graduate 230 students from its different courses. Some of these will continue their education in higher schools, but no doubt the majority will at once accept the many attractive propositions offered by the world of business. Those who are thinking of taking up work in a college this fall should investigate the courses of instruction offered at this school. On this page will be found a list of the various departments. An announcement of each will be mailed to any of our readers on request if they mention this paper. Address Drake University, Des Moines, Iowa.

## MRS. C. S. CROSS' HEREFORD DISPERSION.

The dispersion of the Fair Acres herd of Herefords, owned by Mrs. C. S. Cross, of Emporia, Kan., on May 15th, is one of the events in Hereford circles that is of such importance that it should attract from a large territory. Through the entire herd the blood of some of the most noted bulls of the breed is represented and the rare judgment Mrs. Cross has shown in the use of good herd bulls on the best females produced at Fair Acres has brought her herd to a point of excellence such as is reached by only a few. Mrs. Cross has never tolerated any drones in the herd and all shy breeders or poor producers have found their way to the shambles. It is in dispersion sales of this kind that buyers may buy with every confidence that they are getting their money's worth and cattle that will continue to do for them as they have done for their past owners. In Mrs. Cross' dispersion of seventy head, about twenty will be found descendants of Dew Drop 3d and Fairy, both daughters of Albion. They are such a lot as will please the more critical buyers. Daughters of Wild

LOCATION IN  
THE CAPITAL  
CITY OF IOWA

## DRAKE UNIVERSITY Normal School

A  
Well Equipped  
Training School  
FOR TEACHERS

LARGE FACULTY OF TRAINED TEACHERS  
EXCELLENT LIBRARY FACILITIES

**The School of Education** offers a course requiring two years for its completion after full preparatory work has been done. All the work required gives full credit in the College of Liberal Arts making graduates eligible to Junior standing in any college of the State of Iowa.

**The Primary Training School** offers a course that requires the full time of the student for two years. The review in the common branches and along educational lines has been strengthened by college work in English and the sciences.

**The Kindergarten Training School** The University maintains one of the highest grade Kindergarten Training schools in this country. Its graduates justly rank high. The demand for trained Kindergartners is increasing each year.

**The Music Supervisor's Training School** aims to prepare competent and painstaking music supervisors to supply the demand for that class of teachers in our public schools.

**The Training School for Drawing Supervisors** has been established to meet the demand for a course preparing the student to teach drawing in the public schools.

**The Oratory and Physical Culture School** offers thorough courses in reading and physical culture, and its graduates are well prepared to teach those subjects.

**The Academy** has for its distinctive work the preparation of students for the various colleges of the University.

Send for announcement of the Department in which you are interested.

Address, **DRAKE UNIVERSITY, Des Moines, Iowa.**

## Drake University Summer School OPENS JUNE 14-17 1907

Departments:—Collegiate, Normal, Music, Academic, Primary Training, Kindergarten Training, Grades, Oratory, Business. The best possible provision for instruction of teachers in all subjects for certificates of any grade, for credits looking toward advanced standing and in general and special professional lines.

Model classes in Kindergarten, and Primary Grades, including Third. Elementary School in which children of any age or grade below the high school will be taught.

Pleasant location in Iowa's Capital City, Provision for those who wish to begin work at any time after May 10th, making it possible to get three months instruction in certain lines.

Graduating classes at the close of each summer term. The only school in the West in which the entire faculty is selected, and the whole organization planned for the exclusive benefit of the Summer School student body.

The faculty of 1907 has been selected with greatest care, and the success of the work is therefore assured. Tuition low when excellence of work is considered. Living expenses lower than elsewhere for like accommodations. Announcements now ready. Reduced rates on all railroads.

**Direct from Mills to you we pay the freight**

**BEACON-ITE LONG LIFE ROOFING**

Shingle roofs will rot and are liable to burn; tin and iron roofs will rust. There is only one roofing that will resist rain, wind, snow or sparks from burning buildings and never rot, rust or burn—BEACON-ITE LONG LIFE ROOFING.

It is a long wool fibre that has been thoroughly saturated in a solution, by a damp-proof process that makes it absolutely water-tight. BEACON-ITE is the only roofing that you can buy direct from the mills, thereby saving the jobber's and dealer's profit. Then again, you can put it on yourself (we furnish all necessary cement and nails free) thereby saving the expense of hiring a roofer.

If you are interested in a roofing that will cost you about one-half the price of tin or shingles and will outlast either many years, we want to send you our "Roofing Literature" and FREE samples of BEACON-ITE. Write for them to-day.

**BEACON-ITE MILLS, DEPT. 4, St. Louis.**

## RECEIVED OVER FIFTY INQUIRIES FOR LAND.

SATISFACTORY RESULT FROM A KANSAS ADVERTISER'S ANNOUNCEMENT IN THE HOMESTEAD.

Mr. J. E. Seaton, of Vernon, Kan., writing under date of April 26th, regarding the land advertisement which he had inserted in The Homestead, says:

"I received some fifty odd inquiries from my last advertisement of four issues with you and made a very satisfactory exchange for a farm in Clay County, Iowa, through same."

Tom will be found among the attractions in cows. The younger females, two-year-olds and yearlings, are by Tranquility, a son of Beau Brummel. Some extremely desirable things are found here. The cows of breeding

age are in calf to the coming two-year-old herd bull, Christy, one of the most promising bulls to pass through a sale ring this year. Christy was got by Keep On 2d and out of a Lord Saxon-Wild Tom dam. A strong show could be made with this bull if he is properly carried on for the fall shows. The younger bulls that go in the sale will afford

### SOME GREAT FARM BARGAINS.

J. H. Dumont & Son, of Omaha, Neb., are offering the following exceptional bargains in farms: 440 acres mostly virgin soil, with timbered shelter for stock; living water, in western Iowa at \$65 per acre; 320 acres, twenty miles north of Omaha with fine shelter for stock and complete hog feeding plant, including water system at \$60; 360 acres twenty-five miles from Omaha in the southwestern part of Washington county, which is especially adapted to grain and stock raising, at \$80; quarter section of pasture and hay land near Lincoln at \$42; 680 acres, two and one-half miles from Beatrice, partly seeded to alfalfa, fine stock feeding plant, good shelter, 250 acres in cultivation at \$60. Will furnish tenant for the Beatrice farm who will rent for a term of years and pay as rent \$2,000 per year and all taxes rent. These properties are all owned by banks or individuals who have special reasons for selling and have authorized them to close them out at bargain prices. These properties must be sold within the next thirty days and they are being offered away below their value. See advertisement on page 19 and write Messrs. Dumont & Sons at once. Kindly mention The Homestead when writing.

### HERDS IN GRUNDY CO., MISSOURI.

Around Trenton are located a number of enterprising and ambitious breeders of pure bred stock and recently a representative of this paper visited Mr. H. C. Campbell, near that place and found a good working herd of Short-horns in the meadows, at present there

**ONE MAN MADE \$10,000 ON HALF AN ACRE** of ground, growing Ginseng. Another is making hundreds of dollars per year growing Mushrooms in an ordinary cellar. Others are making big money growing Golden Seal and other medicinal plants, of which the wild supply is fast becoming extinct and prices rapidly advancing. **YOU CAN DO THE SAME.** Our new monthly magazine, **PROFITABLE HOME INDUSTRIES**, tells you all about it; full details; letters from successful people. If you want to make money, write us today. Price \$1.00 per year, 3 months trial 25 cents, sample copy 10 cents. Address, **PROFITABLE HOME INDUSTRIES, 270 Thompson Bldg., Scranton, Pa.**

Is no sale stock, as the eligible stock for such purposes has been in good demand at this farm. Another Short-horn breeder visited was Mr. J. R. Skinner, who has collected some very well bred individuals. An Angus breeder in the same vicinity who is doing well is Mr. P. C. McDonald. He has been showing some and will have something at the leading shows again this year. His prospects are good for getting some nice ribbons. Over in Iowa, at Corydon, Mr. W. E. Cutler was found preparing for his coming sale of Short-horns, June 8th. This will be a sale of good stock and it should profit new breeders especially to be on hand. Within a short drive of Corydon is situated Mr. Nelson King and Mr. I. G. Davis. Both of these gentlemen consigned some first class Short-horns to the combination sale held at Corydon last fall. At the head of Mr. King's herd is Scotch Archer, a good bull throughout, carrying a strong infusion of Scotch blood. A young bull is for sale here. Stock is healthy and going on to grass in fair condition generally.

### Many Orders for Eggs.

Mr. E. B. Sinn, of Brighton, Iowa, who advertises Rose Comb Brown Leghorns in our department of classified advertising, writes under date of April 26th, as follows: "My little advertisement in your classified columns is bringing me lots of orders for eggs. Enclosed please find cash to continue it."

### Destruction of Chickens By Rats.

To the Editor of The Homestead:

In reply to your inquiry about the amount of damage that is annually done on the average farm by rats, I will say that last year these pests destroyed 200 young Barred Rock chickens for us. These, when mature, would have been worth at least thirty-five to forty cents each, so you can see that our loss runs from \$70 to \$80. In addition to this destruction, I feel sure that ten bushels of grain worth forty cents a bushel were consumed. I for one would like to get hold of some easy and effective way to destroy these pests.

John Portwood.  
Fillmore county, Neb.

**The GALLOWAY Cream Separator**

**50% SAVED**

**Direct From My Factory to Your Farm. Get My Prices Before You Buy. Get My Catalog.**

I have been told there are a lot of farmers who would own a cream separator if they could get one at a reasonable price.

I am looking for those farmers.

I will give any farmer that chance and take all the risk of my separator pleasing him.

I'll send it out on my free trial plan and am going to give the first farmer in every section who buys my separator a chance to take advantage of my new and very successful proposition which will help him pay for his machine. Requires no work and only a few minutes' time.

Write me for my booklet and proposition before you think of buying of any other manufacturer. Remember you get my very low prices and my \$25,000.00 bond at the same time.

**I Want One Million Farmers To Get My SPECIAL PROPOSITION**

When it comes to the machine the Galloway has all the good points you will find in any separator made, and a lot of its own besides. Prove this for yourself. Let me send you my separator on a ten days' trial on my free trial plan. My special proposition and free trial plan make you the most liberal offer possible. I hope you will appreciate this to you. My catalog will give you my selling plan in full and a complete description of the separator. It will say something besides telling you the Galloway is the closest skimmer and easiest operated machine made. They all claim that. I'll go ahead and prove it and I'll also let you prove this for yourself. Remember that always. You are to be the final judge of the Galloway. It won't cost you a cent, if the machine isn't all I claim for it. It's so simple in construction, so well made and adjustable that you'll think as I do that you ought to have one. Now, of course, when it comes to telling you all about my separator which I am selling direct to you, I must ask you to send for my catalog. It will give you all you want to know. My catalog is my only salesman and one that will save you a lot of money. Send for it. Just drop me a postal and say, "Please send me your booklet and your special proposition by return mail."

**William Galloway, Pres. The William Galloway Company, 103 Jefferson St., Waterloo, Iowa.**

**Ten Days' Free Trial**

**Send for this Booklet**

# LANDS AND HOMES FOR SALE

## At Estevan, Saskatchewan "Rosy Promise Has Ripened Into Reality."

MEN of means may here invest surplus funds and watch dollars grow while they wait. Crops produce plenty profit. We provide renters if you wish, but you can prosper proportionately to come and sojourn among us. Renters cannot know, and pay in rents the price of homes and prosperity here. Our locality may not be the Cream of Creation, but a land of prosperity. Instead of watching our smoke at a distance, buy land, secure an Estevan snap and rejoice with us. Generous crops cause gentle smiles. At Estevan no adversity with sorrowful countenances. There is a reason why. Ask and we will explain more. Our Homeseekers' Guide and a weekly newspaper, published at Estevan, Sask., will be sent for a time (free of charge) for the asking. Each will bring to you much information of our locality. The land of profitable investment, of opportunity, of prosperity. Mention The Homestead.

THE NELS MIKKELSON LAND CO.,  
Pioneer Prosperity Promoters,  
Estevan, Sask., Canada

**California Alfalfa and Sugar Beet Land.**  
FERTILE, fertile alfalfa land, all under irrigation, in prosperous Butte County, adjoining the thriving city of Blggs. \$65 to \$110 per acre very easy terms. Five to six crops of alfalfa every season. Irrigation water, \$1.00 per acre a year. Close to schools and churches, two railroads, good roads, electric lights, etc. Not a wilderness but in the heart of a desirable community. Sugar beets on this land will pay big profits. Suitable also for peaches, grapes, figs, English walnuts and oranges. Farmers from the middle West settling this land rapidly. Now is the time to buy. Values are advancing. For a home or for profit, you cannot better it. Write for free booklet. Butte County Irrigated Land Co., Dept. 6, 1109 Post St., San Francisco, California.

## Farms Near Omaha Market

WHITE for particulars in regard to three grain and stock farms close to Omaha. 320 to 440 acres each, \$85, \$70 and \$80 per acre. Two belong to banks, owner of other one wants to move to Ohio. **For Sale Cheap** 200-acre Clayton Co., Ia., stock and dairy farm. Must sell during May. Inquire Box 146, Edgewood, Iowa.

## HOT WEATHER AHEAD.

Many a housewife is wondering how she will pass through the coming summer months with the stove she well knows will make the kitchen unbearably hot—to say nothing of the dirt, dust and ashes that will add to the discomfort. There is a way out of it all—a way that not only lessens the work and keeps the kitchen cool, but that also reduces fuel expense. This convenience, comfort and economy is all effected by the New Perfection wick blue flame oil cook stove, an oil stove so superior to other makes that it is fast replacing the coal and wood range, the old-fashioned oil stove, and in many cases the gas stove. The New Perfection gives a strong working flame at moment of lighting. "Blue flame" means the hottest and cleanest flame produced by any stove. The flame is always under immediate control and can be raised or lowered instantly. The convenience of this will be understood when it is considered that while the flame of one burner is boiling the kettle or roasting a large joint, that of another can be reduced to simmering point—in this way enabling the housewife to cook a variety of dishes at one time. On washing and ironing days the comfort and convenience of the New Perfection will be greatly appreciated. It gives heat results in the least time, and does away with all coal and wood carrying and the many other disagreeable jobs that have to be done with other stoves. The New Perfection is made in three sizes with one, two and three burners, and is warranted to give full satisfaction. Another home comfort is the Rayo Lamp, which produces a light of unusual brightness, yet soft and mellow—a light that will not hurt the eyes. The Rayo Lamp can be used in any room. It is highly ornamental and beautifully nicked. Every lamp is warranted. The New Perfection wick blue flame oil cook stove and the Rayo Lamp are two real essentials to home comfort. Their easy operation, absolute safety and handsome appearance commend them wherever stoves and lamps are used. Inquire at your local dealers. See page 15.

## Last Mountain Valley SASKATCHEWAN

affords the investor, as well as the settler, unparalleled opportunities to make their money earn more money. Good rainfall, rich soil, splendid water, abundant fuel for all purposes, make this an ideal district for location. Invest your money in

## Canadian : Wheat : Lands

Send 15c for our beautiful, new photographic souvenir, entitled "The lake and the Land of the Last Mountain Valley," which is not only a work of art, but a book of authentic information. With this Souvenir we also send the 20th Century Atlas of Canada. Maps, Descriptive Matter, etc., on request.

WM. PEARSON CO. Ltd.

307 Northern Bank Building, Winnipeg, Man.

## WESTERN CANADA PRAIRIE LANDS

Today WESTERN CANADA is a country of substantial homes, profitable farms, growing cities and villages; in all this magnificent country there is no land equal to that in the districts of The Famous Saskatchewan Valley, The Great Quill Lake Plains, The Goose Lake District, The Yorkton District. In these Districts we own and control Over 500,000 Acres from which you can make your own selections.

These lands will produce 30 to 50 Bushels of A No. 1 Hard Wheat to the Acre, in fact the actual average for the past few years has been more than double that of Minnesota the greatest wheat producing State in the Union. With wheat selling at present prices, it is not much of a mathematical problem for the farmer to figure the enormous profits to be made from this land that will produce more wheat and of higher grade than land costing five to ten times as much per acre.

History will repeat itself and these lands will in a few years be worth as much as they are today in Minnesota, Iowa and other States. The saying is "Opportunity Knocks But Once at every Man's Door." It is knocking at yours now. Will you take advantage of it? Send for Free Maps, descriptive matter, etc.

STEWART & MATHEWS CO., LTD., 187 Water St., WINNIPEG, CANADA, 305 Jackson St., ST. PAUL, MINN.

## WE HAVE A FARM FOR YOU

You can choose it from over 100,000 acres of the best land in the world,

You may be making money easy now but you can make it easier and quicker in

## Sunny Southern Alberta

Let us tell you how hundreds of American Farmers have grown rich in from three to five years in Alberta by making a double profit on their lands and crops.

Land in Alberta has just begun to advance. If you buy now you are sure to double your investment in the next two years, and you only have to pay a small portion of the money down. Your land will produce enormous crops to sell on good markets while its value is going up.

We will sell you a farm at a price to fit your pocketbook.

THE CANADIAN-AMERICAN LAND & INVESTMENT CO., LTD.  
Room 14 Burns Block, CALGARY, ALBERTA, CANADA.

Send today to THE DES MOINES DAILY NEWS, Des Moines, Iowa, for a trial subscription, enclosing 40 cents in stamps or money order, and receive the Daily without Sunday for three months.

#### Trustworthy Help.

Two hundred dollars pays the bill for one man's labor for the busy season on the average farm. The quality of the work returned from such an investment is variable. It may be first-class or it may be of such a nature that its mention brings to mind unpleasant reflections—of wasted time and unsatisfactory results. The day is at hand when the farmer cannot plan to have too much of his work done by machinery. The same amount of money invested in a reliable gasoline engine that is required to pay the cost of keeping one man for the busy season will save an endless amount of worry and do a surprising amount of work for the farmer. The Eli two cycle gasoline engine is a machine suited especially to farm usage. It

## IMPORTANCE OF GOOD HAY CARRIERS.

Large hay makers know the importance of a good carrier. It means the raising of large forkfuls, therefore, rapid unloading, the absence of stalling or dropping back on the wagon, absence of breakage, the delivery of hay just where it is wanted in the mow and all in the shortest possible time and with least annoyance and labor for the men and the team. This Loudon Junior Carrier runs on a steel track, but can be furnished for wood track as well. The carrier itself is especially strong. There is no danger of breakage. It does not matter at what angle the fork pulley enters the carrier. It does not affect the carrier or tend to spread the wheel arms, or pry the carrier from the track. The swinging fork pulley is round topped, and the carrier has a wide flaring mouth, into which the pulley goes unerringly. The fork pulley swings freely, even when supporting the load. This is an especially valuable feature where the mow is already well filled, or the hay has to be pulled over across beams and the like. The swinging pulley prevents any danger of breaking the carrier or pulley head. One of the best things about this carrier is the patent iron knot or swivel "S" into which the end of the rope is fastened. This lets out the kinks and twists in the rope, and does away with all the bother occasioned by kinky ropes. There are no springs to get out of order. The stops are positive, and the wheels, which are chilled, run on special axles. It has been the purpose of the Loudon people to perfect a carrier which would make hay unloading easier and faster. They have it in their Junior Carrier. They make a long and excellent line of "Perfect Barn Equipments." A catalog may be had on application, which will give all particulars. Mention this paper when you write. See page 4. Inquiries should be addressed to the Loudon Machinery Company, Fairfield, Iowa.

# Walking on Cushions

**IF YOU** had suffered long with corns, calloused places, aching, tired feet, and suddenly walked on cushions, how great would be your relief; but when you returned to the ordinary walks of life your pains would be with you still.

The ordinary shoe is stiff, hard and uncomfortable to the person so afflicted—and relief is hard to obtain. After many years of experiment and faithful tests by actual experience, we have succeeded in perfecting and producing

## Kirkendall's Cushion Soled Shoes.

These shoes provide instant relief, and more than often effect permanent cures from such torture. They are made on strictly scientific principles—made to conform to any shaped foot—made in all lasts, leathers, widths and sizes, and are a distinct revolution in the art of shoe manufacturing.

Those who have suffered for years with rheumatism have worn these shoes and experienced wonderful relief—often have been entirely cured. One can see the great benefit of always having the sole of the foot warm, dry, and at an absolutely even temperature. The feet, always being encased in shoes, are naturally tender, filled with thousands of sensitive little nerves and blood-vessels, and when suddenly chilled and kept damp and wet, it is easy to see how the entire system is effected. Wearing our Cushion Sole Shoes causes the jar of walking to be reduced, lessened and removed, and one avoids the irritated nerves and tired feet, especially when afflicted with foot troubles.

The popularity of Kirkendall's Cushion Sole Shoes is firmly established, and they are unhesitatingly recommended. Befriend your feet. Try a pair of these shoes, and be rid of your foot troubles.

If your dealer does not carry them, write us. We can then learn why, and at the same time advise you where you can get them.

**1101-1105 Harney St. F. P. KIRKENDALL & CO. OMAHA, NEB.**

### REMARKABLE FREE DIP OFFER.

We have published considerable information of late upon the subject of dips and dipping. We believe every farmer should become familiar with the great advantages this modern method of ridding stock of insect parasites, and treating and preventing animal diseases. We know of nothing that costs so little which produces so much good.

Now, that the season for dipping is at hand,

### IMPORTANCE OF GOOD HAY CARRIERS.

Large hay makers know the importance of a good carrier. It means the raising of large forkfuls, therefore, rapid unloading, the absence of stalling or dropping back on the wagon, absence of breakage, the delivery of hay just where it is wanted in the mow and all in the shortest possible time and with least annoyance and labor for the men and the team. This Loudon Junior Carrier runs on a steel track, but can be furnished for wood track as well. The carrier itself is especially strong. There is no danger of breakage. It does not matter at what angle the fork pulley enters the carrier. It does not affect the carrier or tend to spread the wheel arms, or pry the carrier from the track. The swinging fork pulley is round topped, and the carrier has a wide flaring mouth, into which the pulley goes unerringly. The fork pulley swings freely, even when supporting the load. This is an especially valuable feature where the mow is already well filled, or the hay has to be pulled over across beams and the like. The swinging pulley prevents any danger of breaking the carrier or pulley head. One of the best things about this carrier is the patent iron knot or swivel "S" into which the end of the rope is fastened. This lets out the kinks and twists in the rope, and does away with all the bother occasioned by kinky ropes. There are no springs to get out of order. The stops are positive, and the wheels, which are chilled, run on special axles. It has been the purpose of the Loudon people to perfect a carrier which would make hay unloading easier and faster. we wish to call your attention to one of the most remarkable dip offers ever put out by a manufacturer of this product. The Marshall Oil Company, Marshalltown, Iowa, who manufacture one of the best dips on the market, have an advertisement in this issue which every farmer who owns live stock should take advantage of. They offer to send to anyone who will fill out the small coupon in their advertisement, a five gallon can of Dipolene without asking a cent of pay in advance. They prepay the freight charges and give you permission to use it for thirty days, on any farm stock, for any disease in any way you choose. You can put it to the severest test imaginable, and if you find it is not satisfactory you can return it to them at their expense. There is no agreement to sign, no obligation upon your part to keep it if it is not satisfactory. It is an out and out straightforward offer, made solely to give every one who desires to test Dipolene an absolutely free opportunity to try it.

We urge our readers to send for this trial can. Remember, you are not obliged to keep it. You are not asked to pay a cent in advance. You are the judge in every respect. Turn to their advertisement on page 4.

Double berths in tourist sleeper \$1.00. For tickets and berth reservation, call at City Ticket Office, 512 Walnut St., or Union Station.

## VETERINARY MATTERS

PROFESSIONAL veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of \$1.00. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. All veterinary inquiries should be addressed to this office.

## SYMPTOMS AND TREATMENT.

## LAMENESS.

I bought a horse in January with an enlarged knee. Don't know what caused it. She has been worked hard—was used in a team. She was not lame when I bought her. Is there anything I can do for her?

Blistering may benefit the case as so often suggested here or have it punctured and blistered by a veterinarian. You will find prescription for blister in almost any issue of this paper.

## DOSE OF TUBERCULIN.

In testing for tuberculosis I notice the veterinarian injecting four c. c. government tuberculin, which I thought a rather high dose, as it represents double the amount usually given. Do you think it is too much and is it harmful to a healthy cow?

You should have asked the veterinarian and he might have told you why he was using the larger dose than ordinary. It is quite a common and perfectly correct practice to inject such a dose where a cow has previously reacted to tuberculin and is being retested, or where a cow appears to be in the last stages of tuberculosis and so is less likely to respond to the injection of the ordinary dose. The tuberculin in itself would not do the cow the slightest harm and would have no effect unless she were tuberculous. We are surprised you should imagine that a graduate veterinarian would

make the mistake of injecting a dose that would prove harmful to a healthy cow.

## WARTS ON HORSES.

I have a young horse that has a wart the size of a quarter of a dollar on the eye, also one on fore leg. How may these be removed?

If the warts have narrow necks tie a small string tightly around them and they soon will fall off. Then cauterize the base with lunar caustic. If the warts have wide bases, saturate them once daily with glacial acetic acid applied drop by drop.

## BARREN MARE.

I have a black Belgian mare coming four years old, weighing 1,850 pounds, that don't come in season. Last year I fed her asafetida, which the veterinarian prescribed. She came in then, but would not come in only about once a month and would make bag and milky substance would drop from her teats for a day or so. She is a fine mare and I would like to get her started to breeding.

Give her an injection of yeast mixture once a week according to directions so often given here. A mare should not come in season more than once a month. It would be well to open the mouth of the womb before giving the first injection.

## SWELLING.

I have a valuable gelding which was kicked on the right hock joint on the outside about six weeks ago. After being kicked joint swelled some, but soon got better. One day he got loose and ran about two or three miles. Joint then swelled more than ever. He seems to lie on it quite often. Leg is swelled to hoof. He is not lame. He gets a light feed of ear corn twice per day, and plenty of oats straw. Some say not to touch it, while others say to blister it. Should he be used in hauling?

Do not blister, but after removing hair rub in a little mercurial ointment each other day and allow plenty of out-door exercise, but do not use him for hauling. He should have a large box stall when in stable.

## CHOREA OR ST. VITUS DANCE.

I have a fine mare coming four years old this spring. She seems a little crampy in the hind legs and when she stands she places her right front foot ahead. Please advise me what to do, also state cause. Would it be best to give her only light work or turn her out on grass this summer? She is a large draft mare.

The disease is incurable and is hereditary from affected ancestry. She may slightly improve if turned out on grass during the summer season. There is a possibility that it may be from weakness of the stifle, the patella of that joint slipping in and out of place. In that case a blister applied to the joint would prove helpful.

## WOUND.

I have a horse that was cut in the wire fence last July and so far have been unable to heal it. There seems to be a growth formed in the wound. I have burned it out with butter of antimony and have been using a liniment for dressing with no results. What shall I do to heal this up?

You do not state location of wound, so we are at a loss to understand probable condition present. On general principles a slow healing wound is greatly benefited by removal of hair around it and rubbing in a blister such as cerate of cantharides. Do this; then apply twice daily a little of an ointment composed of one dram each of iodoform and tannic acid in an ounce of lard. Keep horse from biting part.

## OPHTHALMIA.

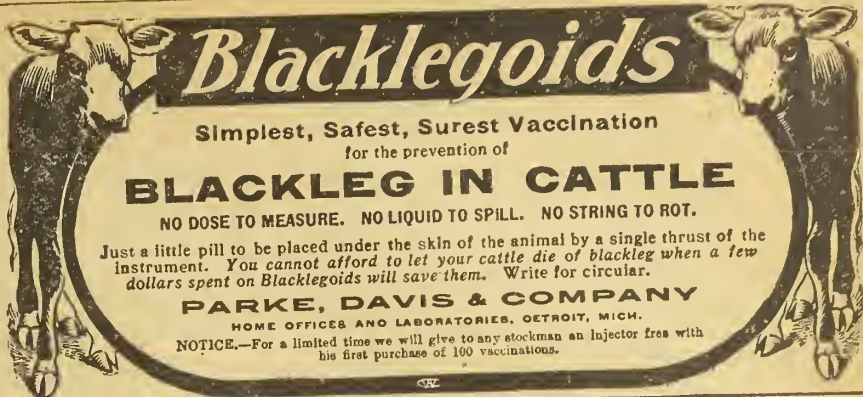

I have a six-year-old mare that has something the matter with her eyes. They keep watering all the time and the white of the eye is of a reddish color. Have been this way for six or eight weeks and keep getting worse. If you could inform me through your paper you would greatly oblige.

She probably has periodic ophthalmia which comes and goes at intervals of a month or so, is incurable and results in eventual blindness of one or both eyes. Darken stable. Sponge eyes night and morning with a saturated solution of boric acid; once daily rub eyelids thoroughly with a mixture of one part citrine ointment and two parts lanolin. An affected mare (having periodic ophthalmia) should not be used for breeding purposes, as the disease is considered hereditary.

## LAMENESS.

I have a horse which ran away last summer, and sprained its ankle severely. I put on liniment and bandaged it well. But it is still very lame and has a hard swelling around it. Is there anything that you can do for it?

The best treatment would be to have the part fired and blistered by an expert veterinarian, but if this cannot be done then we would advise you to remove the hair and blister several times, at intervals of three or four weeks, using a mixture of one dram of biniodid of mercury and two ounces of cerate of cantharides. Rub in the blister for fifteen minutes; wash it off in forty-eight hours; then apply lard daily. Tie the horse up short

## Blacklegoids

Simplest, Safest, Surest Vaccination for the prevention of

### BLACKLEG IN CATTLE

NO DOSE TO MEASURE. NO LIQUID TO SPILL. NO STRING TO ROT.

Just a little pill to be placed under the skin of the animal by a single thrust of the instrument. You cannot afford to let your cattle die of blackleg when a few dollars spent on Blacklegoids will save them. Write for circular.

**PARKE, DAVIS & COMPANY**  
HOME OFFICES AND LABORATORIES, DETROIT, MICH.

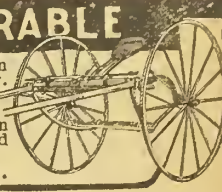

NOTICE.—For a limited time we will give to any stockman an injector free with his first purchase of 100 vaccinations.

## IT'S SAFE, STRONG, SPEEDY, DURABLE

You can break colts easier with this cart. No matter what position animal gets in you can dismount instantly. Nothing to tangle legs. It's great for road use. Absolutely no horse motion. Pleasant to ride in. A "hummer" for track use. Seat can be adjusted to balance rider thus taking all load off the horse. Write quick for free descriptive booklet.

**CHAMPION CART**

**CHAMPION CART COMPANY, 107 Cavin St., Ligonier, Ind.**

so that he cannot lie down or bite the part while the blister is acting.

## COUGHING HORSE.

I have a mare nine years old that began to cough badly in January. The cough does not seem to yield itself to treatment, as I have been giving a cough medicine with little benefit. Can you tell me how to cure her? She is getting worse and has a poor appetite.

Wet all food and give her an ounce of glyco-heroin three times daily with syringe in mouth. Increase the number of doses daily if necessary. See that stable is kept clean and perfectly ventilated and make sure that there is no foreign body lodged at back of mouth or in tongue or that teeth are not causing the irritation.

## EYE DISEASE.

I seek your advice in regard to a Hereford cow. The entire length of lower eye lid is sore. The inner corner has been eaten away. A week ago I commenced caring for her eye. I have been irrigating the eye with warm water in which a little borax has been dissolved, then anoint the lid with ointment of zinc oxide. In order to have ointment reach every part of sore I warmed it; this allowed it to spread over the eye ball. Should I continue the ointment? Is there any danger of it injuring the eye? Each morning there has been a yellowish discharge from the cavity until today there was very little if any. Any advice you will kindly give with regard to best treatment will be most thankfully received and faithfully followed.

We fear that the disease is "fungus haematodes," which is cancerous and incurable. In that case the eyeball gradually will become involved and then the bones of the orbit. As the disease progresses the animal becomes emaciated and then cannot be slaughtered as fit for food. The treatment so far has been intelligent, but we would prefer to sponge the eye twice daily with a saturated solution of boric acid and painting the red sores every other day with a solution of three grains of nitrate of silver in an ounce of distilled water. If the condition is seemingly doing well when this reaches you do not change treatment, but if it has not improved then change to above prescribed treatment.

American lovers of roast fowl must give up their fancy for yellow legs or forego the choicest of table poultry. The yellow leg business is a nonsensical fancy. The uneducated gourmand who calls for yellow-legged chickens would never think of calling for yellow-legged quail or turkey, or canvasback duck. The choicest of all our wild game fowl do not have yellow legs.

## WHOLE FAMILY CURED

Of Eczema, Heat Rash, and Falling Hair—Different Ones Troubled.

## CUTICURA PROVES INVALUABLE

"My wife had eczema on her face for five or six years. We had read so much about Cuticura Remedies that we thought we would give them a trial. We did so, and it has now been about four years, and she has never had a sign of eczema since. I myself used Cuticura Soap and Cuticura Ointment some time ago for falling hair. I now have a very heavy head of hair and it does not fall out. We used Cuticura Remedies for our baby, who was nearly bald when young. She has very nice hair now. She is very fleshy, and we had so much trouble with heat that we would bathe her with Cuticura Soap and then apply Cuticura Ointment, it would dry the heat up so much quicker than anything else. Mr. H. B. Springmire, 323 So. Capitol St., Iowa City, Iowa, July 16, 1905, and Sept. 16, 1906."

## FIELD NOTES.

Hereford bulls are offered for sale by A. F. Hagar, Avoca, Iowa.

Red Polled bulls and heifers are offered for sale by H. N. Hansen, Exira, Iowa.

G. C. Harrison, Blencoe, Iowa, is offering some good Percheron stallions for sale.

C. M. Dewey, Shannon City, Iowa, is offering some Duroc Jersey boars for sale.

Mr. R. J. Harding, of Macedonia, Iowa, reports 125 fine little Durocs, and at the rate they are making headway in the world he should have something attractive later.

For October Duroc Jersey boars sired by a grandson of Ohio Chief write if you are in the market for such to Comer & Gilliland, Carlinville, Ill. These boars are represented to be of a nice cherry color, heavy boned and lengthy, with correspondingly good lines. Write these parties, mentioning this paper. See page 26.

Risser Bros., Sanborn, Iowa, owners of the Pleasant View herd of Duroc Jersey swine, write that their spring crop of pigs from their best bred sows are a promising bunch. In this herd will be found the blood of all the leading families of the breed. Remember the fall sale which these breeders will hold October 25th.

Mr. Henry Lefebure, who is widely known as an importer and breeder of Belgian horses at Fairfax, Iowa, is now on the way to Belgium, where he expects to select a choice collection of stallions for importation about July first. His trade the past few months has been such that he is practically all sold out. Buyers should watch for his later announcements.

A berdsman is wanted by Mr. O. O. Smith, of Des Moines, Iowa, for a good herd of Short-horns. At the head is a son of Whitehall Marshall and from the rest of the herd can be selected a very good herd which Mr. Smith wishes to fit. Here is nice location, within easy reach of the city. Farm is well equipped to care for herd. Write, mentioning The Homestead.

Mr. W. M. Mercer, of Aurora, Ill., is offering 100 extra early Chester White March pigs for sale in his new advertisement that appears on page 27 of this issue. In furnishing copy Mr. Mercer writes: "The favorable weather of March gave our spring crop an unusually good start and we shall keep them going until they are all gone,

which was accomplished last year by November 1st."

Polled Durham bulls are offered for sale by James Wilson & Son, Avoca, Iowa.

Short-horn bulls and Duroc Jersey sows are offered for sale by James T. Dollison, Sac City, Iowa.

A few very choice young Scotch bulls are offered for sale by C. W. Daws & Son, Harlan, Iowa.

Poland China fall boars of the profitable type, not the roly-poly sort, are advertised by Mr. L. S. Fisher & Sons, of Edgewood, Iowa. These pigs are growthy and are all out of mature sows. They are sired by Enough Perfection and Preamble. Prices will be quoted to any breeder interested if they will mention this paper and address as above. See page 24.

Messrs. J. A. Russell & Son, Corning, Iowa, writes that their spring crop of pigs is very promising. Their two Ohio Chief litters are right on the mark as well as a litter of eight lusty ones by Crimmon Wonder Again. A number of Orion sows have litters by Tip Top Notcher, Jr., and with over a hundred pigs thus far there should be some good picking for buyers in this herd.

Pertaining to his recent advertisement of Percheron mares Mr. E. C. Gwinner, of Hol-drege, Neb., writes that he was flooded with inquiries from as many as six states and sold his mares in short order. Mr. W. S. Waters, of Stanford, Neb., was a heavy purchaser. Those looking for a black Percheron stallion, two years old, should be able to make a deal with Mr. Gwinner, as he has a fine one suiting that description. Write him about this, mentioning The Homestead.

Mr. S. J. Philson, breeder of Improved Chester White swine, offers on page 27 a few good gilts at exceptionally low prices, as his time is now being taken up by the new crop of pigs and he wishes to reduce the herd somewhat. These gilts are in nice condition and are bred to Crescent Rex by Norway Chief, sweepstakes hog at the Nebraska state fair, for June farrow. Further particulars may be had by addressing this breeder as above, mentioning The Homestead.

Maasdam & Wheeler, Fairfield, Iowa, report splendid winter sales of Percheron mares and stallions and wish to advise horsemen that they have on hand a few high-class mares already bred and a few with colts at side. Some time in June a new importation of twenty head each of stallions and mares will arrive and prices will be quoted to buyers later on. First come, first served, so buyers should be on the ground to get the best, although the importation will be one of uniform excellence. Mention this paper in writing this advertiser.

Mr. F. Rabaler, Leigh, Neb., owner of one of the very best herds of large improved English Yorkshires in this country, writes as follows: "I have a grand lot of pigs this spring and they have been doing fine. The first of my spring pigs were old enough to be shipped, and I have shipped quite a few already. I am entirely sold out of bred stuff, and they went very fast this year. I had them all sold by the first of March and could have sold more if I had had them. I will have some splendid boars and sows to offer the trade later in the season."

Mr. Ernest L. Mear, of Neponset, Ill., has had unusually good luck with his spring pigs this year. He saved over 100 of those farrowed during March and will be pleased to book orders for these pigs to be delivered a little later in the season. Mr. Mear has always used good boars and many bred by him are being used at the head of good herds throughout the entire country. He can supply readers of this paper with herd boar material in a number of extra good fall pigs at reasonable prices. Write him as per the announcement on page 27 of this issue for description and prices.

Mr. H. B. Loudon & Son, of Clay Center, Neb., are offering a choice lot of fall boars for sale at very reasonable prices, and among them are pigs that are very prospective show animals. They are growthy and are from prize-winning strains, most of them being sons of the great Jumbo's Perfection, first prize boar at the Nebraska state fair two years in succession and being good enough to win third in his class at the world's fair at St. Louis. They also have a good one or two by Hambletonian, the first prize yearling at Nebraska in 1904. If you are in the market for anything in this line write them and see what they have to offer.

W. J. Prather, Russell, Iowa, is offering some well bred Duroc Jersey boars for sale. Three of these are fall boars and are sired by Tom Davis, the second prize Iowa state fair boar formerly at the head of his herd. The two yearling boars are sired by Proud Advance and Top Notcher Again. He is pricing these boars very reasonable, providing they are taken soon. He has about seventy-five spring pigs, sired by the Iowa state fair sweepstakes boar, Crimmon Wonder Again, Long Alix, the Kentucky boar Commodore, also by a son of Advancer and a son of Proud Advance. If anyone wants a yearling or a fall boar write Mr. Prather.

A herd of Poland China hogs that is fast gaining a foothold in Nebraska is that of Mr. John Schmal, of Sutton, Neb. He has not been engaged in this business as long as some, but by his good care and proper knowledge of mating hogs to produce the best results he has at last built up one of the best herds in the state. At the head of this herd we find the great boar Dude's Wonder, a son of old Nemo L's Dude and one of the good boars of the breed. He is a very smooth fellow with a good arched back that is always pleasing to the eye of the good breeder, a splendid spring of rib carrying a good even width from end to end. He has a splendid head and ear, good bone and stands well on his feet. He is proving a good breeder as his get will show on the farm at the present writing. In selecting the brood sows for this herd Mr. Schmal has purchased nothing but the very best of the most popular strains. One of the good sows now in this herd is Schmal's Pride, a daughter of Mogul, the prize winning hog at the Nebraska state fair. This sow now has a fine litter by Dude's Wonder. Susie Perfection, a daughter of Perfection L. & W., he by L. & W.'s Perfection, is another of the good ones. This sow also has a fine litter by Dude's Wonder. There are now about seventy pigs on the place and it might be well to get your order in early if

This is Huttig.

through your dealer, but an ironclad, legally binding guarantee, signed by the HUTTIG MFG. CO., capitalized at \$1,000,000, and responsible for every promise it makes.

No other roofing gives you a personally signed guarantee as strong as this. No other roofing can AFFORD to do so. Why can I do it?

Simply because my roofing is the only roofing on the market, made from pure, natural, imported Asphalt.

Asphalt comes from the Island of Trinidad. A large part of it is used in the exclusive manufacture of HUTTIG'S RUBBER ROOFING.

My roofing is made of long-fibered wool felt, densely compressed and heavily saturated with this specially prepared Natural Trinidad

**H. W. Huttig**

PRESIDENT

# I Stand Back of Huttig's Rubber Roofing

WITH A WRITTEN, PERSONALLY SIGNED, LEGALLY BINDING GUARANTEE.

Yes, sir,—I can afford to stand back of my roofing because it stands back of me, and makes my word good as gold.

I GIVE you a written guarantee that this roofing will do what I claim—not a mere VERBAL PROMISE.

Asphalt, which protects every particle of fiber. Now, mark this carefully: The saturation of Felt with Asphalt in HUTTIG'S RUBBER ROOFING is 150 per cent as against 104 per cent, the highest saturation of ANY of the roofings with the crazy names.

That's the principal reason why my roofing will not "stick" in the hottest, nor crack in the coldest weather.

HUTTIG'S RUBBER ROOFING requires no skilled labor to lay it. Every roll contains enough liquid cement, nails, caps, etc.

It will not run, rust, rot, crack, leak, blow off, require frequent repairs, and is not a fire trap.

Now, here's how I feel about it. If you have used for roofing—

You don't want to fool with a doubtful article, when you can get HUTTIG'S with a guarantee that means absolute protection, both to your roof and to your pocketbook.

Just put the burden on HUTTIG. My shoulders are broad. I will take care of all your roofing troubles, if you will trust me.

Ask your dealer for HUTTIG'S RUBBER ROOFING. If you can't get it of him, ask ME, and I'll see that you do get it.

Anyway, write for a big, free sample of my roofing and let me send you my booklet B and special ironclad Roofing Guarantee. Write me personally, and do it to-day.

**HUTTIG MANUFACTURING CO.,**

707 East Second Street, Muscatine, Iowa.

you want a choice Dude's Wonder pig. Write Mr. Schmal and find out what he has to offer.

One hundred thousand red cedars, one year and two-year-olds, are offered for sale by Garland & Fowler, Afton, Iowa.

A registered Percheron stallion is offered for sale by Mr. W. C. Pollock, Arion, Iowa. He will weigh 1,700 pounds and is priced at \$700.

Northern grown seed corn of the latest varieties, and sold under the Holden test, is offered for sale by the Gateway Nursery Co., Le Mars, Iowa.

Lump jaw cure and other valuable recipes for farm animals is offered by Mr. Geo. W. Burns, of Canton, So. Dak. Send \$1, mentioning this paper.

Percheron and French draft stallions and mares are offered for sale by C. T. Gollehon, Blair, Neb. He also has some Kentucky and Missouri jacks for sale.

A splendid gray Percheron stallion weighing 2,200, and all right in every way, is offered for sale by Mr. J. S. Golder, of Scribner, Neb. He is a good one and should be seen to be appreciated.

A splendid young Scotch bull, a Cruickshank Victoria, and a son of Imp. Scottish Pride, is offered for sale by the Ardmore Stock Co., Holstein, Iowa. It will pay anyone wanting a herd bull to go and see this fellow.

In this week's issue of The Homestead will be found the advertisement of Mr. August Voge, Portsmouth, Iowa, who has a number of good fall Duroc Jersey boars for sale, sired by Red Knight Again, a son of the noted sweepstakes boar, Red Knight. He also offers some yearling sows for sale sired by Crimmon Wonder I Am II, third prize Iowa State Fair boar, and also a few by his old herd boar, Perfection Boy. Mr. Voge is one of the good Duroc Jersey breeders, and he will ship you a good hog.

Mr. R. C. Poston, Corydon, Iowa, one of the good Duroc Jersey breeders in southern Iowa, reports the arrival of eighty spring pigs, and expects about sixty more before his sows get through farrowing. His present crop will be sired by Ohio Chief, Kan't Be Beat, Tip Top Notcher, all well known and famous boars. He will also have pigs by a grandson of old Kan't Be Beat and a son of Arion. He has ten Junior Jim gilts in the herd and quite a number of Orion bred sows. Mr. Poston has been one of the very best buyers the past two years, and he has secured the very best. He had some good things to offer the trade last year, but will be in a better position this fall to cater to his trade. We will have more to say about his herd later in the season.

Messrs. Comer & Gilliland, of Carlinville, Ill., proprietors of the Village Stock Farm, are offering a few very good fall boars for sale in their new advertisement on page 26 of this issue. These gentlemen have one of the best herds in the middle West, both from the point of breeding and the individual merit of their stock. The boars which they have for sale at this time are sired by Carlinville Chief, a grandson of Ohio Chief and are out of one of the best daughters of Kan't Be Beat. This cross is one of the most fashionable of the breed and at the price asked the stock cannot be duplicated. There are others sired by Jay's Onward, a litter mate to Gold Cloud, the champion boar at the Illinois State Fair 1904, and now at the head of Messrs. Fred Kraschel & Son's herd, at Macon, Ill. Write these gentlemen if you mean business and are in the market for a fall boar. Kindly look up the advertisement and mention The Homestead when writing.

Messrs. H. B. Moats & Son, Villisca, Iowa, report a saving of about fifty spring pigs, together with a nice bunch of fall stuff. Everybody in southern Iowa knows the Moats herd of Poland Chinas, and it is one of the herds that has produced some good hogs. Big Perfection, one of the great boars in his day, formerly headed their herd, and he did much to bring their herd to the front. They are now using one of his sons, as well as a son of the noted sweepstakes boar, G's Perfection. Their old boar, Shamrock, considered one of the well-bred sires in the state, still holds the forth at the head of the herd, and he has become well and favorably known as a sire of high class stuff. The firm of H. B. Moats & Son is one of the most reliable Poland China firms in the state, and when you make a purchase from their

herd you can always depend upon what they tell you. Later in the season we will tell our readers more about what they have for sale.

Puro-bred Black and White Langshans, Light Brahmas and Mammoth Bronze turkeys is the kind that Mrs. S. E. Newell, Audubon, Iowa, offers for sale. Can supply eggs from any of the above breeds.

On page 24 of this week's Homestead will be found the advertisement of J. D. McDermott, Wiota, Iowa, who owns one of the most select herds of Short-horn cattle in the state. His herd is a practically Scotch herd, being headed by the massive roan bull, Imp. Fashion Favorite 149580. Mr. McDermott is now offering a red yearling Scotch bull for sale, a son of Imp. Fashion Favorite and out of Imp. Jilted Maid by Imp. Golden Fame. He is pricing him right and any one wanting a young Scotch bull at a reasonable figure had better go and see this fellow. He also has a number of younger bulls that he would price to any one wanting them. Among these is a light roan, a son of Imp. Fashion Favorite and out of an imported cow that is strictly all-right. He is not caring whether he sells this fellow or not, as he would rather grow him out. He will make a great herd bull some of these days, as he is full of quality, and shows much promise. When writing to Mr. McDermott kindly mention Iowa Homestead.

Messrs. Taylor & Jones, of Williamsville, Ill., in reporting the favorable sales which they have been making, write us: "Recently we sold to Mr. L. E. Brown, of Delavan, Ill., a fine imported Percheron. Mr. Brown had been looking for a long while for the kind of a Percheron he wanted and found him only when he came and looked through our barns. Messrs. Mershen & Moffat, of Newton, Iowa, get another fine imported Percheron, while Messrs. McNeill & Co., of Chandlerville, Ill., get one of the very best imported Shire stallions we have sold in a long while. He was a great prize winner in England at the London shows. Mr. T. M. Davin, of Tower Hill, Ill., buys a good American-bred Percheron, and Messrs. J. W. Parlier & Co., of Maroa, Ill., buy an imported Shire that will be a hard one to beat. Dr. Thos. Blair, of Lyons, Ohio, gets a good American-bred Percheron, as does Mr. Geo. W. Kline, of Culver, Ind. Mr. Jos. H. Roth, of Eureka, Ill., purchased an imported Belgian and Mr. J. D. Fillion, of Toledo, Iowa, gets an imported Shire that was in our last importation."

W. D. Fulton, Villisca, Iowa, is one of the well known breeders of big Poland Chinas in southern Iowa, who still holds to the big boned type of hog. This year he has seventy-five spring pigs with a few sows to farrow yet. He also has about thirty fall sows and boars, and these he will put into his fall sale which will be held October 10th. Mr. Fulton has three Giantess sows in his herd, and two of these have litters of pigs by his new herd boar Prince I am 36349 and the other will farrow to him in a few days. The fall stuff are sired by Miller Boy, a boar bred by John Miller, and one of the big fellows. Prince I am, Mr. Fulton's herd boar, is the best boar he has ever owned. He is a son of old Guy's Price and is out of a daughter of Lady Hammond. He was first and sweepstakes boar at the Aurora, Neb. fair, one of the strong western shows. His sire won first and sweepstakes at the Nebraska state fair in 1903, and the sweepstakes boar at the same show in 1906 was out of a half sister of his. He is a hog that will weigh 800 pounds and has a lot of smoothness for a boar of his size. His pigs look good and he shows every evidence of being a good breeder. Mr. Fulton will show a good bunch of his stuff when his sale time comes around.

## SHORT-HORN BULLS.

A good bunch of heavy boned and growthy young Short-horn bulls are offered for sale by A. B. Clark, Wayne, Neb. He can fill a car load lot if wanted.

## 1907 EGG RECORD FREE.

Along with every purchase of Lee's Lice Killer will be given an egg record free. This is an inducement to interest poultry raisers in this valuable poultry compound which is guaranteed to destroy lice, mites and vermin of every description on poultry. It may be applied as a paint or spray to the roosts and walls with very little trouble or inconvenience. Prices are popular and any of

our readers will find Lee's Lice Killer a very convenient poultry mixture to have on hand. Send for the egg record today, addressing your inquiry to George H. Lee Company, Omaha, Neb.

### HEREFORD BULLS.

Twenty bulls ranging in age from one to three years of age and ten two-year-old heifers are offered for sale by W. W. Wheeler, Harlan, Iowa.

### SPORTING AND PET LIVE STOCK.

The Mount Penn Kennels, Reading, Penn., is a firm which imports and breeds thoroughbred sporting and pet dogs, ferrets, rabbits and pigeons. They will handle your order promptly and will send a big catalog on request. Address as above mentioning this paper.

### SHIRT WAISTS POPULAR.

Most of our lady readers will be very much interested in an offer which the Ladies' Emporium, 820 W. Walnut St., Des Moines, Iowa, make on page 15 regarding ladies' shirt waists. This garment is growing in popularity every year and the Ladies' Emporium is offering some especially attractive waists at very low prices.

### ALFALFA AND SUGAR BEETS

grow most luxuriantly as well as peaches, grapes, figs, oranges and nuts in the California lands that are being advertised on page 19. Farmers from the middle West have learned the fruitfulness of this locality, which is Butte county, near the town of Briggs, and are fast settling the farms. For free booklet write Butte County Irrigated Land Co., Dept. 6, 1109 Post St., San Francisco, Cal.

### IN EVERY MAIL

Among the letters which the manufacturers of "Chamberlain's Perfect Chick Feed" are receiving daily are ones which indicate the popularity of this food for poultry in the following lines: Dear Sir:—Please ship me 500 pounds of Chamberlain's Perfect Chick Feed. Say, your feed is O. K., once used, always used. Will want more later. Yours truly, A. C. Harris, Ulrich, Mo. This chick feed is advertised on this page and it is made by W. F. Chamberlain, St. Louis, Mo.

### TWO HUNDRED STYLES OF VEHICLES,

Are manufactured by the Elkhart Carriage and Harness Mfg. Co., Elkhart, Ind. A few of these will be found pictured and priced in our columns from time to time. Besides making huggies, and every other kind of vehicle this firm makes and sells direct to the consumer a fine grade of harness. For thirty-four years the plan of selling without middlemen's profits has been practiced by these manufacturers. This is the reason why they are able to quote rock bottom prices on high grade buggies and harness. If you intend soon to buy a nice buggy in any of the different styles or a light or heavy harness it

will no doubt be profitable to have the catalog of this company at hand. It will be sent to any address by mentioning this paper in your inquiry which should be forwarded to their address as given above. See page 20.

### MISSOURI AUCTION SCHOOL.

On August 5th, the next term of the Missouri Auction School at Trenton, Mo., opens and young men planning to take instruction in the business of selling live stock in the auction ring should write for illustrated catalog to W. B. Carpenter, Pres., Trenton, Mo. Kindly mention this paper.

### APIARY SUPPLIES.

Those of The Homestead readers who want apiary supplies should write to the Leahy Mfg. Co., Omaha, Neb. They carry a full supply of all kinds of bee material, such as hives, extractors and in fact everything that a bee man may want. They will send their free illustrated circular provided you mention The Homestead.

### STOCKMEN'S SUPPLIES.

A special offer is made on page 20 of a five-gallon can of Milk Oil Dip and a galvanized steel tank suitable for dipping hogs and sheep. The firm of F. S. Burch & Co., Chicago, wish to interest stockmen in their full line of supplies which includes worm powder, ear labels and buttons, tattoo instruments, sheep shears, etc. An illustrated catalog explains their full line. Write for it mentioning this paper.

### SOME HIGH-CLASS ANGUS BULLS.

Any of our readers who want a well-bred Angus bull should read the advertisement of W. H. Jones, Quimby, Iowa. He offers for sale a twenty-two months old bull, a son of Imp. Edward R. and an exceptionally well-bred Erica. He is fit to head any herd. He also has for sale a well-bred Blackbird and a Pride bull, besides several younger ones. These are real bargains and it will certainly pay anyone of The Homestead readers to go and see them.

### PROFITABLE HOME INDUSTRIES.

On page 18 will be found an offer that should interest those seeking profitable home employment or an opportunity to launch into a lucrative business. For one dollar a year, or twenty-five cents for three months trial subscription a magazine devoted to articles on the culture of mushrooms, ginseng, golden seal and other medicinal plants will be sent to anyone enclosing their remittance and addressing Profitable Home Industries, 270 Thompson Bldg., Scranton, Pa.

### TWO HUNDRED AND FIFTY MILLION SHEEP

are said to be dipped every year in Cooper's Dip. This fact demonstrates more than any other thing could the popularity of this dip, which not only kills ticks and other vermin, but improves the appearance and quality of the fleece. If your dealer can't supply you, write to the Des Moines Drug Co., Des Moines, Iowa, or to one of the three points nearest your town given in the advertisement on page 20. Mention this paper when you write.

### GOOD STALLION COLT FOR SALE.

Mr. E. C. Gwinner, of Holdrege, Neb., has a very fine stallion colt that he will price at a reasonable figure to anyone who is in the market for something of this kind that is bred right and a good individual. This colt will be two years old this summer and has great size and finish for a colt of his age. He is by the great prize-winning stallion, Casino 27830. His dam was Marcella 19377, an 1,800-pound mare. He is bred right and is a very prospective ton stallion. Write Mr. Gwinner for prices, or better than that, go and see him, as he is sure to please you. When writing please mention this paper.

### SAVE MONEY ON A SEPARATOR.

If you are thinking about saving money on the price of a cream separator you should send your name and address at once to the Davis Cream Separator Company, who advertise their offer on page 9. This company are selling their separators at wholesale prices and promise to save from 20 to 50 per cent on every machine. Their make of separator contains all the essentials of a good skimming machine. The new catalog which fully illustrates and explains this separator will be sent to anyone for the asking. Write for it, asking for Money Saving Catalog No. 118. Address Davis Cream Separator Company, 54L, North Clinton St., Chicago, Ill.

### McKELVIE'S POLAND CHINAS.

A representative of this paper last week spent a day visiting the herd of Poland Chinas owned by Mr. H. L. McKelvie, of Fairfield, Neb., and found there one of the most prospective bunches of Poland China pigs he has seen this year. At that time there was about 115 good pigs on the farm and we consider them as choicely bred as is known to this great breed. In building up this great herd Mr. McKelvie spared neither time nor money in purchasing the very best and together with his good judgment and proper knowledge of mating hogs to produce the best results he has built up one of the good herds of the state. He is a lover of a good beast and is striving each year to make his herd better than the one before. Individuality has always been his guiding star and during our visit to this herd found many animals that would make a creditable showing at any of the best shows yet held. This year's crop of pigs represent the blood of such noted boars as Grand Look, the champion boar of the breed in his class this year, Expansion the king of all sires yet known to produce the large type, Blaine's Tecumseh, a boar that has done much to increase the standard of good Poland Chinas; Dr. Tom, a 1,000 pound boar now at the head of this great herd; others are by Expander, Hadley's Last, Jim Crow and Nemo

a son of Mcs. Choice Tecumseh 3d. With this great combination of prize winning blood represented in the herd it looks as if this would be a place that would present many good opportunities in picking up a herd head. Mr. McKelvie is now ready to book your order for a good pig and it might be good policy to get your order in at once. Write him at once for prices and he will be glad to quote them to you. When writing please mention this paper.

### A REAL MINERAL SURFACE ROOFING.

There are many roofings on the market today which will give satisfaction provided they are carefully painted or coated every year or two. This painting, however, is expensive and troublesome, and we are glad to note the coming into the market of a new roofing which requires no paint whatever. This is Amatite roofing. Amatite has a mineral surface which takes the place of paint and lasts very much longer. Farmers who have any roofing to do should obtain a free sample, which may be done by addressing the Barrett Manufacturing Company, New York, Chicago, Cleveland, Allegheny, Kansas City, St. Louis, Minneapolis, Philadelphia, New Orleans, Cincinnati. See advertisement on page 14.

### A FAMOUS HORSE FARM.

One of the most famous harness horse farms in the world, for the reason that it has produced the most famous horses, is perhaps the International Stock Food Farm of 700 acres situated near Minneapolis, Minn. This is the home of Dan Patch, the horse which paced a mile at the last Minnesota State Fair in 1:55. On page 11 we show a picture of Dan Patch and Crescens, another one of the famous horses of this farm. This picture is only a miniature of a very beautiful one 16x21 inches, printed in six brilliant colors, which will be mailed to any of our readers who will name The Homestead and state how much live stock they own. Address the International Stock Food Company, Minneapolis, Minn.

### PRIVATE WATER WORKS SYSTEMS.

Private systems of water works are necessary on the farm. Only here and there are locations favorable for piping from a city. One of the most important problems to be solved in a system of water works is the power to elevate the water. For this purpose the hot air pump possesses exclusive features and great value. This pump is run by heat with comparatively little expense. Operation is extremely simple. Messrs. Thomas & Smith, of New York and Chicago, make it their business to equip farm water systems with either hot air or an electric pump. Those expecting to install water works on their farms or in small towns should look up the advertisement on page 15. When you write address Messrs. Thomas & Smith, 17-19S, Carpenter St., Chicago.

### J. J. CONSIDINE CO. ON HAY, ETC.

Market is the strongest it has been this season; a very strong demand, especially for the choice grades, choice timothy is selling at \$19.00 and \$20.00 and is scarce at that. Offerings have been very light and will be from now on until after corn planting time, for farmers will have little time to haul. Those who take advantage of this interval will certainly make a generous profit and even though extra labor and effort are necessary we urge them to make it. Ship now. Prairie is a little stronger and will sell better from now on. The shortage in timothy has helped to work the supply down and there is little in transit. At the first of the month when consumers stock up the demand will be first class. Ship now. Straw receipts are small and prices higher for all kinds. Ship now.

### SECOND-HAND TELEPHONES.

Mr. B. H. Van Vliet, 1006 Grand Ave., Des Moines, Iowa, has an advertisement on page 20 of this issue in which he is offering to sell, first-class, second-hand telephones at the bargain price of \$2.50 each and prepay the freight. Mr. Van Vliet is not making this offer because the 'phones are not worth much more, but because they have been rendered useless to him by the installation of a new switchboard. The telephones are guaranteed to be in good condition, and are just the thing for a farmer to use on a light farm line, or to talk from the barn to the house, or from one neighbor to another. They are a bargain and those readers who are fortunate enough to secure one, will be well pleased with their purchase. The Homestead would suggest that those of its readers who are interested in such a bargain, write for particulars, mentioning The Homestead.

### CLOSING OUT ANGUS SALE.

On June 18, at Des Moines, Iowa, Mr. H. A. Cole, of Chicago, Ill., one of the well known Aberdeen-Angus breeders will close out his entire herd of cattle, composed of about sixty-five head. This herd is one of the well known herds in the West, having been bred and raised on his 400-acre farm, near Belgrade, Neb. When founding this herd Mr. Cole drew upon the very best herds for foundation stock, and when buying herd bulls or foundation females, he never spared expense. The first bull he used was the noted Lad of Emerson 3706, a son of the Trojan Gay Lad, and he was a richly bred Marmion's Erica. His second bull was Imp. Marmion's Erica, but he died after he used him a year, and he thought enough of him that he then went and purchased his full brother, Imp. Electrician, the bull that now heads his herd and will be sold in the sale. This bull is not only bred in the purple, but he is a splendid breeder, and he will show an excellent string of calves in the sale. He will sell an imported K. Pride, an imported Drumin Lucy and an imported Queen Mother, together with their descendants. All the breeding cows, heifers and young bulls will be sold, and it will be a splendid place to buy Angus cattle. Watch The Homestead

columns for further particulars about this sale.

### A. C. BERRY OFFERS DAUGHTERS OF IMP. MUTINEER.

Mr. A. C. Berry, of Unionville, Mo., owner of the great Short-horn breeding bull, Imp. Mutineer (a Scotch Missie bull that was bred by Mr. W. S. Marr, of Uppermill, Scotland, and got by Bapton Chief and out of Imp. Missie 6th, the dam of the great Whitehall Marshall) is offering a fine lot of heifers that were got by Imp. Mutineer. Some of these are all Scotch and a few are Scotch topped. The bulls got by Imp. Mutineer have for the past year been sold at an average of \$250 and the man hunting some choice females will find them here. Mr. Berry has also a few choice bulls just coming of serviceable ages. There is herd bull material among these. See page 27 for Mr. Berry's advertisement and if in the market for good Short-horns of either sex write him.

### A CHOICE INVESTMENT.

One visit to Oregon county, Missouri, would convince you that there is one of the greatest fruit producing sections in the United States. It is here that the Ozark Development Co., of Des Moines, Iowa, is having an extensive commercial orchard planted, one mile from the town of Blandville. The orchard will contain 60,000 Elberta peach trees besides tenant houses and outbuildings for employees. This orchard will be managed by experts in their line and as business increases, the orchard will be enlarged, as the company owns the adjoining land. A small amount of stock in this Ozark Development Co. is for sale. If you are interested in such a proposition, write the company and they will send you by return mail one of their albums which gives in detail, their plans for operation and their stock proposition. Please mention this paper.

### PROMINENT BUSINESS MAN SUCCESSFULLY TREATED FOR PILES.

There are hundreds of men and women suffering from piles or other rectal diseases who ought to learn about the hundreds of cases of such disease that have been cured by the Drs. Thornton & Minor System of Treatment at the institution which is conducted by these doctors at Kansas City, Mo. Read the following testimonial from a well known business man and banker: Kansas City, Mo., Oct. 29, 1897. Drs. Thornton & Minor. Dear Sirs:—I cannot recommend your treatment for piles too highly, you having treated me very successfully. I was afflicted for years and you effected a permanent cure, without a day's loss from my business. Very truly yours, J. J. Swafford, Director National Bank of Commerce. Read Drs. Thornton & Minor's advertisement in this issue and write for their free booklets. Thirty years of success proves their ability.

### CARPENTER & ROSS SHORT-HORN SALE.

One of the best lots of Short-horns to be sold this year is that offered to the public by Messrs. Carpenter & Ross, of Mansfield, Ohio, in their forthcoming sale to be held on Wednesday, May 22. This firm have at the head of their herd, the noted prize winning son of Whitehall Sultan, Avondale. Many who have seen this bull pronounce him one of the best sons of the champion. Several cows and heifers in the sale are bred to this bull. Another bull which was used with success was Whitehall Count, another of the good sons of Whitehall Sultan. Several of the younger things in the sale are sired by this bull. Whitehall Count demonstrated his worth both in the show ring and as a breeder and was sold at public auction to Dr. W. H. Earles, of Milwaukee, Wis., at \$1,000. To further increase the value of this offering Mr. P. G. Ross, known to the fraternity as one of the best judges and best pester Short-horn breeders of this country, recently made an importation from the best herds of Scotland and six of the nineteen bulls offered are just from Scotland. Six females of this importation are also included in the sale. These cattle are now in quarantine and of the many importations which Mr. Ross has brought over, this one is without doubt the best. These cattle are offered at your own prices. They are from the best herds of Scotland and the breeder who is in the market for a herd bull, or a richly bred

# At "Fair Acres Farm," Near Emporia, Kan.

The blood of Albion, Lord Saxon, Wild Tom, Java and Keep On. 19 yearling bulls, headed by Christy 23417, he by Keep On 2nd, and out of Fashion by Fashion by Lord Saxon. 28 grand breed ing cows, many with calves at foot. 12 extra fine heifers, yearlings. The balance are young things of great promise.

**MRS. C. S. CROSS, EMPORIA, KAN.**

heifer of show yard merit will find in this lot Short-horns which will please and be profitable to him. Fifty head have been cataloged thirty-one cows and heifers and nineteen bulls. Many of the cows have calves at foot, while others are close to calving to the service of Avondale. This young bull is proving a valuable sire as his produce will show on sale day. Further particulars will be found in succeeding issues. The catalogs are now ready and will be sent to all who write for same kindly mentioning The Homestead. Study the breeding of this good lot of Short-horns and plan to be present at Mansfield, Ohio, on May 22. The advertisement appears on this page of this issue.

#### NEW IDEA IN CULTIVATORS.

On another page we present a design of the new J. I. Case Crank Shift Cultivator and a brief description of its construction. This cultivator is claimed to adapt itself to every condition of crop and soil. Undoubtedly this is a feature which should commend this cultivator to every farmer. The machine is devised so that it may be swung from one side to another very easily in order to escape obstructions or corn hills. With an implement of this kind it is practically possible to cultivate every inch of the surface soil. Besides the crank shift feature, there are others, such as the telescope axle which permits of adjustment between wheels to suit the width of the corn rows. All the many other unequalled advantages of this implement are fully explained in the catalog, which will be sent free by addressing J. I. Case Plow Works, Dept. S22, Racine, Wis. For the advertisement see page 9.

#### HAVE YOU GOT YOURS?

Have you received the splendid free picture of the 1907 Girl? After much trouble and expense, the Sharples Separator Company succeeded beyond their hopes in reproducing from life, in the softest and daintiest colors, the sweetest dairy maid ever offered by any cream separator company as a free picture suitable for framing and placing in any home. Send at once to the Sharples Separator Co., West Chester, Pa., the names and addresses of five farmers who keep cows but have no Tubular Cream Separator, and the Sharples Separator Company will mail to you, in return, the picture of the 1907 Girl, free from printing and large enough for framing. Write the names plainly. Give your own name and address clearly. You must mention the name of this paper to get the picture. The Sharples Separator Company has a limited number of wall calendars and will send one of them, free, with each picture, as long as the calendars last. If you want both, write at once.

#### A GREAT DUAL PURPOSE HERD BULL.

The followers of the Dual Purpose Short-horns will find at Hughesdale Farm, owned by Mr. H. J. Hughes, of Trenton, Mo., one of the greatest bulls now on the market. The bull referred to is out of Rowena 2d, the Champion Dual Purpose cow at the World's fair held at St. Louis and was got by Grand

Lavender a full brother to Golden Lavender, the herd bull that sold in the "Clover Blossom" sale last week for \$995. Grand Lavender was got by Grand Victor and was out of Imp. Sittytou Lavender 6th by Pride of the Morning. Then follow the great bulls, Dunblane, Pride of the Isles, Count Bickersstaffe, etc. At thirteen months of age this young bull weighed 1,200 pounds and is a bull that is fit to head any herd, he being one of those mellow fellows with two good ends, a middle, and four legs of the proper length. See page 27 for the Hughesdale advertisement and if wanting a herd bull that is bred right and from heavy milking ancestors get in touch with Mr. Hughes.

#### ABSORBINE.

Just a few weeks more and the busy, prosperous horse buyers will be searching the country again, and these buyers will know a good horse when they see one, be sure of that. So it will be a wise move on your part, Mr. Horse Breeder, to take the chances offered by the present slack time, and see if there are any blemished horses in your stable. If there are get busy at once. Now's your time to clean and cure them up—ready for the buyer's keen examination. By doing so you are likely to make for yourself a lot of money. Forty or fifty dollars, even, have more than once been made by the breeder removing the blemishes from his horses before selling them. Many of the most successful horse breeders use nothing but Absorbine, relying on it to remove all blemishes. Absorbine does not blister, stain or remove the hair and the horse can be used; \$2 a bottle at dealers or delivered. Manufactured by W. F. Young, 40 Monmouth St., Springfield, Mass. See advertisement on page 21.

#### SPLIT HICKORY BUGGIES.

There is a great variety of material used in the construction of buggy wheels. Years ago every buggy wheel was made of split hickory, that is, instead of being sawed the logs were split. This made it possible for every spoke to be straight in its grain, which insured unusual strength. The scarcity of hickory in past years has made it impossible to secure sufficient to satisfy the demands of the buggy trade. Dealers have resorted to the use of other hard woods. Few woods have the strength of grain that hickory does, so that consequently it was impossible to produce as good a buggy wheel out of other kinds of wood as it was out of hickory. The Ohio Carriage Manufacturing Company are noted for their famous split hickory vehicles. What they offer in the line of serviceable buggies should interest everyone who has use for a buggy. A postal card will bring you the catalog when addressed to the Ohio Carriage Mfg. Co., Station 31, Cincinnati, Ohio. See page 3 and write for the book at once.

#### SEND FOR A COPY AT ONCE.

The steady increase in germ and parasitic diseases afflicting farm live stock compels farmers and breeders to give more and more attention to keeping their animals free from their attacks. This is a positive necessity if farmers expect a profit from them. As an efficient aid to owners of live stock in maintaining them in health and comfort, we can recommend the Veterinary Adviser, a sixty-four-page booklet. It is compiled by noted authorities and treats of the various diseases and parasites which attack live stock. It also points out the necessity for cleanliness and the maintenance of hygienic conditions in connection with live stock and the value of a reliable disinfectant and insecticide as a means of keeping flocks and herds free from diseases, as well as preventing the spread of contagious and infectious diseases when an outbreak occurs. The booklet will cost you nothing but a postal card requesting that a copy be sent to your address. Write at once to the Zenner Disinfectant Company, Lafayette Avenue, Detroit, Mich.

#### THE MARTIN ANGUS SALE.

What promises to be one of the greatest Aberdeen-Angus sales to be held this year will be that of the noted breeder and showman, C. J. Martin, at Churidan, Iowa, on May 28th. This may be termed a Prince Ito 2d offering, there being nearly twenty head in the sale, sired by that noted show and breeding bull. No Angus bull today in the country has won more fame in American show rings than has Prince Ito 2d. In every noted show from the world's fair down through the leading state fairs, he has been a grand champion winner. He is a son of the \$9,000 bull, Prince Ito, and he is one of the most royally bred Pride of Aberdeen bulls now doing service in the country. As a breeder his reputation will be well sustained when the buyers see his string of youngsters that will be sold in the sale. There will be attractions galore in this sale, but one of the greatest will be the grand champion cow, Blackbird 26th, the first grand champion cow that was ever sold in a public sale in this country. This noted matron was grand champion over all breeds at the World's Fair in 1903, and today she stands as the greatest Aberdeen-Angus cow in America. In this sale will be her five-months-old son, Black Defender, and he is sired by Prince Ito 2d. Here is another proposition that the future showman cannot afford to overlook. Bred as he is, along the most approved and up-to-date blood lines, together with his individual excellence, he is one of the greatest bull propositions that has been offered for sale in many a day. Mr. Sam Johnson, his noted herdsman, who stands today in a class by

#### TOO LATE TO CLASSIFY.

#### GOLDEN HERD DUROC JERSEYS.

HEADED by Tip Top Notcher 20729, grand champion boar World's Fair 1894, and Ambition, first prize pig Illinois State Fair 1905 and 20 prize boar 1906, and sire of more prize winners at Illinois State Fair, 1906, than any other boar. Ambition's first 16 gilts sold for \$1,677.50. A few rows of fine farrow bred to these boars for sale. Service fees to Tip Top Notcher \$100; to Ambition \$50. Will book a limited number of sows at above prices. The best is none too good. L. E. Thomas, Golden, Illinois.

R. E. Hogsett, La Prairie, Illinois.

Loudon & Son, Clay Center, Neb.

point of breeding and individuality as the female consignment. The man who is in the market for a show bull will find it in this sale. In Village Sultan, the first calf from Whitehall Sultan dropped after the champion became the property of Mr. F. W. Harding, is found one of the best bulls to go through the sale ring this year. His dam is Village Lassie of the Cruickshank Village Bud family and sired by Imp. Best of Archers, the sire of the \$5,000 Ceremonious Archer. Individually Village Sultan is built much on the order of his sire. He is as smooth as an apple, and has the width and covering of top that is found in the get of Whitehall Sultan. Few bulls are seen so short of leg and with flesh so well distributed from backs up. This bull will suit the most critical buyer. There never was a time in the Short-horn business when a good bull is so much appreciated and this young bull will fill the requirements of the discriminating buyer. Village Sultan's calves are beginning to arrive at Glenfoyle and are evidence of his value as a breeder. Imp. Pennau Commander is a bull of remarkable merit. He is compact, smooth, and has depth and thickness and much quality. The calves at Glenfoyle by Pennau Commander are an unusually good lot. They resemble their noted sire in depth of body and scale. Mr. Chrystal would not offer this bull for sale but cannot profitably keep so many herd bulls. The breeder who is in search of a tried sire will be pleased with this bull. Rarely are such bulls offered at public auction and the opportunity to secure at your own price such a bull as Imp. Pennau Commander should not be missed. The balance of the bull consignment are all yearling bulls of much merit. Ury Champion is a Campbell Ury, by Imp. Lovat Champion. His dam Ury Girl 4th is included in the offering and was got by the Nonpareil bull, Imp. Royal Member. Ury Champion is an all red calf, thick and fully fleshed. His full brother sold in the last sale at \$300. Another good young bull of the Campbell Ury tribe is found in Harvester. He was got by the good Scotch bull Alexander. This young bull is a very deep, low down thick fellow and is the making of a very good herd bull. Clan Champion, by Imp. Lovat Champion and out of Bonny Briar by Imp. Royal Sailor, belongs to the Marr Beauty family. Individually he is of the herd leader airt and will be appreciated by the breeder in search of a herd bull. There are other young bulls by Imp. Lovat Champion and Imp. Beaufort Victor that are from cows that have proven their worth in this herd. These young bulls belong to the fashionable Scotch families and those present sale day will find in the offering bulls to meet all requirements. The individual needs of the buyers will determine the choice from this good lot and in point of breeding and individuality they will please the careful buyer. This offering is the strongest ever made from Glenfoyle and should claim the attention and presence of the Short-horn fraternity. The catalogs will be sent to all who write mentioning this paper as per the announcement on page 25 of this issue. Marshal, Mich., is on the main line of the Michigan Central railroad, 178 miles east of Chicago. Parties from the west can leave Chicago the night before the sale at 11:55 p. m. or 3 a. m. Plan to be present sale day.

himself as one of the most famous fitters of Angus cattle on this side of the water, says that he is a better proposition by far than was Prince Ito 2d at the same age. He will also sell Blackbird 35th, the best Blackbird heifer that will be sold this year. She was the first prize heifer at the American Royal and the International in 1905. She was sired by the grand champion bull Prince Ito 2d, and her dam is Blackbird 24th, the first prize cow at the World's Fair in 1904. Another good thing is the Queen Mother cow Floretta of Cherokee, a first prize heifer at the Iowa state fair, and was in herd that won silver cup over all beef breeds. She will have a bull calf at foot by Prince Ito 2d. There are a grand good lot of Prince Ito heifers in the sale, and he will also be bred to most of the cows. There will be a number of young bulls in the offering, nearly all of which are sired by Prince Ito. Among the most noted families represented are Pride, Blackbird, Queen Mother, Erica, Heatherbloom, Drumin Lucy, and other well known families. No Angus breeder in this country has won more distinction than has C. J. Martin, and no herd in America today is deserving of more attention than is the Martini herd. The offering is a strictly high-class one in every particular, and every arrangement has been made to entertain the visitors on that occasion. You should attend this sale by all means, whether you want to buy or not. Write at once for catalog and kindly mention The Homestead.

#### GLENFOYLE SHORT-HORN SALE—LAST CALL.

One hundred head of fashionably bred Scotch Short-horns to be sold in one day assures many bargains. Such is the case in the Short-horn sale to be held at Glenfoyle Farm, owned by Mr. A. Chrystal, at Marshall, Mich., on Wednesday, of next week. Mr. Chrystal has been one of the most successful breeders of Short-horns in this country and has one of the largest herds. In order to reduce his herd he is consigning seventy-five head to this sale which with the calves at foot number upwards of one hundred head. Unless there is an unusual turn out of buyers many of the cattle will sell at prices that—considering the breeding and individual merit of the offering—cannot be duplicated in this country. In our last issue we called the attention of our readers to part of the female consignment to this important sale, and in these columns this week we wish to call particular attention to the balance of the offering, both the females and bulls. There are in this offering a number of daughters of the noted prize winning bull, Imp. Lovat Champion, used with much success by Mr. Chrystal and afterwards sold to the Flynn Farm Co., of Des Moines. The heifers are of the thick, sappy sort, very robust and will do well in any herd. Buyers who are in the market for richly bred, well made heifers will find in the get of Imp. Lovat Champion many of show yard merit. They are bred to Mr. Chrystal's herd bulls, Imp. Rapton Magnet, Imp. Pennau Commander and Village Sultan, the last two bulls being in the sale. Diamond 21st, a thick, smooth Scotch heifer of strictly show yard merit, has an exceptionally good head and horn, very nicely covered and evenly fleshed. He will do to show this fall. Diamond of Lakeside 4th, is another Scotch heifer of show yard merit. She is one of those thick, low down, sappy kind that are found in few herds. This heifer is due to calve before sale day to the service of Imp. Pennau Commander. Maisie 3d, Maisie 5th, Maisie 6th and Maisie 7th are richly bred heifers of the Bruce Mayflower tribe. They are worthy of the inspection of careful buyers. Mina Grey is a Campbell Mina by Roan Sittytou. She is a very valuable cow and is a good producer, and her yearling heifer Mina Grey 2d (included in the offering) by Imp. Lovat Champion and a heifer calf at foot by Imp. Beaufort Victor, are evidence of her breeding qualities. Lady Nonpareil 2d is a richly bred Nonpareil by Imp. Lovat Champion, and is safe in calf to Imp. Bapton Magnet. This heifer is a wide, deep, low down, thick-fleshed animal and will attract the attention of the discriminating buyer. Westlawn Secret is a Cruickshank Secret by Gloster's Lavender. She has a fine bull calf dropped November 5 at foot got by Good Choice, a son of the champion Choice Goods. Nelly Bly of Glenfoyle is a daughter of Imp. Ury Prince and will calve shortly after the sale to the service of Village Sultan. She is a very good all around heifer and bred to this noted son of Whitehall Sultan will do well in any company. There are a number of valuable Scotch cows which should find places in good herds. Every female in the offering of breeding age is safe in calf, has calf at foot, and in many cases are reared. Lack of space forbids mention of many of these, but they are in keeping with the high standard maintained in all Glenfoyle sales. The bull consignment in this offering is a truly notable one. In many sales of all breeds, bulls prove to be the weak end when compared with the females. It is not so at Glenfoyle this year. The bull offering is fully as strong in both

# GLENFOYLE SHORT-HORNS

## AT AUCTION

**75** Glenfoyle Farm, Marshall, Mich., Wednesday, May 8 **75**  
**SEVENTY-FIVE HEAD OF IMPORTED AND HOME-BRED SCOTCH  
AND SCOTCH TOPPED SHORT-HORNS.**

Sixty-five head of choicely bred cows and heifers, twenty-five with calves at foot and many others due to calve shortly after sale day. **EVERY FEMALE IN THE OFFERING OF BREEDING AGE EITHER HAS CALF AT SIDE, OR IS SAFE IN CALF.**

It is the best lot of cattle ever sold from the noted Glenfoyle Herd. It surpasses any sale held in recent years in the number of large cows listed of **Scale, Substance, Character and Smoothness.** More Scotch Short-horns are listed than in any sale of recent years.

The bull offering is the best yet made from Glenfoyle, and includes two of the herd bulls, **Imp. Pennan Commander 211984** and **Village Sultan 260235**, one of the best sons of the **Champion Whitehall Sultan**. This young bull is fit to head any herd in America. There are a number of young bulls of herd header type.

This offering from Glenfoyle Herd is one of the strongest of the year and the large number of Scotch cattle offered should attract the attention of the Short-horn breeders throughout the entire country.

Catalogs are now ready and will be sent to all who mention this paper when writing.

## A. CHRYSTAL, MARSHALL, MICH.

Cols. Woods, Bellows, Jones and Cottingham, Auctioneers.

### The Cameron Herd of O. I. C's.

Among the good herds of O. I. C. swine in the corn belt is the Cameron herd, owned by Mr. W. B. Porter, of Cameron, Mo. Mr. Porter founded this herd some four years ago, using foundation stock that was as good as could be secured. In this particular Mr. Porter was very fortunate, as he was in close touch with some of the best O. I. C. herds of America and had an opportunity for making selections such as is not had by every beginner. Among the first of these purchases was King 8934, a half-brother to Jackson Chief, the boar that was grand champion at the World's Fair held at St. Louis in 1904, also winner of seven first prizes and \$758 in money. King also was a prize-winning hog, having won first in class at the American Royal in 1903. He was got by Iowa Chief, sire of Jackson Chief, and was out of the Silver-bred sow, Silver Maid. King proved a great breeding boar and got two crops of pigs for Mr. Porter before he died. Several of these sows were retained and other boars were bought, also a few sows, and today the Cameron herd is in fine shape to furnish breeding stock. The present herd boars and the sires of the crop of pigs now on hand are Perfection Chief 19239, a son of Jackson Chief II, and Gretchen II., one of the great brood sows of the breed. Jackson Chief II. was used by Mr. Porter for one season and Perfection Chief was reserved to succeed him. The other herd boar, Chief L. 19070, is a grandson of the great breeding boar, Sweepstakes, and was out of Della by Eastburn's Pride. Both boars are the kind that are improvers in the breed and their get have the back with well-sprung ribs, two good ends and bone a plenty. The sows from which the present crop of pigs is being raised are by such boars as Jackson Chief II., King (both boars referred to above), Kerr Prince, Kerr Dexter and King George. Mr. Porter's herd numbers 150 head. The spring pigs are coming along nicely and a fine lot of herd headers can be found among them. The man who wants O. I. C.'s that are close descendants of the most noted sires the breed has yet produced can find them here and in larger numbers than elsewhere, as Jackson Chief never sired a pig after the World's Fair. Mr. Porter owns one of the good hog breeding farms in Missouri and is located six miles from Cameron. He invites prospective customers to pay the herd a visit and make personal selections. Notify him of your intended visit and you will be met at Cameron. To those who cannot come and wish to order by mail, he promises square treatment and guarantees everything as represented. Early orders will be booked and care given to same, insuring the man who orders early as good as the herd produces. See page 27 for advertisement of the Cameron herd and when writing kindly mention this paper.

Thomas, Jameson & Mitchell to Sell Short-horns June 13th.

The firm of Messrs. Thomas, Jameson & Mitchell, of Allen, Kan., announce a partial dispersion sale of their herd of Short-

horns, the sale to be held in the fine stock sale pavilion, at Kansas City, Mo., on Thursday, June 13th. This should be an important event in Short-horn circles, as the Thomas, Jameson & Mitchell herd has for thirty years been known as one of the strongest herds in America. Two years ago the herd was moved from Kentucky to Kansas and since that time has been under the management of Mr. S. D. Mitchell, the junior member of the firm. Few, if any, herds in the West can show an equally strong herd, either in breeding or from an individual standpoint. For the sale the better part of the herd is listed and a stronger or more select offering will not be found in any sale this year. The last year show herd will be included and practically the entire herd of Scotch females, which number over fifty head. In future issues a full account of the offering will be given. Short-horn men should keep the date in mind, as this will be a sale well worth attending, whether to get a few choice things to add to a herd or for foundation stock.

### M. W. Walker & Son Offer High Class Duroc Herd Boars.

Messrs. M. W. Walker & Son, of Malta Bend, Mo., proprietors of the Plainview herd of Durocs are offering some very high class herd boar material. One of these, Buckeye Chief 15687 is a son of the great Ohio Chief 8727, and out of a daughter of Ohio King, he by old Protection, the boar that has furnished as much, and probably more foundation stock than any Duroc boar known to the breed. Buckeye Chief was two years old in March and has proven a good sire. He is not sold for any fault, but because Walker & Son are keeping so many of his daughters. Some appreciative breeder who can use an Ohio Chief boar should look after him. The other two boars are yearlings, one being got by Second Climax 23361 and out of that grand show and brood sow, Dotie 37472. The other was got by Silk Worm 36911, and out of Polly Wonder 34662, one of Walker & Son's great Ingomar sows. Better bred herd boars are rarely found and when found are held well up in their figures. Messrs. Walker & Son are pricing these boars exceptionally reasonable considering their individuality and rich breeding. If in the market for a high class herd boar write them of better still go and see these boars.

### A Clydesdale Stallion and Short-horn Bulls.

Messrs. George Watt & Son, of Anamosa, Iowa, are offering, in their advertisement on page 28 of this issue, an extra good three-year-old Clydesdale stallion, Warrior 11723 (Vol. 12) by Montfort 8799, out of Rosa 6th 8896, an extra fine, draft mare bred by Messrs. A. & G. Davidson, of Monticello, Iowa. She was by Young Blaze and he by Darling's Prince by Imp. Prince Imperial, the very best blood lines found in Clydesdales. In moderate flesh this three-year-old stallion weighs 1,600 pounds and is built right. Messrs. Watt & Son are also offering two dark red bulls fourteen and

### LARGE YORKSHIRE HOGS.

#### LARGE YORKSHIRES, the Bacon Hog. BREEDING STOCK FOR SALE AT ALL TIMES.

Pairs and trios, not skin. My Foundation herd was selected in Canada of the best breeders by me personally. There is no breed of hogs in existence to-day that makes better mothers and can raise more pigs in a litter. Try this breed if you want to make money. Write for prices.

F. RABELER,

LEIGH, NEBRASKA.

### POLAND CHINA HOGS.

**45** Poland China Boars **45**  
Sired by Impudence 97557, Medler 99999, Dakota Chief 2d 35927, R's Perfection 39012 out of Nemo L's Dude, Tecumseh and Perfection sows. Write us. We can suit you. Address,

WM. RAY & SON,

DEFIANCE, IOWA.

eighteen months old, respectively. One is by Scottish Lad 231843 out of Beauty of Sterling (Vol. 49, page 1005); the other by Collynie Victor 149949 out of Golden Grace 3d (Vol. 58, page 1075). There is no better breeding in the Short-horn herd book than this and the individuality of these two young bulls is all that could be desired. Those looking for a fine young Clydesdale stallion or a Short-horn herd header should write to Messrs. George Watt & Son, of Anamosa, Iowa.

### Coming Short-horn Sale.

Mr. N. P. Hलगren, of Vinton, Iowa, will hold a large sale of Short-horn cattle at his farm near Vinton, Iowa, June 19. This sale includes about fifty head of imported and home-bred Scotch and Scotch-topped young cows, heifers and bulls, including the herd bull, a splendid Cruickshank Prince Royal. The females offer some exceptional opportunities for securing young cows of first-class breeding. Anyone intending to buy a good young bull sometime in the near future will do well to keep this date in mind, as there is undoubtedly going to be bargains offered among the bunch of fifty head. Catalog will be ready for mailing June 1st and you should get your name on the list, mentioning The Homestead and addressing as above. See advertisement on page 27.

The following unsolicited letter to Truman's Pioneer Stud Farm, of Bushnell, Ill., from a patron illustrates something of business methods at the well-known importing establishment: "The horse, Buller V., which we bought of you last week arrived here in good shape a few days ago and he looked better to us than he did at your barn. We have been very busy since he came and we feel that the least we could possibly do in return for the fair and honorable deal which you gave us would be to write our appreciation of same. We shall certainly have a good word for Trumans, as you did all that you said you would do in your written agreement and then to clinch matters favored us still further. It is a pleasure to deal with people whom one feels are not trying to take advantage. We have remarked to several since our return, if anybody could get better treatment than that which you gave us we would like to know where they would

### WILCOX HAS BRED SOWS FOR SALE.

MR. Gerald Wilcox of McCook, Nebraska, offers a choice lot of Duroc Jersey and Poland China bred sows at reasonable prices if taken at once. Write him and mention The Homestead.

### 10 GOOD FALL BOARS

are pushing competitors "off the roof" hypnotizing buyers with "top notchers" at "LET-  
LIVE-PRICES." John, if you pay cash or bankable note you will buy a stallion of  
IAMS. IAMS' "SELLING CLOTHES" "FIT" "all the boys." He saves thousands of  
dollars to stallion buyers. He is not in the "STALLION TRUST." He places \$1,000  
or \$1,500 Insurance.

\$1,000 — SAVED AT IAMS — \$1,000

**I**key! what a rich graft these "SLICK STALLION SALESMEN" are working on the  
honest farmer, selling fourth rate stallions at \$2,000 to \$5,000. Iams sells "top  
notchers" so good, big and cheap THAT THEY DO NOT NEED TO BE PEDDLED TO BE  
SOLD. Mr. Buyer, see Iams' stallions yourself. Take no "GOLD BRICK STALLION  
SALESMAN'S WORD." Iams has "THE GOODS" you read about. His establishment is  
worth going 2,000 miles to see. Iams makes his competitors "HOLLER." He is knocking  
"HIGH PRICES" out of the Xmas tree. Iams saws wood, "BUTTS IN," sells more stal-  
lions each year. He makes every statement good. **George, dear! Buy a stallion of Iams.**  
His \$1,200 stallions are MUCH BETTER than our neighbors paid those Ohio men \$4,000  
for. Then I can wear the diamonds. Iams speaks the languages, buys direct from  
BREEDERS, pays no buyers, salesmen or interpreters, has no two to ten men to divide  
profits with. Iams guarantees to sell you a BETTER stallion at \$1,000 to \$1,500 (a few  
higher), than are sold to Stock Companies at \$2,500 to \$5,000 by SLICK SALESMEN.  
or pay you \$100 for your trouble, you the judge. Iams pays horse's freight and buy-  
er's fare; gives 60 per cent breeding guarantee.  
Write for eye-opener and greatest horse catalog on earth.

VOL. LII. NO. 19.

DES MOINES, IOWA, MAY 9, 1907.

WHOLE NO. 2599

### AN IMPORTANT NEED ON HIGH PRICED LAND.

Most of us in our affairs do a great deal of imitating—that is, we follow the example of others. This may be done unconsciously in many cases, but it is done just the same. In agricultural matters it is important that we follow after men who are working along right lines.

There is not a township in the great central or southern West but what can show a dozen or more of what you might call first-class farmers. These are the men whose affairs should be studied by the average man and whose ways should be imitated, in a measure at least.

One of the most successful farmers of the great central West recently stated that in his opinion the greatest need now in this area is more and better fencing. His doctrine was that every fence on the farm should be hog-tight so that hogs, instead of being raised in dry lots around the buildings, could run hither and thither over the pastures, over the stubble fields and, when the corn is husked out, over the corn stalk fields.

It was the belief of this man that farmers could sooner or later eradicate absolutely the disease of swine plague and cholera by adopting this plan. It adds stamina to the breeding stock, and it certainly paves the way for making cheaper pork. Of course by using more grass and less grain it may take a little longer to finish hogs, but in his opinion one hundred pounds can be made cheaper by taking a year or fourteen months to do it than can be done by making it largely on grain in nine or ten months. We believe that this is good, sound doctrine to preach to our readers. Fencing, it is true, is costly, and yet prices are by no means prohibitory. Let us compute for a moment what a hog-tight fence costs. The woven-

cost of the fencing. It is not our thought that any man will undertake to fence his farm with hog-tight fence all at once, but by adding forty, eighty or one hundred rods a year the task will soon be finished and in the meantime the increased income from the hog end of the farm will take care of the fencing bills.

### THE PRACTICE OF RINGING HOGS.

A Missouri subscriber sends the following communication:

I do not believe that I have ever seen the question discussed in your paper as to the advisability of ringing hogs. I have always been under the impression that hogs were spending their time profitably while they were rooting, because it seemed to me that they were getting something nature intended them to get or they wouldn't be so engaged.

However, I have a big bunch of sows this spring that are rather changing my notions on the subject, but before I change my practice I thought I would submit the subject for your consideration. Some of my old sows have run down almost to skeletons. The more they root the more they seem to like the operation, and I notice that the most arduous rooters have the thinnest pigs. Please discuss the subject and submit it to your readers in order to get their advice on this topic.

It is an undisputable fact that brood sows sometimes spend too much time in turning over the soil. It is possibly true that they are after something that nature intended them to get, but we have noticed that where the practice is stopped by ringing they generally remain healthy and as a rule they increase after that in their milk flow.

We do not desire to place ourselves on record as favoring the practice of ringing hogs under all circumstances, but we do believe that in some cases the practice is to be highly recommended. We have found from experience that it is not necessary to ring all the brood sows because some of them will not spend over half an hour a day rooting, while others will work hours at a

time. The latter, we believe, should be rung in the interests of the suckling pigs.

Not long ago we visited a 1,500-acre farm where five or six hundred young pigs are raised annually. There were about 400 little pigs on hand at the time. Some of these were in excellent shape, indicating that their dams were good milkers, while a considerable number had a pinched appearance. Upon inquiry we found that while all the sows had access to a large timber pasture, only part of them were strenuous rooters. The owner stated that he had sows that would root four or five hours steadily without ever stopping, and necessarily the pigs of such a sow were being neglected. Such labor on the part of the sow certainly cut down her milk flow, because energies that should have gone in the direction of milk production were spent in useless labor. The owner of these hogs confessed that he had made a great mistake in not taking the matter in hand earlier and ringing these chronic rooters.

Of course where one only has small pastures it is generally necessary to resort to the practice of ringing all the hogs, otherwise they will work too much destruction to the clovers and grasses. It is advisable of course to make some effort to supply mineral matter when this is done, in the form of charcoal or wood ashes, because undoubtedly the rooting habit is acquired to some extent because of the desire for mineral matter as well as insects and roots.

One farmer recently stated in our presence that he considered it a great blunder to ring hogs because of the fact that he never knew a case where hogs addicted to the habit of rooting contracted disease. While there might be something in this theory, at the same time we believe hogs may be kept just as healthy if they are given free range,

plenty of pasture and allowed access to mineral matter.

### WHY NOT HARROW CORN?

Looking back a decade or two one can recall the preaching of strange doctrines relating to agricultural matters. The farmers' institute must bear its share of fathering not only strange doctrines, but unsound doctrines, though, of course, the agricultural press is not exempt entirely.

We are started in this train of thought by the remembrance of a stirring address delivered a few years ago at a farmers' institute on corn growing. The speaker in this case, who was not only a good theorist, but was a practical man, advocated sound notions about preparing land for corn, and when asked whether it was advisable to harrow corn after the time of germination, in substance said:

It certainly pays to harrow corn after it comes up, but before it is large enough to cultivate. The harrow will kill the weeds, create a mulch which conserves moisture, and will do more good than can be accomplished by two or more cultivations later on. Some of you shake your heads and imagine that the harrow will work havoc in a corn field after the plants are two or three inches high, but I beg leave to differ with you on that point.

A few years ago I ordered a man to harrow a forty acre field of corn. I was obliged to leave home soon after giving this order and expected that the work would be finished when I returned. To my surprise I found that the man had only harrowed an acre or two when he suspended business, it being his thought that he was absolutely destroying much of the corn. It so happened that the field was never finished and the yield of the strip that was harrowed at that time was at least ten bushels more per acre than the balance that was not harrowed. Since that little experience I have been a strong advocate of the harrow, and I urge the farmers present to take the word of one who has had experience along this line and follow his example.

No doubt many followed his example because we can recall the time when practically every farmer did more or less harrowing after his corn was up. The

practice was not generally continued, though one will occasionally see the harrow in a corn field doing the important work of destroying weeds and creating a mulch. But the harrow does more than this and in all probability tears out anywhere from 5 to 10 per cent of the corn plants. No doubt therefore why the gentleman whose words are quoted above obtained a larger yield from the harrowed corn than from the other was that in the first place his stand was too thick and the harrow thinned it down to suit the fertility and moisture supply in the soil. Nowadays, however, men adjust this matter at planting time, aiming to put in seed that will grow and use it in just such quantities as will contribute to the largest yield if it all germinates. We therefore say that in modern times corn

Avondale, the noted prize winning son of the Champion Whitehall Sultan, at the head of the well known herd of Short-horns, owned by Messrs. Carpenter & Ross, of Mansfield, Ohio. A number of cows in the forthcoming sale of this firm are either safe in calf to this noted bull or have calves at side by him. See Field Notes.

fields should not be harrowed after the plants appear above ground. True it is that weed destruction is important, as well as the creation of a mulch; but unless one has a stand that is altogether too thick the advantages derived from the harrow will be more than offset by the destructive effect of the corn plants. We believe that it is an excellent thing if the harrow can be run over the surface just before the plants appear to knock out the young weeds, to obliterate the planter marks so that these will not form a thick crust in case of heavy rains, and of course to create a shallow mulch.

VALUE OF THE DISK PLOW.

One of our subscribers from Polk county, Iowa, sends the following inquiry:

I would like if some of your readers who have had experience with the disk plow will give the result of that experience through the columns of your paper. There is some land in this county that cannot be plowed with the ordinary plow. I mean by this that the soil will not scour and that one can only do a job of rooting, which you can scarcely call plowing at all. I have been told that the disk plow will scour in this soil. If that is true I would very much like to have it confirmed by others.

We shall be pleased indeed to hear from those who have had experience with the disk plow. There is not a state in the entire central West but what some land can be found where the ordinary plow will not scour, and it is just such a condition as this, as we understand it, that the disk plow is designed for.

We desire that those who respond to this invitation shall describe the character of the soil, and especially state how the common plows work in it, and how the disk works by comparison.

Making Good Earth Roads.

To the Editor of The Homestead:

We have a system by which railroads are made and operated.

We have a great system of our schools, so one teacher can commence where the other one left off.

But we have no system by which our roads are made, and each builder commences where he pleases. He may tear up what the man does the year before. If so, both years' work is wasted. But with a system so one builder will commence where the other one left off, in a few years we will have fine dirt roads. If many of our roads are getting no better, as a great many of our people claim, then our money, in one sense, is lost.

To start with, don't hire a man to oversee the roads because he needs the money, but hire one that will earn the money.

Inasmuch as we are spending thousands of dollars each year on the roads without the results obtained that should be, we feel that we should have defined what a finished road is, and the uniform system by which such road is made and maintained.

The worst trouble at present is to get competent men to handle the road funds that are already raised for road making.

The work done on the road is more in a temporary than a permanent manner, or if a piece of road is made good it is at the expense of some other road, that is left almost wholly unworked.

Now, what I want to get at is to adopt a system whereby every dollar expended will help the next dollar expended. It is less expense to keep a good road in good shape than it is to keep a poor road passable.

A finished road is a nice, smooth oval from twenty to twenty-five feet wide, and from eighteen inches to two feet highest in center, except in low, wet land it must be wide enough so it can be thrown high enough to drain itself, or be drained by tile and thrown high enough to surface drain. All main traveled roads should be wider than less traveled roads.

All roads that are not finished as stated before should have furrows plowed on each side from sixteen to twenty-two feet apart, as straight as the lay of the land will permit. A straight road looks nice, and can be finished by the same number of rounds, no extra turning. The plowing should be done in early spring, while the ground is soft, for it plows easier, and it gives the ground time to mellow before grading, which should be done as soon as the ground is dry enough in spring. If the plowing is done but a short time before

grading, plow but one furrow on each side of road.

After this plowing is done in spring, as soon as dry enough go over road with plow and scraper and with such material as trustees provide, make and repair culverts, throw up low places, plow in ditches, if any, and do such work as grader cannot do.

When this plowing on each side of road has mellowed and is dry enough, put eight or ten horses on grader, or engine—always have plenty of power to pull grader—if horses, and the road has ditches on each side, string them out. It will take three rounds to throw this in.

Then commence again in same place, cut down as deep as you can well with grader, go one round, and then take off one team and put on drag and follow the grader with drag. In that way two rounds with grader followed by drag finishes the road, and makes it about eighteen or twenty inches highest in center. Follow last round with drag, for economy, as it does not take so much power to pull grader, and the same work is accomplished in one round that would take two with grader.

Next year, or any time you want to widen road, plow one furrow on each side of road and go two rounds with grader in same place. For the last round set the blade at greater angle, throwing dirt farther last round, then take off one team and put on drag as stated above. Repeat this until the road is required width.

This finished road may be kept up very cheaply by going a few rounds each year with the disk, and keeping it run in with a drag when the ground is dry; or a grade may be made with disk and drag.

The purpose of this system is to make the road good for present travel, and that every dollar spent in this way will help make a permanent finished dirt road. The main object is to get the center of road full so the rains do not tear

C. C. DYE.

up what work is done. Making grades a little at a time makes them more solid, and by moving ditches over a little at a time they do not get deep. Make grades at a very little cost by doing a little each year, using the funds as they come in. Instead of making a part of the road each year, we get over almost all of it, and in three or four years we will get a nice finished road

that will be easily kept up at a small expense.

Decatur Co., Iowa. C. C. Dye.

Value of Commercial Fertilizers

To the Editor of The Homestead:

The following inquiry comes from Mr. R. O. Vangilder, of Macon county, Ill.:

Last year I planted with my corn a fertilizer called Armour's Corn, Wheat and Oats Special. I planted it only on the high, thin spots. It made the corn grow faster and at the time the corn was laid by the fertilized corn was as big as the corn on the richer part of the ground. But the dry weather and grub worms set it back so that I could not tell at the time it was gathered whether the fertilizer did any good or not. I am thinking of trying it again, but some tell me that the sulphuric acid used in the fertilizer will kill the land. I wish to inquire if this is so? I would like to try that fertilizer again, but I do not want to put anything on the land to injure it, as it is poor enough now. Have you any bulletins on fertilizers? If so, I would like to have them. I paid \$20 a ton for that fertilizer I used on the corn last year. What is the reason clover will not make a catch on this ground? Once in five or six years I can get a stand.

The composition of Armour's corn, wheat, and oats special fertilizer, as given in a little booklet, published by Armour and Company, is as follows:

	Per cent.
Ammonia .....	1
Potash .....	1
Available phosphoric acid .....	7
Total phosphoric acid .....	9

These constituents are not elements of plant food, but they are compounds in which the elements are contained. Thus, ammonia contains 82 per cent of nitrogen; so-called phosphoric acid contains 43.2-3 per cent of phosphorus; and potash is a compound of potassium and oxygen, containing 83 per cent of the element potassium. It should also be understood that the total phosphoric acid includes the available phosphoric acid. It would be simpler to say available phosphoric acid and unavailable, or inert, phosphoric acid. By making these computations, we find that this fertilizer is guaranteed to contain the following percentages of plant food elements:

	Per cent.
Nitrogen .....	.82
Potassium .....	.83
Available phosphorus .....	3.49
Inert phosphorus .....	.87

These are the percentages according to the minimum guarantee, but the Illinois law allows a deficiency of 1 per cent below the minimum guarantee before it can be considered as evidence of fraudulent intent. You will see that this would permit dropping out all of the nitrogen, potassium, and inert phosphorus and reducing the available phosphorus to 2.49 per cent, or less than fifty pounds of phosphorus to the ton. I may say that this amount of phosphorus can be purchased in acid phosphate for \$6.00, in steamed bone meal for \$5.00, or in raw rock phosphate for \$4.00.

We can usually buy plant food elements at the following prices:

	Per lb.
Nitrogen in dried blood or sodium nitrate .....	\$.15
Potassium in potassium chlorid .....	.06
Phosphorus in acid phosphate .....	.12
Phosphorus in steamed bone .....	.10
Inert phosphorus in rock phosphate .....	.04

I do not think Armour & Company take any advantage of the legal privilege of putting out a fertilizer 1 per cent below the guarantee. The official analysis of this fertilizer for 1906 was as follows:

	Per cent.
Nitrogen .....	.90
Potassium .....	.95
Available phosphorus .....	3.63
Inert phosphorus .....	.23

Computing from this actual composition with the prices given above we get the following results from one ton of this fertilizer.

Nitrogen, 18 pounds at 15c .....	\$2.70
Potassium, 19 pounds at 6c .....	1.14
Available phosphorus, 73 pounds at 12c ..	8.76
Inert phosphorus, 6 pounds at 4c .....	.24

Total commercial value .....	\$12.84
Total value of phosphorus only .....	\$ 9.00

From this it is seen that the fertilizer for which \$20 a ton was paid contains only \$12.84 worth of plant food.

It should be kept in mind also that for use in general farming in this state nitrogen is not worth fifteen cents a pound because it will not give a sufficient increase in crop yields to pay fifteen cents a pound for it, and this is also true of potassium at six cents a pound.

Furthermore, there is an inexhaustible supply of nitrogen in the air upon which we can draw by means of clover and other legumes, and there is an inexhaustible supply of potassium in the soil which we can liberate as needed by turn-

### Help the Horse

No article is more useful about the stable than Mica Axle Grease. Put a little on the spindles before you "hook up"—it will help the horse, and bring the load home quicker.

## MICA AXLE GREASE

wears well—better than any other grease. Coats the axle with a hard, smooth surface of powdered mica which reduces friction. Ask the dealer for Mica Axle Grease.

### Going to School or Learn a Trade?

If so, write for our fine new catalogue giving complete information about the special opportunities offered for obtaining an education in almost any subject and learning some of the best trades. Address O. H. LONGWELL, Pres. Highland Park College, Des Moines, Ia.

ing under decaying organic matter, as clover, farm manure, etc., so that it is not only unprofitable to buy nitrogen and potassium, but it is unnecessary. Consequently the agricultural value of this fertilizer; that is, the value to the farmer, lies in the phosphorus which it contains, which amounts to \$9.00 a ton, counting the available phosphorus at twelve cents a pound and the inert phosphorus at four cents a pound. It should also be understood, however, that one can buy inert phosphorus in the form of raw rock phosphate and make it available himself by the same means he must use to liberate potassium from the soil, namely, by plowing under the phosphate with farm manure, clover, or other green manures. In finely ground natural rock phosphate one can obtain for \$3.12 (counting four cents a pound for phosphorus) as much phosphorus as was obtained for \$20 in this so-called "complete" fertilizer.

Illinois circular 96, "Soil Improvement for the Illinois Corn Belt," gives some information relating to difficulties in growing clover, and shows that the yield of clover has been more than doubled by the use of phosphorus on the ordinary Illinois prairie land. Of course, we sometimes have such weather conditions that clover fails even on the richest land, and on some very thin lands the supply of decaying organic matter is too small to make available a sufficient supply of potassium and other mineral elements.

On some of the worn timber lands, and in southern Illinois, on the ordinary prairie land, we find that the soil is also acid and consequently deficient in limestone. Some bulletins and circulars which are now in press will give further information relating to the use of lime and ground limestone. Cyril G. Hopkins.

University of Illinois.

MISSOURI LANDS FOR SALE.

Mr. Harry M. Rubey, of Macon, Mo., is offering 280 acres of what he considers the best land in Macon county, Mo., for sale in his advertisement that appears on page 15 of this issue. There are two sets of improvements, one being a new cottage just completed, and a fine barn, besides two old barns and an old house, all in good repair. Everything is in first class condition. The farm is located seven miles from the county seat and one mile from Excello, on the Wabash railroad. It will be sold on easy terms at the price named in the advertisement.

## Farm Furrows

Turned by a Practical Farmer.

Some incubators never hatch anything but trouble.

Judicious advertising is an investment, not an expense.

It is up to the old-timers to dig out their records of cold-dry springs.

According to advices from Wall street, the crop of spring lambs must have been a failure.

A little recreation is as necessary to the steady working farmer as oil is to machinery.

At this time of the year we often see the combination of low test and scant flow of milk.

Mixing one can of poor cream with one can of good cream is apt to make two cans of poor cream.

Sowing weed seeds with small grain is a good deal like giving ammunition to the enemy in war.

Horses, cattle, and sheep never do very well when herded in the same lot. Too many animals are injured.

Soak peas for twenty-four hours in warm water before planting, if for no other reason than to give them an even start with the weeds.

Quite a few dream and plan what they would do if they only had the money, but fail to plan how to make the most of what they have.

Simplicity and elegance should be characteristic of the farm home. Costly knickknacks and showy furnishings promote a small degree of comfort and good cheer.

It is a problem in my mind whether to enclose the stock lots for the most part with woven wire fencing or with a board fence. Send your views in to our editor.

The crow is the crook of birds that frequent the farm and his every action indicates it. He governs himself on the theory, I believe, that evil is all right when not found out.

# Harvest Time

## Draws Near and Nearer

### ARE YOU READY?

**I**F you have a crop of grain or grass growing, you naturally are beginning to think more and more about how you are going to reap the full benefit of the year's growth.

How you are going to turn what Mother Nature has given you, into the largest amount of golden dollars—

—How you may harvest your crop at the least expense, with the least delay and with no avoidable trouble.

Now is the time to make your decision—not just before you begin to cut your grain or hay.

You want to be sure that you are ready for harvest—that you have a harvesting machine not of the "may-be-so" kind, but of the "know-for-sure" kind—a machine that you can depend upon with all certainty and assurance.

You can't afford to try "to get along" with a wornout machine, for in all probability it will waste more time, more of the crop, and more of your nervous energy, than a new machine costs.

Neither can you afford to experiment with a machine. Let others do that if they want to and think they can afford it, but as for you, make up your mind to use *only* such machines as time and experience have proved to be successful and dependable.

For, after all, that is the only way in which you can arrive at a wise decision. All over the world during the past thirty to forty years, farmers have been using harvesting machines of many kinds and many types of construction.

Some they condemned beyond all hope, the first time they tried them.

Others they gave a second trial, only to find them wanting.

While to a few—a very few—they awarded the stamp and seal of their approval season after season and year after year.

Does not that mean something to you?

Do you know of any better guide than the thirty years' experience of *all* the grain and grass growers of the world?

Could you in a whole lifetime of investigation arrive at a surer decision than *all* the farmers of the country put together?

Of course not.

You know that in this day, the wide-awake farmer knows what he is about. If a majority of farmers favor a certain line of machines, it *must* be because that line has *proved* its value.

There can be no other reason.

And there *is* no other reason for the popular-

ity and reputation of the six leading makes of harvesting machines now known as the International line:

**Champion, McCormick, Osborne, Deering, Milwaukee, Plano.**

Their popularity has increased from year to year because every year they prove to more and more farmers that they can be *depended upon* with certainty.

And today they are better than ever before in their history.

The International Harvester Company is able to employ, in the design and construction of each machine, every principle and every mechanical idea that more than thirty years of experience in this special line has demonstrated to be of value.

The International Harvester Company is able to command at all times, the very best materials that forest and mine produce—not only the lumber from its own forests and ores from its own mines, but by reason of its steady and increasing requirements and the desirability of its trade, it secures the pick and choice from hundreds of lumber camps, mines and mills.

The International Harvester Company very naturally attracts to its factories the most expert workmen, the most skilled mechanics; so that it has constantly at its command every facility for the improvement of its machines,

—every mechanical principle that experience has approved,  
—the choicest materials,  
—the most skilled workmen.

Do you wonder, then, that so many farmers all over the world refuse to use any other than these standard machines?

Do you think you can afford to begin harvest without first getting one of these machines?

### See the International Dealer

and get a catalog of whichever machine you want. If you don't know an International dealer, write us and we will give you the name of the one nearest you.

Don't forget this other advantage. If your team runs away or an accident occurs, you can *always* get repairs for an International machine near at hand, and they *always* fit. A full stock of repair parts is carried at every agency.

Equal in importance with a perfect machine is perfect twine. The most perfect twine made may be had in Champion, McCormick, Osborne, Deering, Milwaukee and Plano, sisal, standard, manila and pure manila brands.

## International Harvester Company of America, Chicago, U. S. A.

(INCORPORATED)

**International Line:**—Binders, Reapers, Headers, Header Binders, Corn Binders, Corn Shockers, Corn Pickers, Huskers and Shredders, Corn Shellers, Mowers, Hay Tedders, Hay Rakes, Sweep Rakes, Hay Loaders, Hay Stackers, Hay Bales, Feed Grinders, Knife Grinders, Cream Separators, Gasoline Engines, Pumping Jacks, Manure Spreaders, Weber Wagons, Columbus Wagons, Bettendorf Wagons and Binder Twine.

developed into an apple. It seems nature adjusts matters so that a little "freeze" may take some and yet leave a plenty.

If anything occurs to unduly excite a cow while milking, take a sample of what you get, test it, and compare with tests at other times; also take a sample of the first few streams from a cow

and compare with a sample from the stripping at the same milking, but never try to force a cow to give down her rich milk by kicking her in the belly.

A fact which I am certain of is, that to sell breeding stock to the best advantage the sire and dam must be in good condition. The animal is valuable principally for its ability to grow flesh.

The only indication of fleshing qualities of the young animal is exhibited in its parents.

Weights were taken recently on a carload of fat hogs on the Chicago market before and after their "fill," a term well known to shippers. The difference was 480 pounds, which at the current price made over thirty dollars for the load.

### 10 Points to Consider When You Buy A Buggy.

Buy direct from the factory. My \$45 Knox Special Top Buggy is sold that way. No dealer's profit for you to pay. No salesmen or jobbers for me to pay to sell my buggies. I sell direct to you. Get my Knox Buggy on 30 days' trial. Use it a month, test it in every possible way, and send it back if not satisfied. And I will pay the freight both ways.

Be sure your buggy is guaranteed by a reliable maker. I guarantee the Knox for two years. That is another advantage of dealing directly with me.

My \$45 Knox Top Buggy is a comfortable rider. It has a wide, roomy seat. That very same buggy at your

local store sells from \$75 to \$90. So you easily save \$30 in jobber's and dealer's profit.

The body is 24 inches by 54 inches. The gear is oil tempered. Long distance, full clipped axles. Easy riding spring. Full plated reaches.

The shafts and wheels are guaranteed to be split hickory. Oval edge tires.

My Knox buggy is handsomely painted and tastily upholstered.

It has a four how leather top. In short, it's the leader of my big line of buggies, carriages and vehicles of all kinds. Remember, I sell them all straight from shop to buyer, guaranteed, and a big saving to you.

Send for my big buggy book. It's free. Tells more about my line. But order my \$45 Knox Buggy now, right from this advertisement. You are safe. Address

R. M. Knox, President,  
Western Harness & Supply Co.,  
613 Commercial St., Waterloo, Iowa.  
P. S. Have been advertising in The Iowa Homestead for six years.

## THE HOMESTEAD

A Practical Journal for the Farmer, Stockman, Fruit Grower, Poultryman, Gardener and Housekeeper.

BY JAMES M. PIERCE.

JAMES ATKINSON, Editor in Chief.

ESTABLISHED IN 1855.

Entered at Des Moines Postoffice as second class matter

PUBLISHED EVERY THURSDAY.

**SUBSCRIPTION RATES**—Single subscriptions, \$1 a year; ten copies one year, \$10, and an extra copy to get up of club. In clubs of fifty or more, 30 cents a year; in clubs of one hundred or more, 25 cents a year. Single subscription three years in advance, \$2; five years in advance \$3; ten years in advance \$5. Subscription price in Canada, \$1.50 a year. Remit by draft, registered letter, post-office or express money order. In renewing subscription, use same name and initials as address on paper, or explain why you change. In changing your postoffice address, send your old address as well as the new. Errors in address or failure to receive paper within two weeks should be promptly reported to the publisher.

Address all communications and business letters to  
**THE HOMESTEAD COMPANY,**  
Des Moines, Iowa.

### GOVERNMENT WHITEWASH.

An Illinois subscriber, E. B. Ferris, asks for a recipe for whitewash to be applied to old buildings. We possibly cannot do better than to give the formula for government whitewash. Take one-half bushel of unslacked lime, slack it with boiling water, cover during the process to keep in steam, strain the liquid through a fine sieve or strainer and add to it a peck of salt previously dissolved in warm water, three pounds of rice boiled to a thin paste and stirred in while hot, half a pound of Spanish whitening and one pound of glue previously dissolved by soaking in cold water and then hanging over the fire in a small pot hung in a larger one filled with water. Add five gallons of hot water to the mixture, stir well and let it stand a few days covered to protect from dirt. It should be applied hot for which purpose, it can be kept in a portable furnace.

### A Word on the International Barrow Show.

To the Editor of The Homestead:

Some time ago I noticed a quotation in your paper from an address delivered by W. Z. Swallow at the annual meeting of the Iowa State Board of Agriculture. According to the remarks quoted, Mr. Swallow was of the opinion that injury was done the swine industry by placing the grand championship award on a Yorkshire barrow weighing 510 pounds.

In a class like grand championship in barrows at the International Live Stock Exposition I do not think that the market requirement ought to be considered and, as I look upon it, it is simply a matter of selecting the best hog irrespective of size, according to the market standard of excellence, leaving size out of consideration. If this were taken into consideration it would be unfair to the majority of the animals in the class, as this is made up from the winners of the various classes, ranging from the lightest to the heaviest. The market nowadays requires a medium weight hog with a large per cent of lean meat of good quality. This hog need not necessarily have a very large ham, but it should have a ham that is plump and made up of lean meat with a moderately thin layer of fat on the outside. The hog should be symmetrical and of proper shape and good quality throughout, and dressing a high percentage.

As stated above, if in a show of this class the market requirement as to weight were taken into consideration the heavy-weight hog of any breed would not stand any show against a hog of the required market weight. But by placing the best hog first irrespective of weight, it gives every hog a chance and illustrates to the public the type of hog that is required by the market. If weight were taken into consideration in this class it would also be logical to say that no hog should be shown except those that weigh between 200 and 250 pounds, as these are the ones mostly in demand by the market, but nevertheless they have classes for pigs weighing 150 pounds and for hogs weighing as high as 500 pounds. I think the placing of the Yorkshire barrow first at the last International was entirely justifiable, as this was an exceptionally fine barrow. He was made up of the pro-

### Fast Bailing

MORE BALES EVERY HOUR.

Three strokes of plunger for every round of team. That means uniform work and right application of power. It makes work lighter for men and team. Its leverage is 1 to 15. Most presses are only 1 to 12. It's a press you can feed fast and run fast. Feed hole is large enough to take in any size forkful. No choking and no danger, no matter how much you are crowding the work. Perfect automatic feeder, trussed steel tension, bales anything that's baleable. We also build the famous Ohio Power Press and the best two stroke press on the market. Write for Catalogue.

ST. LOUIS WRECKING & SUPPLY CO., 3867 MANCHESTER AVE., ST. LOUIS.

portion of fat and lean that was ideal from the present market standpoint. Furthermore, he had a splendid back which would cut the best kind of a pork loin for the fresh meat trade. His ham was plump and did not carry too much fat. The hog had an excellent side, was well let down in the flank, the side firm and well carried out and would cut out an excellent side of bacon provided it were not too heavy, but he was the type of hog that should be adopted as the ideal. Aside from this, this hog had excellent quality and a very small percentage of the cheaper cuts of meat and no waste in the form of excess fat. Although the other hogs shown in this class were excellent specimens, I think the ribbon was placed properly. Illinois Exp. Station. Wm. Dietrich.

### WYOMING GOLDEN PRAIRIE FOR THE LANDSEEKER.

Over thirty years ago the Union Pacific railway was granted a large strip of country along their route through southeastern Wyoming in which is located the present growing town of Luther. Ranchmen owned some of this land, but fenced in the public land along with their own, thus preventing division of the territory into homes for farmers. There were, however, a colony of Swedish people who secured a foothold in this territory in the early '80's known as the Albin settlement. This colony has steadily improved their farms and perfected systems of tilling the soil which has made it possible to raise immense crops of small grain. Grazing has been good and stock and grain farming has been successfully carried on. This instance is cited as an example of what can be done in the way of farming in this region where the generally understood system of dry farming prevails. Last year the national government decided that fences surrounding government lands must come down and the man looking for a home on the cheap lands of the West must be given a chance. This is the real manner in which this region has come to be opened to the settler. In all there is something like 150,000 acres thrown open to settlement and farms are being taken rapidly. A settlement of German Lutherans has located at Luther and the town is making rapid growth. Luther is but twenty-six miles from Cheyenne. This is land that has been prized by the ranchmen, has been proved to be first-class farming land and is now being sold at prices that should interest every farmer who is seeking a western home. Page 24 of this paper is devoted to a description of this country. A coupon will be found in the lower corner, which if filled out properly with your name and address will bring you a map and literature. The Federal Land & Securities Company, 210 Fifth St., Des Moines, Iowa, have the sale of these lands in hand.

### YOUNG MEN NEEDED FOR FIREMEN AND BRAKEMEN.

Railroad employing officers on the principal roads of the country are experiencing difficulty in securing enough competent men for firemen and brakemen. As summer approaches this difficulty is becoming more and more noticeable. In fact the indications are that the business of the railroads will be handicapped early in the fall, through an insufficient supply of men. The idea of preparing men for these positions by correspondence is not new, but has reached its highest state of development only in the training given by the National Railway Training Association, of Omaha and Kansas City. The work of this association, which is to prepare men for the railroad service, is supervised

by railroad officials, and the training given is prepared by a high official of one of the largest roads. The training is so thorough and is such an excellent preparation for the work, that the graduates of this Association are always in demand. In fact men cannot be prepared fast enough for the many openings. Just a short time ago the association received a letter from one of the largest roads of the country requesting that between eighty and one hundred men be supplied within the next few months. Similar calls for their graduates are coming in from all over the country. The cost of the training is very small, and the association guarantees that its graduates successfully pass the examinations, or they will refund the money paid. Men are eligible between the ages of eighteen and thirty-five years. It will pay anyone interested in securing railroad employment to fill in the coupon on page 12 of this issue, and send it to either Omaha or Kansas City, when full particulars will immediately be sent.

### PIANO BARGAINS.

Many homes are looking to the advent of a piano. The old organ which has dispensed music to the family for years is being superseded by the piano. Every young person should aspire to some knowledge of music. The piano offers entertainment to the person of ordinary as well as of superior musical talent. Girls should be given instruction on the piano at an early age, as no accomplishment is so acceptable in society as musical skill. The cost of a piano is not exclusive. Right now high class instruments may be secured by the family of moderate means. Slightly used instruments that are as good as new, can now be purchased at a large discount on the original price. A Chicago firm has an advertisement of pianos on this page which is well worth the attention of prospective buyers. These instruments are offered by the old and reliable music firm of Lyon & Healy, 20-37 Adams St., Chicago, Ill. Write them for fuller details.

### GOOD PAY—EASY WORK.

This combination is offered in the positions which the Turkish Remedy Co., 500 Main St., Portland, Me., is advertising on page 6 of this issue. They desire to employ one honest person in each locality to deliver their supplies and look after collections. This company manufactures a complete line of family remedies and their business has grown so rapidly that they must hire more help at once. The person who secures this position will have entire control of the sales in his or her territory and may earn from \$80 to \$125 a month. No capital or experience needed as the company pays all the expenses and supplies a beautiful plush-lined sample case containing the seventeen different family remedies, worth \$13.40, together with booklets, circulars, etc. Send your application at once to the address given above. If you have a horse and rig, be sure to tell them so when you write, as they are particularly anxious to hire people who have rigs.

SENT SEVERAL OTHERS AND ALL WERE CURED.

The following testimonial speaks well for the institution of Drs. Thornton & Minor, of Kansas City, Mo., specialists in rectal diseases: "Warrensburg, Mo., March 13, 1904. Drs. Thornton & Minor, Kansas City. Dear Sirs: I will say I was afflicted with the piles for fifty-two years. Tried many doctors and remedies, spent much money and received no benefit. I went to you for treatment, and will say, with much satisfaction, I am now sound and well. Have sent several of my suffering neighbors to you and they have all come home cured. I shall endeavor to send other sufferers and will ever say a good word for you as long as you treat others as you did myself. Very sincerely, Judge William H. Bufford, Railroad Commissioner." Look for Drs. Thornton & Minor's advertisement in this issue and write them.

These standard works are published by the U. S. Government and for the first time advertised for sale.

The prices at which these books are offered are just what they cost the Government to print. They will be mailed prepaid to any address in the United States, Hawaiian Islands, Philippines and Porto Rico on receipt of price.

Remit by Post Office Money Order. Postage stamps and personal checks will not be accepted. Send for free list of Government books on special subjects.

Not more than one of each book to any one purchaser.

Address Superintendent of Documents, Sub Division 86 Government Printing Office, Washington, D. C.

## VETERINARY MATTERS

PROFESSIONAL veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of neighbors. Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of \$1.00. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. All veterinary inquiries should be addressed to this office.

### SYMPTOMS AND TREATMENT.

#### EGG-EATING POULTRY.

Can you tell me what will stop my chickens from eating their eggs? I have tried a few different things, but nothing seems to stop them; they are well and fat.

Make nests in a dark place and have them ten inches off the floor, with tops so that hens must enter from the front. As the hens cannot reach the eggs from the floor and cannot well stand up in the nests they will soon be cured of the vice.

#### INJURED EYE.

We have a bay mare that is three years old. She either jabbed her eye out or got a little chaff in it in or near the sight, and a scum is forming on that portion of the eye. Have been washing it with soft water. Can you tell me what to do for it?

Wet the eye ball with a lotion of two grains of nitrate of silver in an ounce of distilled water once daily for ten days. We fear, however, that the condition of the eye may be due to periodic ophthalmia (moon blindness) which is incurable.

#### SOWS OFF FEED.

I have trouble in keeping my sows on feed after they farrow. They seem to like to feed better than eat. I feed only water the first day and the second give a little shorts which is increased up to the sixth day when whole oats and wheat are fed. The pasture is good.

It would be better to feed a slop of bran and a very little oilmeal at first and then change to a slop of middlings, bran, ground oats and ground barley with milk. Physic each sow with four to six ounces of epsom salts in slop and this may help to get her onto feed again.

#### TO TOUGHEN HORSE'S SHOULDERS.

Can you recommend any method by which horses' shoulders may be toughened so as to prevent them from becoming sore easily? Please give me a recipe for it through your valuable paper.

To toughen the shoulders of horses in spring sponge twice daily with a solution of half an ounce of tannic acid in half a gallon of water or make a strong decoction of white oak bark and use in same way. Some people prefer a saturated solution of alum. Keep collars clean and dry and have them fit properly. Always remove the harness at noon.

#### TUMOR FROM A KICK.

Two months ago one of my mares got kicked on the point of the breast bone and a large lump formed which is on the place where bruised. This proved to be a gathering of pus which later broke. However, the sore did not heal, but continued to irritate the breast and now there is a very hard lump there again, which liniment has failed to affect. What kind of treatment should avail in reducing the lump?

The only way to get rid of the offending tumor will be to have it dissected out by a veterinarian. The wound should heal speedily if properly cared for. Keep her tied up so that she does not bruise part on floor or manger.

#### TUMOR ON SHOULDER.

One of my mares has a lump on her shoulder the size of a small apple; it is hard and seems to be loose under the skin. When first noticed it was the size of a hazelnut, but it got larger and the collar commenced to hurt it, causing inflammation; there is no inflammation when she is not used. There was a lump on the same shoulder last summer, but it got well and I used her at heavy work all the fall and winter and it seemed to be all right until this started.

The best way to handle such tumors is to have them cut out by a surgeon. The wound heals rapidly if kept clean and treated with antiseptics such as a solution of coal tar disinfectant, or if packed with oakum saturated in a solution of equal parts turpentine and raw linseed oil. If not removed the tumors usually enlarge and often form pus when exposed to the irritation of the collar.

#### SCOURS.

I would like to have you tell me what is the matter with my calves. They are sick at birth or inside of two days. Instead of the characteristic evacuations of a new calf, they are whitish and very offensive. Calf soon loses appetite and is too sick to stand up. Please send treatment or preventive.

This form of scours is contagious and the germs causing it either to enter the body by way of the raw navel cord at birth or by the mouth when the calf sucks from an udder that has become tainted with the germs from manure or discharges from vagina. To prevent the discharge provide perfectly sanitary disinfected, sunny, ventilated, white-washed stables and pens. Wet navel of calf at

KILLS TICKS

# ZENOLEUM

CURES SCAB

### The Purest Coal-Tar Dip

The successful shepherd watches his sheep as a cat watches a mouse. He dips in Zenoleum to keep the sheep free from ticks and lice. He dips to cure scab, if by accident scab infests his flock. He disinfects the pens to keep them clean and the sheep healthy, because healthy sheep grow into good fleece and more mutton. This makes a flock profitable. ZENOLEUM is recommended as a remedy for stomach worms.

### The Principal Sheep Breeders in America

## USE ZENOLEUM

They find it the best of all dips after many years' experience. Forty-two Agricultural Colleges say "Zenoleum is best." It is equally good for many ailments and diseases of cattle, horses, swine, and poultry, and has a hundred uses of interest to good housewives.

### No Strings to the ZENOLEUM Guarantee

Here it is: If Zenoleum is not all we say it is, or even what you think it ought to be, you can have your money back. No talk, no letters—just money.

### The Zenner Disinfectant Co.,

## Blacklegoids

Simplest, Safest, Surest Vaccination for the prevention of

### BLACKLEG IN CATTLE

NO DOSE TO MEASURE. NO LIQUID TO SPILL. NO STRING TO ROT.

Just a little pill to be placed under the skin of the animal by a single thrust of the instrument. You cannot afford to let your cattle die of blackleg when a few dollars spent on Blacklegoids will save them. Write for circular.

**PARKE, DAVIS & COMPANY**  
HOME OFFICES AND LABORATORIES, DETROIT, MICH.  
NOTICE.—For a limited time we will give to any stockman an injector free with his first purchase of 100 vaccinations.

birth, and twice daily until perfectly healed, with a 1-500 solution of corrosive sublimate. At same time sponge belly of calf and genitals and udder of cow with a 2 per cent solution of coal tar disinfectant and continue for at least two weeks. Abandon for the time being pens used by scouring calves. Feed cows well on oats and bran.

#### BOG SPAVINS.

I have a large draft colt about ten months old. Four or five months ago he began to lift his hind legs in a peculiar way. When walking he lifts the foot a little higher than he should and swings the entire leg outward. When trotting or moving rapidly I notice nothing wrong. I have examined his hips and stifles joints as carefully as I could, but can find nothing wrong with them. There seems to be a swelling on the front of both hocks. It is not hard and appears much like a swelling caused from a kick. He has always run in the pasture with the other horses and is exceedingly playful. Would this cause the swelling, and would the swelling cause him to walk the way he does? Would a liniment composed of iodine and glycerine be of any use? Any information you can give me in regard to this colt, will be appreciated.

The swellings in front of hocks are bog spavins, but would not be likely to cause the peculiarity in gait noted and that, we fancy, is an evidence of chorea (St. Vitus' dance) which is incurable. Rub the swellings with iodine ointment each other day.

#### FOUNDER.

I have a horse ten years old. He is very poor and has rubbed his mane all out. The skin on his neck is loose. He walks lame in front. It is either in his shoulder or his feet. I had his teeth attended to, but that did no good. He did not pick up at all. Is shod all around. What would you advise?

It may be that the horse is suffering from chronic founder (laminitis), but nobody could decide that or the exact nature of trouble without a personal examination. This should be made by a qualified veterinarian. If this cannot be done, then clip hair from hoof heads and blister with cerate of cantharides. Wash affected parts of skin with a 1-50 solution of coal tar dip; then rub in flowers of sulphur. Repeat as required. Feed black strap molasses freely, first mixing it with warm water, then stir-

### SHOE BOILS

ring in with a mixture of cut hay, bran and corn meal. Use at least a quart of molasses twice daily with whole oats at noon and long hay at night.

#### Less Work, More Results.

Labor saving methods and contrivances have done more for the advancement of farming than any other industry in this country. How to economize on the hardest labor that falls to the farmer's lot—labor that always must be done by hand—is told in a practical way in an attractively illustrated and valuable book, published by the American Fork & Hoe Co., Cleveland, Ohio. While the present edition lasts our subscribers can procure copies free by writing to the above address and mentioning The Homestead. See advertisement on page 8.

#### BARGAINS IN FARM LANDS.

If you want to learn about exceptionally rare bargains in South Dakota farm lands or unusual business opportunities in the new towns in the magnificent new country being opened up by the Minneapolis & St. Louis R. R. extension write for beautifully illustrated descriptive pamphlet on the "New Empire," the farmer's and stockman's paradise. This pamphlet will be mailed free. A postal card will do it. Write at once before edition is exhausted, to A. B. Cutts, G. P. & T. A., Minneapolis, Minn.

## Bog Spavin

Cure the lameness and remove the bunch without scarring the horse—have the part looking just as it did before the blemish came.

**Fleming's Spavin Cure (Liquid)** is a special remedy for soft and semi-solid blemishes—Bog Spavin, Thoroughpin, Splint, Curb, Capped Hock, etc. It is neither a liniment nor a simple blister, but a remedy unlike any other—doesn't irritate and can't be imitated. Easy to use, only a little required, and your money back if it ever fails.

### Fleming's Vest-Pocket Veterinary Adviser

describes and illustrates all kinds of blemishes, and gives you the information you ought to have before ordering or buying any kind of a remedy. Mailed free if you write.

OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer, who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to any considerable number of our readers. Subscribers who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should remit \$1.00, addressed as above.

LAW QUESTIONS CONSIDERED.

TELEPHONE INSTRUMENT—FIXTURE.

Mr. E. McClintock, Northville, So. Dak.—A man sold his farm without saying anything about a telephone instrument which was in the house fastened to the wall by screws. Can he reserve the instrument and remove it from the house, or does it go to the purchaser, as a fixture?

Answer.—We think it goes with the house to the purchaser as a fixture, and that the seller has no right to remove it.

ORAL DITCH AGREEMENT.

A Subscriber, Manlius, Ill.—My neighbor has land adjoining mine on the north. There is a small ditch that carries water from his land down to the line between us, and it used to flow across my land to the main ditch, without any ditch at all. When I put in tile some years ago my neighbor agreed to help dig a ditch along my north line, eastward to the main ditch. I dug half of it, he claiming to be sick at the time, and I finally dug the other half, to prevent a flood on my land. When I clean out this ditch, my neighbor refuses to help me. He denies that he agreed to help keep up the ditch. Can I compel him to make a ditch on his south line to carry off the water to the main ditch?

Answer.—You cannot.

FENCE IN PUBLIC ROAD.

An Iowa Farmer.—A has moved his fence out into the road, away from the old fence line where it has stood for twenty years or more. (1) Had he a legal right to do so? (2) Can he be compelled to put the fence back on the true line? (3) If so, what steps are necessary? (4) Would the fact that his tenant moved the fence without his knowledge excuse him?

Answer.—(1) He had not. (2) No; a man cannot be compelled to fence along the public road at all. (3) While he cannot be compelled to fence along the roadway, he cannot keep a fence standing in the roadway, and the road authorities can remove it as an obstruction, and prosecute A for obstructing the public road. (4) It might excuse him so far as a criminal prosecution is concerned, but would not prevent the road authorities from removing the fence.

PARTITION OF ESTATE.

A Subscriber, Little Falls, Minn.—A and B were husband and wife living in Iowa. B had real estate there in her name. She died without a will, leaving a husband and children. Her estate was never divided between them. A died recently, and all the children are of age. (1) Could A in his lifetime have lawfully deeded his share of B's estate to one of their children? (2) What steps should be taken to have the property sold and the proceeds divided among the heirs? (3) Could the property be sold if all the heirs but one consents? (4) Suppose the deed and abstract of title are lost, or one of the children has them and refuses to give them up, but the deed is recorded, could the property be sold without them?

Answer.—(1) He could. When B died A was entitled to one-third of her property, and he had a right to deed his interest to a child or anyone else. (2) If the heirs cannot agree among themselves to have it done without legal proceedings, then it will be necessary for one or more of the heirs to bring suit against the others in the district court for partition of the land, and perhaps probate proceedings also. (3) It could by legal proceedings. (4) The record copy of the

deed with a new abstract could be used in place of the lost documents.

FENCE ON PUBLIC LAND.

A Subscriber, Fort Pierre, So. Dak.—In 1904 I filed on a quarter section of land in South Dakota. At that time there was a wire fence running through the middle of said quarter section. The cattle man who built the fence has not removed it. Can I lawfully claim and hold the fence?

Answer.—You can. The fence is a fixture belonging to the owner of the land.

ANTE-NUPTIAL CONTRACT.

A Reader, Clayton, Ill.—A man's wife died and he married another woman, but before he married her, she signed a written contract to take only a child's part of his estate. Will such a contract stand in law?

Answer.—Such a contract is called an ante-nuptial contract, and if it be properly and carefully prepared and executed, it is valid and binding at law.

ASSESSMENT VALUATION.

A Subscriber, Wisconsin.—(1) Has an assessor of any town in this state the right to raise the valuation of real estate without notifying the owner thereof? (2) In case such a raise is made by the assessor, must the taxes be paid by the owner?

Answer.—If the valuation be upon the sworn statement of the taxpayer the assessor cannot raise it. If the taxpayer refuses to swear to the valuation the assessor may raise the valuation. (2) If an illegal raise is made by the assessor, the taxpayer may recover excess.

RIVER BOUNDARY—ACCRETION.

Mr. L. Achenbach, Tipton, Iowa.—Suppose a man's land is bounded on one side by a river and a sand bar forms by his land extending into the water, and timber grows upon the sand bar, has anyone a right to cut and remove the timber?

Answer.—No one has a right to cut or remove the timber except the owner of the land. If nothing expressly to the contrary appears in his title his boundary line is the middle of the stream and the sandbar that forms by accretion, belongs to him, together with the timber which grows upon it.

STOLEN PAPER—RETURN.

A Subscriber, Mt. Pleasant, Iowa.—Some parties stole a valuable paper from a man in another county, and put it in with my papers. I do not know how long it has been in my house. In fact I can prove nothing only that I found the paper accidentally. The paper is favorable to me and also the party that I suspect of having put it in my possession. I do not want the paper. I don't want to take advantage of the man who lost it. If I return it to him he will think I stole it, as I can prove nothing as to the party I suspect. Please advise me.

Answer.—Suppose you should have an envelope addressed to the man who owns the paper, in typewriting, by a person who is close mouthed, has some sense and can be depended on as confidential, enclose the paper, stamp the letter, and drop it in a city receptacle for mail. That might accomplish your object with safety.

LAST WILL—CATTLE GUARDS.

A Subscriber, Nashotah, Wis.—(1) When a husband and his wife make their wills, where is the proper place to keep them? (2) Does such a will have to be sealed to be valid? (3) Suppose the wife having made her will, dies, and the will is in possession of the husband, would it be valid? (4) Can a farm be leased for a longer term than fifteen years, in Wisconsin? (5) Do the statutes of Wisconsin compel an electric railway company to construct and keep in repair cattle guards at private crossings?

Answer.—(1) A will can be deposited with the judge of the county court, in a sealed envelope indorsed with the name of the testator, his address, date when delivered, and name of person by whom delivered. The judge gives a receipt for it, and safely keeps it. The law provides that this may be done, but not that it must be done. It makes but little difference where or with whom a will is

# Hay Makers Implements

## Clean Sweep Loader

The business hay loader, but not the kicking kind. Does not bunch, wad, tangle nor thresh hay, and does not elevate manure nor trash. Divides a swath—the only machine for satisfactory cloverseed gathering. Works on hillside or level, in wind or calm. Carrier raises as load increases. Detach without getting off load. Light draft, strong and durable.

### SANDWICH Side-RAKE

TEDDER AND RAKE IN ONE—BETTER THAN EITHER

Does not rope the hay, but teds it into light, flippy windrows so it air cures perfectly. No need for second stirring, which breaks up stems and leaves. It rakes clean and it requires no dumping. The easiest of all rakes to operate, a boy old enough to drive can do it.

Best Pair Hay Making and Saving Tools on the Market. Send for catalog and get all particulars.

## \$80 to \$125 PER MONTH AND EXPENSES

No Capital Needed or Experience Necessary

You Furnish the Horse, We will do the rest.

We have a most desirable position to offer one industrious person in each locality, whose duties will be to take full charge of all deliveries and collections in connection with the introduction and sale of our complete line of Family Remedies. The position is one of trust and honor, therefore each applicant must be honest and have a good reputation, be fairly well acquainted in the community and not too extravagant, else we could not engage them at any price.

**TURKISH REMEDY CO.,** 500 Main St., PORTLAND, MICH.

deposited. If it be safely kept it is valid. (2) It does not have to be sealed. (3) It would. (4) It can. (5) We think the law providing that railroad corporations shall make proper crossings, and erect and maintain proper cattle guards at private crossings applies to an electric railroad, just the same as it does to a steam railroad.

DOCTOR'S CHARGES.

Mr. A. S. M., Forbes, N. Dak.—How much mileage is a practicing physician allowed by law in the state of North Dakota?

Answer.—The law has not fixed the amount of mileage to which a practicing physician is entitled to charge. A legislature has no power to fix such a charge any more than it has to fix the price of labor in any other avocation. It is a matter of private contract between the doctor and his patient, or the employer and his employe, and when no contract is made, what the service is reasonably worth can be recovered.

TAXES—PURE FOOD LAW.

Mr. J. H. Adamson, Milo, Iowa.—(1) Can a person have his taxes due on January 1st, of each year, taken from his assessment of moneys and credits for that year? (2) Where can I procure a copy of the pure food law? (3) If eggs be sold, and some of them prove to be bad, does it subject the seller to a penalty under the pure food law?

Answer.—(1) He cannot. (2) Write to the member of congress from your congressional district, or to one of the senators from Iowa. (3) Not unless the eggs are sold out of the state where they are produced. The United States pure food law has no application to articles of food sold and consumed in the state where the same are produced.

HORSE DEAL.

An Iowa Subscriber.—Recently a person sent word to me that he had a horse to sell, and asked me to come and see him. I did so, and after looking at the horse, I asked the price. The owner told me the price. I said I would take the horse at that price. Two persons were present. They then departed. Then I offered to pay the owner for the horse, but he refused to take the money. (1) Under what circumstances can I get the horse? (2) Have I a right to go and take the horse without any words with the man who owned him?

Answer.—(1) You cannot get the horse at all. A verbal contract for the

### Anchor Fence

is best adapted for the farm because no experience is required to erect it and the item of repairs is eliminated. Send for free fence book 12.

**Anchor Fence & Manufacturing Co.,** Cleveland, Ohio

**WANTED** Herdsman of experience to care for small herd of Short-horns, headed by Gloucester Marshal. Preferably married man. Wish to show. Write O. O. Smith, Des Moines, Iowa.

sale of personal property in Iowa cannot be enforced, unless some part of the price was paid, or in case of a horse, it be delivered. (2) You have not.

When it is evening, ye say, it will be fair weather, for the sky is red. And in the morning, it will be foul weather today, for the sky is red and lowering. Now there is a philosophical reason for this. It was just as true before it was in the Bible as it has been since.

THE DES MOINES DAILY NEWS

OFFERS A THREE MONTHS' TRIAL SUBSCRIPTION BY MAIL FOR 40 CENTS.

This is so cheap that The News should be in the home of every one of our readers, as all have a chance to see just how good The News is at thirteen and one-third cents a month.

The publishers will stop the paper at the end of the three months unless you decide to renew your subscription.

The News is independent in politics, publishing the news in a condensed and readable form. Daily market reports, farm news, household hints, special woman's page, sporting gossip, and in fact everything that goes to make up a complete metropolitan paper.

Send today to THE DES MOINES DAILY NEWS, Des Moines, Iowa, for a trial subscription, enclosing 40 cents in stamps or money order, and receive the Daily without Sunday for three months.

Good Treatment and Fine Results.

The X-Ray Incubator Co., of Wayne, Neb., writing under date of April 22d, say: "We are very well pleased with the results received from our advertisement in The Homestead and wish to thank you for the favors shown."

Free Trip to see this Hay Press

OFFER GOOD FOR 30 DAYS ONLY

The New Century has Pull Power, 7-inch Step-over. No taking off of wheels. 2 or 3 strokes to the round.

The ONLY truly successful SELF-FEED Hay Press on the market.

If you are going to buy a hay press we will pay your railroad fare to some point where you can see the New Century, Full Circle, All Steel, Self Feed Hay Press, and all other makes on sale. It would cost us as much as, or more than, your railroad fare to send a salesman to see you. Buy the press that suits you best. We pay your railroad fare, no matter which one you buy. When you see how easy the New Century is on the horses, how well it is made, what smooth bales it turns out and how many of them, you will see why we make such an offer. We have issued 1000 transportation cards which entitle the holders to their railroad fare to one of our many agencies. Send us your name at once for one of these cards. You can use it any time. **10 DAYS' FREE TRIAL.** If you cannot come to see the New Century we will send one for ten days' free trial. Send it back if you don't like it, and we pay the freight.

**WESTERN STEEL & WIRE CO.,** 105 Osage Avenue, Kansas City, Kan.

# CLASSIFIED ADVERTISEMENTS

ADVERTISEMENTS are inserted in this department of The Homestead (and, by special arrangement, also published in The Wisconsin Farmer, of Madison, Wis., and The Farmer and Stockman, of Kansas City, Mo., without additional charge) for the low price of five cents a word for each insertion, no insertion being accepted for less than \$1.20; and cash must invariably accompany this order, as we keep no books for this class of business. No display type or illustrations are admitted. Each number and initial letter or abbreviation, including the address, counts one word. Form for printing this page closes on Saturday of the week preceding publication; hence copy must be mailed so as to reach The Homestead on or before Saturday morning. Guaranteed combined circulation of the three papers over 190,000, reaching a farm population of at least 950,000 in the states of Iowa, Illinois, Nebraska, North and South Dakota, Minnesota, Wisconsin, Missouri, Kansas and Oklahoma.

## Potato Harvest

The Best Tools Bear This Label

WHEN it comes to digging potatoes you surely want a potato fork or hook. Both are good. Other tools can be used, but they make the work much harder. Now the question is whether you will have a genuinely good fork or hook—one solidly constructed of dependable materials, that works just right for you—one that is awkward and weak and causes you to waste time and energy?

When you buy True Temper Potato Forks and Hooks you get

**"The Best Tools You Have Ever Bought At the Same Prices You Have Always Paid."**

Because special tests and inspections prove all True Temper tools to be correct in quality, construction, "hang" and temper.

Forks, Hoes, Rakes, Hooks, Weederers. Cultivators—every kind of Farm

and Garden Hand-Tool.

Ask your dealer to show them to you.

Our FREE BOOK, "Tools and Their Uses," will tell you all about special-purpose tools. Write for it today.

AMERICAN FORK AND HOE CO.,  
1235 Am. Trust Bldg  
Cleveland, Ohio.

## HORTICULTURAL TOPICS

THIS department is conducted by an experienced horticulturist. All questions relating to horticulture will be answered if of sufficient general interest to warrant a reply in this department. Communications and inquiries upon horticultural topics should be addressed to this office.

### RELATIVE MERITS OF LIQUID AND DUST SPRAY.

One of the highest and most comprehensive investigations along this line has just been completed by Prof. C. S. Crandall, of the Illinois Experiment Station, results of which have just appeared in printed form in Bulletin No. 106.

These experiments were commenced in 1903 for the purpose of testing the relative effect of the dust and liquid method of applying the spraying materials. The portion of the orchard selected for the work contained 108 eighteen-year-old trees of all variety. The experiment was closed with the harvesting of the crop in 1905.

The following conclusions are drawn from this experiment:

Insects and fungi injurious to fruit crops are assumed to be here as a permanent fixture and, in order to secure marketable fruit, it is absolutely necessary to combat the pests in some manner. Thousands of dollars have been spent experimentally in the effort to determine which of all the remedies suggested could be relied upon to produce the best results at least cost.

The result of the experiments led to the introduction of Bordeaux mixture, applied as a liquid spray, as a remedy for fungi and various forms of arsenic as remedies for chewing insects.

These remedies have come into general use and, while frequently failing to give perfect satisfaction, because of improper preparation, careless application, or too frequent downpours of rain, is still recognized as the best that have been discovered up to the present time.

The introduction of dry Bordeaux mixture applied with arsenates as a dust spray was prompted by a desire to decrease the cost and labor of spraying. It does both of these things, but its value can not rest upon cost and ease of application. The final test of value is, and must be, efficiency in preventing injury from fungi and in killing insects.

The experiments conducted by the department of horticulture, testing the relative efficiency of the wet and dry sprays have extended over three seasons; they have included an aggregate of 424 trees, 147 of which were sprayed with liquid, 167 with dust, and 110 maintained as control trees which received no spray. The number of apples produced by these trees totals 372,726. These fruits were examined individually and record made of blemishes.

The experiments have been reasonably extensive, they have been carefully executed and the conclusions drawn are fully warranted by the results obtained.

With regard to the effects upon foliage the results are identical in all orchards and in all seasons. Trees sprayed with liquid Bordeaux and Paris green retained their foliage in healthy working condition throughout the season. Dust-sprayed and check trees may be placed together because the behavior of foliage was the same in both. Leaves began falling in July and, in early September, these trees were practically denuded. This loss of foliage by dust-sprayed and check trees was due to apple scab, against which disease the dust spray was entirely ineffective. The effects of this loss of foliage are very serious. The assimilatory processes of trees are active in proportion to the working leaf surface; as leaves fall, these processes diminish until brought to a stop by the entire loss of foliage, long before the work of the should normally end. The fruit is starved, does not approach normal size, and buds for the next year can not be properly developed.

It also frequently happens that under the stimulus of rains and high temperatures in October, leaf buds of the defoliated trees, that normally should remain dormant until spring, unfold and expand clusters of new leaves. This renewed and abnormal activity of the trees affects fruit buds also; a considerable portion of them have been observed to swell and some expand the flowers. All this is greatly to the detriment of the trees and fatal to the prospective crop for the next year. It emphasizes the necessity of such treatment as will retain the foliage in full working condition until the end of the season.

As is clearly indicated by accompanying photograph in this bulletin, trees which were sprayed six times with the bordeaux were decidedly benefited. In one case the foliage of the season is intact, doing full work and the other not only has the foliage of the season been dormant until the next spring have been lost, but in the attempt to repair the loss the buds that should have remained called into activity and have put forth leaves.

This extra draft upon the resources of the tree impairs vitality. The tree enters the winter in weakened condition and, while it may survive, is unprepared to bear a crop or even to make a satisfactory growth the next season.

Differences in fruit were as marked as were differences in foliage. Liquid-sprayed trees gave smooth fruit of good size. Dust sprayed and check trees gave small, ill-formed fruit, badly marked by scab and of very little value even as evaporator stock.

Dust spray is 52 per cent cheaper than liquid spray and it is easier to

## ACTUAL TESTS

are the things which count. Farmers all over the country made tests for us last year with

## Nitrate of Soda

(The Standard Ammoniate)

In every case the crops which had a top dressing of Nitrate of Soda yielded a far more abundant harvest than those without. We want more tests on

## WHEAT Rye or Barley

and to a limited number of farmers will send sufficient Nitrate of Soda for the purpose

## We Breed 7 Varieties of SEED CORN

We raise every ear of corn sold by us for seed on our own farms. We cultivate 7 large farms; each of them produces a pure variety of seed corn. Our plan of cultivation insures your getting pure bred corn, the best varieties.

We have increased the yield of certain varieties from 35 to 90 bushels per acre on the same land. That shows what breeding will do. If you want some of that kind of seed corn send your name for catalog. We sell hundreds of bushels of seed corn to our neighbors annually; they tell us it is the best they can find anywhere. That's proof that our seed is what you want.

transport about the orchard. It has no other advantages.

The results of the experiments are sufficiently decisive to warrant the conclusion that dust spray is absolutely ineffective as a preventive of injury from prevailing orchard fungi, and that it is considerably less efficient as an insect remedy than is the liquid method of applying arsenates.

The effort of the orchardist may best be expended in perfecting the preparation and application of the standard bordeaux mixture combined with arsenates.

### The New Strawberry Plants.

To the Editor of The Homestead:

Strawberries should by this time be mostly set out and growing nicely. Occasionally plants will be late in arriving and sometimes it is in May before the last setting is made. When for any reason more plants are desired quite late in the season—sometimes when the extra earlies are already in bloom there is still a chance to get plants that are not too far advanced by sending to extreme northern nurseries. Some years ago a nurseryman on whom I was depending to send me plants, failed to do so and I found myself at the beginning of May without means to set my plantation and early varieties around me with green berries on them. There was only one chance. I sent to a Michigan grower and stated the case. I ordered on Monday—on Friday the plants were here and by Saturday night all were set and made a good stand. Michigan plants are nearly a month later than Missouri plants.

After the plants are set and growing and the ground stirred, the rows must be gone over to remove all bloom and buds that appear. Spring set plants will bear some fruit, but this should never be permitted as it weakens them so that they cannot send out good strong run-

## HURST POTATO SPRAYER ON FREE TRIAL

No money in advance—Pay when convenient. Sprays Everything—Trees; Potatoes, Truck, etc. 4 rows at a time—20 acres a day. Double Your Crop—extra yield one acre will pay for its first season. A boy can operate. GUARANTEED 5 YEARS. Wholesale Price (where no agent). Agts. wanted. After trial if you keep it—pay when you can. Special FREE OFFER for first one in locality. "Spraying Guide" and full information.

ners for next year's crop. A good time to pinch off buds is when the first hoeing is given which should be soon after the plants are set. L. R. Johnson.

### GOVERNMENT BOOKS ON STOCK.

For the first time the United States government is advertising standard works of its own publication at cost price to farmers and stockmen. The books offered are the following: Diseases of the Horse, Special Report of the Sheep Industry in the United States and a report on Diseases of Cattle and Cattle Feeding. Each one of these publications are bound in cloth and are good, serviceable and useful books for any farmer or stockman. They are edited by the experts in the government department of agriculture and animal industry. Each book is well illustrated with cuts and color engravings which facilitate the understanding of anatomy of animals. These books are priced on page 5 at actual cost. They are large and as it costs considerable to print and mail the government is taking this method of preventing many from sending for the books through curiosity. A full description of these publications will be found on page given above. They are being advertised by the Superintendent of Documents, Sub-Division 68, Government Printing Office, Washington, D. C.

## OUR DAIRY DEPARTMENT

All communications relating to dairy matters should be addressed to this office. Inquiries of general interest regarding dairy management and production will be promptly answered.

### QUALITY IN UDDERS.

The size of an udder, especially of the mature cow, is often a very deceiving indication of the amount of milk she can produce. Quality is a mark of efficiency in this respect that should not be overlooked. The udder is directly concerned in the making of milk. It may do its work well or poorly depending on the activity of the various cells in its organization. While it is not an absolute rule it may be taken as a general one that the external appearance of the udder is a fair indication of the structure of those parts that are within.

On frequent occasions one is convinced of the fact that a neat, trim udder of moderate size is more likely to yield a larger mess of milk over a maximum period of lactation than a large udder of meaty texture. Generally a lack of quality throughout the conformation is associated with a coarse udder, though of course one generally notices this discrepancy in the general make-up of the animal first. An extreme example of a coarse udder is one that is thick skinned, showing no vein canals on the surface and which feels inelastic, knotty and hard to manipulate. Long, coarse hair hangs from the quarters and applies itself closely to the teats to hinder the hand of the milker, and form a place where dust and fine litter is collected. In aged cows a coarse udder becomes heavy and the teats protrude in many directions which makes milking tedious.

A much more preferable condition to the one just recited is where the hair is short and fine and grows out from velvety, pliable skin that continues up into the flank where on wintry mornings the small boys delight to warm their hands. The veins should stand out showing well the branching, especially on the ovals between the thighs. Such an

udder is inviting to the palm of the milker and as the milk is drawn loses its fullness gradually until the quarters appear to consist of folds of soft elastic skin. This is not the case with the coarse, meaty udder, and one is never certain by observation alone when such a one is milked dry, as it does not lose its form so noticeably. Large development with plenty of quality is the ideal condition in an udder and when found on a normal, healthy cow is the best of external signs of excellence.

### A TENANT DAIRY FARM.

The Department of Agriculture has recently published a bulletin describing the operations of a dairy farm in southern Michigan that pays the owner of the farm twelve per cent on his investment and the tenant the snug sum of \$1,500 a year.

The farm in question contains 120 acres and, with the buildings, represents an investment of \$12,500. Each man owns half the dairy herd, while the tenant furnishes the horses and ordinary farm implements, though such heavy machinery as engines, silage cutters, etc., are paid for out of the undivided receipts. After all expenses are paid the net proceeds are divided equally.

Sixty cows are kept at present, together with a few hogs, and the gross receipts from the farm last year was \$6,000. The strange part of the management is that the cows are put in the stable in October and are never let out until spring. The cows are fed silage and grain twice a day and alfalfa hay at noon. Bran forms the basis of the grain ration and is fed the whole year round, along with cottonseed meal and oil meal. All manure is carefully saved and its application on one eighteen-acre field has increased the yield from 400 bushels in 1894 to 1,200 bushels three years later. The application of manure to the soil has resulted in bringing the yield of ensilage corn up to twenty-five tons per acre. Corn stubble on this farm is generally sown to rye, the rye cut for hay and the field planted to corn again. All manure is hauled directly from the stable to the field, a carrier transmitting it directly to the spreader, which is kept under cover near the stable.

The milk from this dairy herd is usually sold at the rate of five cents a quart delivered to the customer, so that the profit of this farm comes more from its large production than from high prices obtained for the product.

Our dairy readers we know would be interested in reading the further details of this profitable tenant farm. These will be found in Farmers' Bulletin No. 280, which may be obtained upon application to the Department of Agriculture, Washington, D. C.

### TATTOOING DAIRY CATTLE.

The objection to the ear tag on the ground that it is easily torn out of the ear on cattle that run in pasture much of the time, has led to the adoption of the tattoo marker by many dairymen. The operation is performed by a tool called the marker, practically a pincher, which bears on one face of the jaws the desired figures or characters formed by a number of steel points or needles. The number is then pressed in the inside of the calf's ear where the hair is the thinnest, and the figure formed by the impression is immediately smeared or painted with a special tattoo ink or paste. This results in filling the needle holes with the pigment which dyes under cuticle permanently.

It is claimed that once the tattoo has been properly made it will never fade or grow dim. Calves may be operated upon when a few days old and the figures will not be affected by age. The advantage of this system is that the ear is not disfigured and the mark of the owner is permanent. While the tag may carry more information, possibly, than the tattoo the difference is not enough to offset the good points of tattooing.

### Judy's Angus Combination Sale.

The better lots consigned to the combination Angus sale, held under the management of Mr. M. A. Judy, on Wednesday, May 1, at Chicago sold well, but there was a tendency on the part of those present to discriminate too much in the matter of condition. The top price of the sale was \$525, at which figure the Blackbird bull, Undalata Blackbird, consigned by Messrs Harry Weissenger & Son, of Shelbyville, Ky., went to Mr. J. W. Reedy, of Beresford, S. Dak. Mr. Stanley Pierce, of Creston, Ill., topped the female consignment, paying \$490 for Blackcap Ito, a daughter of the noted bull, Prince Ito, consigned by Judge John S. Goodwin, of Naperville, Ill. Col Silas Igo did the selling in his usual satisfactory manner and was assisted

## "MAIL-ORDER" CREAM SEPARATORS

Many inquiries are made as to whether the sale of "mail-order" and the various other so-called "cheap" separators seriously hurts the sale of DE LAVAL machines. There is undoubtedly a good deal of general interest on the part of separator buyers in this respect.

The answer is NO, that it certainly does not. On the contrary, the sale of "mail-order" and other "cheap" machines is helping the sale of DE LAVAL machines, which is larger from year to year regardless of all kinds of attempted competition.

The people who buy "mail-order" and other "cheap" separators at from \$20 to \$50, are almost invariably buyers who could not have been induced to pay \$40 to \$100 for a DE LAVAL machine to begin with. They would either have gone on without a separator or bought one of the fake "dilution" contrivances termed "extractors" or something of that kind.

But having once bought a "cheap" CENTRIFUGAL separator they find enough merit even in it to satisfy them that they cannot afford to be without one, though they soon learn that in separators at least the best is the cheapest. So when their first machine is worn out within a year or two, and frequently within a few months, they are almost sure to be buyers of DE LAVAL machines the second time.

Then they have come to appreciate the importance of skimming clean and being able to run a heavy cream, as well as of having a machine of ample capacity and one that will last from ten to twenty years, even if it does cost a little more.

Thousands upon thousands of buyers of low-grade separators thus become second time converts to the use of DE LAVAL machines, and the DE LAVAL Company looks upon the "cheap" separator manufacturers and "mail-order" concerns as doing the best kind of missionary work for them to this end.

When the buyer wants to cut out this expensive "primary school" separator experience he pays the price and buys a DE LAVAL machine in the first place, usually saving its cost twice over while the "cheap" separator buyer is being educated to the point of doing so.

A DE LAVAL catalog or any desired information is to be had for the asking.

## Because You Need The Money

It's your business and if you don't attend to it, who will? You cannot afford to keep cows for fun. That isn't business, and, furthermore, it isn't necessary. There is money in cow keeping if you go at it right, and besides there is more fun in going at it right than there is in staying wrong.

You need a Tubular Cream Separator because it will make money for you; because it saves labor; because it saves time; because it means all the difference between cow profits and cow losses.

Look into this matter; see what a Tubular will do for you and buy one because you need it.

How would you like our book "Business Dairying" and our catalog B. 121 both free. Write for them.

Kills Prairie Dogs and Gophers of all kinds. Endorsed by State Experimental Stations. 1,400 tablets prepaid for \$1.25. Warranted. Katicide Tablets 25c. Ask druggist or send direct. Booklet free. F. D. Chemical Co., Fort Dodge, Ia.

## POULTRY DEPARTMENT.

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

### Raising Ducks.

To the Editor of The Homestead:

The raising of ducks is among the most profitable of home industries. The Imperial Pekin ducks at ten weeks old weigh from five to six pounds, bringing an average price of eighteen cents a pound. Machinery has enabled the duck raiser to accomplish his ambition of having his stock in the markets when prices are the best and also of raising large numbers of birds in a limited space of time.

The beginner should start modestly and increase his plant as his knowledge of the work increases. It is not at all necessary that ducks should have access to water to be raised successfully as they grow and thrive as readily without. There are successful plants where thousands of ducks are raised that have no water save that which is given them as drink. Houses for ducks are simple affairs. A duck does not mind the cold if it can keep its feet warm. Indigestion is not so prevalent with ducks as with chickens. The duck's ceaseless motion aids the digestive organs. The food of the duck is both vegetable and animal in nature; when the birds are raised in confinement this diet must in a measure be imitated to get the most satisfactory results. Too much hard food such as grain, does not agree with these birds and they cannot thrive on it. I always feed a mixture of corn meal and bran with scraps and plenty of grit. Do not feed sloppy food. Every farmer, every small home, where there is sufficient room, should grow a few ducks of some kind with his other poultry, as nothing is more attractive as a variety in table fowl.

B. F. W.

high scoring females at \$1.50 for fifteen, or \$2.50 for thirty.

—Buff Orpington eggs are offered for sale by Mrs. G. R. Fuller, Rolfe, Iowa.

—Rose Comb White Leghorn eggs are offered for sale by Mr. T. M. McEvoy, Emmetsburg, Iowa.

—Barred Plymouth Rock eggs from exhibition stock are offered for sale by W. W. Soholes, Onawa, Iowa.

—Aye Bros., Blair, Neb., offer Barred Plymouth Rock eggs of the Bradley Bros. and Judge Norvall strains at \$1.00 per fifteen.

—Mrs. E. F. Escher, Manning, Iowa, is selling Barred Plymouth Rock eggs from her very best matings. She has the Bradley and Ringlet strains.

—Single Comb White Leghorn eggs are offered for sale by John C. Miller, Harlan, Iowa, at \$1.00 per sitting. He has good stock and is a reliable breeder.

—White Wyandotte eggs exclusively, is what Mr. A. J. Podendorf, of Logan, Iowa, is offering for sale. Read his advertisement and send him an order, and you will be well satisfied.

—Pure-bred White Wyandotte, White Holland turkey and Toulouse geese eggs are offered for sale by the Forest Home Poultry Farm, Box 253-H, Audubon, Iowa. This firm has the very best of stock and is one of the most reliable poultry firms doing business in the state.

—"White my orders have been very satisfactory, my poultry have laid unusually well," is the text of a letter from Mrs. C. F. McLochlin, Gray, Iowa. In her advertisement are offered eggs from White Holland turkeys, Imperial Pekin ducks and White Wyandotte chickens. Moderate prices considering quality. Write your wants mentioning The Homestead. See page 11 for prices.

—Messrs. Aye Brothers, Blair, Neb., who advertise eggs from B. P. Rock chickens at \$1 per fifteen wish to call the attention of readers to the prizes which this flock has captured. At the big Washington county show, against strong outside competition, they won third in cock, first in cockerels, second and third in hen and first in pullet classes. This indicates something of the quality of eggs they are selling.

—"The eggs from my flock of S. C. White Leghorns are hatching splendidly," writes Mr. R. E. Brown, of Richland, Iowa, and from 478 eggs I have hatched 418 strong, healthy chicks. I am using nothing but Wyckoff cockerels on all my flock this season and believe I can supply Homestead readers with eggs that will improve their flocks. Write me, mentioning The Homestead." See page 11 for his advertisement.

—A neat little poultry circular has come to hand from Mrs. Frank Hart, of Danbury, Iowa, breeder of Light Brahmas, R. C. Brown Leghorns and Toulouse geese. At present her supply of goose eggs is exhausted. However, she can handle a number of orders of eggs from her chickens. Mrs. Hart has spent a good deal of money and considerable time in bringing the flock up to its present standard, and we hope that our readers will show their appreciation of her efforts by giving her the recognition she deserves. See the advertisement on page 11.

—Mr. Hartman, one of the influential business men of Winterset, Ia., has developed into one of the largest and best known poultry men of the central part of the state. He started in the chicken business as a side issue, but now, he is so devoted to the business that a large portion of his time is given to his fancy stock. A single glance at his birds would convince you of the fact that Mr. Hartman has reason to be proud of his products. They are of the 219 strain Barred Plymouth Rock variety, and will show up well among the very best. If you want the best in this variety write Mr. W. A. Hartman, Winterset, Iowa, and mention The Homestead.

### Salt for Poultry.

To the Editor of The Homestead:

One of your subscribers, Mr. A. H. Evans, sends the following inquiry:

I wish you would tell me if salt will kill hens. One of the boys placed quite a large pile of salt near the hen roost and since that time we have lost more than fifty hens.

By experience I have found where cows had been deprived of salt they exhibited an abnormal appetite for it. Chickens relish salt in their food the same as human beings. Salt prevents worms and gapes and increases the egg yield, but is very loosening to the bowels if improperly handled. I have known pork brine and ice water when thrown out to kill fowls that drank it. Feed one teaspoonful of pulverized salt to a quart of soft feed.

Subscriber.

There must be meat in some form in the daily bill of fare for laying and growing stock. But that amount should not exceed 25 per cent of the total amount of feed given. Too much meat and bone produces laxity of the bowels, impairs the digestive organs, and often results in soft-shelled, thin-shelled and infertile eggs.

Do not forget the green food for those brooder chicks. It is absolutely essential. So is grit and charcoal in their food.

### POINTERS.

—Barred Plymouth Rock eggs are offered for sale by J. M. Janssen, Sibley, Iowa.

—Silver Laced Wyandotte eggs are offered for sale by O. M. Healy, Bedford, Iowa.

—Mrs. L. C. Reese, Prescott, Iowa, offers Barred Plymouth Rock eggs for sale from a pen headed by a 92 point cockerel and from

## Homestead Brought 75 per cent of His Orders.

CHICKEN GRIT MANUFACTURER AND POULTRY BREEDER HAS THE USUAL EXPERIENCE OF ADVERTISERS.

Mr. W. A. Hartman, of Winterset, Iowa, manufacturer of limestone grit for chickens and breeder of 219 strain Barred Plymouth Rocks, sends us copy for change of his advertisement and writes:

"The Homestead is surely all right as an advertising medium and your patrons know where to go for good service. I advertised in several other papers, but out of nearly one hundred orders received during the last eight weeks, The Homestead has brought more than 75 per cent. I wish you the fullest success."

## Incubator

**\$7.00** Buys the Best 120-EGG Incubator

freight prepaid, ever made.

Double cases all over: best copper tank; hot water self-regulating. Best 100 chick hot water Brooder \$4.50. Incubator and Brooder ordered together \$11.00. Satisfaction guaranteed. Our book, "Hatching Facts" tells all about them. Mailed free. Write today.

Belle City Incubator Co., Box 52, Racine, Wis.

## LIKE MOTHER HEN

Only Adjustable Suspension Poultry Brooder made. Thousands in use. Heated by warm water. Temperature always uniform. Warm water tank above chicks with loose damper opening under which chicks hover. Warmth equally spread and chicks do not crowd. No under heat to burn their feet. No steps or bridge to climb. No lamp flames or burners to breathe. Should lamp go out the warm water would keep the chicks alive all night. Lamp above chicks, has safety device, adjusted in height as chicks grow. Send for Catalog 106. Automatic Hatching Co., Detroit, Mich.

## THE FARMERS' FRIEND

E. J. Ingwersen, Lyons, Iowa.

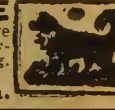

He makes Farm Gates, Water Tanks, Feed Troughs, Hay and Hog Racks for Wagons, Screen Doors and Windows, Kitchen Sinks, Post Tamperers, Jammock Racks, Fancy Plate Racks, Lawn Swings and Clothes Racks. He will sell direct to the farmer at surprisingly low prices. Write for his price list and see how much money you can save. Mention this paper.

Farmers wanted as agents AUGUST POST Moulton, Iowa.

## DOGS FOR SALE

AND ALL kinds of pet and live stock. Send 10 cents for sixty-page descriptive illustrated catalog.

MOUNT PENN KENNELS, Reading, Pa.

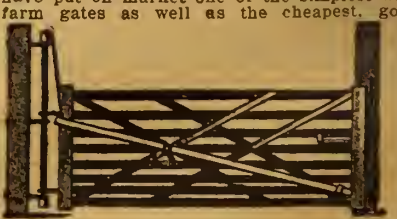

have been making sales extraordinary. This enterprising firm are wide and favorably known as among the largest and best importers of European stallions and mares of any firm in America. During the late winter they sold to the Pleasant View Stock Farm, of Pukwana, So. Dak., eighteen Percheron mares, (imported) and one very choice imported Percheron stallion. The following sales were all made from their famous Clinton barns during April: 1 2,200 pound Belgian stallion to Idaho; two Percheron stallions to state of Washington; one Percheron, one German Coach to Nebraska; two Belgians to North Dakota; three Belgians to Iowa; two Percherons to Wisconsin. The above were all imported. The United States government placed an order with this wide-awake concern for thirty very high grade Percheron and French coach stallions for the government's special use in Montana. These horses were all delivered in April. Mr. O. R. Champian sails for France and Belgium in a few days to be on the ground early. He expects to bring a fine collection for 1907.

### SOME SPLENDID LAND BARGAINS.

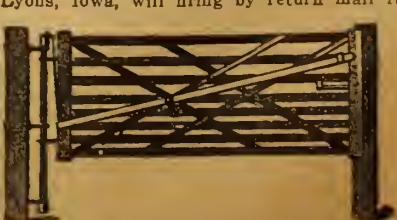

J. H. Dumont & Son, of Omaha, Neb., are offering the following exceptional bargains in farms: 440 acres mostly virgin soil, with timbered shelter for stock; living water, in western Iowa at \$65 per acre; 320 acres, twenty miles north of Omaha with fine shelter for stock and complete hog feeding plant, including water system at \$70; 360 acres, twenty-five miles from Omaha in the southwestern part of Washington county, which is especially adapted to grain and stock raising, at \$80; quarter section of pasture and hay land near Lincoln at \$42; 680 acres, two and one-half miles from Beatrice, partly seeded to alfalfa, fine stock feeding plant, good shelter, 250 acres in cultivation at \$60. Will furnish a tenant for the Beatrice farm who will rent for a term of years and pay as rent \$2,000 per year and all taxes. These properties are all owned by banks or individuals who have special reasons for selling and have authorized them to close them out at bargain prices. These properties must be sold within the next thirty days and they are being offered away below their value. See advertisement on page 19 of our May 2d issue. And write Messrs. Dumont & Son at once. Kindly mention The Homestead when writing.

### THE DAISY FARM GATE.

The Ingwersen Mfg. Co., of Lyons, Iowa, have put on market one of the simplest wire farm gates as well as the cheapest, good

gate on the market, of this construction. A letter addressed to E. J. Ingwersen Mfg. Co., Lyons, Iowa, will bring by return mail full description and prices on this and other valuable devices designed for farm comfort. Mention Homestead when writing.

## WITH THE EDITOR.

Two young persons whose mothers were sisters decided to marry. The parents of the young man were much opposed to the match, believing the marriage of cousins to be a violation of the laws of nature. The cousin lovers, of course, knew of this opposition; they also knew that the marriage was contrary to the laws of the state in which they lived, but they were not to be daunted. The consent of parents can be dispensed with, and if they could not be married in Missouri, why they could go elsewhere.

With the connivance of the mother of the bride-to-be, an elopement was planned. The marriage was accomplished, and the young couple returning began life as man and wife in a state which refuses to sanction such unions.

In the course of time a child was born to the cousins. Shortly afterwards they were visited by the two grandmothers, one of whom had awaited the baby's coming with much anxiety, the more painful because it was studiously concealed. Left alone a few moments she eagerly tested first the child's hearing and then its sight. On finding that it was neither deaf nor blind her joy and relief were so great that she burst into tears. At this moment the other grandmother unexpectedly came into the room, and at once noticed the other's tears, and grasping the situation said: "I just knew you were borrowing trouble. You see how foolish you've been. The baby is all right and as bright a child as anyone need ask." "Yes, the baby is all right," said Grandmother Number One, kissing the child tenderly as she spoke, "but though you won't admit it, you know as well as I do, Mary, that there's a horrible risk to the children when cousins marry."

Mrs. Brown was having "the time of her life," as she expressed it. After an absence of twenty-five years she was "visiting round" among the friends of her girlhood, who had remained in the place where they were reared. As she

sat chatting with Mrs. Elliott, first one family and then another came up for discussion.

"What about the Humes, Ellen? How has their marriage turned out?"

"Oh, they're getting along all right, Hattie and Jake, I mean; the children don't seem to amount to much, though. They were all awfully dull at school and they don't seem to be much better now they're older."

"Well, isn't it generally that way when cousins marry? The children are usually dull or blind or deaf or lacking in some way, I've noticed. For my part I think it is a burning shame that the law don't prevent such marriages. It does in Kansas, but then out West they are more progressive than back here."

In the Bible which I used as a girl, between the Old and New Testaments, there was a page containing a list of persons between whom marriage is forbidden by the church. In newer Bibles this list does not always appear, but public sentiment and legal enactment alike bear witness to the wisdom of some at least of the old ecclesiastical regulations which forbade marriage between certain blood relatives.

For some time it has been generally admitted that statistics bear out the theory that children are frequently born deaf when their parents are closely related by blood. Dr. Graham Bell's recently published census of the blind and deaf in this country makes it quite clear that the principle involved, viz., hereditary degeneration in the offspring of nearly related persons, holds good as regards blindness also. His report states that 5 per cent of the blindness in this country is in cases where the parents are cousins. About one in four of these unfortunate were born blind.

Lovers are usually thoughtless where the future is concerned. Sometimes they are also selfish. Cousins will marry; if they ignore the right of every child to be well born the state should not. Individual liberty is all very well, but individual liberty should not be a fetter. Since it is an approved and admitted fact that the marriage of blood relatives, notably that of cousins, results in physically degenerate offspring, concerted action should be taken to prevent such unions.

The marriage of cousins is now illegal in some twenty states of America. In the face of Dr. Bell's report it should be prohibited in every state in the Union. Economic reasons frequently force reforms which lag when backed by sentiment alone. Possibly the constantly increasing cost of institutions for the blind and the deaf will hasten desired action in the direction of protecting the rights of those, who, in the nature of things, are dependent upon others for protection.

## HOME AND HOMEMAKING.

## LITTLE HELPS BY THE WAY.

Friends, in this world of hurry and work and sudden end, If a thought comes quick of doing A kindness to a friend, Do it that very moment! Don't put it off—don't wait! What's the use of doing a kindness If you do it a day too late? —Charles Kingsley.

## OPPORTUNITY.

My dead love came to me and said, "God gives me one hour's rest To spend with thee on earth again, How shall we spend it best?"

"Why, as of old," I said; and so We quarreled as of old; But when I turned to make my peace, That one short hour was told.

## A THOUGHT FOR PARENTS.

We hear and read a great deal about impolite children, but very little about impolite teachers and parents. Many a devoted but thoughtless father or mother will say things to a child that they would never think of saying to a grown up person. Yet a child is a most sensitive little creature, and we have only to think back over our own childhood to recall many unnecessary mortifications and heartaches.

## DON'T DO THIS.

I know a great many women, and no doubt you do, too, who, when house cleaning time comes around, take the old worn carpets for the boys' rooms. Every chair with a broken rung, or a rocker with only one arm, is thrust into the boys' room with the Old Jerusalem pictures and lace curtains with a great deal of "open work" displayed in their starchy freshness. Boys need bright, pretty rooms, just as much as girls, and if they are given the rubbish room in which to sleep, very naturally they think no care need be given it, since the door is always kept closed, no one gets to see in there, and it makes little difference what appearance it has. If a boy has a neat, pretty room, he will take pride in it, and no mother should make the rooms unattractive for her boys. It is the cheerless homes which send boys out of the

## STEEL ROOFING

PER 100 SQUARE FEET

# \$1.50

FIRE WATER AND LIGHTNING PROOF

Most economical and durable roof covering known. Easy to put on; requires no tools but a hatchet or a hammer. With ordinary care will outlast any other kind. Thousands of satisfied customers everywhere have proven its virtues. Suitable for covering any building. Also best for ceiling and siding. Fire-proof and water-proof. Cheaper and more lasting than shingles. Will not taint rain-water. Makes your building cooler in summer and warmer in winter. Absolutely perfect, brand new, painted red two sides. \$1.50 is our price for our No. 15 grade of Flat Semi-Hardened steel roofing and siding, each sheet 24 inches wide and 24 inches long. Our price on the corrugated, like illustration, sheets 22 inches wide x 24 inches long \$1.60. At 25 cents per square additional we will furnish sheets 6 and 8 feet long. Steel pressed brick siding, per square \$2.00. Fine Steel Beaded Ceiling, per square \$2.00. Can also furnish standing seam or "V" crimped Roofing.

**WE PAY THE FREIGHT TO ALL POINTS EAST OF COLORADO** except Oklahoma, Texas and Indian Territory. Quotations to other points on application. Satisfaction guaranteed or money refunded. We will send this roofing to any one answering this advertisement C. O. D., with privilege of examination if you will send us 25 per cent of the amount of your order in cash; balance to be paid after material reaches your Station. If not found as represented, you do not have to take the shipment and we will cheerfully refund your deposit. Ask for Catalog No. WE-500. Lowest prices on Roofing, Eave Trough, Wire, Pipe, Fencing, Plumbings Doors, Household Goods and everything needed on the Farm or in the Home. We buy our goods at sheriff's and receiver's sales.

## INVESTIGATE ADVANCE FENCE

It's different from all others—in construction. We don't cut the wires into short pieces in order to enable us to make fences a little faster. We have stuck to the good old way in which we made fence seventeen years ago and while it's not the fastest way it's absolutely the best way. Our stay wire is continuous—not cut at the top or bottom or anywhere else. That makes our fence twice as strong as cut stay fences.

Sold on approval. We offer to ship you all the fence etc. you need on approval. After examining it carefully and comparing it with others, if you don't want it return it at our expense and get your money back. Isn't that a fair offer? We prepay freight and guarantee safe delivery. Get our Fence Book and prices.

home to find company and more cheerful places elsewhere.

## A MORNING IN MAY.

A dew-drop sparkling on a blade of green,  
A chattering wren on a maple bough,  
The cheery song of a farmer's boy,  
As he turns the sod with his shining plow  
The air all odor with orchard bloom,  
The sun scarce an hour on his glorious way  
Ah, you have guessed ere this, I know,  
'Tis early morn in the month of May.

## TO CURE FACIAL BLEMISHES.

If girls who have unsightly blemishes on their faces use this simple remedy for a week or more they will find a grand improvement in their appearance: Mix one teaspoonful of lard with as much flour of sulphur. At night wash the face with warm soap suds, rinse, and apply this lotion. Great care must be used in not getting this into the eyes, since it is very painful. The recipe was given by one of New York's best dermatologists. This has proven successful whenever tried.

## CHOICE RECIPES.

**Steamed Rice.**—Half a cup of rice, half a teaspoonful of salt, and one and one-third cups of boiling water. Put in small cups in a steamer, cover closely and steam three-quarters of an hour. Serve with stewed fruit and cream or sugar and cream.

**Custard Pudding.**—This may be baked in little cups. A good recipe is as follows: Put in a basin a quarter of a pound of granulated sugar and the yolks of five eggs, and mix thoroughly with a pastry whip for two min-

utes. Add a quart of milk and a little lemon essence if the custard is served hot with caramel sauce, or vanilla if served cold. Butter and sugar six of the individual molds and divide the pudding among them. Set them in a saucepan of water and bake the puddings in a moderately hot oven for forty minutes. Test each with a knife to see if it is firm in the center.

**Nut Bread.**—Scald one-half cup milk and add to one-half cup boiling water. When cooled to lukewarm add three-fourths cake compressed yeast dissolved in three tablespoonfuls lukewarm water, one-half teaspoonful each lard and butter, two tablespoonfuls molasses, one cup chopped nut meats, preferably English walnuts or pecans, one-half cup white flour, three cups or a little more of entire wheat flour and knead like ordinary bread. Bake in a moderate oven. This bread makes a delicious sandwich when cut thin and spread with currant jelly.

**Veal Loaf.**—Mince three pounds raw, lean veal and a quarter pound fine fat pork, salt or fresh. Season with half an onion, grated fine, a tablespoonful of salt, half a teaspoonful of pepper, half a teaspoonful powdered thyme, quarter of a teaspoonful sweet marjoram, the same amount summer savory and a saltspoonful celery salt. Next mix in two-thirds of a cup of rolled cracker crumbs, a scant cup veal gravy or hot milk, and the yolk of one egg and the whites of two beaten together until light. Mix thoroughly and form into a compact loaf. Roll it until coated in the yolks of two eggs left over, then in sifted cracker or bread crumbs, pack in a butter mold or bread pan, and bake in a moderate oven. As it begins to brown hasten with a little hot water and butter. Roast two

## AMONG OURSELVES.

Busy women do not do much reading in the spring-time, but they hunger for it all the more and some of them will be glad to take the edge off their appetite on the little book talk we are to have from Mary Emily:

I have so many times read your oft repeated and uncomplained-with requests for a book talk for the department that I have concluded that if no one better will give you one, I will. Now, I don't know a thing about books, so I can promise you this will be a very interesting article. Oh, yes; I've read a few, but what I mean is that I know nothing about style, diction, phraseology, plots and the many other things that go to make up a great book or a good seller. When I criticize I do it wholly and entirely from the standpoint of personal liking which I believe to be the standpoint of nine-tenths of the reading public. Of course, critics, real professional critics are different, I suppose; but when the average person says a book is "good" or "no good" it means that he enjoyed it or did not enjoy it and has no reference to its literary qualities. There is a small library in the town in which I am staying at present and when the librarian was asked how many histories, essays, etc., went out daily she said that though it would not take very long, she had no time to count them, for she was kept so busy handing out the books of George Barr McCutcheon to a hungry public. I have just read his "Jane Cable," and I should really like to know how it got to be one of the "six best sellers," for it is common-place and uninteresting. (Remember my standpoint of criticism.) How many of you have read his "Nedra"? It's a thriller. A young man and a girl elope at the start, not because there was any opposition to their marriage, but because they wished to escape pre-nuptial social affairs. After some very thrilling adventures in Chicago and New York they set sail for Manila, expecting to be married when they arrived there. Of course, they have a shipwreck, and though Hugh tries to save his sweetheart, through a mistake he rescues another woman. They are in the water swimming, goodness knows how far, encounter all kinds of difficulties and hair-breadth escapes, and are finally cast up on the sand of an unknown island. Now one of the first things the Lady Tennyson, for such is the name of heroine No. 2, did was to take out her back comb and arrange her hair! If anyone reading this will make a back comb that will stay in the hair through all the experiences that lady had had, he would better patent it, call it the Nedra comb and put it on the market. I am sure he could sell hundreds to long-suffering women who find themselves combless in the ordinary performance of quiet duties. Of course, Hugh and Tennyson fall in love. Two little things like his elopement and her husband would never stand in the way of a real McCutcheon love affair. They remain

on this island, the Isle of Nedra, which is Arden spelled backwards, for one year I think, and become the king and queen of the heathen people they find there. Just as they are about to be married according to the heathen ceremony they are rescued. They find that her husband dead in love with the wreck and his sweetheart dead in love with Hero No. 2, so everything ends happily.

Mary Emily has a pretty gift in her ability to talk charmingly about books. For the circle I express the hope that she will give us the benefit of it two or three times a year, oftener if she feels so disposed.

I want to give the friends a letter which came to me some time ago and has been waiting for a more convenient season. After we have it I shall have a few words to say;

Will an Indian girl be welcome? I have read and enjoyed the talk among ourselves for a long time and I have been very much interested in June Bug. I am a young girl and expect to marry a man much older than myself and if it is wrong I want to know it. My father and mother are dead and I am left all alone. I have six brothers living, but they are all out in the wild West. My brother that has stayed with me since my parents died was laid in the grave a few weeks ago. It was hard to give him up, but yet I would far rather see him at rest than see him a drunkard. I live in a log-cabin all alone now, and give music lessons for a living. I have played the violin since I was eight years of age. The grave-yard where my brother is sleeping is only about twenty steps from my door and many a time at midnight I go to his grave and stay for hours. The people around here look down on me because I am an Indian, but I think if they only knew how lonely I am they would feel different. There isn't another Indian within fifty miles of here that I know of. Sometimes I long to be with my own people and then again I think it best to stay where I am. Many a time I have wished that I might be laid beneath the sod where I should see no more trouble, but I suppose God knows best. Will some one please tell me what to do, for I cannot live this life much longer?—Juanita Lanza.

Since the writing of this letter our young friend has had the benefit of the views of the circle on the propriety of young women marrying men greatly their seniors, but the chances are that her conduct will not be much affected by what we said. Most of us do, not the thing we should, but the thing that is expedient or the thing our inclination prompts. However, that was not what I wished to say. The appeal this letter has for me is in the isolation of the girl. Her circumstances are somewhat singular, but the great fact of her loneliness is not at all singular. In almost every community there are lonely souls and we selfish people who have our homes and our loved ones do nothing for them. Shame on us who might bless and gladden their lives, but refuse to do it. I want every member of the circle right here and now to pause and ask, "Is there anyone hereabouts who needs what I can give in the way of encouragement, sympathy or hospitality?" When we come right up against our duty we generally do the decent thing. I suggest just the question, nothing more.

And now about young girls giving their mothers their confidence. This is a vital matter, one which affects life so generally and so closely that it is worth going into it thoroughly. We shall listen to the views of a daughter and of a mother this week, but as they will not exhaust the subject it will be continued next week.

If a girl or boy cannot trust mother with their secrets, whom can they trust? I have always gone to mamma with my secrets and made her my chum. I never knew what a "chum" was, in any one but mamma. Yes, I was with girls whenever I wished. Mamma always knows when I am expecting company and who my company is to be. If she is feeling well I always expect her to come in to the room and let my friend, or friends, know that he, (or they) are welcome, and I feel hurt if she does not do so. When papa was alive I expected the same of him. No, my parents never were "harsh" or "cranky" with me, but I loved them so I wanted my friends to grow acquainted with them. My brother comes to mamma or me with his plans and expects us to help him out, if we can, and we do it if it is possible. I do not know how and what my little sister will do. I am nearly twenty-one years of age, yet I never promise to do anything until I consult mamma. Of course, if I am away from home that is different. No, I am not boasting, but simply telling the truth. I should be very lonesome indeed, if I could not trust my mother. We have so much fun together. I am afraid I have said too much; but I want to know who a young person is to trust if not father or mother?

As I was reading the letters, Among Ourselves this morning and musing over Dakota bachelor's views on dancing I notice the question asked, "Should a girl give her mother her confidence with regard to her correspondence and her gentlemen friends?" I will tell what I actually know about such a question. It is not natural for young or old to like another to read letters written for only one pair of eyes to see, whether there is anything to amount to much in them or not. It is just the same as a confidential talk. One does not like to have it repeated to the third party. Once when I was a girl I was corresponding with a man friend, and

GRAVELINE positively and permanently cures G. Gallstones. Gives immediate relief. Price 50c a bottle postpaid. Graveline Medicine Co., St. Marys, Kan.

I frankly told him I would let mother read my letters if she wanted to. He objected at first, but we talked it over and we decided a girl ought not to keep anything from her mother. We knew mother to be a sensible woman who would not mention anything to anyone unless it was to father and they together could keep a secret until Gabriel should blow his trumpet. I will confess to a little queer feeling when I handed my first letter over to mother. She read it, but said nothing. I gave her the next and told her where I was going to keep my letters. I put my letters away from that on and told her to read them when she got ready, but I don't believe she ever read another one. The point is this, I had gained mother's confidence by being frank with her and she did not worry about the letters. Mothers will worry if they are kept in the dark about anything. Girls, don't be afraid to tell your mother your secrets. If I should close here you would all wonder what the outcome was of such a correspondence. Some, no doubt, think it could never end in courtship and marriage with mamma's visage in view. But he is the "Only Man" to me now and has been for eighteen years. There has been many a pure correspondence without mother's knowledge and there has been many a bad one that would disgust and cause Old Satan himself to blush, so I think the only wise plan is to take mother into your confidence. It won't do any hurt any way, and it may save you and her many a heart-ache.

The point made by Mrs. Beatrice that her mother did not avail herself of the privilege of reading her sweetheart's letters is worth noting. The fact established that there was no objection to her doing so, that there was nothing to hide and that her good will was desired put the correspondence upon a footing where the mother's active chaperonage was unnecessary.

The friends are beginning to express themselves more freely on the subject of dancing. As "Grey-eyes" speaks for a very considerable number of young girls, her views will receive more attention than if she were simply an individual:

Why do not more say something about dancing when there is so much harm in it? I say there is harm in it because I believe it, as I have danced myself. I am only sixteen, and am obliged to learn most everything myself, my mother not being with us. I began to dance when I was thirteen, and when I began to dance I began to give up church, and was like all other girls who dance. I cared more for boys' flattery than the good and true things in life. But I am glad to say I have found my Saviour, and I am trying to learn more about the Christian life. Dear girls, can't you see the harm in dancing? Don't you want to be more like Christ? Imagine Christ dancing! And ought we to do things that He would not do? Rev. Sam Jones said: "Fathers and mothers who encourage dancing, can you lay your hand on your child's head and say, 'This daughter will die as pure as an angel?' Others' daughters, who are as pure and lovely as yours have been down with the devil's feet on them,—and a woman never gets up when the devil puts his feet on her once." There are so many good ways to enjoy one's self without going to dances and other question-

able amusements. Girls, do think more of your future! Do you think you will be able to do your share of the work God has given to each one of us if you spend your youth in the dance hall and other worldly places?

That last is an important question. Pleasure is legitimate and should have a place in every life. The trouble is that so often our pleasures are ill chosen and that they unfit us for the business of life which is not amusement, but work and character-development. Next week we shall hear from an older woman, one who has had opportunity to measure the power of amusement in directing the currents of life.

Where one lives on the spiritual plane, two live on the mental and scores on the physical where everyone must live while in the flesh. However long we may linger with thoughts and books we must always come back to things and so we are ready to listen to X. Y. Z. on laundry work and another equally practical matter:

I have decided to make my first visit to the Home Department this afternoon. I am always interested in reading the different articles given under this head. I should like to voice the sentiments of the lady who gave us the hints for shortening laundry work. I, too, think it very foolish to iron underclothes, sheets, etc. I have but one little girl, and suppose I do not have near the work to do that some mothers have who iron everything for a large family. I have plenty of aprons for my little girl and do not starch them, but hang them out straight and they do not need ironing. Hang the good man's shirts up by the tail, and they are ready to wear when dry. Some one says, "Iron only the ruffles on the night-dresses." I find it better to have no ruffles on the night dresses, then they won't need ironing. In regard to the size of families, it seems to me that every woman should decide for herself how large a family she feels physically able to care for. And I am also of the opinion that it is quality, rather than quantity, that should be considered in deciding the number to be in the family.

## Dressmaking and Millinery—No 568

Sylvia Silverthorne, Muscatine, Iowa.  
(All inquiries and remittances for patterns described in these articles should be addressed to Sylvia Silverthorne, Muscatine, Iowa, and not to the office of this paper nor to the editor of the Home Department.)  
In replying to a question asked me by one of the readers I may perhaps help others who are puzzling over the same misunderstood point. "How to put a bias piece around the bottom of a gored skirt so that it will fit smoothly?" I think the question refers to the application of a bias band two or more inches in width which was mentioned in a former paper as a very fashionable mode of finish, said band being stitched to the skirt at its top edge only. After finishing the edge of the band that is to be at the bottom of the skirt baste it smoothly in place whether it be at the bottom or a few inches above, then baste at the top adjusting by holding the top edge slightly full, but not enough to form pleats or "gather."

Stitch at the top and take out bastings at the bottom. It is simple as can be when one has the work in hand, although it may seem a bit formidable beforehand. Another mode especially adapted to wool fabrics is the "tailor" idea of using the heated iron and after moistening the material stretch it at the bottom and pull it at the top, press-

[5614 Tucked Blouse, 32 to 40 bust.]

tag it into the desired shape. Should you use this latter method you may find it necessary to repeat the pressing if by chance the garment becomes damp.

5614 illustrates a tucked blouse made up after the lingerie idea, but the model is one that may be selected for any material and

[5629 Flounce Skirt with Straight Lower Edges, 22 to 30 waist.]

for other modes of development than that shown. The garment closes at the back, but as the closing is made invisibly, without allowance for overlapping edges one may easily cut the garment with the back in one

piece and by applying a band or pleat at the front make it front-closing. But I may assure you that the great majority of such waists are made to close at the back. The waist is tucked to yoke depth at front and back, and you will note that the very broad shoulder effect is given. The shaping and adjustment of the sleeve where it joins the arm hole aids in this and let me here suggest that to give the outstanding effect to the sleeve one must catch the edge of the sleeve seam at top to the shoulder seam. If the garment is of a material that permits, the seam may be caught in "blind" stitches so that it turns inward toward the body of the waist. In a waist having tucks as this one has the stitches are "badly" concealed beneath the tucks. The trimmings are of applied lace insertion, and after the trimming is applied the material may be cut away to give the more transparent effect. Embroidered insertion is much used on such waists in this way. The ends of the insertion are finished in a point, no other finish being quite so general. Any material is suitable for such a waist and it may be used as a suit garment or for a separate waist. 5614 is cut in sizes for a 32, 34, 36, 38 and 40 inch bust measure. Give size when ordering pattern.

5629 is a favorite design for skirts that are made of materials that are to be laundered but it will also be used for light weight woollens and silks. The straight lower edges of both the flounce and the top portion of the skirt adapt it to use for embroidered flouncings, as well as to those that are to be tucked or trimmed with insertions or embroidered edgings. The flat stitched pleats at the waist line adjust the fullness of the upper portion, while gathers or shirings adjust the greater fullness of the flounce. A pretty idea is to make both portions of the skirt of plain material in either white or a color, then embroider a design at intervals in something of panel effect, having those on the flounce slightly larger than those on the upper part of skirt, but corresponding

## PLEASANT FIELDS OF HOLY WRIT

SAVE for my daily range  
Among the pleasant fields of Holy Writ  
I might despair.  
—Tennyson.

### The International Sunday-School Lesson.

Second Quarter. Lesson VI. Genesis XLV, 1-5; I, 15-21. May 12, 1907.

#### Joseph Forgives His Brothers.

An ancient inscription describes a certain prime minister as "the eyes of Pharaoh in the North and his ears in the South." It is not an unlikely description of Joseph himself. Twice he is said to have gone through all the land of Egypt. He was as devoted to the interests of his sovereign as Daniel was in Babylon. Immersed as he was in the affairs of administration in the crisis hour of a vast empire, he lacked not the honors of state or the amenities of home. He lived in the superb City of the Sun, near the apex of the Nile Delta. He wore a linen vesture worth its weight in gold, and Pharaoh's own signet flashed from his finger. The fetter of his slave-days, transmuted to a golden ornament, hung about his neck. A famed Egyptian chariot of embossed brass stood at the portal of his palace.

A virtuous and noble woman, probably an heiress to a vast landed estate, swayed her queenly scepter over Joseph's palatial home. Two sons with significant names graced his table. Manasseh served to remind him that the poignancy of his servitude, and the grief of separation from his father's house was gone. And Ephraim suggested constantly the abundant blessings of Providence.

We can scarcely believe that such a high civilization as that of Egypt the principle of bureaucracy did not maintain; and that, as in a Bedouin tribe, all suppliants were brought at once to the chief, so all the famine-stricken suppliants were brought immediately to the presence of the prime minister of the realm. This case was probably exceptional. May not the suspicion that they were disguised emissaries of some hostile nation have led to the innovation? Joseph's quick wit was relied upon to detect them if they were spies.

Twenty-two years, and the brothers' paths, which diverged at the pit in Dothan, converge again in the palace of On; years for Joseph so crowded with startling transitions as to make the artless narrative fascinating beyond comparison; years for his brothers, let us hope, of moral improvement, though their great crime remained unconfessed and unatoned for.

The guilty brothers may have furtively scanned the faces of such domestic slaves as they might chance to meet, with small expectation of recognizing in some menial their rejected brother. But they looked squarely at this mighty prince, with his Egyptian name and retinue, without the slightest suspicion that he was their kinsman. He was completely metamorphosed. But they were the same rude Bedouins, still in shepherd garb, speaking their mother tongue, and

## CONGO ROOFING

Doesn't harden in the sun, or crack in the cold.

Doesn't shrink at the seams. Always waterproof—always tight.

Light in weight; low in price; no imperfect rolls. Absolute satisfaction always.

Congo Roofing makes a fire-resisting, durable roof. Any one can lay it.

A Sample is the best proof. Write today and we will send it to you free.

### BUCHANAN-FOSTER CO.,

538 West End Trust Bldg., Philadelphia, Chicago & San Francisco.

in design. Hand-embroidery you know, is quite the "rage." Pattern 5629 is cut in sizes for a 22, 24, 26, 28 and 30 inch waist measure. Give size when ordering pattern.

Send eleven cents in money (not stamps,) for any pattern wanted, these or others. Address all orders to Sylvia Silverthorne, Muscatine, Iowa.

Their being brought to Joseph an exception. Suspected to be spies.

4. Joseph's recognition. His skill in secreting his identity. Means of discovering brothers' attitude toward himself.

#### The Teacher's Lantern.

The darkest hour is just before dawn. The pitiful emergencies of the patriarchs reached a climax when the divining cup of the merciless Egyptian prince was found in Benjamin's sack. Then at length it was that they heard the voice of the stranger, in the familiar accents of their mother tongue, saying, "I am Joseph."

One must not imagine that the caravan from Canaan consisted of just ten men and ten beasts. The representatives only are mentioned. Ten times ten would be none too many beasts to carry back even a temporary supply for the vast camp of the patriarchs. The "money" was in the form of linked rings of silver, specimens of which have been found in the tombs.

Jacob's propitiatory offering to the unknown Egyptian prince must have affected Joseph deeply. It consisted of peculiar products of the Promised Land, from which he had been an exile twenty-two years—balm, a fragrant gum highly prized in Egypt; honey, possibly thickened juice of grapes; spices, literally "that which is pounded small;" myrrh, bitter ladanum, the well-known odor of which can still be detected about the mummies.

A tomb at Beni-Hassan gives a vivid portraiture of an Egyptian banquet and the attendant manners and customs. The quantity and variety of viands are enormous. Retainers wait to receive their portion. Slices of bread are used as platters. Well might Joseph say at the opening of the meal, "Set on bread." He sent each brother his portion upon one of the slices of bread piled up before him, and indicated his affection for his own full-brother by a portion five times as large as that of the others.

## SKIN SORE FOR 8 YEARS

Spent \$300 on Doctors and Remedies But Got No Relief--Work Often Impossible--Trouble Gone

### CURED IN A WEEK BY CUTICURA

"Up to a week or so ago I had tried many other remedies and several doctors, and spent about three hundred dollars, without any success, but this is today the seventh day that I have been using the Cuticura Remedies (costing \$1.50), which have cured me completely, so that I could work again to-night. My trouble was as follows:—Upon the limbs and between the toes my skin was rough and sore, and also sore under the arms, and I had to stay at home several times because of this affliction. I had been suffering for eight years and have now been cured by the Cuticura Remedies within a week. I shall recommend it to my friends. Fritz Hirschblatt, 24 Columbus Ave., New York, N. Y., March 29 and April 6, 1906."

\$4.50 TWIN CITIES \$4.50

The Minneapolis & St. Louis R. R. announce their first popular excursion to St. Paul and Minneapolis May 11th. Special train will leave Union Depot, Des Moines, 8:30 p. m. Double berths in tourist sleeper \$1.00. For tickets and berth reservation, call at City Ticket Office, 512 Walnut St., or Union Station.

**Destroy This Pest with**

# Swift's

## Arsenate of Lead

Every variety of leaf-eating insect is destroyed by this insecticide; the codling moth and other moths, caterpillars, grubs and slugs; the potato bug, elm leaf beetle, etc. Swift's Arsenate of Lead is white, sticks to the foliage, and cannot burn or scorch, no matter how strong a solution is used. More highly recommended than any other insecticide. Write for free booklet. It will interest you.

#### Analysis and Key.

1. Joseph the "Eyes of Pharaoh." Devoted to his sovereign. An adopted country.
2. The splendor of Joseph. His vesture, ornaments, palace, chariot. His family.
3. The incident. Brothers' arrival.

## ADDITIONAL FIELD NOTES.

## THE GOLDEN PRAIRIE OF WYOMING.

The opening up to settlement of what is known as the Golden Prairie District of southeastern Wyoming marks the beginning of a new era for that fertile country. Until within the past few months, with the exception of the small Swedish settlements surrounding Salem and Albin postoffices, this entire tract, consisting of a quarter of a million acres, was under the absolute control of less than one-half dozen ranchmen who during recent years have amassed a fortune as a result of grazing their flocks and herds upon the succulent grasses. Each alternate section of this land consists of free government homesteads and now that President Roosevelt has compelled all fences surrounding homestead lands to be torn down, settlers are rushing in and the next few months will witness most remarkable developments there. Practical farmers who have recently visited that territory are unanimous in their praise of the fertility of the soil, abundant crop yields, shallowness and purity of the water and other conditions which combine to make this a desirable opening either for a home or as an investment. On page 24 of this issue is found the full page advertisement of The Federal Land & Securities Co., descriptive of the Golden Prairie country. This company is a Des Moines institution and its officers, directors and stockholders include many of the best-known and reliable business and professional men of Des Moines and Iowa. Their resources are ample and those dealing with them may rest assured of a "square deal."

## R. H. HADLEY'S SHORT-HORN SALE.

On May 22d will occur a sale of Short-horn cattle at New Providence, Iowa, that should attract the attention of the farmers of the state of Iowa to that extent that they should lay away their labors for the day and attend the sale. It will certainly afford them an opportunity to secure some good useful, practical Short-horn cattle such as should be placed on every good Iowa farm in order to keep abreast of the times on the high priced land that requires the best of everything grown in order to make interest on the investment. On this date Mr. Hadley will offer forty-seven head of registered Short-horns. There will be sixteen bulls in the offering, the remainder females practically all of breeding age, a large per cent of which will have calves at foot. Probably the principal attraction of the sale will be Mr. Hadley's herd bull, Golf-man 2d, 247994. This is an exceptionally well bred roan bull, calved July 1, 1904. He was sired by that great Scotch bull, Golf-man, owned by A. L. Stutzman, of New Sharon, Iowa. The dam of this bull for sale is Mabel 2d, and she by Imp. Fearless Archer 132621. This bull, Golf-man 2d, has been used with marked success by Mr. Hadley until the present time when he deemed it necessary to make a change. This necessity affords a splendid opportunity for some one in need of a good Scotch bull to purchase one that has been tried and tested. Mr. Hadley will sell four other good young bulls, all red. They are about one year old, and are just ready to enter into service. Associated with Mr. Hadley in this sale will be Mr. E. S. Shelton, who will sell six cows and heifers, some with calves at foot. Mr. F. T. Clampt sells six cows and three bulls. Mr. Roy Wood sells two cows with calves at foot. G. W. Mitchell, three bulls, and Wm. Crider, two bulls. Mr. Hadley sells four Scotch cattle that are good ones and worthy of attention by the Short-horn fraternity. Col. A. P. Mason, of Iowa, is the auctioneer and will do the selling. Application for catalogs must be made to R. H. Hadley, New Providence, Iowa. Kindly mention The Homestead when writing for them.

## GEO. M. McMURRY OFFERS GOOD DUROC FALL BOARS.

Among the younger men of the popular Duroc Jersey breeders of the corn belt is Mr. Geo. M. McMurry, of Maryville, Mo. Mr. McMurry has been breeding the Duroc Jersey for a few years past, using such foundation stock as is, and has been recognized as among the best producing strains of the breed. When the Perfection Chief Stock Co. was formed to buy the great show and breeding boar, Perfection Chief, Mr. McMurry took a third interest in the boar and when the representative of this paper visited at Mr. McMurry's last week he was more than pleased to see that Perfection Chief is making good for Mr. McMurry. Perfection Chief is one of the large, smooth kind, weighing 800 pounds in breeding condition. Individually Perfection Chief is right up among the best, as he carries one of the strong, arched backs, a set of well sprung ribs, the width of rump, so much sought after by Duroc men, an extra good set of legs, well placed and a head that has to be seen but once to impress breeders that Perfection Chief will make good. As a pig he was shown at the world's fair at St. Louis, winning second prize pig and in 1905, senior yearling boar at the Iowa state fair. Mr. McMurry's first pigs by Perfection Chief arrived last fall and are all that was expected. The boars have the bone, quality and all the stretch necessary. Among these is an early summer boar out of a Top Notcher sow, that should go to some good herd where a good strong male is wanted. He has an extra heavy bone of good quality, a strong back with the width carried back through the rump to setting on of tail. Two out of a Shakespears sow are also good and by some might be preferred to the other. Choice Goods 43367, a full brother to W. L. A.'s Choice Goods was also used by Mr. McMurry, but unfortunately he quit breeding and only a few of his get are in the herd. Breeders know the blood lines that are found in these are as rich as are found in the herd books, as Choice Goods traces through Lafayette, his sire to Protection, Duroc Challenger and Duroc King, three boars that have never been out classed as sires. Through his dam, S. E.'s Model 9th, that sold for \$1,060, he traces to the great Ohio Chief. Some very fine boars of fall farrow have for their sire Choice Goods and no mistake will be made in these. Mr. McMurry has a fine lot of spring pigs coming on of which more will be said as the season advances. Just now we wish to urge any in need of a fall or summer boar to write Mr. McMurry and kindly mention this paper when doing so. See page 18 for advertisement.

## LANDS AND HOMES FOR SALE

## STOP TRYING TO MAKE MONEY

on high priced worn out land when you can get the richest land in the world at one-eighth the cost. Land that will make you rich in a few years. We own and control

Pioneer Prosperity Promoters,  
Estevan, Sask., Canada

## Canadian Government FREE FARMS

OVER 200,000 American farmers who have settled in Canada during the past few years, testify to the fact that Canada is beyond question the greatest farming land in the world.

## Over Ninety Million Bushels of Wheat

from the harvest of 1906 means good money to the farmers of Western Canada, when the world has to be fed. Cattle Raising, Dairying and Mixed Farming are also profitable callings. Coal, wood and water in abundance; churches and schools convenient; markets easy of access; taxes low. For literature and information address the Superintendent of Immigration, Ottawa, Canada, or the authorized Canadian Government Agent, W. V. Bennett, 801 N. Y. Life Bldg., Omaha, Neb. E. T. Holmes, 215 Jackson St., St. Paul, Minn.

## BEWARE OF LAND AGENTS WHO

FOR the sake of a commission try to sell bad lands in a good country. Save commissions by buying direct from us in the Garden Spot of Texas, where values will increase faster than elsewhere because the soil is richer and deeper; will produce larger and more varieties of crops; is clear, ready for plow; crop failure impossible, because some crop can be planted any month in year; climate healthy; not cold in winter nor hot in summer; ample rainfall; competing railroads within two miles; close to best markets in world; good neighbors. Save agent's commission by buying direct from us. Do it now. Prices \$10 to \$20 per acre in any sized tract to suit. Next fall will be \$5 an acre more.

Write or call for booklet, "Truth About Texas," and state map free. Cheap R. R. rates. Free fare to buyers.

PICKERT-HAMMOND LAND CO.,  
Opposite Grand Central Station,  
Houston, Texas.

N. W. Branch, 1039 and 1040, Lumber Exchange, Minneapolis, Minn.

## LAND ADVERTISING.

FOR additional advertisements of farms, farm lands, etc., see department of CLASSIFIED ADVERTISING elsewhere in this paper. It will pay you, if looking for bargains, to look over the advertisements to be found there.

## A Fine Kansas Farm For Sale

A FARM of 280 acres, nine miles North-east of Yates Center, (the County seat of Woodson County) and within one mile of Vernon, on the Missouri Pacific railway, running from Kansas City to Wichita, 119 miles from Kansas City. The farm is an excellent one, good rich soil, well improved, all under fence, divided into fields, with 25 acres of hog tight fence, and pasture fenced separately, and in Oil and Gas Belt.

The improvements consist of a five room dwelling house, with cellar and summer kitchen, well and cistern. A good barn, with stabling for a dozen horses, and hay-loft above; a cattle barn, pig pens, granaries, corn cribs, etc., with other out buildings. A good orchard, with abundance of fruit, apples, peaches, plums and small fruit.

A never failing stream of water runs through the west part of the farm near the buildings, furnishing plenty of water for the stock, and with ten acres of timber along the creek. It is an ideal farm home in sunny Kansas.

If Sold Soon I Will Take \$40.00 Per Acre.

If you want a home free from the rigidity of Northern winters, and in the unmatched climate of Southern Kansas, write me, or come to Vernon, and I will meet you and take you to the farm. No trades considered.

J. E. Seaton - Vernon, Kan.

## FARM FOR SALE.

280 ACRES of the best land in Macon Co., with two sets of improvements. One new cottage just completed with five rooms, has never been occupied. Fine barn just completed, besides two old barns and an old house, all in good repair, and everything in first class condition. Situated seven miles from the county seat and one mile from Exello, Mo., which is on the Wabash Railroad, and a good prosperous little town with good schools, churches and stores. There is also a district school just a quarter of a mile from the house. Price \$65 per acre. Will be sold on easy terms. This land is worth \$75 per acre but party owning wishes to sell and get out of the farming business on account of other business interests. For further particulars address,

HARRY M. RUBEY, - MACON, MO.

## I WILL HELP YOU TO MAKE MONEY

I WILL teach you the Real Estate, Abstract, Loan, Insurance and general Brokerage Business by mail, and assist you to establish a prosperous business of your own or secure you a paying position. Our graduates make \$3,000 to \$5,000 annually. The real estate business has assisted many without capital to become independent for life. Write me today.

JAS. T. LARKIN, PRESIDENT,  
Kansas City School of Real Estate, Nelson Bldg., Kansas City, Mo.

## IOWA - THE GREATEST CORN STATE.

FIELD NOTES.

Galloway bulls are offered for sale by W. W. Scholes, Onawa, Iowa.  
Chester White gilts are offered for sale by S. J. Philson, Harlan, Iowa.  
Chandler Bros., Chariton, Iowa, have some good imported and home-bred Shropshire rams and ewes for sale.  
Some very fine Shropshire rams are offered for sale by Geo. Allen, Lexington, Neb. He also offers a splendid bunch of ewes for sale.  
N. A. Lind, Rolfe, Iowa, is offering a few good young Scotch bulls for sale sired by Imp. Fancy's Pride, the bull that sired so much of his show cattle.  
Anyone wanting a car load of Hereford bulls should write or see A. Spooner, Mondamin, Iowa. He has twenty-five aired by a son of old Beau Donald.  
Sufferers from gallstones should try a Graveline, fifty cents a bottle, offered by the Graveline Medicine Co., St. Marys, Kan. Mention The Homestead when writing.  
Information is worth money, when it is of the kind that is being offered pertaining to Golden Valley lands in North Dakota. The region in which this land is found is a choice farming and stock raising country. Dairying is also very profitable. It is the land which the seeker of moderate priced homes is after. Full information, of a money value, for the asking. Write Jonas Bergh Land Co., Eau Claire, Wis. Mention that the advertisement was found in The Homestead. See page 15.

A low wagon at a low price. Handy for the farmer. Will carry a load anywhere a horse can travel.

## Low Down Wagons

soon earn their cost on any farm.

## Steel Wheels

for farm wagons. Straight or staggered spokes. Any size wanted, any width of tire. Hubs to fit any axle. For catalogue and prices, write to Empire Mfg. Co., Box 103 H Quincy, Ill.

Claire, Wis. Mention that the advertisement was found in The Homestead. See page 15.

J. P. Spearman, Papillion, Neb., the coming young live stock auctioneer of the West, is now booking dates for fall and spring sales. Write him if you need a good auctioneer.

A few good fall Duroc Jersey boars, sired by Red Knight Again, a son of the Nebraska State Fair sweepstakes boar, Red Knight, are offered for sale by August Voge, Portsmouth, Iowa.

Red Polled bulls, the farmers' breed, also thirty head of horses and mules, all young and valuable stock, are for sale by Mr. W. H. Hazlet, Leon, Iowa. Mention this paper when you write.

Fruit farms in the finest parts of the state of Washington, are advertised on page 15, by Calhoun, Denny & Ewing, Inc., Alaska Bldg., Seattle, Wash. A two cent stamp brings the booklet.

Marshall Favorite, a good yearling Scotch bull, sired by Imp. Fashion Favorite and out of Imp. Jilted Maid, is offered for sale by J. D. McDermott, Wiota, Iowa. This bull he is offering at a very reasonable price, considering how he is bred.

Two well-bred Duroc Jersey boars, namely, King Top Notcher and Crimson I Am, both prize winners at the Iowa state fair, are offered for sale by H. H. Sexsmith, of Greenfield, Iowa. Mention this paper when making inquiry regarding these.

We wish to call the attention of our readers to the binder twine advertisement of Hon. August Post, of Moulton, Iowa, which appears on page 10. Mr. Post has been handling binder twine for the last nineteen years and we can highly recommend him and his methods of conducting business.

A right good young Victoria bull is offered for sale by Ernest Funke, Greenfield, Iowa. He also offers a nicely bred Acanthus bull for sale and a few younger Scotch bulls. Mr. Funke is one of the oldest and one of the best Short-horn breeders in southern Iowa. He is pricing these bulls within the reach of anyone who wants a good bull.

Three Kansas farms in Sherman, Graham and Woodson counties, are offered for sale on page 15. These farms are all tillable and good crop producers. Improvements vary from good to first class and at the prices named they should be attractive to farmers or investors. Write to Mr. L. G. Boies, of Birmingham, Iowa, saying you saw the advertisement in The Homestead.

"My March and April litters are large and lusty," writes Mr. J. T. Scarff, of Salem, Iowa, breeder of O. I. C. White hogs "and orders for fall delivery will be filled with only high grade stock. Homestead readers have bought me clean out of mature stuff and the good bone and easy keeping qualities of my herd have been very pleasing to customers." Mention The Homestead when you order.

Black Norman stallions are wanted by Mr. E. B. Thompson, Cumberland, Iowa. Anyone having good grade draft stallions and mares from one to five years old should write to this advertiser at once. A limited number of good ones will no doubt be taken by Mr. Thompson and those having anything to suit his needs should write at once, stating and describing such property and kindly mention The Homestead when so doing.

S. H. Thompson's Sons, of Iowa City, Iowa, have good Scotch Short-horn bulls to sell. Announcement is made on page 21 by S. H. Thompson's Sons, of Iowa City, Iowa, that they have some twelve, mostly Cruickshank families, such as Mysie, Victoria, (both Imp. Victoria 51st and 73d descendants.) Miss Ramsden, Princess Royal, Lavender, Violet, Flora and Beauty. These bulls range from fourteen to twenty-two months old.

Messrs. Blackman & Nelson, of Albert Lea, Minn., breeders of milking Short-horn cattle, have a bull advertisement elsewhere, which persons looking for Short-horn bulls from milking strains will do well to look up. These breeders milk all their cows, hand raise the calves, test for tuberculosis, alter inferior stock and fully guarantee all they sell or ship. Write them and refer to The Homestead in your inquiry. See page 19.

With eighty fine spring March and April Chester White pigs, Mr. B. M. Boyer, Farmington, Iowa, should be able to take good care of his customers the coming season. Orders are now being booked to be shipped when pigs are about three months old. This stock may be bought in pairs or trios and not related. Part are sired by Mapleleaf King 13069, by Combination, the many times state fair prize winner. Other sires of merit also. Mention The Homestead when you order. See page 18.

Messrs. E. L. Nagle & Son, Deep River, Iowa, writes that they have two September Chester White boars for sale, sired by Pioneer 9515 and Neponset Henry 15607 respectively. These are well shaped fellows and their breeding should satisfy the best herds. Both have prize winners in their pedigree. The spring pigs are coming along well and promise to make as fine a bunch as they have ever had. Write them for mature stock or have your order booked for young stuff. Mention The Homestead.

A representative of The Homestead recently called on O. N. Remington, Tekamah, Neb., one of the oldest Poland China breeders in the West. This old veteran was one of the pioneers who purchased his original stock from the McGee & Moore herds of Ohio, and since that time he has never wavered in his faith in the Poland China hog. Mr. Remington has been one of the good breeders in the West, and he has also been one of the good buyers when he secured foundation stock. For these many years he has had at the head of his herd old Tecumseh Ideal, one of the best diving sons of Chief Tecumseh 3d. To assist him he has Chief of All, a boar of wonderful size and bone; also Golden Rule, Missouri's Big Perfection, and Graceful Perfection. His present crop of pigs are mostly aired by Chief of All and Graceful Perfection. He has always endeavored to breed size, and has two sows, Lady Wonder 6th and Orange Blossom, that will weigh about 900 pounds.

# Why Suffer With Catarrh

When you have such absolute proof of our ability to cure this disease of the Throat, Nose, Bronchial Tubes, Stomach, Bowels, and Liver, as the cured patients that gratefully testify in their own cases. We have so much faith in our own powers that we offer a full month's treatment **Free of Charge**

Sloux City, Ia., March 20, 1907.  
I have been using your treatment for catarrh for two months and I feel today as if I did not need any more treatment. I have gained considerable in flesh, weighing twenty pounds more than last fall. I have a very good appetite, sleep well, and can do my every day work with ease. I shall be glad to recommend your treatment to any one who is troubled with catarrh. With my best wishes, I remain, yours truly,  
ALBERT MOS.

Sharpsburg, Iowa, Dec., 4, 1906.  
I write you that I am feeling well and I don't need any more medicine. Your medicine has benefited me and I believe effected a permanent cure. I will recommend your treatment to others who have catarrh. Thanking you for your kindness, I remain,  
Yours truly,  
WILLIAM BECKETT.

403 Flynn Bldg., Des Moines, Iowa.

Please send me Free Symptom Blanks with a view to my taking your free month's treatment.

NAME .....

ADDRESS .....

Then he has some of the most fancy bred sows, and all in all, has one of the best herds in the state. His present crop of pigs numbers about seventy-five or eighty head, with a few more sows to farrow. He expects to have something very attractive for the boys this fall.

Messrs. Isaac A. Novinger & Sons, of Kirksville, Mo., write that they have had a very mild winter and their herd of Short-horns have come through in fine shape. At present, the herd consists of 150 head and contains many which these breeders think compare with the best. About one-third of the individuals are of good Scotch breeding and anyone interested in good Short-horns, either male or female, should write or visit these breeders. As a leader they are offering five first-class Cruickshank bulls that are suitable to head well-bred herds. When writing mention this paper.

Mr. W. R. Hainline, of Blandinsville, Ill., proprietor of the Blandinsville herd of Duroc Jerseys, writes as follows in regard to his herd: "The two sows that I bought at Messrs. M. W. Greer & Son's sale at Bushnell, Ill., last fall have litters of eleven and twelve pigs, and are doing fine. The litters are sired by Double Track II, and will please anyone. I have seventy-five pigs and six sows to farrow. I intend to hold two sales a year and am sure that I will have the hogs that will please the breeders." Homestead readers in the market for good Durocs will do well to correspond with Mr. Hainline, as he will be pleased to furnish prices and descriptions.

Austin Renshaw, Blair, Neb., reports 125 spring pigs so far this season and they are doing fine. They are sired by Long Alix, a litter brother to the \$2,000 sow Alix II, also by his old show winner Arlon and Redwood Chief, a son of Ohio Chief. He has a good sow by Long Alix that he may show the boys this year. Long Alix was also the sire of the \$250 gilt that topped his last sale and went to Geo. I. Clark, St. Edwards, Neb. He has one litter by him and out of a Crimson Wonder sow. Mr. Renshaw has three sows for sale that will farrow in July and he will book orders for sows bred to farrow this fall. If any of our readers are wanting bred sows it will pay them to write Mr. Renshaw.

Mr. C. F. Kirk, Ponca, Neb., is one of the best known Duroc Jersey breeders today in northeast Nebraska. His purchase of the great sow, Ruberta, at \$1,500 brought him into the lime light, but before this he always was a buyer of high class stuff. Readers of The Homestead will be interested in knowing that Ruberta has saved six pigs, five sows and one boar, and it is an excellent litter. They are doing fine, and there is every reason to think that she will be a good investment. This litter is by Junior Jim, and therefore should be in good demand by breeders. He has about eighty-five spring pigs, and they are sired by Junior Jim, Kan't Be Beat, Mo. Gold Finch and a son of Ohio Chief, Masterpiece. He has three litters by Kan't Be Beat. One of these litters and a particularly good one is out of a Cole's Duroc sow, another is out of a Red Knight sow. He has several good litters by a son of Ohio Chief that he purchased at the Harding sale

last fall. Bertie Advance, by Proud Advance has a good litter of ten pigs by Junior Jim, and Rose Advance, another daughter of Proud Advance has a litter of nine by Mo. Gold Finch. He has a litter by the Ohio Chief boar out of an Orion sow, and all in all he has a variety of breeding that should appeal to the best breeders. He will have some choice boars for sale this fall, and will also hold a brood sow sale next spring, at which time he will put up an offering that should be very attractive to all the best breeders. Just now he is offering two fall and one spring Ohio Chief boar for sale.

Mr. T. A. Gossard, of Ponca, Neb., is one of the well known Duroc Jersey breeders in northeast Nebraska who has been in the business for a number of years. This spring he has about eighty spring pigs sired by Mo. Gold Finch, Oom Paul Jr., Ohio Chief 2d, Earl (a son of the Nebraska State Fair winner, Crimson Critic), and Perfect Wonder, a son of Brighton Wonder. He has two Proud Advance sows, one with a litter by Ohio Chief 2d, and the other is about due to farrow to the same boar. Ohio Chief 2d is the boar that now heads the Sheldon Bros. herd at Shannon City, and has the reputation of being an excellent breeding boar. His Mo. Gold Finch litter is out of a Reed's Banker sow. He has seven litters by Perfect Wonder, a son of Brighton Wonder, and out of a daughter of old Pericles. This boar formerly headed his herd. He has a nice bunch of pigs and he will have some good things for the fall and spring trade.

**SHORT-HORN BULLS FOR SALE.**  
Anyone wanting a good growthy, well bred Short-horn bull should write or see A. B. Clark, Wayne, Neb. He has a number of good ones now on hand, ready to do good active service, and he is pricing them right. He could fill a car load order, should anyone need that many. Write him about these at once or go and see them.

**CHOICE HEREFORD BULLS FOR SALE.**  
Messrs. G. W. Way & Son, of New Sharon, Iowa, are offering for sale on page 23 some very fine Hereford bulls for sale, sired by Beau Brummel 4th. There is only a few of these fellows, and the fortunate man will get there early and make selection. Messrs. Way & Son have added some more valuable females to their herd, rich in the blood of Lampfighter and Beau Brummel.

**SOME HIGH CLASS ANGUS BULLS FOR SALE.**  
A well bred twenty-two-months Erica bull, sired by Imp. Edward R. is offered for sale by W. H. Jones, Quimby, Iowa. He also has a young Pride and a choicely bred Blackbird bull for sale, and he is offering these at prices that cannot be duplicated elsewhere. It will pay anyone that wants an Aberdeen-Angus bull to go and see these.

**TEXAS LAND VALUES GO UP.**  
Land values in the best part of Texas are getting higher every day, from reports of land men interested in these southern lands. The vast number of people who have taken up farm homes in the state of Texas have done so because of the many advantages the country offers. It is favored with a mild climate, railroads are frequent, the best class of people are moving in and crops can be grown every month in the year. The land which this article makes mention of is situated near Houston, a large and industrious city. Now this land can be purchased direct of the Pickert-Hammond Land Co., Houston,

# DON'T BUY GASOLINE ENGINES

UNTIL YOU INVESTIGATE "THE MASTER WORKMAN," a two-cylinder gasoline, kerosene or alcohol engine, superior to any one-cylinder engine; revolutionizing power. Its weight and bulk are half that of single cylinder engines, with greater durability. Costs less to buy—less to run. Quickly, easily started. Vibration practically overcome. Cheaply mounted on any wagon. It is a combination portable, stationary or traction engine. SEND FOR CATALOGUE. THE TEMPLE PUMP CO., Mrs. Meagher and 15th Sts., Chicago. THIS IS OUR FIFTY-THIRD YEAR.

Texas. Their northwest branch office is in the Lumber Exchange, Minneapolis, Minn. Write for their booklets and special inducements, mentioning The Homestead. See page 15.

#### WOOL, PELTS, FEATHERS IN DEMAND.

Holders of wool, pelts, goatskins, feathers and roots, should send for price list of these articles to Messrs. M. Summerfield & Co., 214 N. Main St., St. Louis, Mo. This firm has been in business of this nature for thirty-six years and should certainly be prepared to handle shipments of any of the above products in any amount. Write them and they will send you price list, sacks and tags as you request. Mention The Homestead in your letter. See this page.

#### IS FARM HELP WORTH THE COST TODAY?

The farm labor question is intelligently treated and certain aspects of it solved in an attractive and expensively gotten up forty-eight page, illustrated book, published by the American Fork & Hoe Co., Cleveland, Ohio. We urge every reader to procure a copy before the present limited edition is exhausted. Write for it at once, after reading advertisement on page 8. Please mention The Homestead.

#### G. P. TYRELL & SON, OF OXFORD JUNCTION, IOWA, WANT TO SELL SHORT-HORN CATTLE.

On another page will be found the announcement of Messrs. Tyrell & Son, who are desirous of selling at once ten splendid Short-horn yearling bulls. Anyone that has ever seen old Sittytton Sort, that marvel of beef carcass, that sired these ten bulls offered for sale, can perhaps realize that the young bull offering is of this same low down thick-fleshed type. Sittytton Sort comes by his thick-fleshed qualities by inheritance, and for this reason he is able to transmit this very desirable quality to his offspring. This firm are desirous of letting these ten bulls go at farmers' prices if taken at once. The reason is that they have determined to make a public sale of Short-horns October 2d, and these bulls will be too old by that time, as they are now ready for service. This paper

takes pleasure in recommending this firm as reliable and with whom it will be a satisfaction to do business.

#### THREE OHIO CHIEF BOARS ARE OFFERED FOR SALE BY C. F. KIRK, OF PONCA, NEB.

Mr. Lee Sencenbaugh, Ponca, Neb., has a nice crop of about sixty Duroc Jersey pigs, which he is growing out for his fall trade. He is one of the well known stockmen in that section of the state, and always raises some registered pigs along with his cattle feeding operations. He has a 360 acre farm on the edge of town where he can care for them at the least possible cost.

#### THE DRESSING OF WOUNDS

is often necessary in any household without the aid of a skilled practitioner. Immediate attention should be given any wound or bruise of the skin, as delay allows inflammation and pain to start. A valuable remedy and healing antiseptic in cases of emergency is Oleo Curine, which is guaranteed under the pure food and drugs law. Agents are wanted in every rural community. Address, The Oleo Remedy Co., 132 E. 23d St., New York, N. Y., for booklet as advertised on page 4.

#### KATER & SMITH OFFER HIGH-CLASS HEREFORDS.

Messrs. Kater & Smith, of Grant City, Mo., are offering a car load of Hereford bulls that should attract the range man who is wanting an absolutely high-class lot of bulls that are in the best possible condition. There are among these a number of bulls that are fit to head herds, they being exceptionally well bred and right individually. See page 23 for advertisement and do not hesitate to get in touch with this firm if wanting a herd bull or a car load.

#### THE MISSOURI AUCTION SCHOOL.

Mr. W. B. Carpenter, president of the Missouri Auction School, Trenton, Mo., announces on page 21 that the summer term of school will open August 5, 1907. The catalogs telling of the school, the methods of instruction and the terms will be ready for distribution in about two weeks. Already auctioneers that have graduated from the Missouri Auction School are selling in ten different states. Many fine testimonial letters from these have been received by Col. Carpenter and will be reproduced in the new catalog. See page 21 for advertisement and write today, asking that a catalog be mailed you as soon as off the press.

#### CANCER CURED.

A Kansas City physician has a mild combination treatment for cancer which is used by the patient at home. He has had years of success and has hundreds of testimonials. The treatment is endorsed by physicians, ministers, etc. The local application destroys cancerous growth, and the constitutional treatment eliminates the disease from the system, preventing its return. Write for free book "Cancer and Its Cure." No matter how serious your case, no matter how many operations you have had, no matter what treatment you have tried, do not give up hope, but write at once, Dr. O. A. Johnson, 1233 Grand Ave., Suite 371, Kansas City, Mo.

#### CURE FOR APPENDICITIS.

Within the last few months leading druggists over the country have been supplied with a medical preparation for the cure of appendicitis, and other afflictions of the lining membranes of the alimentary canal, the lungs and other organs disposed to peculiar diseases. Appen-D-Form is the name of this new remedy and it is sold under a guarantee that authorizes the person from whom it was purchased to return the money paid for the remedy should it fail to relieve or cure any case of appendicitis, blood poison, peritonitis, pneumonia and ovarian troubles. Directions and full instructions accompany each package. Should Appen-D-Form not be kept by your dealer write to the Appen-D-Form Co., Elkhart, Ind., 501½ N. Main St.

#### WHEN HAY-MAKING TIME COMES

there will be no time to study the hay-making implements on the market. The time to plan for gathering the hay crop is right now. It is a case where one should never put off a duty for the morrow that can be done today. The way to properly study the hay-making question is to secure a good catalog like the Sandwich Mfg. Co. send to those who ask for it. This catalog tells all about the many new features which have been added to the hay-making machines this year. The hay loader, a machine which offers great opportunity for improvement, is found much perfected in this year's model. It is guaranteed to work under any conditions that a hay loader can. The tedder, another very important implement for the hay-maker, has been improved by the Sandwich people and its merit should be investigated. Right now is the time to send for the catalog and post up on these two essential hay-making implements. Address your request to the Sandwich Mfg. Co., 143 Main St., Sandwich, Ill. See page 6 for the advertisement.

#### THE TEEL SHORT-HORN SALE.

Fifty head of Scotch and Scotch topped Short-horns have been listed by Mr. Walter Teel, of Rushville, Ill., for his forthcoming sale which will be held at the breeding farm on Friday, May 31. This consignment comes from one of the oldest and best herds of Short-horns in the central West. It was founded by the late Jas. A. Teel, father of the present owner, in 1860. The best blood of the day was selected for the foundation and the individuality was in keeping with the breeding. Mr. Walter Teel has followed closely along the lines which enabled his father to so successfully build up one of the most useful herds of the breed. At the head of his herd he has been using Cherry Grove Banff 3d 231859, one of the best sons of the celebrated Lori Banff, now at the head of the well known herd of Mr. Milton E. Jones. This bull follows such noted bulls as Imp. British Prince, a richly bred Cruickshank bull, and Marmion, another Cruickshank bull of unusual merit. Both of these bulls were used in the herd with much success. The females are mostly sired by these two bulls and either have calves at foot by Cherry Grove Banff 3d or British Prince 5th, a good son of Imp. British Prince. All females of breeding age have calves at foot or are safe in calf. They represent the Orange Blossom, Umatilla, Michigan Casket and young Mary tribes and

"The Recollection of Quality Remains Long After the Price is Forgotten."

Trade Mark Registered

## Tool Requirements

What do you expect of a hammer—a rightly formed handle that can't work loose or come off—a face you cannot batter—the true hang and balance for straight driving? Then you must get a hammer on which this name appears.

## KEEN KUTTER Tools

No matter what kind of tools you want, this name signifies that every requirement in quality and service will be met.

are a good useful lot. Mr. U. G. Teel, of Rushville, Ill., consigns six head to this sale. Further particulars in regard to this offering will appear in our next issue. Write for catalog, kindly mentioning The Homestead.

#### 1907 GALLOWAY PREMIUMS.

Secretary Chas. Gray, of the Galloway Breeders' Association has recently published a list of premiums offered for breeding and fat Galloway cattle at the state, interstate and international fairs to be held this fall. The first one will be the Interstate Live Stock and Horse Show, to be held at St. Joseph, Mo., September 23 to 28; the next will be the American Royal from October 14 to 19; the International from November 30 to December 7, and the Western Stock Show to be held in Denver, from January 20 to 25, next. All persons interested in Galloway cattle would find the classifications made by Secretary Gray interesting, and we suggest that application be made for same to Chas. Gray, 17 Exchange Ave., Chicago, Ill.

#### FINE KANSAS FARM BARGAIN.

Elsewhere in this issue will be found a description of a 280 acre Kansas grain and stock farm, located in the oil and gas belt and near Yates Center, the county seat of Woodson county. This place is within one mile of a railroad station, which is about 120 miles southwest from Kansas City, thus affording direct transportation to that great market point. The improvements consist of a commodious house, good barn for horses and other stock and granaries and other out buildings. There is a nice orchard and a woodland pasture with a never-failing stream of good water. This is a home in an ideal climate and will be sold by the owner on very reasonable terms. Write to Mr. J. E. Seaton, Vernon, Kan., mentioning this paper. See page 15.

#### NORTH DAKOTA FARM AT A BARGAIN.

Mr. H. F. Wells, of Estherville, Iowa, is offering for sale, on page 15 of this issue of The Homestead, a section of North Dakota land. It is located in Ramsey county, of which Devil's Lake is the county seat. It is one mile from Derrick, a thriving little railway town. The land is uncultivated at present, but 90 per cent of it is suitable for cultivation. It is gently rolling prairie land. Mr. Wells is not offering this land for sale because he has not the confidence in this country, but because he has need for the funds in his business. His price is \$20 per acre, \$3,960 down, and \$1,280 payable in 1912, 1917 and 1922 to the state, which holds the contracts. This land is a bargain. Mr. Wells would be glad to have you look the land over before buying. The number of the section is given in his advertisement. Look this up and write Mr. Wells if you are interested in such an investment.

#### HIGH CLASS POLAND CHINA MEDDLER BOARS AT BARGAIN PRICES.

Mr. H. J. Hemmerling, of Dike, Grundy county, Iowa, is offering for sale on page 18 some of the most fashionable Poland China blood known to the breed. He has eleven fall boars for sale, sired by the great boar, Meddler, and out of such sows as daughters of Chief Perfection 2d, Perfect Darkness 2d, Ohio Perfection and Impudence, out of Perfection E. L. dam. Breeding unequaled from present day reckoning's and at staggering low prices for this line of breeding. There is probably no herd in Iowa that has as much of the prominent prize winning blood as has Mr. H. J. Hemmerling's herd. His herd boar E. L.'s Pride 116889, is a marvel of smoothness, yet is a hog of exceeding size and choicest conformation. His bone is extra heavy and of the finest texture and quality as is evidenced by the manner in which he carries his great body, remaining on his toes like a pig. His fine, arched crest can be likened unto a Morgan stallion. His immense heart girth, crest, and short stubby feet, doubtless come through his dam, who was a great granddaughter of old Black

U. S. 13471. The strongest bog of his generation in the above points. Mr. Hemmerling has spring pigs out of Lady Alert, Spurling's Choice, sbe by Mischief Maker, Iowa Queen by Chief Perfection 2d and Lady Darkness by Chief Perfection 2; in fact his strain of brood sows runs as follows; seven sows by Chief Perfection 2d, eight by Meddler, two by Prince Alert, two by Perfect E. L., and others by L. & W.'s Perfection, G.'s Perfection, etc. The Homestead congratulates Iowa on having such a Poland China breeder in the state.

#### GOOD SCOTCH SHORT-HORN BULLS FOR SALE BY COOKSON BROS., AT WEST BRANCH, IOWA.

The Cookson Brothers, of West Branch, Iowa, have now ready some six very choice Scotch bulls for sale. These bulls range from fourteen to twenty months of age. All are sired by Young Commodore, generally conceded to be the best Scotch bull in Iowa, and by odds the best bull ever owned by this firm of breeders. One of the bulls is of the Beauty family, one is of the Bruce Heatherwick Mayflower tribe. One is an Orange Blossom and is one of the best ones. One is out of a half sister to Young Commodore and is certainly a fine prospect for a herd bull. This firm have sent out some very choice herd bulls, but they never had a choicer lot to pick from than at the present time. All of the bulls offered are reds, and all are past the doubtful ages of development. Their announcement appears on page 20.

#### AN AID TO THE HOG RAISER.

Many days can be saved in a year to the farmer who installs a number of reliable hog waterers in places where his hogs will have easy access to them. Furthermore, in this way of getting water to the hogs there is always a supply ready for the animal. On page 4 we show a cut of the Hawkeye Automatic Hog Waterer. This waterer has been in use for a sufficient length of time to fully demonstrate its merits, and those who have used it are well satisfied. The valuable feature in this make of waterer is the valve which is formed by a non-corrosive metal ball which rests on an expansive rubber seal, making leakage impossible. The valve is guaranteed to work perfectly for five years, and this is certainly an indication of the great faith which the manufacturers have in their waterer. Thousands of these have been sold the past season and not a single one returned. Full particulars regarding this waterer may be secured by writing to the Parsons Hawkeye Mfg. Co., Newton, Iowa, and mentioning this paper.

#### PRIZE WINNING CHESTER WHITES.

The best all around Chester White boar ever inspected by The Homestead's oldest representative is owned by that young, enthusiastic breeder at Dike, Grundy county, Iowa, M. W. F. Hemmerling. We refer to Modeler 13235. This phenomenal ladies' favorite, (as ex-Senator Vail styles the Chester White), was farrowed September 5, 1905, and weighed 500 pounds at twelve months of age. He has a show record never before equaled by any boar of his age and breed, as will be seen by the following list: First in class at the following state fairs: Iowa, Minnesota, Wisconsin, Kentucky and Illinois, breeders' champion at the great Iowa state fair, headed young herds that won first at all of these fairs and several specials to his credit. This exceptional boar was bred by Mr. F. D. Humbert, of Nashua, Iowa. Unquestionably Modeler was the widest, deepest and generally best developed bams of any Chester White boar ever seen in Western show yards. He stands on feet and legs that are beyond criticism. His sire was Nashua Boy 12563, while his dam Mae 17568 was bred by that veteran breeder M. E. Newburn, who was the greatest showman of Chester Whites in this country for many years. Mr. Hemmerling will have a few fall litters by the world's most prominent sire, Old Combination. At this date Mr. Hemmerling would

like to sell sixteen good fall farrowed boars, now eight months old, and twenty-three sons, litter sisters to these fall boars. These are all by W. F.'s Model, a 700 pound boar. Some of the gilts will be bred to Modeler and offered for sale later. It would not be a bad idea for anyone desiring something choice bred to the greatest Chester White boar living to book orders early. The seventy-five spring pigs are demanding space and attention, hence attractive prices are made on this fall stock. See announcement on page 22.

#### DISPERSION OF THE FAIR ACRES HEREFORDS.

It has often been said (and we think truthfully) that women inspire men to perform and to carry to greater ends in their life work, any profession or labors they may have seen fit to engage in and it is to be regretted that on May 15 the Hereford world is to lose from its ranks one who has by her individual efforts and from a nucleus of ten cows grown a herd of over seventy head. That is such a herd as should inspire the efforts of all breeders. The herd referred to is the Fair Acres herd owned and personally managed by Mrs. C. S. Cross, of Emporia, Kan. Mrs. Cross has done her part and as she says in the announcement in the catalog of her dispersion sale, she parts with the herd simply because the work connected with the management of a herd of this size is more than she can attend to and that it is with regret that she severs her connections with the "white faces." Those who have the interest of the breed at heart should pay a lasting tribute to Mrs. Cross, as by so doing they can add to their herds stock that is good and descends for generations from stock that has helped to put the Hereford to its present high state of perfection. The catalog shows seventy-one lots with the blood of such sires as Albion, Lord Saxon, Java, Keep On, Imp, and Tranquility, a son of Beau Brummel, predominating. A great many cows sell with calves at foot by Major Beau Real, a bull that Mrs. Cross used with much success. A number of his get are listed and they will be found desirable. Three steers by him are cataloged as lots 48, 52 and 62. Lot 62 is a full brother to the grand champion steer shown by Mrs. Cross at the world's fair at St. Louis. These are show prospects ready to be carried on. The yearling and two-year-olds are by Tranquility, a Beau Brummel bull that made a good cross on the Fair Acres cows. The bulls listed will be found high class and choice herd bull material will be found here. Christy, the present herd bull of which so much has been said, is listed as lot 51. He will be found one of the best yearling bulls to pass through a sale ring for some time to come. Bellairs, a September yearling, got by Tranquility and out of a daughter of Java, should please some man hunting a bull with even lines and a good head. Valmond 2d, listed as lot 71, is another September yearling got by Tranquility and out of Dewdrop 3d, one of the imported cows that were got by Albion. He will be found an exceptionally fine hander, well covered over back and with good lines. The great value attached to the produce of Dewdrop 3d should add much to his value as a herd breeder proposition. Lot 65, Monrad, is a February yearling, got by the same sire and out of a daughter of the great Kansas Lad. His full brother, not considered so good, sold for \$275. Monrad is a

low set fellow and an even flesher. Saxon, Beau Real, a yearling son of Major Beau Real, and out of the same cow as Christy, should please some critical buyer. All the bulls are of a pleasing uniformity and a choice lot from which to make selections. The cows are remarkable for their productiveness and on looking through the catalog it will be found that the daughters of Wild Tom, Lord Saxon, Albion and Keep On made a foundation seldom equaled. The original cows are listed with their daughters and grand-daughters following. This will be one of the rare opportunities to see two and three generations. The men wanting cows for breeding purposes can do no better than here, as Mrs. Cross would never tolerate a non-breeder or a poor producer as her herd was one that had to prove a working and a money making herd. Some females of strong show yard form will be found in the offering. The last announcement of the sale will be found on page 22 and we urge all our readers who want choice breeding stock to be with Mrs. Cross at this her first and last sale of her favorite breed, "the White Face."

#### AN IMPORTANT SHORT-HORN DISPERSION SALE.

In order to close a partnership, the Short-horn herd owned by Messrs. J. W. Palmer & Son, of Albion, Ind., will be sold at public auction at the breeding farm on Friday, May 24th. Thirty-five head of richly bred Short-horns have been listed. Of this number Mr. T. E. Adams, of Columbia City, Ind., lists one extra good cow and five yearling bulls of the herd header sort. Messrs. Palmer have been careful buyers. They have bought the best that was offered for sale both in point of breeding and individual merit. For this reason, the offering is practically Scotch and the individuality of the offering is in keeping with the richness of the blood lines. At the head of the herd has been used the Scotch bull, King of Diamonds, and he will do to head any good herd in this country. He was fifth at the International in 1904 in senior yearling class, and is the sire of some of the best calves the writer has seen this year. He has an attractive head and horns, is evenly covered, nicely balanced and stands on short legs. King of Diamonds is out of the same dam as Villages Lad, the bull which Mr. Frank Cotton sold for exportation to South America, and which sold for the highest figure of any bull in the consignment. He is a very sure breeder and will bear the inspection of anyone in search of an extra good herd bull. The attraction of the bull consignment is Choice Master 267262, by Choice Bud 212003 by Imp. Choice Goods. This bull is a beautiful roan and was dropped November 29, 1905. In the hands of some good showman this bull would make his mark this coming fall. He is a show bull in every particular, is deep, wide, with a wonderful spring of rib and has the scale, thickness and smoothness found in strictly show bulls. He has a particularly good head and horn and stands on good short legs. The breeder who is in search of a strictly good herd bull will do well to be present on sale day. Very few bulls possessing the breeding and individual merit as does Choice Master, are offered for sale at public auction, but in dispersion sales breeders have an opportunity to secure at their own prices many animals that under other conditions would not be offered at any price. Many of the cows have calves at foot while others are well along in calf. They represent the most fashionably bred Scotch families and individually are in keeping with their breeding. Get the catalog, study the breeding and plan to be present at Albion on day of sale. This event follows the noted Scotch sale in Chicago of Messrs. Forbes, Prather, Ayres & Hanna and can be easily reached. Albion is 135 miles east of Chicago, on the Baltimore & Ohio railroad. Further particulars regarding this offering will appear in our next issue.

#### THE SOUTH OMAHA SHORT-HORN SALE.

Readers of The Homestead who are wanting Short-horn cattle will be interested in the public sale that will be held at South Omaha, Neb., under the management of Mr. F. P. Healy, on Monday, May 27th. For a number of years past Mr. Healy has been managing Short-horn sales at this point, and let it be said to his credit that he always brings with him an extra good lot of cattle. This is to all intents and purposes a breeders' sale, being consignments from several of the very best herds. The contributors are as follows: W. R. Wilson, Arispe, Iowa; F. C. Holland, Milton Iowa; F. P. Healy, Bedford, Iowa; N. D. Merrill, Creston, Iowa; and J. A. McFarlane, Fairfield, Iowa. There will be forty-nine head in the sale and of these twenty-seven head will be Scotch cattle. There will be twenty-seven head of females and twenty-one head of bulls. Mr. W. R. Wilson, than whom there are few better breeders in the state, will sell sixteen head, and a better draft of cattle has never come from the Wilson herd than will be offered in this sale. He is selling five bulls, three cows, and the rest are heifers, and we will say there are some extra good ones among the bunch. Among his bull offering is his five-year-old herd bull Straight Cruick 191132. This bull has been used with much success in the Wilson herd and he is now selling him because he has so many of his daughter on the farm. He is a son of Violet's Galahad and his dam is a daughter of Valley Champion, and he belongs to the well known Queen of Beauty family. He is strictly a pure Cruickshank bull and he is going to be a bargain for some man that is looking for a herd bull. He will also offer a number of younger bulls in the sale, the most of which are straight Scotch. The most of Mr. Wilson's offering are Scotch cattle, backed up by his forty years of practical knowledge in breeding Short-horn cattle, and it is a consignment that any breeder could well feel proud of. We will have more to say of his cattle individually in future issues. Mr. F. P. Healy is also putting in a splendid offering of ten head. Four of these will be young bulls, five are heifers and there will be one cow with a calf at foot. Among his bull offering is two good young Duchesses of Gloster bulls, both sired by Banner Pride and both out of dams by Scotts King. These are strictly pure Cruickshank bulls are both red in color, and will command attention on sale day. These bulls should go to head good herds, as there is everything to commend them to the breeder who is looking for that kind of a bull. He also includes three good

**GEO. M. McMURRY,**

**MARYVILLE, MO.**

Secret helpers and one well bred Brawth Bud. He has been particularly careful to select some of the very best things he had in his herd for this sale, and he is certainly contributing some of the good things in this offering. Mr. E. C. Holland is selling ten head, among which are seven head of heifers and two Scotch bulls. One of these bulls is a richly bred Orange Blossom and the other is an Acorn, and both of them are sired by the Thompson bred bull Bold Prince. He also sells some very nice heifers in this sale, and those who, have heretofore bought cattle from him know that he generally comes forth with something good. Mr. J. A. McFarlane will sell five head of young bulls and Mr. N. D. Merrill will sell six head of bulls in the sale. The offering is a good one, both in point of breeding and individual excellence. There will be some very choice bulls in the sale that should go to the head of herds, and the females are among the best that have been sold in South Omaha this season. We will have more to say of these cattle in our succeeding issues. Write to Mr. F. P. Healy, Bedford, Iowa, for catalog of the sale and be kind enough to mention Iowa Homestead when doing so.

#### THE CARPENTER & ROSS SHORT-HORN SALE.

The month of May, 1907, will go down in history as being noted for Short-horn sales, representing many of the leading breeders of the red, white and roans, beginning with sale from a noted herd in Michigan and followed by a week of noted sales beginning with that of Messrs. Carpenter & Ross, of Mansfield, Ohio. A select draft of imported and home-bred Scotch cattle will be offered for sale by this firm on Wednesday, May 22. The imported lots, six bulls and six females were personally selected by a gentleman of long experience in importing Scotch cattle, Mr. P. G. Ross, of the above named firm. Mr. Ross assures a representative of this paper that the lot of cattle which he has selected from the best herds of Scotland should be appreciated. The cattle recently imported are in good thrifty condition, and will suit the breeder who wants something of merit rather than those which have been highly pampered. This sale offers to the Short-horn breeders unexcelled opportunity to secure at their own price representatives of the leading herds of Scotland, among the number being prize winners at noted shows and direct descendants of many of the most popular prize winners. The bull buyer will find plenty of material of the right sort in this offering. Among the imported bulls, of which there are six, Diamond Victory is rated as a desirable one. He is by Diamond Mine, a son of Bapton Diamond, a noted breeding bull of Scotland, having sired the calves that made the highest average for James Durno at the Perth sale in 1906 and the third highest in 1907. A full brother was sold at a high figure last year to go to Cblli, Stronan Star is by Montrose Baron, a winner at a number of the leading shows, and claimed by Captain Sterling to be the best bull he ever owned. This dam is by the celebrated bull, Star of Morning. He is a low thick-set, red bull, with extra good head, splendid back, and nicely covered over hips. His full brother won first as yearling at the Perth show and sold for the record price of \$3,000. Keir Scepter is a Miss Ramsden, by Lord Elgin. He is described as a low down, mellow, compact bull, of unusual character. His dam, Meadow Shepherdess, by Lord of the Meadow has been a noted bull producer, two of her sons having sold in Argentina for \$7,500 and \$9,000. Royal Gold by Royal Crown, a Cruickshank Clipper with the dam, Goldie 37th, by William of Orange is a very smooth, stylish calf with an excellent head and much character. His dam is one of the greatest bull breeders of Scotland, and is still producing at the age of fifteen years. The sire of this bull, Royal Crown was a championship winner at the Royal Northern Show, at Aberdeen. The reasons are numerous why this bull should prove an attraction sale day to anyone who is in the market for a bull that is

## Three Ohio Chief Boars

for sale. Two fall boars and one yearling. Write me at once.

**C. F. KIRK, Ponca, Nebraska.**

**6 Good Duroc Jersey Fall Boars for Sale.** I HAVE 6 extra good fall boars that I will price right if taken at once. backed up with show yard ancestry and whose individual excellence comes to him through his immediate ancestry. Royal Fusileer belongs to the Marr Flora family and is another of the low down, blocky sort, and is regarded as one of the good bulls of the importation. Royal Crown, by Vice-President and out of Coldstream is a roan of exceptional merit, and is regarded as one of the desirable ones. He belongs to the Diamond tribe. The female consignment of this importation includes many prize winners at the leading Scotch shows. The Short-horn breeder of this country who is in search of show material will find in this lot of females animals worthy of his careful inspection. Cadboll Gwynne is one of this kind. She was second prize winner at Perth and was the highest priced female of the sale. She is in calf to a Broadhooks bull, that was a winner of eight firsts and two championships in 1906. She is a daughter of Baron Butt, and her dam, Gwynne 2d, was by Scottish Prince. She will make a creditable showing this fall and should attract the attention of all Short-horn breeders. Mona's Mint is a two-year-old heifer bred by James Durno. She is considered the choice of the two-year-old heifers bred by Durno. Her sire, Royal Mint, is a full brother to Collynie Mint that sold at \$3,100. She is in calf to Baron Fyrie, the highest priced calf at the Aberdeen sale. Bekinda, is a two-year-old by Royal Mint. She is a heifer of great scale and will make a large, roomy cow, and is in calf to imported bull, Spicy Peggy, a daughter of Spicy King, one of the best breeding bulls of Scotland. One of his daughters sold for \$4,250 and eleven of his get made an average of \$2,060 last year. She is another of the show heifers in this importation and is in calf to the Broadhooks bull mentioned above. Astea by Violet's Victory, has a fine roan bull calf at foot by Clarendon, winner of first in class at Aberdeen, 1906. Marmion 7th, by Pitline King 2d, and her dam was Marmion 5th by Diomed. She is in calf to Royal Gold, and is a low down, thick, blocky heifer. We have briefly reviewed the imported lots and commend them to our readers in search of well bred Short-horns. The offering throughout is a notable one, and this firm are deserving of the patronage of the Short-horn fraternity. The catalogs will be sent to all who write kindly mentioning The Homestead. The announcement appears on page 20 of this issue. The Forbes-Prather-Ayres-Hanna Scotch sale will be held in Chicago, on the following day, May 23, and both sales can be made at one expense. Further particulars regarding this offering will appear in our next issue. Plan to attend this noted sale.

**The Forbes-Prather-Ayers-Hanna Short-horn Sale.**

One of the important events in Short-horn circles this season is the forthcoming sale to be held in Chicago, on May 23, by Messrs. I. M. Forbes & Son, J. F. Prather, F. W. Ayres, and D. R. Hanna. This sale follows that of Messrs. Carpenter & Ross, of Mansfield, Ohio, on Wednesday, May 22. This sale is made up of Scotch Short-horns from four of the noted herds of the breed. It represents the production of herds which have had much to do with the improvement and popularity of the breed. The herds represented in this auction have been drawn upon for many of their best individuals, winners in strong shows and in many cases animals which could be retained with profit in the herd. Rarely are breeders given the opportunity to secure at public auction cattle representing the get of such noted sires and dams as the lot which is consigned to this sale. The female list includes many show yard winners and much show yard material. The offering merits the attention of breeders who are in the market for show stock, or wish to add new blood to herds already established. To the farmer who contemplates the establishment of a pure bred herd, this offering offers unexcelled advantages. Every bull cataloged is good enough to head a good herd. They are bred along the lines that are producing the prize winners and that are most approved by the breeders of the present day. In every way this is one of the top offerings of the year and breeders will do well to be present sale day. Messrs. I. M. Forbes & Son, of Henry, Ill., send forward ten females, including two senior yearling heifers that will be heard from in the fall shows. One of them, La Belle 2d, was fifth in class at the last International in the strongest competition of the show. Queen of Scots 19th, is a daughter of Imp. Royal Robin, a bull which sold in the 1901 International at \$1,150, to F. W. Ayres and used successfully by him. Messrs Forbes regard her dam the best cow they ever bred, and her granddam the best cow they ever owned. The Duchess of Gloster family has given to their herd some of the best producers they ever owned, and in listing this cow they are sure that she will do well for her new owner. She is safe in calf to the prize winning bull, Victor Linwood, second at International in two-year-old class 1906, and he and his sister, won first there as produce of cow. Star's Red Queen, is another of the Duchess of Gloster family, and is got by Imp. Star of the North, the first prize aged bull at the 1900 International and sold at auction in the International sale the same year for \$1,840. She is a splendid individual of the Scotch type, beautiful head and horn, thick-fleshed, smooth and uniform in conformation and levelness of lines. She is safe in calf to Imp. Cock Robin, the bull at the head of this noted herd, a bull who has established an enviable reputation as a sire of prize winners. The Messrs. Forbes are listing cattle which represent their breeding herd, said by competent judges to be one of the best collections on either side of the water. Further particulars in regard to their offering will be given in our next issue. Mr. J. F. Prather, of Williamsville, Ill., lists five head of splendid young things, four females and a bull. Rosebud 13th is a coming three-year-old by Imp. Pride of Fancy and out of Rosebud 8th, by Imp. Fearless Archer, a bull used with much success by Mr. Prather. She is a smooth, well made young cow, that will do well in any company, and is safe in calf to Prince Victor, a bull purchased by J. H. Green & Co., from Village Park herd. She will calve shortly after sale, and will be a valuable addition to any herd. Nonpareil Queen 3d is a daughter of Imp. Victoria's Count, one of the best Victoria bulls in this country. Her dam was by Imp. Collynie, a Dutch bred bull of great merit. Individually this young heifer will suit the most discriminating buyer. She is in calf to Imp. Sovereign. Mr. Prather lists a very good lot, including a young bull fit to head some good herd. Further mention of this consignment will be made in our next issue. Mr. F. W. Ayres, of Athens, Ill., lists twelve head, ten females and two extra good young bulls of exceptional merit. Mr. Ayres has one of the top Scotch herds of the country and is sending forward a representative lot of cattle. Champion Robin is an eleven months bull by Imp. Royal Robin and out of Imp. Rosaline by Imp. Lovat Champion. This young bull is one of the low down, compact bulls which are seldom offered at public auction. He has an attractive head and horn, is extra good throughout, and is a wonderfully well covered, thick-fleshed bull. No better herd bull will be offered for sale this year, and the buyer in search of a herd header will be pleased in this bull. The females are an attractive lot. Imp. Marigold 4th is one of the attractions of the offering. She has been a good producer, Mr. Ayres keeping two of her heifers in his herd, which are just about priceless. She is safe in calf to Imp. Bapton Coronet, one of the best sons of Silver Plate, which heads this herd. Clara 62d is a daughter of Imp. Royal Robin and out of Imp. Clara 59th. She is of strictly show yard merit and is sure to please some one in search of show material. Her breeding is unsurpassed and her individuality is in keeping with her blood lines. This offering is a strictly high class one in every respect and is in good breeding condition. The largest consignment comes from the well known herd of Mr. D. R. Hanna, of Ravenna, Ohio. Included in it are a number of prize winners and others which will furnish material for the fall shows. Diamond's Mariner is listed. He is a son of the noted breeding bull Imp. Bapton Diamond, and his dam is of the famous Marr Missie family. He won first at Kansas City and divided honors with Avondale, the good son of Whitehall Sultan, at the various fall shows at which he was exhibited. He will make a good show proposition this year or will do to head the best herds. There are a number of other richly bred bulls listed, mention of which is deferred until our next issue. The females listed by Mr. Hanna are a richly bred lot. Moss Rose 4th is a show proposition. She is a daughter of the Marr bred bull, Imp. Crescent Knight, and out of Imp. Moss Rose. She is safe in calf to Nonpareil Archer. A daughter of Marquis of Zenda that will please is Nonpareil of Pine Grove 15th. She sells with calf at foot by Marigold Sall-

or. Several imported cows are included in this consignment, mention of which will be made in our next issue. Catalogs may be had by addressing Mr. W. C. McGavock, of Springfield, Ill. Look up the advertisement on page 20 of this issue and mention The Homestead when writing for catalog.

**Cutler's Short-horn Sale.**

On Saturday, June 8th, Mr. W. E. Cutler, of Corydon, Iowa, will disperse his entire herd of Short-horn cattle at his farm, adjoining the inland town of New York, Iowa. Southern Iowa and northern Missouri men will find this a most convenient sale to attend, and the breeders from other states will find it to their interest to be present when this bunch of cattle goes under the hammer. Mr. Cutler has been one of the oldest breeders of Short-horns in southern Iowa, and his "Canna Hill herd" has been one of the best in that section of the state. When Mr. Cutler founded his herd he began by purchasing the best bulls he could buy. The first bull used was Orange Blossom Duke, a son of Orange Blossom Lavender, and he was a richly-bred Cruickshank Buttery. The next used was Vallenev 2d, a Cruickshank Victoria, and a grandson of Victor Mysie 2d. This bull was purchased of Messrs. S. H. Thompson & Son and was used with much success in the herd. Quite a lot of his get will be included in the sale. He next secured the Bothwell-bred bull, Victor Maple, a son of the noted bull, Grand Victor, and this bull he used until the middle of last summer when he sold him to one of Iowa's most noted breeders, Mr. C. A. Saunders, of Manilla, Iowa, and he is now doing service in his herd at the Greeley Stock Farm. This bull is a half brother to Golden Lavender, that sold in the recent sale of Mr. Geo. Bothwell for \$995. Mr. Cutler's present herd bull, and one that will be included in the sale, is Baron Victor 250111. He is a two-year-old Cruickshank Victoria and was bred by Mr. M. L. Logan, of Lineville, Iowa. He is a son of Victor Knight 177893, a son of the \$1,000 bull, Baron Dudding, and out of a daughter of the Duchess of Gloster bull, Baron Goldust 3d. This bull topped the Logan sale last summer and he is today one of the best bull propositions that we know of that will be offered at public sale. We make mention of the herd bulls used in this herd at this time simply to call attention of breeders to the class of cattle that Mr. Cutler will sell in his sale. The Scotch females represented will be Victoria, Rosemary and Lavender tribes, and there will be about eight head of these altogether. The other females will be Rose of Sharon, Young Phyllis, Bellina, Young Mary and other well-known tribes, and these will have from two to four and five Scotch tops on them. The last three bulls that were used in this herd were Victoria bulls, and the cattle that go into the sale show the breeding that is behind them. The female offering will include Victoria, Funke 7th, a daughter of old Golden Champion. Here is a Cruickshank Victoria heifer with a bull calf at foot by Victoria Maple. Then he also sells some Rosemarys and a Lavender, the latter being a daughter of Imp. Fairhaven with a heifer calf at foot. The herd has a remarkable lot of good cows in it, and is particularly strong in milking qualities. Several of the cows to be sold would make useful dairy cows, having large udders and are great milkers. There will also be a nice line of heifers sold, and some of these are very promising. There will be fourteen bulls in the offering, ranging in age from ten months to two years. Mr. Cutler is disposing of his herd because of ill health, both of himself and his wife, and this is the only reason that he is selling out. The Cutler herd has been one of the profitable herds in southern Iowa, and we know of no place where buyers will be able to get better bargains than they will in this sale. Watch for further announcements in these columns and write at once for catalog. Kindly mention this paper.

**GRAND PUBLIC SALE OF****Short-horn Cattle****AT NEW PROVIDENCE, IA., MAY 22, 1907**

On the above date at my farm adjoining the town of New Providence, I will offer for sale 47 head of strictly business Short-horns. **Sweepstakes Winners.** -:- **A Whole Horse Show**  
All of Iams' "Superb bunch" of "show stallions" are offered for sale. Dad, it's a  
"100 to 1" they are the "best ever." Get into "Iams' band wagon." All rail-  
roads lead to Iams' Importing Barns at 2 cents a mile, and Iams'

**SUMMER PRICES**

are pushing competitors "off the roof" hypnotizing buyers with "top notchers" at "LET-  
LIVE-PRICES." John, if you pay cash or bankable note you will buy a stallion of  
IAMS. IAMS' "SELLING CLOTHES" "FIT" "all the boys." He saves thousands of  
dollars to stallion buyers. He is not in the "STALLION TRUST." He places \$1,000  
or \$1,500 Insurance.

**\$1,000 — SAVED AT IAMS — \$1,000**

Key! what a rich graft these "SLICK STALLION SALESMEN" are working on the  
honest farmer, selling fourth rate stallions at \$2,000 to \$5,000. Iams sells "top  
notchers" so good, big and cheap THAT THEY DO NOT NEED TO BE PEDDLED TO BE  
SOLD. Mr. Buyer, see Iams' stallions yourself. Take no "GOLD BRICK STALLION  
SALESMAN'S WORD." Iams has "THE GOODS" you read about. His establishment is  
worth going 2,000 miles to see. Iams makes his competitors "HOLLER." He is knocking  
"HIGH PRICES" out of the Xmas tree. Iams saws wood, "BUTTS IN," sells more stal-  
lions each year. He makes every statement good. George, dear! Buy a stallion of Iams.  
His \$1,200 stallions are MUCH BETTER than our neighbors paid those Ohio men \$4,000  
for. Then I can wear the diamonds. Iams speaks the languages buys direct from  
BREEDERS, pays no buyers, salesmen or interpreters, has no two to ten men to divide  
profits with. Iams guarantees to sell you a BETTER stallion at \$1,000 to \$1,500 (a few  
higher), than are sold to Stock Companies at \$2,500 to \$5,000 by SLICK SALESMEN,  
or pay you \$100 for your trouble, you the judge. Iams pays horse's freight and buy-  
er's fare; gives 60 per cent breeding guarantee.  
Write for eye-opener and greatest horse catalog on earth.

# In the Golden Prairie District of Southeastern Wyoming

Within one to six miles of railway station you can now buy at from \$8.00 to \$15.00 per acre on ten years' time, land equal in fertility and productiveness to the best in the central states.

**DO YOU ASK WHY, AT THIS LATE DAY, THIS LAND CAN BE HAD AT PRICES SO LOW?**

## The Question is Easily Answered

BECAUSE—Over thirty years ago the government gave the U. P. Railroad Company each alternate section of the land in a strip forty miles wide. Because—This being the best grassed, best watered section of the "eastern slope" ranchmen at once secured the railroad land, enclosing in their fenced pastures the alternating homestead sections, making it impossible for the homeseekers to locate there. Because—Only last year the government at Washington decided that the "little fellow," the man looking for a home, should have a chance, and all fences surrounding government land were ordered torn down. Because—This put the ranchman out of business, and threw open for settlement some 150,000 acres of choice homestead land, while we purchased the deeded lands, 10,000 acres of which we are improving and the remainder we are placing on the market.

## The Public Is Not Slow in Grasping a Good Thing

Although but limited advertising has been done, we have sold over 40,000 acres of the land in the past few months, nearly all of it to practical farmers. More than 300 homestead entries have been made, 61 of them in March and 100 in April. A settlement of German Lutherans has been established with headquarters at the new town of Luther, on the Union Pacific railway, 26 miles east of Cheyenne, the state capital.

## Luther Is Booming

A large two story building, almost completed, will be the home of the Luther State Bank, and the postoffice, with public hall above. The Hotel Ellis, a fine two story building, will be ready for occupancy by May 15th. A lumber yard is in operation, a sash and door factory has been secured, while a creamery, elevator and broom factory are soon to be added. The fertility of the surrounding country and the thrift and enterprise of her citizens, will soon make Luther the best town in that part of the West.

A Golden Prairie Outfield with School House in Distance. Photographed Sept. 22, 1906.

## A Present of a 160-Acre Farm

The opportunities offered in the Golden Prairie District are unequalled anywhere else in the world to day. Consider for a moment that on your purchasing 160 acres or more from us, we will locate you, free of charge, on an adjoining government homestead, of as choice land as the sun ever shone on. This virtually cuts the price of your land in two. Then, if you are buying as an investment, do not fail to note that these homesteads, being taken up and improved by farmers, insures a steady and rapid advance in the value of your purchase.

## We Do Not Simply Assert---We Prove

When the stockmen took possession of the Golden Prairie country they failed to entirely monopolize it. In the early '80's what is known as the Albin settlement was started in a township not fenced by the ranchmen. This settlement, composed chiefly of Swedish people, gained a foothold, and their remarkable success in farming on the prairie without irrigation is what induced us to invest in Golden Prairie land.

Following are some of the many testimonials we have received from these people. The signed originals are in our office, subject to your inspection.

## TESTIMONIALS

### Mr. Cunningham's Statement

Mr. J. W. Cunningham, of Albin, Wyoming, makes an interesting statement as to the amount of grain he thrashed during the past year. He has lived adjoining the Swedish settlement in Laramie county for twenty years and in addition to operating the thrashing machine during the past few years, he has made a success of farming. In Mr. Cunningham's letter, as in most of the others, the term "dry farming" is used. This is the ordinary expression used by the people in our section of the country to distinguish from irrigation, ordinary farming where rainfall is depended upon.

Albin, Wyoming, February 16, 1907.

Federal Land and Securities Co.,  
Des Moines, Iowa.

Gentlemen:—

Answering your inquiry will say I have lived here in Wyoming about twenty years. I have farmed every year during this time and have never had a failure of crops. Have run thrashing machine each season for the last four years. The first season I thrashed 50,000 bushels of grain, and have gradually increased until the season of 1906 I ended the season with a total of 135,000 bushels thrashed. All this crop was raised in my neighborhood by dry farming. Started my machine September 3d and closed the season January 1, 1907.

I own 640 acres of land, twenty horses, twenty cattle and thirty hogs. I raise all kinds of garden vegetables. Had last season one acre of potatoes that yielded 200 bushels, all dry farming.

Yours truly,

(Signed) W. J. CUNNINGHAM.

### Mr. Cox's Letter

Mr. John B. Cox is one of the best known farmers in the neighborhood north of Pine Bluffs. A visit to his farm will verify all the statements he makes in the following letter.

Pine Bluffs, Wyoming, February 14, 1907.

To the Federal Land and Securities Co.,  
Des Moines, Iowa.

Dear Sirs:—

Replying to your inquiry will say I settled on my homestead in February, 1889. Have been farming here ever since that time and raising cattle, hogs, horses, poultry, wheat, barley, oats, potatoes and some corn. Sowed three pounds of blue grass seed three years ago this spring. It has done well and I have a good blue grass sod. Sowed my first timothy seed (one acre) in the spring of 1902; had a good stand and have sowed each spring since until now I have twenty-five acres of good timothy meadow and am going to sow ten acres more this spring. I thrashed in 1906, forty-eight bushels of timothy seed and it yielded ten bushels per acre. Sowed in spring of 1906 two pounds of home grass seed and it is doing fine. Red clover is setting in my meadows more every year. Have raised all kinds of root crops to perfection. Have young orchard, gooseberries, red currants, raspberries, etc., all doing well. Corn yielding about forty bushels per acre, wheat thirty-five, oats sixty bushels, all dry farming. I own 960 acres of land and have been offered \$13.50 per acre cash for it, but my price is \$30.00 per acre and won't take any less.

Yours respectfully,

JOHN B. COX.

### Mr. Anderson's Statement

Albin, Laramie county, Wyoming, February 12, 1907.  
I settled in this county in 1887 on a homestead. I have been farming ever since that time on upland prairie without irrigation and have never had a total failure. Raise wheat, rye, oats, barley, millet, some corn, potatoes, pumpkins, squashes and all kinds of garden vegetables whenever I planted them. I own 1600 acres of land, 160 acres in cultivation. In 1906 raised 6,500 bushels of oats, 600 bushels of potatoes, 350 bushels of barley, 250 bushels of speltz. Own eighty head of horses, ninety cattle and twenty-four head of hogs. I made my start and am worth all I have from the beginning on my homestead.

(Signed) GUST ANDERSON.

### Mr. Malm's Statement

Pine Bluffs, Wyo., Feb. 13, 1907.  
I settled in Laramie county, Wyoming, in the year 1887, on the farm I now live on. I am living on the same old homestead. I have been farming every year since that time. I have raised wheat, oats, rye, millet, potatoes, pumpkins, squashes and all kinds of garden vegetables whenever I planted them WITHOUT A SINGLE FAILURE. I also have a young orchard set out and some forest trees and all are doing well. For the benefit of those who have been told that it is necessary to irrigate to raise anything, will say that my land is all upland prairie and I depend of course entirely on rain-fall to raise crops. I have 175 acres under cultivation. Raised in the year 1906, 600 bushels of fall wheat, 300 bushels of spring wheat, 3,300 bushels of oats, 500 bushels of speltz, 500 bushels of spring rye, twenty acres of corn. I have ten acres of fine alfalfa. I own a modern corn binder and am feeding corn in the fodder to my stock. I have made all I am worth living on the same old homestead, by sticking to my work. I own 350 cattle of all ages, twenty-five horses, 60 head of hogs. Borrowed the money I bought my first plow with.

### DIFFICULT PROBLEM IN SWINE RAISING.

The following communication has been received from a subscriber at Westbrook, Minn.:

I had three brood sows running around all winter and they were bred to a registered boar. I did not feed these sows anything when the weather was good, but during bad weather I fed them a little ground barley, as slop. They run out in the corn stalks that were husked last fall after the cows run in them all winter, so there is not much corn left for the sows. They were not fat, but in good shape. These sows are now ten months old, and weigh 225 pounds. They had great difficulty at farrowing time, it being necessary for me to kill one. The other two farrowed the same day and it took me from six o'clock in the morning until eleven o'clock at night to get the pigs away from them. They each had six pigs and I only got three alive and one of these died the next day. One of the sows could not stand on her hind feet for a few days, but she is getting better now. Would it be all right to breed these sows again, or would I have the same trouble?

Considering the manner in which these sows are handled, it is an exceedingly difficult matter to diagnose the trouble. Barley is comparatively rich in flesh-forming constituents and when fed in the form of slop makes a good food for brood sows. Then again, the fact that these sows had the run of the stalk fields would furnish plenty of exercise—an important matter for sows with pig.

We suspect, however, that the trouble is due to the fact that only a comparatively small amount of barley was fed and that these sows got most of their living in the corn field where, of course, only corn was available. If they were largely brought through the winter on corn alone then it is not surprising that there should be difficulty at farrowing time; that the pigs should be weak, and that many of them should be dead. Corn does not contain the flesh-forming constituents nor the mineral matter to make a good ration for a brood sow, and no greater mistake can be made than to bring hogs through the gestation period largely on corn. When this is done they invariably go wrong at farrowing time, and while men commonly attribute it to bad luck, it is nevertheless a case where effect and cause are closely related.

An incident was recently called to our attention where an extensive Poland China breeder sold two sows to a neighbor two months before the sows were due to farrow. The seller had brought his sows through the winter largely on a mixture composed of three parts shorts, two parts bran, five parts ground corn and one part of oil meal. The sows were fed about all they would eat of this mixture twice a day, and in cold weather the slop was heated. In addition, they were given a little ear corn at noon. In the case of the first twenty sows that the owner kept not the slightest difficulty was experienced at farrowing time by a single sow, the little pigs were strong and the sows had plenty of milk, the result being that a splendid average was saved from the twenty sows. Not so in the case of the two sows sold to the neighbor. They were put on a ration of corn when taken to their new home and one of these sows died at farrowing time, while the other saved only three pigs.

This was a case where feeding methods had all to do with the success and with the failure, and it is just possible that the subscriber who submits the above inquiry has allowed his sows to get too much corn and not enough flesh-forming constituents.

We would not hesitate to breed these sows again for fall litters, because they

will in all probability run on grass during the summer and there will not be the same difficulty experienced at farrowing time during next August or September.

### THE QUACK GRASS PROBLEM.

A subscriber from Pomeroy, Iowa, sends the following inquiry:

I have a small field infested with quack grass and I notice that the plant is spreading. I shall consider it a favor if you will kindly give me the best method of exterminating this grass.

We can only give the general principles that must be employed in destroying quack grass. In the first place, this grass has a tough rooting system which lives over winter and which will stand a good deal of tearing up before it is destroyed.

Advantage should be taken of this fact, and labor should be spent rather on the surface than in going any considerable depth into the soil with implements and bringing the roots up. We have known the following method to work exceedingly well in many cases: Plow the sod in the late summer or fall and if the grass starts up in the fall after plowing, run the disk over it and thoroughly cut back all greenness. Do the same thing in the spring two or three times so as to absolutely prevent the grass from producing leaves. If this is kept up until about the first of June and such crops as millet, sorghum, kafir corn or rape seeded thickly at that time,

the chances are that the quack grass will be almost absolutely eradicated.

By the above method plants are weakened by the methods of cultivation employed in the spring months, and the crops mentioned come on so rapidly that the ground is shaded sufficiently to prevent the growth of the weakened grass plants, the result being that the sod begins to rot, thereby destroying all shallow as well as deep roots.

We have known instances where men have succeeded in ridding land of quack grass by plowing in the fall, keeping the surface cultivated in the spring and by planting corn late, so that corn cultivation could be kept up until well on in July. The only objection to this plan is that in case the precipitation should be heavy the chances are that it will be almost impossible to keep ahead of the pest, though if the weather is moderately dry this plan is often very effective.

### FORCING YOUNG PIGS ALONG.

There are two policies to be pursued in one's method of handling young pigs. One is the policy of light feeding and the other that of forcing the young pigs along rapidly before and after the weaning period.

Conditions under which hogs are raised vary so much that we are by no means dogmatic in our advocacy of either plan. Where it is the intention to carry hogs until they are fourteen or fifteen months old before they are

finished for market it is no doubt the wisest plan to let the sow and pigs have plenty of grass, and, in addition, feed a comparatively small grain ration. With this method of handling, the pigs will possibly not weigh over seventy or eighty pounds when they are six months old, so that it naturally requires a long finishing period when the first growth has been as slow as this.

By the other method the results are altogether different, because if one will feed a brood sow heavily while she is suckling her pigs and will go to the trouble to make a little creep for the young pigs after they are a month or six weeks old, and if a good rich slop is supplied to the sows and pigs until weaning time, the weights should run all the way from 125 to 175 pounds at six months. Under such circumstances there should be no difficulty in finishing pigs that have been handled in this way at a weight of 275 to 300 pounds by the time they are nine to ten months old.

What should determine which method ought to be followed? In the first place, where one expects to have his hogs follow steers and hogs are, as it were, a matter of secondary consideration, the light feeding plan might be the better of the two; but where hogs are the main issue, then we believe that heavy feeding from the start, or at least liberal feeding, will realize a man the most profit. We think that it will pay especially to be liberal in the use of feeds this year because there is nothing in sight to bear prices before the onslaught of the 1907 crop. Whether the marketing of that crop will do it or not remains to be seen, but we know of a number of keen swine breeders who are in the business on a pork basis who are planning to attain heavy weights as early as possible this year. Their idea is to get out from under their 1907 crop before the bulk of the marketing begins, and we are not sure but what their policy will be a wise one.

We have only to add that in any event where young pigs are fed grain it pays, and pays well, to use something besides corn. It may be ground oats or barley or mill feed, though of course an exceedingly good ration may be made up by using corn along with about one part of oil meal or tankage to nine or ten of the corn.

It is quite convenient, where a farmer wishes to be very exact, to know accurately the number of acres in the different fields. This information is not hard to secure. With a hundred-foot line two persons can soon get the dimensions, or one man with a light wheel of large diameter so equipped that it may be pushed ahead of him, can secure the same result by counting the revolutions of the wheel.

Of sixteen leading institutions of learning, the Kansas state agricultural college leads the list in the per cent of its women graduates who marry. It has been demonstrated by a professor that the number is nearly twice as many as its best competitor, Vassar College. The domestic science course of the Sunflower state should, in view of this information, soon be over-crowded.

While it is a splendid thing for the young pigs to get them on grass as soon as possible, it is better to keep them in the pens if the whole herd of sows and pigs must be turned together in order for them to get a daily taste of "greens." Stealing will become alto-

Blackbird 26th, the only world's fair champion cow of any breed to ever be offered at public sale. Will be sold by C. J. Martin, at Adasa, Iowa, in his sale, on May 28, 1907. See page 25 for his announcement and send for catalog of sale.

gether to common and one sow will be drawn down by pigs that are not her own. Too many of the young rascals turn prodigal.

#### Making Cement Posts.

To the Editor of The Homestead:

For cement line posts it is inconvenient and somewhat expensive to use any large gravel, consequently we use only sand and cement. The amount of cement needed to fill the voids in the sand is ascertained by filling any vessel of known quantity with dry sand, then pouring water slowly into the measure of sand until entirely filled. The amount of water added (by volume) is the amount of cement needed to fill the voids. It is well to add a trifle more cement than this test shows in order to be absolutely certain that all voids are filled as they must be to secure the best results.

If you find that your sand requires one-fourth cement, then take three buckets of sand to one bucket of cement which will be enough for an inexperienced hand to experiment with, spreading it evenly on the bottom of the mixing box; over this spread as evenly as possible your one bucket of cement. Mix dry with a hoe or shovel, as you may prefer, until the mass is an even color throughout and don't slight this part of the work. After thoroughly mixing dry, add water while turing the mass over. Add the water slowly in order that the cement may not be washed away from the particles of sand. When your mixture is about the consistency of thick slop you have it ready to put in place, and this should be done with as little delay as possible. Do not mix up more than you can get into place in half to three-quarters of an hour from the time of first applying the water.

Corner posts, being of a much larger cross section, are made usually of a richer mixture of sand and cement to which is added from three to five parts of broken stone or small gravel. This mixture is not made as wet as for the line posts, and is put in place and tramped at the line of each set of reinforcing wires and on the top or open side of the mold. Posts made at this season of the year will be in good fix for use next fall. Keep them shaded while green and do not move them in less than two weeks, and better if you can leave them sixty days before moving. The process of mixing for line posts which I have endeavored to describe is called the "slush" process and needs no tamping. Undoubtedly this method makes a stronger product than the dry tamp process. H. N. Macdonald.

Muscatine county, Iowa.

#### The Two Row Cultivator.

To the Editor of The Homestead:

In regard to the inquiry about the two-row cultivator I will state that I took one on trial in 1906 that was returned by a farmer who was unable to work it at all. After I used it half a day it worked fine and is no harder to work than the one-row cultivator. It is a great success on fall plowing and I think it is all right on stalk ground if the stalks are raked and burned. One man and three horses weighing about 1,200 pounds each do not have hard work to take care of from sixty-five to seventy acres of corn. C. De Witt.

Polk county, Iowa.

#### Alfalfa.

To the Editor of The Homestead:

I noticed a recent article in your paper on alfalfa, by Mr. H. D. Lute, of Nebraska, and this reminds me of my alfalfa that I have been going to write you about.

A great many people around here are of the opinion it will not do well in this section. In the spring of 1903, I sowed about two acres, by way of experiment, on sandy ground. The next day after sowing, the wind blew hard and rolled the greater part of the seed into the pasture, but what did stay came up fine and has been furnishing three crops of hay every season, but is so poor a stand that it is hard to tell how much hay I do get; besides there is more or less timothy and clover mixed with it, so this is not a fair test, but it has so thoroughly convinced me that alfalfa will grow and do well in this part of the country, that last fall I put in about four acres more for a hog pasture. This ground was heavily manured in the spring of 1904 and cropped every year up to last fall when it was plowed. The ground being so dry I was afraid to

sow it until we got some rain, but just as soon as it did rain, which was about the middle of September, I sowed broadcast about twenty pounds per acre, harrowing it in in good shape. It came up fine, wintered well and looks well now,—except where the chickens cleaned up the young plants last fall from about half an acre,—in fact as good as any young seeding I ever saw in Nebraska. I expect to sow more next fall, as I like it better than spring sowing.

Carroll county, Iowa. C. E. B.

#### A Renter's Method of Feeding Hogs.

To the Editor of The Homestead:

In one of the issues of your paper Mr. Furrows asks for a discussion on the hog feeding problem and I have been waiting for an answer, but so far have failed to see any. I will therefore give my method and experience in caring for and feeding hogs.

Almost every farmer or hog raiser has his own ideal in this regard. As a rule breeders of fine stock will use a great deal of shorts, oil meal and tankage, which are the best of feeds, but very costly and require the ready cash. The renter does not always have the ready cash, so he will commence feeding corn to the little pigs as soon as they will eat and keep it up until they are ten or eighteen months old, when, after a fashion, they are ready for market or dead from disease. Many do not realize that corn alone is injurious to the development of the growing pig.

At the present price of lard the hog is the most profitable animal on the farm, and we should use our best endeavors to develop him in as short a time as possible. I bring my hogs to a weight of 250 to 300 pounds with the feeds raised on the farm. I always raise barley, which I get ground and make into a slop as soon as the pigs are large enough to feed. It contains a great deal of milk and as the pigs become larger I soak the barley and let it start to sprout, when they will eat it with a relish and do well. I also raise the mangel or sugar beet which, with the exception of one weeding and thinning, is about as easy to raise as corn and produces a great deal more feed to the acre. I also feed raw potatoes as soon as they can be obtained in the fall. This is a good worm destroyer and easily digested. Personally, I know of a bunch of hogs where many of them were dying from what was supposed to be cholera and after feeding raw potatoes the sick ones all got well. These feeds can all be raised on the farm and require no cash outlay, and by adding some pumpkins and a little corn a hog will thrive and grow rapidly and at six or eight months old can very easily be made to weigh 250 to 300 pounds, and by only feeding a little corn to finish them off with. I claim that corn alone, either fed green in the early fall or after it is matured, is unhealthy and injurious to the best development of the growing pig and a great cause of the diseases among hogs. Much disease could be prevented by feeding mixed feeds which can be raised on the farm, giving only a full feed of corn during the finishing period.

Humboldt county, Ia. M. Olson.

#### Breaking Western Range Horses.

To the Editor of The Homestead:

I have broken several hundred head of range horses in the past nine years. With the exception of four or five head they have given entire satisfaction. The following is the method that I have found the most satisfactory:

I drive the bronco into a small, round corral and rope him by the neck, using a brass hondoo on the lariat. After the animal is caught I snub him up quite close to the corral fence, one man holding the end of the rope which can be turned loose in case of getting tangled up or choking to death, while another man throws another lariat around both front feet. It now requires two men to pull the front feet out from under the animal and thus throwing it. The man holding the snubbing rope turns it loose now and catches the horse by the lower jaw, standing back of its neck, and turns its head over backwards and holds it there, while the other man ties the lower hind leg between the front feet. Now a halter is put on and a three-quarter-inch rope tied around the neck. It is doubled up and stuck through the halter ring in the form of a loop. Two or three half hitches are

tied around the loop, and finally the end of the rope is passed through the loop. This can always be untied easily.

Another long three-quarter-inch rope is tied around the horse's neck where the collar rests, not tight, and drawn around the fetlock of the upper free hind leg, which is then drawn ahead within about one foot of the front legs. It is then wrapped once more around the pastern joint and passed to the collar around the neck, wrapping it half a dozen times around the tight rope to keep it on the foot, after which it is tied to the collar. The horse is now let up and the halter-breaking commences.

By pulling the horse's head towards me I commence to go closer and closer until I can reach out and put my hand on his nose, rubbing it gently and patting it, also talking to the horse at the same time in a kindly tone. The next step is to repeat the same thing on both sides of the neck and then all over, as far back as possible, even rubbing and handling the front legs, keeping this up until the horse gets tired and does not mind the touch of the human hand. Next, I take a stout stick about four feet long and tie a large piece of cloth to the end of it and rub this over his hind quarters, around his legs, everywhere and all over, keeping hold of the rope with one hand and keeping his head turned towards me all the time. In about an hour and a half I can generally catch the most of them by the tail and worry along behind them. If the leg is tied short enough so that they can only rest the toe occasionally, they cannot kick.

After this I pull him around sideways for awhile until he gives to the rope and then turn his foot loose. I never tie a leg up longer than two hours. I generally pull him around another hour and pat him, when the most of them will lead a few steps. I then tie up in a safe place for half a day and they are finally taught to lead up on a loose rope.

This seems a tedious way of halter-breaking, but it is by far the best. What a bronco learns when he is first handled he will never forget. One man can break three head per day this way. This rule I use for the average range horse. A natural kicker, or fighter, or "man eater" requires different treatment, which I cannot describe here for want of space. A horse's foot can also be tied up without throwing it, providing it is halter-broken and needs handling. I also jump on their backs and ride them with the foot tied up; they cannot hurt you only by falling. Next day I hitch them up, providing they lead well.

This requires a strong harness, one with a flexible pad is preferable, and a good wagon with a brake, and, last but not least, a gentle horse. If a bronco has been well handled when halter-broken it is no trouble to put the harness on by putting the bridle on first. I always tie the bronco to the hame ring of the old horse, quite short, then I buckle a strap with a ring in it around the pastern joint of the left front leg, tie a long rope in it and draw this through another ring fastened to the harness where the pad buckles into the hame tug. I coil this rope up and hang it on the hame.

Now I take another rope and tie into the halter. While one man leads the old horse to the wagon the other holds this last rope to keep the bronco from running around the old horse. (The neckyoke should be tied to the tongue and the brake set.) After getting the horses in position I take the last named rope backwards and tie it to the hind wheel above the brake block. The bronco is now tied to the old horse and also to the wagon. If he jumps over the tongue, the operation is repeated. One man holds the old horse now while the other hitches up first the old horse and then the bronco. This goes like clock-work where the two men are used to working together, and there is no show for the horses to get away.

When everything is hitched I gather up the lines and get on the wagon, while the assistant takes the foot rope and puts it in the wagon for ready use. Then he unties the wheel rope and jumps in (this last part is generally done quite swift), and catches the foot rope. By this time there is generally something doing and away we go. If the bronco is willing to go slow, all right; if he gets in a hurry and bucks too much, and kicks a trifle, the foot

## Don't Paint Your Buildings with Clay

Don't pay paint prices for a cunningly mixed paint substitute containing clay, water, chalk, benzine, etc. Its first cost is as much as real paint, and its real cost—its wearing cost—is five times greater.

## CARTER

Strictly Pure

## White Lead

is every atom paint, ready for you to add linseed oil and dryer. Makes more gallons of pure paint (any color), covers more surface and wears longer than any other lead or paint. Sold by reliable dealers everywhere.

Send for our booklet, "Pure Paint." Exposes the methods of selling worthless materials at paint prices, and tells you how to save money on your paint bill. Sent FREE, with six beautiful color schemes.

Address Dept. D.  
CARTER WHITE LEAD CO., Chicago, Ill.  
Factories: Chicago—Omaha.

rope is pulled and thus he is forced to go it on three legs. He cannot hurt anything. If he stampedes I always drive in a circle, giving the bronco the outside. I always select a large field, meadow or pasture and drive them until the bronco gives up. They are driven twice daily.

As soon as they are bridle-wise and cut up no more capers, I venture into the road and near fences. I always drive a bronco on the left side first, and if they are bound to run every time they get their wind I just let them have their run out. The foot rope is a fine safety valve. If one watches right close he can generally pick their foot up before they can kick. A right woolly bronco requires a W. The foot rope fastens on the right side of the harness, passes through a ring on right foot, up through another on belly band, through ring on left foot and thence through ring on left side of harness.

Reynold Ziesman.  
Big Horn county, Wyo.

#### SIX POINTERS FOR DIP USERS.

Some of the good features of the well-known Cooper Dip are summed up in the following six points: The Cooper Dip is odorless and never kills the natural scent from ewe to lamb. Remember this when buying your sheep dip. It is possible to improve the condition of the growing fleece by the use of a good dip. The Cooper Dip possesses a splendid record throughout the world, as a wool tonic. One essential feature of dipping is to prevent a fresh attack. The Cooper Dip stands high in this respect. Insects cannot live on Cooper-dipped sheep. In South America and South Africa government tests have brought to light the superior efficiency of Cooper Dip for ticks, lice and mange in cattle and horses when used at the same strength as for sheep, and without the least damage to the animal. The Cooper Dip continues to advance in the estimation of sheepmen everywhere, and its use on 250 millions yearly is a positive proof of its high merit. The Cooper Dip has stood hundreds of official tests in the last sixty-five years and its quality has never yet been questioned. If your dealer can't supply you with this dip send to Des Moines Drug Co., Des Moines, Iowa, or the nearest point for distribution as advertised on page 20. Mention The Homestead when you write.

#### A LIFE PARTNER—HOWE SCALES.

Did you ever stop to think of the value a good record in business was? Did it ever occur to you that a record of sixty years of scale making was an asset worth thousands and thousands of dollars to the makers of the Howe scales? This fact means more to you than you ever dreamed, no doubt, if the thought has never occurred to you before. With all the improvement in the making of farm scales there is plenty of opportunity for a farmer to get a poor scale palmed off on him. If you intend to buy a farm scale why not buy one that will last for a lifetime? You can do it if you take a Howe scale home with you. The fact that a single scales of this make is to be found in use frequently for forty years proves the statement. All the modern improvements are embodied in the Howe make. If you want to post yourself on farm scales so that you may be able to tell the difference between a good and a poor scales, write the Howe Scale Co., of Ill., 1321 Wabash Ave., Chicago. See page 4.

## Farm Furrows

Turned by a Practical Farmer.

Some cows have great ability—for landing a man in the gutter.

A loose rein and flopping breeching make the best horse look second class.

Many states are introducing the wild pheasant and it is said to be a popular idea, as the bird is a voracious insect catcher.

Send a green man after a load of sand or brick and you can depend upon it if he gets back he will have enough for about two loads.

The building of a modern house is no small undertaking and it is well to begin to study plans before the carpenter and his tool kit alight. People who leave their thinking to do afterwards commingle it with more or less regret.

It is well worth while now and then to replace old gates with good strong ones made from new lumber. It takes no more time to make a gate from new material than it does from old stuff. Stock seem to have more respect for a gate made of sound new boards.

Some people claim that hogs root because they crave something which their food does not furnish. That something is, no doubt, the rooting feature. Rooting is as much of a habit with the hog as the burying of food is with a house dog that has never known hunger.

If the price of lumber, wire fencing, implements and building materials are to remain at their present price it is no more than just that all meats hold close to the seven cent mark. It may be, too, that there is a general reciprocation of prices between farm and factory products.

The number of farm papers that are dumped into the mail box of some farmers should afford an excellent opportunity for practicing a bit of careful selection. One acquaintance of mine receives no less than ten farm weeklies. All are more or less black or white and a few are read.

It is said that of all brutes man loves the dog the best. He may exuberantly plant his forepaws on a man's white shirt bosom or romp on the pink sofa in the parlor. He may plant a ham at sixteen cents a pound in the middle of the most precious pansy bed and meet the family with the most innocent grin.

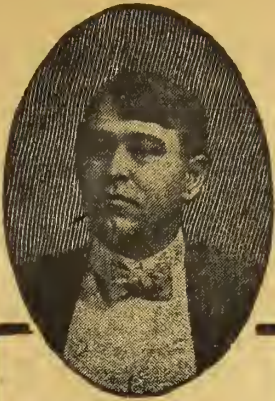

### WAGON SENSE

Don't break your back and kill your horses with a high wheel wagon. For comfort's sake get an

#### Electric Handy Wagon.

### This is Huttig

Yes, sir, — I can afford to stand back of my roofing because, it stands back of me, and makes my word good as gold. I want you to read every word of this advertisement. I wrote it myself, and you can take it from me that whatever Huttig tells you about roofing is so.

*H. W. Huttig*

President Huttig Manufacturing Co., 707 East Second St., Muscatine, Ia.

## I Stand back of Huttig's Rubber Roofing

With a Written and Personally Signed, Legally Binding Guarantee

MY roofing,—known far and wide as HUTTIG'S RUBBER ROOFING—is a "money-back" roofing in FACT as well as in NAME. I give you a written guarantee that this roofing will do what I claim—not a mere VERBAL PROMISE, through your dealer, but an ironclad, legally binding guarantee, signed by the HUTTIG MFG. CO., capitalized at \$1,000,000, and responsible for every promise it makes.

No other roofing gives you a personally signed guarantee as strong as this. No other roofing can AFFORD to do so. Why can I do it?

Simply because my roofing is the only roofing on the market, made from pure, natural, imported Asphalt. That's why! That's the secret of my success with roofing.

Asphalt comes from the famous Asphalt Lake in the Island of Trinidad. About 100,000 tons are brought to this country every year, and a large part of this is used in the exclusive manufacture of HUTTIG'S RUBBER ROOFING.

My roofing is made of long-fibered wool felt, densely compressed and heavily saturated with this specially prepared Natural Trinidad Asphalt, which protects every particle of the fiber.

Now, mark this carefully: The saturation of Felt with Asphalt in HUTTIG'S RUBBER ROOFING is 150 per cent as against 104 per cent, the highest saturation of ANY of the roofings with the crazy names.

That's the principal reason why my roofing will not "stick" in the hottest, nor crack in the coldest weather.

Other rubber roofings, which have to de-

pend on Texas and California Asphalts (products of petroleum oil), crack in the winter and "run" in summer.

Test it for yourself. Send for sample of HUTTIG'S RUBBER ROOFING and the others; then do this—Get a small quantity of sulphuric acid from your druggist. Put in the sample of HUTTIG'S and the other roofings. Let 'em soak for 24 hours, and note results.

Remember, that the very gases that constitute sulphuric acid are found in the atmosphere, and it is their chemical action that causes roofings to decay.

HUTTIG'S RUBBER ROOFING requires no skilled labor to lay it. Every roll contains enough liquid cement, nails, caps, etc., to lay it.

It can be laid on a flat or sloping roof, across or with the slant of the roof; or on the sides of a building it makes an excellent storm protection.

It will not run, rust, rot, crack, leak, blow off, require frequent repairs, and is not a fire trap.

Now, here's how I feel about it. If you have use for roofing this season, you want the best, which is the cheapest in the long run.

You don't want to fool with a doubtful article, when you can get HUTTIG'S with a guarantee that means absolute protection, both to your roof and your pocketbook.

Just put the burden on HUTTIG. My shoulders are broad. I will take care of all your roofing troubles, if you will trust me.

Ask your dealer for HUTTIG'S RUBBER ROOFING. If you can't get it of him, ask ME, and I'll see that you do get it.

Anyway, write for a big, free sample of my roofing and let me send you Booklet B, and special Iron-clad Roofing Guarantee. Write me personally, and do it to-day.

Travelers may be so annoyed at his sudden flurries as to swear enmity to his owner, and yet a man will pay fifty cents to have the regime continued another year.

Unusual watch should be kept on the smoke-house during the smoking of meat, especially if the structure is a frame one near other buildings. Apprehensive of the great disturbance which a little fire may kindle, the cement or brick smoke-house should stand in high favor on the farm.

No matter how trusty one may think his horses are it is running too much of a risk to allow them to stand in the field when hitched to some implement that will surely main some one of the number in case of a runaway. It is very easy to get careless about such things on the farm.

A grove of deciduous trees may be replaced eventually with evergreens by cutting out several rows at a time and re-planting with the conifers. The

ground should be cleared by fall, then broken and allowed to mellow up until spring. The natural shade of the grove is much to the advantage of the young evergreens.

The conservative, thoughtful citizen cannot fail to be shocked at the apparent rivalry which seems current for the perpetrating of hideous and unheard of crimes. Farm communities are no exception in these days and the sensitive mind shrinks from the daily report of wickedness.

Rural mail carriers have cause to be exuberant over the raise in wages which will take place July 1st. Some will need additions to their bill books, no doubt, to make room for the 9 to 25 per cent increase to be granted. The carrier that can count twenty-five mile-stones along his route will draw \$900 a year.

The orchard should by all means have a cover crop to prevent the evaporation of moisture that takes place in spring

and fall as well as during hot weather. Gardening the young orchard is quite satisfactory, though a trifle inconvenient. For the mature orchard there are plenty of forage crops, grasses and legumes to suit any condition.

Peculiar things happen down in Kentucky and recently a farmer's barn came rolling down hill toward a passing freight train. The engineer in his excitement actually hit the barn, impeding its progress with the caboose which had been suddenly evacuated. Both suffered. Now can the barn owner claim neglect on the part of the railroad?

To rise in the morning after the recent rainstorm and find the apple blossoms weighted with snow and icicles was a sight that might have been more beautiful had it not been so serious. Such an extraordinary and incompatible relation is not very encouraging to the lover of fruit; still one should not complain at flowery winter weather.

A flat roofed building covered with roofing paper can be built for considerably less money than where the gable roof is the design. With the exception of the barn the flat roof would probably be very satisfactory. As regards the looks the gable roof would be, no doubt, the best in general appearance, yet I have seen large stock barns with flat or rounded roofs that did not offend the taste in the least.

#### ABSORBINE.

Filled tendons, big knee and thickened tissues make a trainer and owner uneasy. I have found the following treatment works very satisfactorily in some cases that did not respond to other treatment as fast as desirable, and would suggest that you try it for your case. Rub in the Absorbine thoroughly, pinching and working the thickening back and forth, massaging it for a number of minutes so as to get the Absorbine in deeper, which will disintegrate, soften up, and absorb faster. Make a clay paste by softening up some good clay with one ounce glycerine and 16 ounces water, to about the thickness of vaseline, and at night after you have worked in the Absorbine, spread the clay paste all over and around the leg or bruised tissues. In the morning you can brush out the dry clay and rub in the Absorbine without covering. This clay bandage over the Absorbine will cause an internal sweat that will soften up, force a deeper circulation, and draw out any inflammation that may be present. Absorbine can be purchased from regular dealers or will be sent charges prepaid upon receipt of \$2.00 by the manufacturer, W. F. Young, P. O. F., 40 Monmouth St., Springfield, Mass.

We have Large Colored Lithographs of our World Famous Champion Stallions, Dan Patch 1:55 and Cresceus 2:02 1/4, in an Exciting Speed Contest. It is 16 by 21 inches and shows both horses as life-like as if you saw them racing. You can have one of these Large and Beautiful Colored Pictures of the Two Most Valuable Harness Horse Stallions and Champions of the World, Absolutely Free. We Prepay Postage.

1st. Name the paper in which you saw this offer.  
2nd. State how much livestock you own.

INTERNATIONAL STOCK FOOD CO.,  
MINNEAPOLIS, MINN., U. S. A.

### THE WORLD'S MOST FAMOUS HARNESS HORSE FARM.

International Stock Food Farm of seven hundred acres, owned by M. W. Savage, is generally acknowledged to be the most famous harness horse farm in the world because it owns the Four World Champion Stallions, Dan Patch 1:55, Champion Pacer and Fastest Harness Horse in the world; Cresceus 2:02 1/4, the champion trotting stallion of the world; Arion 2:01 1/4, the champion 2 and 3-year-old trotting stallion to high wheel sulky; Directum 2:05 1/4, the champion 4-year-old trotting stallion. Also Roy Wilkes 2:06 1/4, the first stallion to beat 2:10 and world's champion for four years. All of these stallions and the one hundred brood mares and their colts are fed "International Stock Food" every day. You are especially invited to visit this farm at Savage, 10 miles from Minneapolis, and see the every day, practical results of feeding "International Stock Food." 25 Cents for One Cent. We always welcome visitors.

## THE HOMESTEAD

A Practical Journal for the Farmer, Stockman, Fruit Grower, Poultryman, Gardener and Housekeeper.

BY JAMES M. PIERCE.

JAMES ATKINSON, Editor in Chief.

ESTABLISHED IN 1855.

Entered at Des Moines Postoffice as second class matter

PUBLISHED EVERY THURSDAY.

**SUBSCRIPTION RATES**—Single subscriptions, \$1 a year; ten copies one year, \$10, and an extra copy to get up of club. In clubs of fifty or more, 25 cents a year; in clubs of one hundred or more, 20 cents a year. Single subscription three years in advance, \$2; five years in advance \$3; ten years in advance \$5. Subscription price in Canada, \$1.50 a year. Remit by draft, registered letter, post-office or express money order. In renewing subscription, use same name and initials as address on paper, or explain why you change. In changing your postoffice address, send your old address as well as the new. Errors in address or failure to receive paper within two weeks should be promptly reported to the publisher.

Address all communications and business letters to  
**THE HOMESTEAD COMPANY,**  
Des Moines, Iowa.

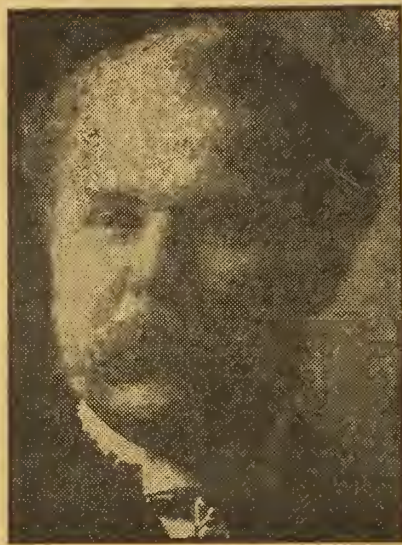

### NEW DEAN OF WISCONSIN COLLEGE OF AGRICULTURE.

Most of our readers are aware of the fact that Prof. W. A. Henry, dean of the Wisconsin College of Agriculture, was obliged to resign his position some time ago, to take effect July 1st, on account of ill health. Since tendering his resignation there has been considerable speculation regarding the choice of his successor. The names of many excellent men have been mentioned, but the board of regents recently found what they think to be the right man on the faculty of the great institution at Madison.

The board selected Prof. H. L. Russell, a graduate of the institution and for fourteen years an honored member of the

faculty as professor of bacteriology. When Prof. Russell began his work at the Wisconsin institution in 1893 bacteriology was a comparatively new science, and his work since that date has not only brought fame to himself but wealth to the state of Wisconsin. He has had largely to do with the framing of laws for the stamping out of tuberculosis. In the past two years alone he has conducted 10,000 voluntary tests in Wisconsin herds, and his methods for, eradicating this much-dreaded disease are receiving strong support by the Wisconsin legislature.

In addition to his work connected with the stamping out of tuberculosis, he has been a co-worker with Dr. Babcock

H. L. RUSSELL.

in solving problems affecting the cheese industry, as well as those relating to the pasteurization of milk and cream.

Although Professor Russell's work has had to do with the digging out of fundamental scientific principles, yet at the same time the outcome of all his investigations have been intensely practical, so that the farmers of the state of Wisconsin are more and more pinning their faith to the principles that Dr. Russell finds adapted to their practices.

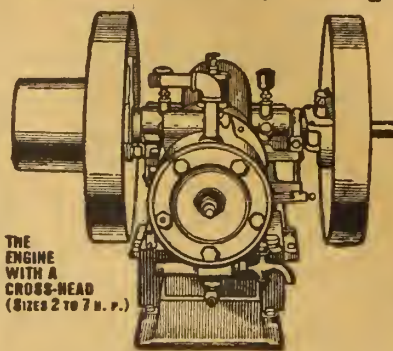

It is no small honor to succeed a man like Professor Henry, and no doubt the board of regents felt the responsibility of picking a successor of high attainments. In choosing Dr. Russell the board seems to have met the responsibilities of the selection wisely, so that the work so well begun by Professor Henry will be carried forward without interruption.

### STAMPING OUT TUBERCULOSIS IN CATTLE.

No doubt to most of our readers tuberculosis in cattle is becoming a hackneyed subject. This should not be the case until the herds of America have been freed from this deadly disease—deadly to cattle and to the human race.

While there is some difference of opinion as to whether bovine tuberculosis is communicated to man or not, the pre-

## Trustworthy Help

is a gasoline engine that can be trusted to run hour in and hour out, day in and day out, winter and summer, with very little attention. This trustworthiness you find in the

## ELI Two Cycle GASOLENE ENGINE

This engine has no complicated cams, levers, valves, pivots to wear and stop the work on hand—no compression in the crank chamber to leak and cause trouble. Forty-four successful years of progressive business are back of it as our guarantee. Isn't this the engine you are looking for? And we sell it direct to you—the man behind the dollar. Send for our free catalog and investigate for yourself. You cannot afford to pay for your dealer's mistakes.

Moline Pump Company, (Established 1863) 303 Twentieth Street, Moline, Illinois

## Traction Engines For Sale.

We have on hand ready for delivery several 15 Horse-power Traction Engines, new and second hand, also one 8-horse-power Traction Engine second hand, that we will sell very cheap in order to close them out within the next few months. A great opportunity to buy a good engine at practically cost price.

THE O. S. KELLY MFG. CO.,

IOWA CITY, IOWA.

### FOR SALE.

One Peerless 16-Horse Engine, one Peerless Separator, Self-feeder and Wind Stacker, also one Joliet No. 2 Cornsheller.

THIS machinery is good as new. Will sell for half its cost when new. Will sell for cash, or write what you have to trade.

W. R. HAINLINE.

Blandineville, Illinois

## The GALLOWAY Cream Separator

Direct From My Factory to Your Farm. Get My Prices Before You Buy. Get My Catalog.

I have been told there are a lot of farmers who would own a cream separator if they could get one at a reasonable price.

I am looking for those farmers. I will give any farmer that chance and take all the risk of my separator pleasing him.

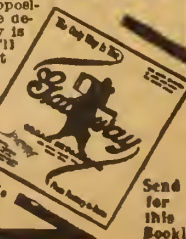

I'll send it out on my free trial plan and am going to give the first farmer in every section who buys my separator a chance to take advantage of my new and very successful proposition which will help him pay for his machine. Requires no work and only a few minutes' time. Write me for my booklet and proposition before you think of buying of any other manufacturer. Remember you get my very low price and my \$25,000.00 bond at the same time.

WILLIAM GALLOWAY  
A Farmer Business Man,  
and President of  
The Wm. Galloway Co.

### I Want One Million Farmers To Get My SPECIAL PROPOSITION

When it comes to the machine the Galloway has all the good points you will find in any separator made—and a lot of its own besides. Prove this for yourself. Let me send you my separator on a ten days' trial on my free trial plan. My special proposition and free trial plan make you the most liberal offer possible. I hope you will appreciate this enough to send for my catalog to day. My first letter will explain my whole proposition to you. My catalog will give you my selling plan in full and a complete description of the separator. It will say something besides telling you the Galloway is the closest skimmer and easiest operated machine made. They all claim that. I'll go ahead and prove it and I'll also let you prove this for yourself. Remember that always. You are to be the final judge of the Galloway. It won't cost you a cent, if the machine isn't all I claim for it. It's so simple in construction, so well made and adjustable that you'll think as I do that you ought to have one. Now, of course, when it comes to telling you all about my separator which I am selling direct to you, I must ask you to send for my catalog. It will give you all you want to know. My catalog is my only salesman and one that will save you a lot of money. Send for it. Just drop me a postal and say, "Please send me your booklet and your special proposition by return mail."

William Galloway, Pres. The William Galloway Company,  
103 Jefferson St., Waterloo, Iowa.

Send for this Booklet

ponderance of evidence seems to indicate that it is, and so long as the matter is in dispute we think that it is wise for men to assume that the disease in man and in the bovine is one and the same thing. The scientist, von Behring, who discovered the anti-toxin for lock-jaw and diphtheria, seems to have demonstrated that milk from tuberculous cows is one of the chief sources of tuberculosis in the human, and a few days ago he discovered a bacillus or germ which, when injected into the veins of a healthy calf once at three weeks and again at three months, will prevent it from contracting tuberculosis thereafter. If the calf so treated is not fed milk containing the germs of tuberculosis and is kept away from a diseased herd and out of infected places for one year, it is then immune and will not contract the disease even if placed in infected quarters.

That such a discovery has been made at all may be new to many of our readers, and yet in Germany and Prussia something like 70,000 cattle have been treated in the manner described above during the last four years, and the result of this treatment seems to prove beyond the shadow of a doubt that the animals treated become immune. Similar results have been obtained in Belgium, Japan and France, and some work has been done in America, notably in the state of Wisconsin and in Minnesota. We believe when such an eminent scientist as von Behring is sustained by the record of tens of thousands of cases of animals being rendered immune by his treatment that it is time for either the federal government or state legislatures to recognize the merit of the treatment in order that some measures might be taken in every state to at least test the method, and therefore, without further delay, make a beginning in stamping out this deadly disease.

We advise action, not so much because it means the saving of the herds of this country that are now infected, but, rather, because it means so much to the human family, as the evidence is sufficient on one side of the question to confirm us in our opinion that tuberculosis is transmitted from the bovine to the human through the medium of milk. If it can be stamped out of the herds, who can say but what in the very near future the disease will disappear altogether.

40 ACRE FARM, TWO PLANOS, A CITY BUILDING LOT, A TWO-SEATED BUGGY AND \$320.00 CASH. ALL TO BE GIVEN AWAY.

Read the advertisement of Successful Agriculture, of St. Paul, Minn., on page 17. The

When you begin a day's work, if you are not confident all hands are going to stick it out from sun-up to sun-down you start with a worry. Each day has just so many hours for work and if one is spent hunting assistance, urging a laggard, or nursing a weakening, something important is neglected and you—the paymaster—are the loser. This rule applies to all help—men, animals and machinery. Especially the latter. If your machinery goes wrong, you stop, your men stop, your horses have to go for repairs—result, a day lost for everybody.

When you want water pumped, feed ground, wood sawed, etc., you want it. You can never depend on the wind—horse power and hand power are both unsatisfactory and expensive. The ideal power is always illustrated with beautiful photograph cuts of farm scenes.

They are advertising to give away several fine prizes, the best one being a forty acre farm in northern Minnesota. Think of getting a farm like this for sending only fifty cents or one dollar for subscription to Successful Agriculture. There is no reason why one of our readers should not be the fortunate one; besides, there are other valuable prizes to be given away and if you don't get first prize you stand a good chance of getting one of the others.

In their last contest, over 1,600 prizes were distributed. One subscriber received a forty acre farm for fifty cents and another subscriber received one for one dollar.

This contest is in the hands of such well known men as Henry A. Castle, Ex-Postmaster, St. Paul, Minn., and Ex-Auditor U. S. Postal Dept., Washington, D. C., Judge J. R. Blackwell, St. Paul, Minn., and Frank D. Lovering, Asst. U. S. Nat'l Bank Examiner. These men will act as judges and you are assured of absolutely fair treatment.

We advise every one of our readers to look up the advertisement as we consider this an exceptional opportunity for someone to get some one of these valuable free prizes.

### BLACK PRAIRIE CORN LANDS.

There is at this time an unprecedented demand for corn land. The southwestern boom is over, and it has educated buyers to the value of land in the corn belt. The almost prohibitory price of land in central Illinois and Iowa is driving the careful investor to northwest Missouri, in the famous Grand River Valley, near Chillicothe, Mo., the ardent soil yields the largest returns to be found on the continent. Corn is king of crops, and one hundred bushels per acre excites no comment. Developments in this famous valley are now going on. Mr. Bazal J. Meek, of Chillicothe, will answer all inquiries relating in any way to the district mentioned. These lands with a black soil six feet deep are selling at from \$48 to \$68 per acre. These lands rent as follows: Half the corn in crib, half the wheat or oats at machine, half the hay in stack. This is the rule long established. The price of these lands will go steadily upward. On account of its immense productivity this land will soon reach the \$200 mark. The location of these lands will also tend to make them go higher, as Chillicothe is only eighty-five miles from Kansas City, and sixty-five miles from St. Joseph, in the northwest part of the state. The rarest land on earth is corn land. Corn cannot be raised with profit south of the thirty-eighth parallel or north of the forty-sixth. Look at the map. One of the best posted men in the United States a few days ago asserted that the price of corn must soon pass the price of wheat. Corn lands in Illinois and Iowa have already gone to the \$200 note and may go higher. Chillicothe is a city of 10,000 people, with paved streets, electric lights, fine schools and three great trunk lines of railroad. Near Chillicothe Mr. Bazal J. Meek, of Chillicothe is developing a drainage district which is destined to become the richest spot in the great state of Missouri. Many Illinois and Iowa men have invested. These men know a good soil. After traveling everywhere they are buying in Livingston county, Mo. The climate, the water, the soil, the fruit and the people make it a spot to live in. In the district near Chillicothe is the simplest drainage proposition to be found anywhere.

## OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer, who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to any considerable number of our readers. Subscribers who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should remit \$1.00, addressed as above.

### LAW QUESTIONS CONSIDERED.

#### AUCTIONEER—LICENSE.

Mr. W. H. Maris, Spring Hill, Kan.—Can a person without a license lawfully act as an auctioneer at a public sale in the country in Kansas?

Answer.—There is no law to prevent it.

#### LIFE OF JUDGMENT.

A Subscriber, Mills County, Iowa.—One P obtained a judgment against M in Iowa, eleven years ago. Is the judgment outlawed?

Answer.—If the judgment was in a justice's court, it is outlawed, because ten years is the limitation. In courts of record twenty years' time is the limitation, hence if the judgment was in a court of record, it is not outlawed.

#### LOST PROMISSORY NOTE.

Mr. J. B. Grayson, Moline, Iowa.—A made his promissory note payable to B, who lives in Austria-Hungary. A enclosed the note in a letter addressed to B in Austria-Hungary Monarchy. The letter was lost on its way. Can the finder enforce payment of the note against A?

Answer.—He cannot. The finder could not enforce the note without endorsement or assignment by B, transferring the note and the debt it represented to him.

#### MECHANICS' LIENS—KANSAS.

A Subscriber, Hurley, Kan.—I worked under a sub-contractor for wages, on a new railroad which was constructed in this vicinity last fall. My last day's work was January 18, 1907, and I have not been paid for the last month I worked. (1) Can I file and enforce a mechanic's lien for my unpaid wages? (2) What time is allowed for filing a lien after the last work? Give main points?

Answer.—(1) You cannot. (2) Sixty days. It would require too much space to print the main points of the mechanics' lien law in Kansas.

#### DAMAGES BASED ON NEGLIGENCE.

A Subscriber, Hopeville, Iowa.—A owns eighty acres of land, and an adjoining eighty acres is owned by B. A creek runs through both tracts. In case logs or other things are washed from A's land and lodged upon B's land, can B compel A to remove them?

Answer.—If the logs or things are lodged upon B's land by reason of A's negligence, B can recover damages from A, but cannot compel him to remove them. If, in fact, no negligence can be charged against A, as to the occurrence, B is without legal remedy.

#### INHERITANCE IN ILLINOIS.

A Subscriber, Wenona, Illinois.—When a man dies without making a will, leaving a wife, and brothers and sisters, but no children, who is entitled to his estate according to the law of Illinois?

Answer.—One half of the real estate and all of the personal property goes to the widow. The other half goes to the brothers and sisters, share and share alike, unless the parents of the deceased be living; in which case they share with the brothers and sisters, each being entitled to a child's part.

#### HOMESTEAD—WIDOW.

A Subscriber, Royal, Neb.—A filed a homestead, and died two years afterward. B, his widow, proved up on the homestead at the expiration of the five years in her own name. (1) Had she a lawful right to prove up in her own name alone, having at the time one son, who was also the son of A? (2) What right if any has this son to the land? (3) Can B sell the land and give a good and clear title to it without the son joining in the deed?

Answer.—(1) The widow had a right to complete the homestead entry, and prove up in her own name, and receive the patent. (2) None whatever while his mother lives. (3) She can.

#### RIGHT IN PUBLIC ROAD.

A Subscriber, Harlan, Iowa.—A's land is on the north side of the public road, B's land is directly opposite, on the south side of the road. B wanted to buy a half acre of land from A, in the shape of a strip along the north side of the road on which to plant trees. A refused to sell such strip. Then B plowed a strip in the roadway on the north edge of it eighty rods long, and intends to plant trees on it this spring. (1) Has A a legal right to plant trees on said strip? (2) Can anyone give him the right to do so?

Answer.—(1) If the partition line between the farms of A and B runs along the northern line of the road, then B has a right to plow the strip and plant trees on it, unless prevented by the road

authorities; but if the partition line between the farms runs in the middle of the road, then B has no right to plow the strip or plant the trees, and A can prevent him from doing so, by injunction. This is so because the public does not own a public road, but only has the right to use it. Subject to such use the land belongs to the owner of the ground from which it was taken. (2) If the line is in the middle of the road nobody but A can give B the right to plow the strip and plant the trees.

#### HOG DEAL.

Mr. Albert Von Bergen, Peterburg, Neb.—I had a sow and pigs which I priced to a man at a certain sum when he looked at them, and before he left we agreed upon a somewhat less price. A few days later he told me to bring him the sow and pigs at the price we had agreed on. I delivered the sow and pigs at his place to his hired man, who said he was not at home. About three weeks later I demanded the price, and he would not pay it. He said all the pigs except one had died, and he had lost all his other young pigs. I offered to take the sow back, but he refused. He fattened her and sold her, and refuses to pay me. What can I do about it?

Answer.—Sue him before a justice of the peace for the price agreed upon.

#### HUSBAND AND WIFE—HEIRS.

A Subscriber, West Union, Iowa.—A was married twice. The father of his first wife, gave her some money during the eight years of her married life. She then died leaving several children. When they become of age can they compel their father to pay them the said money, there being no will or papers concerning it? (2) A man was twice married. The children of his first wife have money coming to them from their mother's side. In case one of the children should die before it becomes of age, who is entitled by law to that child's share?

Answer.—(1) If the wife's money was not kept separate by her during her lifetime and used and considered as her separate property, then the children cannot compel the father to account for it, otherwise they can. (2) Its father is entitled to its share.

#### LIFE ESTATE—WASTE.

A Subscriber, Mount Pleasant, Iowa.—A man having no children, died leaving a will by which he gave his wife the use of his farm during her natural life, and at her death it was to go to his brothers and sisters. The widow has given her tenant who occupies the farm, the privilege of cutting brush in the pasture and other trees that she wishes to have removed. Can the brothers and sisters of the deceased, prevent the tenant from cutting said brush and trees, or recover damages on account of such cutting?

Answer.—They cannot prevent the cutting of brush in the pasture, nor recover damages therefor. If the cutting of trees is not done for the clearing or improvement of the land, but for sale or gain, then the brothers and sisters can prevent it by suing out a writ of injunction, and also recover damages.

#### TAX SALE—REDEMPTION.

A Reader, Walford, Iowa.—I hold a mortgage on a piece of land in Kansas, which has been sold for taxes. (1) How long a time is required before the purchaser at tax sale can obtain a tax deed? (2) What kind of a notice must be given before the tax deed can be made? (3) Can I redeem the land at any time before a tax deed is made?

Answer.—(1) Three years from the date of sale, if not redeemed. (2) At least four months before the expiration of the time for redemption, the county treasurer must publish a list of all unredeemed lands, with notice that unless they be redeemed before the time expires, they will be conveyed to the purchasers. This list and notice must be published once a week for four weeks in some paper of general circulation in the county, and publication must be complete four months before the time of redemption expires. (3) You can.

#### RIGHT OF WAY—CONDEMNATION.

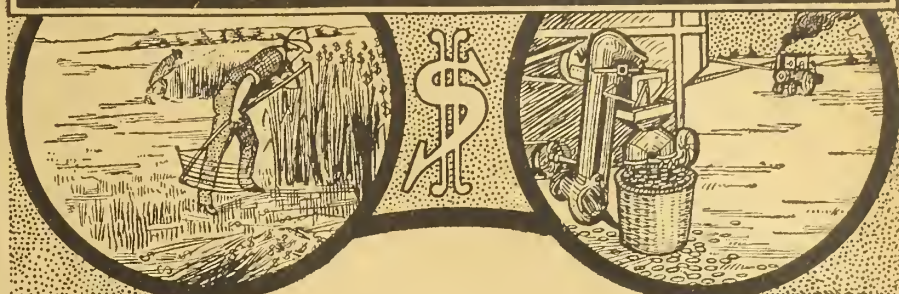

A Subscriber, Alpha, Ill.—A railroad company is surveying many lines through my farm with the purpose of fixing upon a right of way for its road. It is not willing to pay me what the right of way is reasonably worth. The railroad and I cannot agree as to the sum it ought to pay for the right of way. In such a case what are the necessary legal steps, and how is the value of the right of way determined?

Answer.—When the land owner and the railroad company cannot agree as to the compensation to be paid for right of way, the law provides for the following proceedings, viz.: The railroad company must file a petition with the clerk of the circuit or county court, for condemnation. The clerk there summons jurymen, a jury is empaneled, selected and sworn, and goes on the land and views the premises and makes a written report to the court, and the court finally enters judgment for the amount, time of payment, entry, etc. Either party may appeal to the supreme court.

#### LIABILITY ON LEASE.

A Reader, Eldridge, Okla.—A has a homestead on which he has made final proof. He wished to return to his former home in Missouri for a time, and he rented the place to B for the term of three years, B to furnish all material to keep up all fences, and all other improvements thereon, in as good shape

## HARVESTING DOLLARS

The harvest of dollars is on in Southern Alberta, and the man who gets in during the next few months is the man who is going to reap his share of the harvest.

If you have been watching the trend of events in Western Canada you know that land has been gradually advancing there, and you know that the people who have gone there to make their homes on Alberta's fertile acres are making more money than they ever made before.

There is a better opportunity offered right now in Southern Alberta than has ever been offered there or anywhere else before.

On the great Canadian Pacific irrigated tract, comprising 3,000,000 acres of the best land in America, is to found the opportunity of a life time.

On this tract the farmer need never fear that his crops or live stock will suffer for water. Every farm has an irrigation ditch running through it, and the water is always ready to be turned on.

There is no better soil anywhere for raising Alfalfa, Sugar Beets, Wheat, Oats, Barley, Cattle, Horses, Sheep or Hogs.

This land is located near Calgary, which is a thriving Canadian city, growing by leaps and bounds. Large grain elevators are located in every town along the line of the Canadian Pacific, and one of the largest packing houses in Canada is running full blast in Calgary. Thus the farmer has the best of markets at his very door.

It is a fine trip through Alberta and Western Canada, and we are glad to have people come and see the country, because when they come they fall in love with it and stay right here. Send us your name and address and let us tell you how to make the trip at very small cost, and how to get a piece of this fertile land at a price so low it will surprise you, and on terms so easy that any man can own a farm.

### CANADIAN PACIFIC IRRIGATION COLONIZATION CO., Limited,

71 Ninth Avenue, West, - - - - - CALGARY, ALTA., CANADA.

Sales Department, Canadian Pacific Railway, Irrigated Lands.

9

as they were at the beginning of the term, and to pay all taxes and to break twenty acres of sod, and extend the field fence to enclose all plowed land in one field; and furnish all posts, wire and staples necessary to complete and maintain all fences on the place; and in the lease is this further clause: "When all things mentioned in this contract have been complied with, and the place returned to A in good order, then this contract shall be null and void." In case B should let the fences go down, and fail to pay all taxes, can A hold him liable therefor after the time of the lease has expired?

Answer.—A could hold B liable after the expiration of the lease. He could sue him and recover a judgment for whatever damages he could prove resulted from the failure of B to keep the fences in repair, and for his failure to pay taxes.

#### COMPENSATION OF TOWNSHIP CLERK.

A Subscriber, Monroe, Iowa.—The board of supervisors refuses to pay township clerks for money handled by them, because Section 1538 of the Code was amended leaving out the words, "The township clerk shall receive two per cent of all money coming into his hands and paid out for road purposes." Sec. 591 says, "for all money coming into his hands by virtue of his office, five per cent, unless otherwise provided by law. I contend that township clerks can recover compensation according to Sec. 591, because the law does not provide any other way. Who is right, and what compensation is a township clerk entitled to for handling road funds—and other funds?

Answer.—We believe that your contention is correct. It may be that the legislature of 1906, in amending section 1538 of the code, intended to abolish all compensation for the clerk in handling road funds, but the amendment does not seem to us to have that effect, because as you say, section 591 still remains in force. Therefore it is our opinion that the township clerk is by law entitled to five per cent of all money he handles as clerk, whether it be road funds or other funds.

#### STRAY LAND—TAXATION.

A Subscriber, Minong, Wis.—Near my home there is a piece of land that seems to have no owner. It was once part of a railroad land grant, but the railroad company failed, and sold out to another company, and in the transfer it did not deed this land. Parties have tried to homestead the land, and tried to buy it from the state, and from the railroad company, but they all say they do not own it. It has never been assessed for taxation. (1) How can I obtain a good title to the land? (2) Is there any way to get the land on the tax roll? (3) Could I simply take possession of it and improve it, and thereby hold it by adverse possession?

Answer.—(1) If nobody owns the land, it would be difficult to find anybody who could transfer to you a good title. If possible get a quit claim deed from the first named railroad company, and then

take possession of the land and hold it either by yourself, or by a tenant. After thus holding it ten years you could claim it by adverse possession. (2) The assessor has the right, and it is his duty to put the land on the tax roll, and assess it. (3) This question is substantially answered by the answer to the first question.

#### HUSBAND AND WIFE—PROPERTY.

Mrs. A. B. L. Monroe, Neb.—(1) Where there are no children, what portion of the real estate of a husband does a wife inherit at his death? (2) What portion does she get if the husband made no will? (3) While a wife is living with her husband, how much of his property is she entitled to, so that she can use or dispose of it as she chooses? (4) How much of his property can a husband give to his kinsman without the consent of his wife? (5) Can a husband dispose of all his property by will excluding his wife from all share in it?

Answer.—(1) All of it for the term of her natural life; and then it goes to the deceased husband's father. (2) The same—the first question is answered upon the assumption that the husband made no will. (3) She can use and dispose of her own separate property as she chooses, but she has no such rights in property belonging to her husband, but only the right to be supported by him. (4) All of it except the homestead. (5) He cannot. She is entitled to the homestead for her natural life, and also to dower in the real estate owned by her husband during the marriage.

#### LEASE—BREACH OF CONTRACT.

A Subscriber, Hudson, Iowa.—By a written lease A rented forty acres of land to B from March 1, 1906, to March 1, 1907. B died in November, 1906, and his son C was appointed administrator of his estate. C had rented the farm from his father before his death. The lease between A and B contains the following, viz.: "The second party shall put at least twenty acres of said premises in oats, the second party to get all the straw but two loads from same, but the first party is to get forty loads of manure from the premises of second party as compensation for said straw." After C was appointed administrator, and had taken possession of his father's farm, he told A that he could get the straw from the premises, and A got the straw, but when he wanted to haul the manure C refused to let him have it claiming first, that the lease between A and B had not been signed before a notary public, and was therefore invalid and that because A had not hauled the manure in the fall of 1906, he had forfeited his right to it. What remedy has A?

Answer.—It was not necessary that the lease should be signed before a notary public. A did not forfeit his right to the manure. He can recover damages in a sum equal to the value of the manure.

### Going to School or Learn a Trade?

If so, write for our fine new catalogue giving complete information about the special opportunities offered for obtaining an education in almost any subject and learning some of the best trades. Address O. M. LONGWELL, Pres. Highland Park College, Des Moines, Ia.

## VETERINARY MATTERS

PROFESSIONAL veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of \$1.00. In order that correct information may be given, the symptoms should be accurately described stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. All veterinary inquiries should be addressed to this office.

## SYMPTOMS AND TREATMENT.

## COLIC.

I have a gray gelding, fourteen years old, that is subject to colic. About ten months ago I commenced to use a colic cure and it proved effective each time, but the attacks have been much more frequent this spring. Most every night this week he has had an attack, but not very severe. Is there any preventive and why are the attacks so frequent now?

Such cases usually are due to presence of some incurable condition of the intestinal tract such as aneurism or emboli from worms, or a large calculus obstructing the intestine. An attack will sooner or later prove fatal. Feed to keep the bowels open and always allow the drinking water before feeding. At least once a week give him a pint of raw lin-

seed oil as a light purgative. At time of each attack give one and one-half pints of the oil adding an ounce of turpentine and half an ounce of fluid extract of cannabis indica.

## DEAD TWIN FOALS.

I have a mare which foaled twin colts the last of March. One colt came dead, but the other which was more fully matured lived a few days. The mare was bred the last week in May last year and was in good hands since. About four weeks before she foaled her udder leaked milk badly. What do you think was the cause of the colts dying?

One of the foals died at the time the mare commenced to leak milk and should at that time have been removed if mouth of womb was open, which we think would have been found to be the case on exploration by hand. The foals came ahead of time and the cause we are unable to state as such accidents may be due to one of a great many different causes.

## WEAK COLT.

Please tell me what ails a coming yearling colt. He had the distemper last fall, but seemed to get well of that. Has a fair appetite, but has got very poor. When he lies down can't get up without help. Is swollen in the sheath. Appetite now rather poor. Please tell me what ails him and what to do.

Colt is probably affected with blood worms and is weak, bloodless and emaciated. Mix together, equal parts of dried sulphate of iron, ground gentian root, ground ginger root, salt and powdered nux vomica and feed him a teaspoonful of it night and morning in a mixture of equal parts ground oats and bran. Increase dose gradually until good results follow; then go back to first dose and repeat.

## ABORTION.

Will you please tell me what is the matter with my sheep? They started to lose their lambs when about half gone. Their feed has been corn and wild hay.

The most probable cause of abortion in such cases would be presence of ergot in the seed heads of the wild hay. The fungus referred to is found in the form of purple-black spurs protruding from the seed husks. Moldy hay also will cause abortion among ewes as also will chronic constipation due to feeding coarse, dry fodder and hay without some succulent food to regulate the bowels. Change the food by substituting mixed clover and timothy hay or alfalfa hay for the wild hay which is scarcely suitable for pregnant ewes. Feed oats and bran on grass if hay is not needed at this season.

## CONVULSIONS.

Could you tell me what ails my calf and what to do for it? It is five months old and has sucked a cow all winter. It is rather undersized, but has been well until about two days ago. The first symptoms were a queer look about the eyes and she held her head right straight out as though reaching for something. I rubbed her neck and got her to suck and she seemed all right for an hour or so, then she got wobbly and at last fell down and seemed to have a fit. For the next thirty-six hours she had these spells about every five or ten minutes. Between them she would eat hay and suck the cow. She would draw up and kick and roll from side to side and pant. She has had some grain along from time to time.

The fits come from indigestion. Wean her at once and give a full dose of castor oil in milk sufficient to purge briskly. Afterwards feed carefully on skim milk; flaxseed jelly and dried blood meal as a part ration and allow fine hay, grass and a little oatmeal and bran.

## LEUCORRHEA.

I have a mare twelve years old that your last answer answers all right, but at the time I did not state that it was in the womb also. The womb is ulcerated badly, for a little over a year ago she discharged a mattery stuff from the vagina, also last spring and again last fall. Last spring a veterinarian here disinfected the womb, drained it of all the pus, and we thought we had it cured, but last fall she did the same thing again, but blood came with the pus. I inserted my arm in the vagina and with a rubber tube let quite a little pus run out and then let it alone and it seemed to stop itself. She is clean now and has been for about five months. Can any medicine be given to effect a cure. (2) The mare to the above mare is twelve years old last spring, and while foaling, tore the vulva, or the extreme end of the vagina, so that she lost flesh; meat about the size of your hand rotted away. I don't think she is hurt inwardly. Do you think it best not to breed her again? There are some around here say it will kill her to have another foal. What do you think? (3) I have a coming three years old filly, weight about 1,400 pounds, that a little over a year ago got what is called in the government book, "Diseases of the Horse," Patella Pseudo-luxation. At times it seems that she cannot get her hind leg forward and when it does come, it will be with a jerk and sounds just like you snap your finger real hard. She starts with her hind leg stretched back as far as she can get it and on her toe. Have a coming two-year-old mule that seems to be getting the same way. I think it must be a dislocation of the patella, and any information you may give for the above cases I shall try and apply.

(1) Once a week for cure of leucorrhoea (whites) inject into vagina of mare the yeast solution so often prescribed in this

HOME OFFICES AND LABORATORIES, DETROIT, MICH.

NOTICE.—For a limited time we will give to any stockman an injector free with his first purchase of 100 vaccinations.

department. Do not give internal treatment and do not breed her before she is perfectly cured. (2) A mare in the condition described should not be bred. (3) As stated over and over again in this department the proper treatment for "pseudo-luxation of the patella" is to tie the animal up short in stall and blister the stifle joint with cerate of cantharides. In bad cases the foot of affected leg should be held advanced under body by means of a rope or strap from hobble around fetlock and passed between forelegs and attached to collar on neck.

## INDIGESTION.

I have a mare eleven years old and up until a year ago she was fat. She raised a colt in 1906, bred with an impregnator and she seemed to get thin right after the colt was born. I wasn't alarmed about that, for she had not raised a colt for three or four years, but before the fall plowing was done I weaned the colt and when we got to husking corn I thought sure she would get back in flesh, but instead she kept getting weaker. I fed her very carefully during the winter, feeding carrots and vegetables regularly. She seemed to digest what she ate all right, so I decided to have her teeth looked after and to my surprise I found two of her lower grinders split and half broken down at right angles. I had these fixed by a veterinarian, who said he had improved that mare \$50 worth. Soon after I had the rest of that tooth trimmed off as the hay was always catching in it. She is still poor and the only grain she eats is consumed in the night. I feed ear corn, whole oats, and corn, barley and oats ground. She won't touch wheat bran. She is hide-bound and when I turn her out she tries to rub down everything in sight.

Take her to another veterinary dentist who may find that the other one did not put the abnormal teeth in proper condition. Have her clipped at once and clip her again in fall. Stop feeding ear corn.

You will earn the eternal gratitude of your Horses and Live Stock if you treat them with

## OLEO EQUINE

"A Medicine Chest in every bottle"

Guaranteed under the Pure Food and Drug Law! Formula a century old. Always ready, always reliable. Absolutely harmless. Unaffected by age or climate. Indispensable in every barn and stable. The best thing for any emergency. Large size bottle by mail, 65 cents. Send for booklet. Agents wanted.

The Oleo Remedy Co., 132 E. 23d St., N.Y. City

Have veterinarian give her a physic ball and when the purging ceases give her as a tonic appetizer twice daily two ounces of the following medicine in half a pint of thin gruel or flaxseed tea; hydrochloric acid (dilute), two drams; fluid extract of gentian root, four ounces; pure alcohol, two ounces; water to make one pint. As soon as she will eat get her to take night and morning, black strap molasses mixed with warm water and then stirred up with cut hay, corn meal and wheat bran. She may have to be starved to this food. Then feed whole oats at noon and long hay at night. Have her take at least a quart of the molasses twice a day. Wet itching parts with a solution of one dram each of sulphuric and carbolic acid in a pint of cold water. She should be well exercised every day, but the hardest place any horse can have is between two others at work in warm weather.

## BEE SUPPLIES.

Every reader of this paper who is interested in bee supplies should send at once to the Leahy Mfg. Co., Omaha, Neb., for their new illustrated catalog. They carry everything in the apian line, and their prices are always reasonable. A free catalog will be sent to every Homestead reader provided you mention this paper.

## MILK CANS ROB YOU

Look through a microscope at milk set to cream in pans or cans and you'll see how they rob you. You'll see the caseine—the cheese part—forming a spider web all through the milk. You'll see this web growing thicker and thicker until it forms solid curd. How can you expect all the cream to rise through that? It can't. This

caseine web catches a third to half the cream. You stand that loss just as long as you use pans or cans for they haven't enough skimming force to take out all the cream. But, just the minute you commence using Sharples Dairy Tubular Cream Separator, you stop that loss.

Sharples Dairy Tubular Cream Separators have 10,000 times more skimming force than pans or cans, and twice as much as any other separator. They get all the cream—get it quick—get it free from dirt and in the best condition for making Gilt Edge Butter. Caseine doesn't bother the Tubular. The Tubular is positively certain to greatly increase your dairy profits, so write at once for catalog I-121 and our valuable free book, "Business Dairying."

ALL communications relating to dairy matters should be addressed to this office. Inquiries of general interest regarding dairy management and production will be promptly answered.

### Influence of the Dam in Impressing Dairy Qualities on Her Offspring.

To the Editor of The Homestead:

I have just been investigating, with much pleasure and profit, some important facts in regard to the ancestry of a bull to head a herd of dairy cows.

Baron Schrewe, of Kleinoff Papium, a German scientist and authority on thoroughbred dairy cattle, informs us that a good milk cow will not be the mother of good milk cows to a profitable degree of certainty, unless she is mated with a bull that is descended from a long line of good milkers. Baron Schrewe instituted experiments with one hundred and fifty-three cows. These cows were the progeny of four bulls. A careful record was kept, for a period varying from three to six years, demonstrating conclusively that the dairy quality of the bull they were mated with was of the highest importance in determining the milk yields of their female descendants.

A few conclusions follow along this line, which I consider of great importance to the dairyman and breeder:

First, when a farmer thinks of buying a bull to improve the quality of his future cows, he should look to the quality of the bull, not to the cheapness of price. (The character and reliability of the breeder goes a great way in such a transaction.) He should try to buy a "future" of good quality that will run on for generations, and that will help increase the good effects of every future sire that may be used.

Second, he should always breed in the line of his first effort. If his first bull was a Holstein or Guernsey or Jersey or Ayrshire, he should not break up the line of prepotencies and make a rope of sand of it. By a wise subsequent selection of sires of the same breed, selecting all the time for breeding power, he will enlarge and broaden the stream of dairy heredity. What we are after, in reality, is a better and stronger dairy heredity.

Third, about the most reliable basis of calculation as to the power of transmission, or as it is called the prepotency of the bull, is the dairy character of the grandmothers and great grandmothers

## Every Farmer Knows

That The

# DE LAVAL CREAM SEPARATORS

are in a class by themselves as the best separators. But many have the mistaken idea, which competitors help to magnify, that they are "expensive" and that something "cheaper" will do in their stead.

The Facts Are That The

## DE LAVAL CREAM SEPARATORS

are not only the best but at the same time by far the cheapest—in proportion to the actual capacity and the actual life of the machine.

These are simple facts easily capable of proof to any buyer who will take the trouble to get at them and who need only apply to the nearest DE LAVAL agent or send for a catalog to do so.

on both sides of his pedigree. He is the stored up result of what lies back of him. The quality of his ancestors will have more effect on his offspring than the performance of his mother. She gives to him more of what she has inherited than of what she does. She may be rich in inherited qualities, and yet, for some reason, be herself only an ordinary performer. On the contrary, she may be a large performer at the pail, simply as a sport, but not having a strong tide of inheritance in a dairy direction, she has nothing to convey to son or daughter. This will explain why so many cows, that are large performers themselves, fail utterly to convey their own dairy quality to their progeny. Their line of breeding is from a beef heredity for many generations, and they give to their progeny what they have inherited. A cow breeds from her blood, not from her udder, so we must have dairy performance, if we get our money's worth when buying a bull.

Most assuredly, the Baron is right in his conclusions as to the great value of the bull in determining the dairy character of heifers that come after him. The dairy farmer, that is rooted and grounded in a knowledge of these principles, will make improving work of his breeding. He will buy wisely and breed wisely. The man, who is not thus grounded, will produce just such cows as handicap the business of dairying the country over.

Geo. C. Mosher.

A moderate amount of manipulation of the udder while the last gill of milk is drawn will be found well worth the time it requires. For the first few times it may seem awkward to the milker who has never tried it, but after a few trials a person will be convinced that by working the last milk out of the quarter with one hand and emptying the teat with the other the udder will be emptied much sooner than where the last milk is drawn by stripping without manipulation.

The manufacture of ice cream offers a pleasant and profitable occupation to many farmers who are favorably situated. The factors necessary for success are: Proximity to a town where there is a good demand from people who want a pure article; a herd that will supply a good quality of milk; an abundance of ice, and equipment for caring for the milk and cream so that one can depend on its quality.

# Good Cows at \$15

Almost any man will pay that much for a first-class cow. Thousands of men have the cows but are losing \$15 on each one

because of faulty dairy methods. Government and State Experiment Station reports show that if the milk from every cow in the country was passed through a first-class separator the saving to the cow owners of the United States would amount to \$200,000,000. It looks big but it's a fact. It means just \$15 less on each average cow by the employment of milk pans, cans and other gravity processes of securing the cream. Your cows may be helping to swell this mighty fund. You can stop your part of the loss by the use of our

## Great Western Cream Separator

Our catalogue tells all about this latest improved and most thoroughly up-to-date machine on the market, embodying everything which is best, such as a Perfect Skimming, Self-draining, and Self-washing Bowl, Low-down Supply Can, High Crank, Ball Bearings—hence the

easiest running separator made; a machine with shafts that never wear out. Bearings that can be easily and cheaply replaced; a machine with all its gears running in a spray of oil. It fully illustrates and describes a machine that is always ready for service, and will last as many years as you continue in the Dairy Farming Business. This book illustrates and describes all the essential parts of the machine; it tells of what each piece is made and why. You will get more genuine information reading this book about separators than from any other source. You will get so thoroughly posted that no one can sell you a poor machine and get your good money. You want the very best and will find the GREAT WESTERN to meet every demand.

Our catalogue tells you all about milk, its composition, how and why the cream separates, how and why the milk sours, the changes that take place, why the cream does not separate by gravity when souring begins, why the sour milk is of so little value for feeding purposes, how much cream is lost by all the old methods of milk separation, i. e., the shallow pans, deep setting cans, dilution separators, etc. It explains how the GREAT WESTERN SEPARATOR saves all this cream, making a profit of 12 to 15 dollars for each cow you milk; it tells you of the best methods for raising calves and about the most prominent breeds of cattle; it tells what thousands of men have been trying for hundreds of years to accomplish and how we have succeeded; it tells you how to make your cows keep you instead of you keeping the cows.

If you are milking two or more cows, write us at once as follows:

"I am keeping .... cows. Send me your Book No. 4378 of the Great Western Cream Separator."

It is Free. Ask for it today.

Don't buy a separator of any kind or milk again until you send for our catalogue. Address

Smith Manufacturing Co., 154-164 EAST HARRISON ST. Chicago, Ill.

HINTS, SUGGESTIONS, DEVICES  
AND CONDENSED LETTERS  
FROM CORRESPONDENTS.

Mr. G. W. Knapp, of the Wisconsin Station, sends us a plan for a concrete fence brace and writes regarding it as follows: "I submit herewith an illustration of an anchor post that is rigid, permanent, and inexpensive. The post, or couplet, was made to carry a fence tested by a pull of 6,000 pounds, using a 15-strand woven fence for a test. This is two or three times the pull exerted by the heaviest woven fence, hence the post is amply strong. The couplet—posts and braces—cost \$2.40 for steel and cement, and required two hours' work of two men to set up the forms, mix the cement, and cast the post. The two posts, A and C, and the brace B and tie T, were cast all at one time, and are, therefore, one piece. The dimensions of the members are as fol-

lows: The posts A and C are each 6 inches square; A going 4½ feet and C going 3½ feet into the ground; each being 4½ feet above ground. The brace B is 4x6, and the tie T, is 4x4. The posts are 12 feet apart. The forms for casting the posts, brace and tie were made as follows: For the post forms, two boxes were made 4½ inches long and 6 inches square inside, open at the ends; using for the purpose one inch boards 6 and 8 inches wide. The form for the brace B was a trough made of inch boards, 4 inches deep and 6 inches wide. The form of the tie T was a similar trough 4 inches wide and as deep. The bottom of the trough B was made in

two parts; leaving a hole in the middle of the bottom for the tie T to pass through. Holes were left in the sides of the post forms at top and bottom to receive the ends of the trough. The forms, or boxes, for the posts were set vertically over the holes, and the forms for the brace and tie were put in place. When the forms were in place the steel for reinforcing the concrete was put in place as follows: In the form A two ¾-inch round rods 9 feet long were placed in the corners of the box on the side (d), and two ½-inch rods 9 feet long were placed in the opposite corners of the box on the side (e). These rods reached from the bottom of the holes to the top of the forms. In the form C similar rods were placed, except that the rods were 8 feet long, and the ¾-inch rods were placed on the side (s), and the ½-inch rods on the side (v). These rods were placed ½ inch from the sides of the boxes in all cases. In the forms for the braces B and T, two ¼-inch rods 16 feet long were placed in the bottom of each trough, bending the ends of the rods down into the post form boxes. All of the steel used was the common round steel, known as "soft steel." The concrete was then mixed; using one part cement, two parts sand, and four parts gravel; mixing very wet or sloppy. This concrete was poured in at the top of the post boxes until the holes in the ground and the post forms were full. As the post boxes filled up the concrete ran out into the troughs, making the brace and tie B. and T. The concrete in the troughs was worked at the sides of the trough with a trowel, and the concrete in the post form boxes was worked with a ½-inch stirring rod. The concrete was allowed to stand two days when the forms were removed, except the bottoms of the troughs, which were left in place for three weeks."

Those who have used the plan for making gutters in the dairy barn that is illustrated in the sketch claim that it has considerable merit over the ordinary narrow, two-sided gutter commonly seen. This gutter is a continuation of the passage-way, as we have

staid to show in the cross-section. The advantage of this is that it is impossible for the solid manure to so fill the gutter that the flow of liquids will be impeded or wholly checked on their way to the drain pipes. In removing the solid contents of the gutter the worker

Horse Power and Belt Power.

**KANSAS CITY HAY PRESS CO., 621 MILL ST., KANSAS CITY, MISSOURI.**

need not stand over the gutter, but can work from the passage-way. The one perpendicular side of the gutter should be from eight to ten inches high.

Teamsters and farmers who haul hay on roads where a brake is necessary will no doubt appreciate the idea embodied in the following hint. The idea is to

so construct a brake that it may be operated from the top of the load of hay or forage. In order to do this, build the standard of the rack as high as the load is liable to be. Secure a gas-pipe or rod about one inch in diameter and fasten it in strap-iron bearings on the standard as shown in the diagram. Surmount it with a small balance wheel

keyed firmly. At the lower end of the rod attach a chain which is passed over a pulley in the side of the bed and continued to the brake lever on the rear wheels. A writer in the *Prairie Farmer* recommends this device.

Fever ticks have been found on several herds of cattle in Elk county, Kan., and the state live stock sanitary commission is making investigation. A quarantine has been established.

### A FURIOUS ERUPTION

Itching, Bleeding Sores Covered Body--  
Nothing Helped Her--Child Cured in Five Days by

### A SET OF CUTICURA REMEDIES

"After my granddaughter of about seven years had been cured of the measles, she was attacked about a fortnight later by a furious itching, and painful eruption all over her body, especially the upper part of it, forming watery and bleeding sores, especially under the arms, of considerable size. She suffered a great deal, and for three weeks we used all the remedies we could think of. Nothing would help. We then sent for Cuticura Remedies, and after twenty-four hours we noted considerable improvement, and, after using only one complete set of the Cuticura Remedies, in five consecutive days the little one had been entirely cured, and has been well for a long time. Mrs. F. Ruefenacht, R. F. D. 3, Bakersfield, Cal., June 25 and July 20, 1906."

### Strong Harness

If you would have your harness rain-proof, sun-proof, sweat-proof, soft, strong and pliable, use

# CLASSIFIED ADVERTISEMENTS

ADVERTISEMENTS are inserted in this department of The Homestead (and, by special arrangement, also published in The Wisconsin Farmer, of Madison, Wis., and The Farmer and Stockman, of Kansas City, Mo., without additional charge) for the low price of five cents a word for each insertion, no insertion being accepted for less than \$1.20; and cash must invariably accompany the order, as we keep no books for this class of business. No display type or illustrations are admitted. Each number and initial letter or abbreviation, including the address, counts one word. Form for printing this page closes on Saturday of the week preceding publication, hence copy must be mailed so as to reach The Homestead on or before Saturday morning. Guaranteed combined circulation of this three papers over 190,000, reaching a farm population of at least 950,000 in the states of Iowa, Illinois, Nebraska, North and South Dakota, Minnesota, Wisconsin, Missouri, Kansas and Oklahoma.

WHY RENT? Own your own land. Write to T. V. Lowe, Goodland, Kansas.

WANTED—A Dakota land bargain. Box 400, Buffalo Center, Iowa.

## REAL ESTATE.

TEXAS PUBLIC SCHOOL LAND. Thousands of people are coming to Texas weekly; many others are desirous of finding homes there; but few know there are millions of acres of public land unsold. This land belongs to the school fund and is offered under a recent act of Legislature on the remarkable term of one-fourth of the price cash, balance payable 40 years after date at 3 per cent. Any able-bodied, industrious man with but little cash can secure a home. This land was for many years leased to ranch men, but leases are expiring and it will all be sold to settlers. Produce are wheat, oats, corn, alfalfa, corn, maize, alfalfa and cotton; all fruits, vegetables, fruit, etc. Prices range from \$1 to \$5 per acre. If looking for a home where climate is mild and healthy and land will increase in value enormously, investigate this subject. If you have children to provide for and land is too high where you live, come to Texas. Send \$1 for book of instructions with state law and map to Ashby James, Special Land Atty., Austin, Texas. Reference: American National Bank.

200 ACRES ON THE SOUND—A beautiful place, touching the water and in command of wide views of waterways and mountains; good land, extensive buildings and improvements; telephone connection; schools, stores and conveniences at hand; excellent transportation to and from all of the Sound cities. A bargain. In this for \$7,000. Our new list describes and quotes a selection of the best farms and most fertile land within reach of Seattle. Charles Somers Company, Alaska Bldg., Seattle, Wash.

THE BEST stock farm in northwestern Iowa is for sale at a great bargain: 640 acres of thoroughly tillable, arable land—280 acres under cultivation, 100 acres hay land, 260 acres in tame grass pasture; \$10,000 in improvements; within nine miles of three competing Chicago lines of railway, and town three miles from farm. Let me send you a circular describing this ideal stock farm and naming price thereon. Address, R. J. Hornbrook, Cherokee, Iowa.

TO EXCHANGE for Income Property or smaller farms: 1 ranch 800 acres, 3 sets of improvements, near town. 1 ranch 1,240 acres; improvements cost \$8,000. 1 ranch 2,200 acres; prices run from \$10.00 to \$40.00 per acre. Write for my list. I have many bargains in farms. A. Smith, Stuart, Nebraska.

WRITE FOR INFORMATION regarding lands in south central Missouri—agricultural, fruit and grazing lands—\$5.00 per acre up. Tell us what you want, also terms and we will suit you. Only three hours from Saint Louis market. F. E. Dowd, Manager, Rolla, Phelps County, Missouri.

320 ACRE FARM in Ripley County, Mo. 160 acres in cultivation; balance good timber; blue-room, two-story house, barn 150 by 48 feet; stone foundation. All good cultivating land. Price, \$10,000. Several smaller farms. Send for list. C. H. Martin, Doniphan, Mo.

FOR SALE: 120 acres, improved; 2 miles town, three-fourths miles school, well watered, rich soil, rolling prairie, part bottom; splendid stock farm, fenced and cross fenced. Price, \$55.00 per acre; \$25.00 cash, 5% on balance. Address, H. Box 53, Redding, Iowa.

MOUSE RIVER VALLEY FARM, 160 acres, six miles of Minot, ten wooded, balance tillable; 50 broods, 40 fenced, small buildings, good water, \$3,500. Other bargains \$2,000 upward. Cash or easy. Maps and particulars. F. E. Graves, Minot, North Dakota.

COME TO LAND of Big Red Clover and timothy, greatest dairy and stock-raising country in world. Counties of Polk, Warren and St. Croix. Write for descriptive matter and land lists. Clear Lake, Real Estate Co., (Incorporated) Dept., J. Clear Lake, Wis.

480 ACRES in Sherman County, Kansas, one-and-one-half miles from school and postoffice. Good American neighborhood. About 200 acres of farm land, balance rolling pasture. Price \$8 per acre cash. Apply to Albert E. Kling, Goodland, Kan.

CASH FOR YOUR property wherever located. If you want to sell, send description and price. If you want to buy, send for our monthly. Northwestern Business Agency, 380 Bank of Commerce, Bldg., Minneapolis, Minn.

BUY of the owner 80 acres improved farm. Good buildings; telephone; rural delivery; near school; churches; creamery; county seat. Best clover and potato land in the world. John Bozarth, Nora, Minn.

FIVE Madison County, Iowa, farms for sale by owners, one improved, four unimproved, 140 to 240 acres; 1 to 4 miles to good railroad town. Priced to sell. Alexander & Williams, Winterset, Iowa.

OKLAHOMA FARMS: Write your wants, enclosing stamp for new map of Oklahoma. I sell my own lands direct and pay your fare. No trades. J. P. Becker, Medford, Oklahoma.

WILL SELL to settle an estate any fraction of four sections of this best land in the Pannhandle. Close to Oklahoma. Ten dollars per acre. J. C. McKenna, Ivanhoe, Oklahoma.

CLOSING OUT at a low price on easy terms several finely improved farms recently possessed. Write quick for list. Bank of Itensen, Itensen, Ia.

SOUTHWEST MINNESOTA CORN LANDS. Iowa soil and conditions at half the price in this locality. E. H. Crandall, Montevideo, Minnesota.

FOR SALE—280 acre farm. Well improved in Washington County, Iowa; a bargain. For particulars write to Box 63, I. F. D. No. 4, Wellman, Iowa.

BEAUTIFUL HOMES in southwest Missouri, level prairie farms, no stone, \$30 to \$40 acre. M. Wight, Iantua, Barton County, Missouri.

DO YOU WANT a home in Oklahoma? If so, write to W. E. Willoughby, Chandler, Oklahoma. He has some good ones for sale cheap.

SOLDIER VALLEY FARMS for sale by L. H. Raymond, Pisgah, Harrison County, Iowa.

## REAL ESTATE.

Do you wish to sell live stock, dogs or other pets, poultry, poultry supplies, machinery, new or second-hand, implements, musical instruments, merchandise or, in short, anything that the farmer wants? If so, the best way to accomplish your purpose is by inserting an advertisement in the classified department of this paper. Only five cents a word for an advertisement in the greatest group of farm papers in the world, with 190,000 guaranteed circulation, covering the states of Iowa, Wis., Minn., South Dakota, Ill., Neb., Missouri, Kansas and Oklahoma. For further particulars, see announcement at top of this page.

needed, nothing is better than a grain capsule of quinin every morning. Search for the faulty conditions that have caused the trouble, and having found them, work with all your might to remedy them.

Speaking of lemons hasn't the weather man handed the farmer a fine collection this spring? Roses are in order now if you please, Mr. W. M.

the quarters with sunlight, if possible, and unless it has been thoroughly done within a short time, disinfect well after a general cleaning up. If the lameness arises from rheumatism, the affected joints will be swollen, hot and tender to the touch. Bathe these with carbolic acid or some good liniment. Give twenty-five grains epsom salts, and put thirty-five grains baking soda in each quart of drinking water. If a tonic is

watery matter. They live a week or more. Can you give a cure?

As our correspondent has not given details of surroundings, feeding and care, it will be difficult to make an exact diagnosis of the trouble. The lameness, etc., are symptoms pointing strongly toward rheumatism. The paralysis and bowel indications show something more. If the houses are damp and unsanitary, just such ailments might follow. Flood

## Too Rapid Feathering

Spring chickens often show positive weakness as the result of too rapid feathering. This checks the development of the chick, and may result in loss. If you begin the care of the young brood by giving daily a little of

## DR. HESS POULTRY PAN-A-CE-A

in the morning find these difficulties will be avoided. It contains bitter tonics to increase digestion, iron to make blood, and nitrates to help the fowl to throw off poisons from the system. By increasing digestion you increase growth and egg production, as all development depends absolutely upon the digestion. Besides this it has a principle peculiar only to itself—it has the power of destroying the little germs of disease, cleansing and purifying the system generally. Poultry Pan-a-ce-a is the prescription of Dr. Hess (M. D., D. V. S.). It makes eggs in abundance when given to laying hens, and hastens the fattening of market stock. Endorsed by leading poultry associations in United States and Canada. Costs but a penny a day for 30 hens, and is sold on a written guarantee.

## POULTRY DEPARTMENT.

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

### Turning and Cooling Eggs.

To the Editor of The Homestead:

Why is it necessary to turn incubator eggs? I read the other day of an incubator manufacturer who contends that it is not only unnecessary, but a positive injury. Is his contention true?

Nature is our guide even in artificial incubation. How does the sitting hen manage her eggs? M. M. Johnson says: "The sitting hen turns and airs the eggs more than we give her credit for. We draw our conclusions too much from casual notice. When we enter the room where she sits, she settles down on the eggs and gets mad. The entrance of a cat or dog has the same effect. Any unusual noise will cause her to settle down and stay that way as long as she is uneasy, but when everything is safe she is an entirely different hen. She is continually working with the eggs, has a number of motions to move, stir, and turn them."

"She turns them with her beak, with her feet and hocks and very often she settles down on them and shakes her whole body. Not only does she do this during the day, but through the night. To verify this all you need to do is to mark the eggs late in the evening, and look at the marks early in the morning. The hen not only goes through all these motions mentioned, but she also settles down with her head in different directions, her whole aim seeming to be to keep the eggs warm and moving."

Several ways of turning the eggs are recommended. Since the object of turning is to prevent the germ with its delicate attachments from hardening and growing to one side of the shell, the egg should be handled with care, lest the tender filaments be torn from their moorings. A few incubators, (but less than formerly) have egg-turning appliances by which a whole tray of eggs may be turned exactly half way over by one movement. But these appliances are not much in favor for several reasons. In the first place, it is better that the eggs change places in the trays. There may be varying degrees of warmth and so the heat has a chance of being evened up by the arrangement. Then, too, it is claimed, and with good reason, that the hand is best for handling the delicate organisms hidden within the shell. But it is certainly a mistaken idea that the eggs must be turned exactly half way over twice a day. The shuffle method, as it is called, which provides for the removal of a part of the eggs, leaving room to roll the others around carefully, not only changing position, but also giving a degree of exercise to the growing chick, seems to give the best results. Personally, my method with flat trays is to take out all eggs on outside of tray, roll the rest gently, making the operation longer as the hatch progresses, then placing these eggs on the outside, leaving room in the center for the eggs taken from the edges. After testings leave room on tray, I give the eggs a few rolls when I open the machine to look at thermometer.

For the first week and a half, at least, the eggs get sufficient cooling while being turned, unless the weather is very hot. If at any time the heat is found too high, the eggs should be cooled down to the proper temperature. The long cooling they get while testing is going on, should be taken into account.

Do not turn or cool after the evening of the eighteenth day. By that time the chick has fixed himself in position to pip the shell in the proper place when the supreme moment arrives, and it may prove disastrous to interfere with his plans. Let nature take her course in the matter and don't worry.

Mrs. S. B. Titterington.

### Why Animals Need a Tonic.

If a man were to deliberately and logically reason out the best method of feeding for profit, he would naturally theorize as to what would be best for his own physical needs and apply the practice in the care of his domestic animals. Such a course would eliminate guesswork. For were a man to be held up and stall-fed, he would soon refuse food. How, then, can we ask the most glutinous of our domestic animals to consume a stated quantity of rations each day with-

out believing that at some time during the crowding period a portion of the herd would not get "off their feed." Let us study the different processes of digestion and some of the phenomena which govern it. Stomach digestion is carried on only in an acid medium—that is, the juices of the stomach have a sour taste and smell, and turn litmus paper red—hence strong alkalies retard digestion by neutralizing the acids. Next, digestion is carried on most rapidly at a temperature of the body about 98.5 in man, 101 in the horse and ox; hence, large drafts of cold liquids immediately after eating check the process of digestion until the temperature is again elevated to that of the body. Food, after being softened by the saliva and acted on by the stomach ferments, passes into the intestines, where it receives or is mixed with the secretions from the pancreas and walls of the intestines themselves (Succus Intestinalis). These secretions act upon the food, completing the process of digestion, rendering the contents of the bowels a soft semi-liquid mass, capable of being sucked up by the millions of little mouths that dip down into it and draw out the liquid portions and carry them away to build up bone, muscle, nerves, horn, skin, hoof, or repair waste or store away fat. To aid these sucking tubes to take up the nutritious portions of the food, the bowels keep up a constant churning motion that brings the food in contact with the absorbents and aids them in taking it up; also in forcing their contents onward into the general circulation. Intestinal digestion and absorption is hastened by certain tonics or stimulants which increase the action of the glands of secretion. Substances which have the power of so affecting the gastro-intestinal mucous membrane as to increase its functions greatly, and thereby aid digestion and absorption, are known as tonics or simple bitters. They differ from stimulants in being slower in their action, but more permanent in their effects. Dr. Hess Stock Food is probably the best of food tonics because it is from the prescription of a veterinarian and medical doctor, and is prepared by Dr. Hess & Clark, of Ashland, Ohio. This food tonic produces natural hunger. Hunger or desire for food results from impressions made on the nervous system; a cry of the system for nutrition; an evidence of good digestion and assimilation. Where this particular food tonic has been thoroughly tested it has been demonstrated to be of exceeding value in not only keeping the animal fed in a healthy condition, but aids in the proper assimilation of all rations fed, making it a valuable adjunct to feed for any purpose.

### ADDITIONAL FIELD NOTES.

#### A RELIABLE HAY CARRIER.

Perhaps no one part of the hay making and storing machinery causes such disastrous loss of time as a defective hay carrier. No carrier is too efficient and reliable for the farmer who has a large acreage of hay to cut and mow. On page 16 we show an illustration of the "Meadow King" hay carrier, which represents probably the highest point reached by manufacturers in up-to-date hay carrier construction. The manufacturers have carefully studied every point of the hay carrier and now believe that they have a carrier which is well-nigh perfect. All of the good points of this carrier are explained in the catalog which will be sent to anyone addressing J. E. Porter Co., Ottawa, Ill. Kindly mention The Homestead when making inquiry.

#### WON OUT.

Mr. E. E. Kane, Chateaugay, N. Y., writes March 24, 1907: "I have used Absorbine for the last two or three years in several cases and always with good success. I shall continue to use it as occasion requires. I might tell you of one case where the Absorbine did great good. In the fall of 1904 I had a yearling colt that got frightened in a thunder storm and jumped against a stone wall, bruised and cut his off front ankle; was very lame and the joint fluid was flying out at every step. I went to work with Absorbine and in five weeks I showed the colt at our county fair at Malone, N. Y., and he won first premium in his class and is now one of a pair that \$800 has been refused for at four years old. I shall always advise my friends to use Absorbine, as I believe that it is the best thing on the market for the purposes for which it is recommended." Many customers write of the satisfactory results Absorbine gives. You try a bottle. Price \$2 at druggists or delivered. Manufactured by W. F. Young, P. D. F., 40 Monmouth St., Springfield, Mass.

#### C. J. MARTIN'S GREAT ABERDEEN-ANGUS SALE.

On Tuesday, May 28th, C. J. Martin, Churdan, Iowa, will make his first public sale of Aberdeen-Angus cattle at his farm near the town of Adaza, Iowa. This is pre-eminently the greatest Aberdeen-Angus sale of the season, and one of the greatest that has been held of this breed in recent years. At the head of this herd stands the noted bull, Prince Ito 2d, the undefeated grand champion bull of America, and the female portion of the Martin offering will either be sired by him or will be bred to him. The get of Prince Ito 2d that will be offered in this sale will demonstrate that behind his show record is his ability to reproduce himself, for there are certainly some grand young things in this sale. Among these is the sensational young Blackbird bull, Black Defender. He is not only sired by Prince Ito 2d, but he is also out of Blackbird 26th, the World's Fair and International grand champion cow, and she will also be included in this sale. Not in recent times has such a promising young bull been offered at a public or a private sale and it is to be hoped that he goes into the hands of an intelligent breeder. He is good in every way, his head is wide and short, his back is level and his spring of rib is wide, he comes out nicely at the tail, is low in the quarter, good in his under line and he is full of quality. His dam, Blackbird 26th, the first World's Fair grand champion cow that has ever been sold at a public sale, will also be one of the great attractions of the sale. This cow has been one of the most consistent winners in American show yards in recent times and she has done her share to bring the Martin herd into prominence. She stands today the greatest Blackbird show and breeding cow in this country, and she is in condition to go right on and repeat her past performance. She is bred again to Prince

THIS department is conducted by an experienced horticulturist. All questions relating to horticulture will be answered if of sufficient general interest to warrant a reply in this department. Communications and inquiries upon horticultural topics should be addressed to this office.

### To Relieve Alfalfa Bloat.

To the Editor of The Homestead:

To relieve alfalfa bloat in cattle, take a round stick about the size of a pitchfork handle, or at least large enough to prevent the animal closing the mouth, and either hold crosswise or fasten it in the mouth bridle-bit fashion until the bloat disappears, which will be only a few minutes and never longer than twenty or thirty minutes. It is very simple, but I never knew it to fail, and is so much more satisfactory than the old way of sticking the animal. A Subscriber.

Callaway, Neb.

### Keeping Currant and Gooseberry Bushes Up From the Ground.

To the Editor of The Homestead:

A subscriber from Schleswig, Iowa, asks how to keep currants and gooseberries up from the ground so that the fruit will not mold.

This difficulty is largely a result of improper pruning. The lower branches should be cut off, as they will naturally be so low that the fruit will be very close to the ground where sun and air cannot have ready access to it.

The nature of the soil may also be blamed for some of this difficulty. The element in the soil which gives stiffness and rigidity to plants—in fact, from which the woody part of plants is very largely formed—is potash. This is deficient in many soils and should be supplied.

plied. Wood ashes contain a large percentage of potash in condition to be assimilated readily by the plants. A liberal quantity should be worked into the soil around currant and gooseberry bushes every year.

For the present season or at any time when the bushes are not strong enough to keep up from the ground a wooden frame may be placed around each bush in such manner that it will hold the bushes in an upright position. This frame should be supported at a height of twelve to eighteen inches from the ground. In this manner the difficulty complained of may be very greatly reduced.

F. B.

The longer you make the breeding of poultry an intelligent study the more you will realize how little you knew at a time in your early experience when you thought you knew about all there was to learn. The fellow who ridicules "fooling away time with chickens" is related to the man who sits around the stove at the grocery and tells his listeners how to run the country and settle the great economic questions of the day. The "fool killer" still has plenty of work to do.

Breeding seasons have many disappointments for most of us and we can only profit by them by gaining some point of knowledge that may be of benefit in our future efforts. We must profit by failure as well as from success. The knowledge of experience is often dearly gained, but it is valuable and should be used to good advantage in our work.

### HOT WEATHER AHEAD.

Many a housewife is wondering how she will pass through the coming summer months with the stove she well knows will make the kitchen unbearably hot—to say nothing of the dirt, dust and ashes that will add to the discomfort. There is a way out of it all—a way that not only lessens the work and keeps the kitchen cool, but that also reduces fuel expense. This convenience, comfort and economy is all effected by the New Perfection Wick blue flame oil cook stove, an oil stove so superior to other makes that it is fast replacing the coal and wood range, the old-fashioned oil stove, and in many cases the gas stove. The New Perfection gives a strong working flame at moment of lighting. "Blue flame" means the hottest and cleanest flame produced by any stove. The flame is always under immediate control and can be raised or lowered instantly. The convenience of this will be understood when it is considered that while the flame of one burner is boiling the kettle or roasting a large joint, that of another can be reduced to simmering point—in this way enabling the housewife to cook a variety of dishes at one time. On washing and ironing days the comfort and convenience of the New Perfection will be greatly appreciated. It gives best results in the least time, and does away with all coal and wood carrying and the many other disagreeable jobs that have to be done with other stoves. The New Perfection is made in three sizes with one, two and three burners, and is warranted to give full satisfaction. Another home comfort is the Rayo lamp, which produces a light of unusual brightness, yet soft and mellow—a light that will not hurt the eyes. The Rayo Lamp can be used in any room. It is highly ornamental and beautifully nicked. Every lamp is warranted. The New Perfection wick blue flame oil cook stove and the Rayo Lamp are two real essentials to home comfort. Their easy operation, absolute safety and handsome appearance commend them wherever stoves and lamps are used. Inquire at your local dealers. See page 15.

### Good Poland China Fall Boars for Sale.

To those who are in need of a good fall boar of the most fashionable Poland China blood we wish to say that Mr. R. F. Jackson, of Raymond, Neb., has a number of pigs on hand at present that are very good ones. They are mostly the get of Bonaparte, he by Allerton Tecumseh, and having for his dam Lady Kodak by Kodak. They are very growthy and some of them are sure to make good hogs. Mr. Jackson also offers his herd boar Neb. E. L., a son of Perfection E. L. His dam was Mayflower 2d by Chief Climax. This boar is an extra good individual and has some extra good stuff to show for himself on the place at the present time. He has a very wide back, well arched and carries a good even width from end to end. He hams down extra well and has an extra good bone and feet. Mr. Jackson will price this boar at a very reasonable figure at present and we wish to state that if you are in the market for a good herd boar it might pay you to go and take a look at this fellow as he is surely a good one. When writing please mention The Homestead.

### A Shoe With a Test.

Ordinarily when one buys a pair of shoes he is satisfied when the shoe fits. Too little attention is given to the quality of the materials which are put into the shoe. Shoemakers knowing this to be a fact, have flooded the market with a lot of poor, trashy stuff in the line of footwear that cannot help but give ill satisfaction to the wearer. To those who are convinced of this fact it will be of interest to know that there can now be found on the market a high-grade shoe made of "buffalo calf." This leather is a specially-prepared calf skin which is tanned to endure the hardest kind of usage. It makes up well and results in a shoe of nice shape and good general appearance. On every one of these shoes will be found a small piece of leather cut in the form of a buffalo calf. Anyone who can tear this piece of leather in two with their fingers is entitled to a pair of buffalo calf shoes

## 34 Years Selling Direct

Our vehicles and harness have been sold direct from our factory to user for a third of a century. We ship for examination and approval and guarantee safe delivery. You are out nothing if not satisfied as to style, quality and price.

We are the Largest Manufacturers in the World

selling to the consumer exclusively. We make 200 styles of Vehicles, 60 styles of Harness. Send for large, free catalogue.

Elkhart Carriage & Harness Mfg. Co.  
Elkhart, Indiana

No. 656. Combination Top Buggy and Driving Wagon with Stanhope Style Buggy Seat and Bike Gear. Also Extra Seat for Open Wagon. Price complete, \$61.50. As good as sells for \$75.00 more.

## SEED CORN

NEW GOLDEN WEST and all the best varieties of choice, selected, thoroughly tested seed corn, which have yielded 75 to 215 bushels per acre. Costs only 25 cents per acre for seed. Large, descriptive catalog of Seed Corn and all kinds of Farm and Garden Seed mailed free if you mention this paper.

IOWA SEED CO., DES MOINES, IOWA

free. Ask your dealers about this offer and if he cannot tell you, write directly to Bentley & Olmsted Co., the western people, Des Moines, Iowa. This company will consider it a favor if you mention The Homestead when you write them. See advertisement on page 16.

### Cherry Grove Short-horn Sale.

Mr. Milton E. Jones, of Williamsville, Ill., proprietor of the noted Cherry Grove herd of Short-horn cattle, invites the attention of the readers of The Homestead to the forthcoming sale which will be held at Cherry Grove Farm, on Tuesday, June 4th. This offering is by far the best that has ever gone into the auction ring from this noted herd. Mr. Jones is fortunate in having in service one of the most noted bulls of the breed, Imp. Lord Banff. This noted Scotch bull was shown with great success throughout the season of 1901 and was sold at auction to Mr. Geo. E. Ward for \$5,100, the highest priced Scotch bull sold at auction. At the dispersion of the Ward herd Lord Banff was sold to Mr. Jones and has been doing continuous service in Cherry Grove since. Not only was Lord Banff a noted show bull, but he is one of the very few noted show and breeding bulls of the country. Mr. Jones has secured some of the best Scotch cows of the country and bred them to Lord Banff. Many of these he himself bred, while in other instances he bought the best that could be had. A notable instance of this character was in the dispersion of the famous Tebo Lawn herd. It is doubtful if there are in any herd as large a number of the top Scotch cattle of this noted herd as there are in Cherry Grove. The offering which will be sold at the breeding farm on June 4th is made up of sixty head, nearly all of which are related to Lord Banff. This sale might appropriately be called "Lord Banff" sale. Twenty-five head of young cows, heifers and herd-leading bulls are sired by Lord Banff, while twenty-five females are safe in calf to him. The breeder who is in search of a bull to head his herd, or who wishes to add new blood to a herd already established will find in this offering cattle which will prove profitable to him, and which represent the best the breed affords, both in Scotland and in this country. The beginner who wishes to start right will find in this offering the right kind of cattle to insure his success. An additional advantage that the beginner has is the fact that many of the females have calves at foot by Lord Banff and are rebred to him. Scotch blood predominates, and the Scotch-topped sorts are topped by some of the best bulls used in this country. The cattle will be offered in good, thrifty condition, many of them now running on pasture, and will be appreciated by those present who are looking for cattle of merit, and not those pampered Mr. Jones will be pleased to furnish catalogs to all who are interested in good Short-horns, and will appreciate it if readers of The Homestead will kindly mention this paper when writing. Full particulars in regard to this noted offering will be given in succeeding issues. In the meantime we would suggest that catalogs be secured. Plan to be present sale day, as this is one of the important events in Short-horn circles this year.

### Permanent Water Supply.

The water system which will guarantee to the farmer a permanent, constant supply of water at an even temperature the year round should be highly welcomed on any farm. This kind of a system is possible with the Economy Hot Air pump. The company which make this hot air pump are prepared to equip any farm or dwelling place with a system of water works complete. They claim all the good points of a system in their plan. For full particulars address Thomas & Smith, 17-19S, Carpenter St., Chicago, Ill. See page 14.

### Harvey & Son and Wray & Son's Short-horn Dispersion.

The sale of Short-horn cattle to be held by Messrs. J. H. Harvey & Son, of Maryville, Mo., and B. T. Wray, of Hopkins, Mo., at Maryville, Mo., on Wednesday, May 29th, will be an absolute dispersion of both herds. Mr. Harvey, Sr., began raising pure-bred cattle twenty-seven years ago and has always felt that he was a fixture in the Short-horn business, but other duties have so encroached on his time that he does not feel that the Short-horns can be given the personal attention necessary, hence they are to be scattered and Mr. Harvey hopes to herds where they will be appreciated. Mr. Wray has been breeding but a few years and sells his cattle in order that he may devote his entire time to the Poland China hog. Forty-four head, eleven bulls and thirty-three females are listed. Among these are nine head of Scotch, the balance being Scotch-topped on good reliable American bred families. Each of these gentlemen have when in the market sought for good individuals, then if the pedigree was right, they bought and as a result

## LATE SOWING SEEDS

C. H. SPEERS, G. P. A., DENVER

they have today some very desirable stock to dispose of. Among the bulls is Harvey & Son's Duchess of Gloster herd bull, Baron's Gloster, a bull that will be three years old in June. He was got by Baron Barmpton of Cruickshank, Duchess of Gloster tribe. His dam Carmel Gloster was got by Sir Charming 2d by Imp. Salamis and out of Sweet Chaffy 2d. His second dam Maggie Gloster was got by Imp. Duval Crown, third dam Countess of Gloster was by Commander, third dam Imp. 22d Duchess of Gloster by Barmpton Prince. Baron's Gloster is a good red, a good individual and in the McGavock show sale at Kansas City in 1905, he was first in class and the champion of the show. Since becoming the property of Messrs. Harvey & Son, he has not been pushed, but has been allowed to develop gradually and has been in constant service, getting for them a lot of young things that show him to be a breeding bull of no mean proportions. Some appreciative buyer wanting an all-Scotch herd bull should be on hand sale day. In younger bulls there are several desirable ones, both Scotch and Scotch-topped. One of these, an Imp. Beauty was got by the Bellows Bros. great breeding bull, Hampton's Best and out of Brewster Beauty 2d by Breadalbane, tracing to Imp. Beauty 15th by Heir of Englishman. This cross has produced many good things for the Bellows Bros. and in this yearling Messrs. Harvey & Son are offering a bull that should be sought after by the more exacting bull buyers. Sons of the great Hampton's Best are in such demand that it is not often they are found in public sales. A Marr Emma is cataloged as Lot 42, Emil. He too, is a July yearling and was got by Grissland Victor, a Cruickshank Victoria bull that was got by Imp. Conqueror. His dam, Emiline, was got by Collynie, a Duthie bred bull that was imported by M. Hanna and has proven such a great sire of choice breeding cows. His second dam, Imp. Emma 33d, was got by Sittytown Pride, by the great Scottish Archer. Then follow dams got by such sires as Marsfield, William of Orange, etc. This fellow should please the most critical pedigree crank as well as the man hunting a desirable individual. Mr. Harvey also sells a number of nicely bred Scotch-topped fellows that will make valuable steer getters. Messrs. Wray & Son sell but one bull, their herd bull Lamont 209556, a four-year-old bull of the Imp. Ianthe tribe. He was got by Rosemont, a C. C. Norton bred bull, sired by Imp. Eanker. Lamont is a good red, an evenly built bull and a breeding bull of much merit. A number of his get go in the sale and they show his worth as a sire. The female part of the offering made by these gentlemen is strong in good, useful breeding mares of which mention will be made next week. There are some Scotch females in the offering that should be looked after by those who want to get a few to add to their herds. For catalogs, address either gentlemen connected with the sale as per advertisement on page 23.

## DIRECT FROM MILLS TO YOU WE PAY THE FREIGHT

Have you ever stopped to consider when you buy a tin roof from your dealer, that you are charged three profits: first, the profit the jobber gets when he sells to the dealer; second, the dealer's profit on the tin; third, the dealer's profit on the tinner's labor? But do you get a satisfactory roof even after you have paid the three profits and the job is completed? Or do you often have to send for the tinner again in a short time to patch up a leak? BEACON-ITE is a long wool fibre roofing that you can buy direct from the mills, thereby saving the jobber's and dealer's profit. You put it on yourself and again cut down the expense. BEACON-ITE LONG LIFE ROOFING will never rot or rust. We want to send you FREE samples of this roofing for your examination and also quote you mill prices. You'll be surprised at the quality and the price. BEACON-ITE MILLS, DEPT. 4, St. Louis

## Louden's OVERHEAD CARRIERS

Do All Kinds of Work  
Clean Barns, Stables and Pig Pens. Convey all kinds of Feed, Milk, Water, Ice etc. Handle Merchandise, Ashes, Coal, Slop, Saw-Dust and a hundred other articles about the Farm, Store, Mill and Factory.  
All the Latest Improvements.

## ADDITIONAL FIELD NOTES.

Mr. Sol Frank, of Sioux City, Iowa, offers a bargain in a hog farm on page 19 of this week's Homestead.

Barred Plymouth Rock eggs are being offered by J. M. Janssen, Sibley, Iowa, at 75 cents per fifteen; \$1.50 per thirty and \$5.00 per 100. Write him and send him an order.

Four fall Duroc Jersey boars are offered for sale by Mr. Carl Hansen, of Herman, Neb. If taken within the next thirty days they will go at \$20 apiece. If you want one of these send him your order.

Mr. Austin Renshaw, of Blair, Neb., is offering three good Duroc Jersey sows for sale bred for July farrow, and he is also booking orders for sows bred for fall farrow. Write him and get his prices on these.

Mr. A. H. Brett, of Mason City, Iowa, has chosen June 27th as the date for his sale of fifty head of registered Short-horns and some ten head of Percheron and Clyde stallions. Announcements will appear later.

Three red Scotch-topped Short-horn bulls are offered in this week's issue by Mr. S. S. Spangler, of Milan, Mo. These bulls are of the right age for service and will be priced for quick sale. Write at once, mentioning The Homestead. See page 22.

Mrs. A. Kitson, Audubon, Iowa, advertises duck eggs on page 11. In making mention of the fact last week in these columns we made an error in stating that her price is \$1.00 for nine; we should have said for eleven eggs. Kindly bear this in mind when you order and mention this paper.

Mr. H. S. Allen, proprietor of the well-bred Mulberry Grove herd of Duroc Jerseys, at Russell, Iowa, advises us that his advertisement is doing the work and the fall boars which he is offering are going to good homes. We always are glad to have our advertisers prosper, and right here we will say that Mr. Allen has a proposition in a show, fall boar sired by Top Notcher Again out of an Advance sow. Wide-awake showmen should lay eyes on him. A few other boars are offered at bargain prices, considering quality and breeding. Write your

wants, mentioning the Homestead, or visit the herd.

Special prices are now being quoted on White Wyandotte eggs by Mrs. L. M. Estes, Audubon, Iowa, on page 11. The flock has laid well this season and Mrs. Estes states that as her hatches have been so uniformly good, she has no hesitancy in saying that the eggs offered are a bargain. Write this advertiser your wants mentioning The Homestead.

A pair of Short-horn bulls are offered for sale on page 22 by the Mt. Pleasant, Iowa, State Hospital. As the state farm here will go into the breeding of Holsteins these bulls are to be sold and no doubt they will go at a bargain. One is two-years-old and the other is three. For further information write Mr. C. F. Applegate, Supt., Mt. Pleasant, Iowa, mentioning The Homestead.

In calling attention to the prizes won by the B. P. Rock flock of Messrs. Aye Bros., Blair, Neb., last week we wish to say that besides those then mentioned they won at the Washington county show, first and third breeding pen which with those previously mentioned makes a record to be proud of. See their egg advertisement on page 11 and mention this paper when you have occasion to write them.

Reduced prices have been made by Mrs. Silas Cobb, Marathon, Iowa, on B. P. Rock eggs and on Pekin duck eggs. This advertiser writes that her flock has laid exceedingly well and the per cent of fertile eggs has been high, due no doubt to the health of the flock which has been insured by plenty of range. For prices, see the advertisement on page 11. When writing kindly say you saw the egg offer in The Homestead.

Hereford bulls of the table-backed kind and of the right age for immediate service are offered on page 22. Five herd headers are in the hunch and as thirty-three head are offered there will be an opportunity to buy in carload lots if desired. Prices are reasonable, as always. Write or visit this herd, which is the property of the well-known breeder, Mr. W. W. Wheeler, of Harlan, Iowa. Kindly mention The Homestead when writing.

Mrs. R. Van Der Wert, Lacey, Iowa, writes that her flock of Barred Plymouth Rocks has been laying well and she can fill a number of orders with eggs from pens that have hatched well at home. As the care of the chicks keep her busy, Mrs. Van Der Wert will close out her eggs at half price from now on. Correspondence will be promptly answered by this advertiser. Mention The Homestead when you order or make inquiry. See page 11.

A fine eighty-acre, well-improved Kansas farm is listed in our advertising columns on page 19 of this issue. As this offer indicates a bargain, intending buyers should lose no time in writing the owner. The farm is situated within a half hour's drive of a good town and will be sold on easy terms. For further particulars write to Mrs. Lizzie A. Bennett, 1001 Neosho St., Emporia, Kan. Kindly say you saw the advertisement in The Homestead when writing.

Messrs. John Schroeder & Sons, of Gardner, Ill., invite the inspection of breeders and prospective buyers of their herd of Red Polled cattle. The stock has wintered well and the young stuff is an excellent lot. Whether you are looking for good, everyday animals or show-yard material you should give these breeders a call. Write them if you cannot arrange to visit the herd. Stock of both sexes is offered. See page 25 for breeding represented.

Messrs. John H. Tryon & Son, Lyons, Neb., owners of one of the best Duroc Jersey herds in the West, report about eighty spring pigs to date and several sows to farrow in the near future. Two of these litters are sired by the \$5,000 boar, Junior Jim. Messrs. Tryon & Son owned a half interest in Junior Jim, and now that he is dead there should be a good demand for these pigs. One of these litters is out of Improver Bell, a daughter of the sweepstakes boar, Improver II, and the other is out of a daughter of Trone's Oom Paul. There are litters by other good boars, such as Advance Lad, Clovercroft King, Junior John, and other well-known boars. The Tryon herd is one of the most intensely Orion-bred herds in the state, there

being five daughters of that noted sire in their herd. They also have several daughters of Proud Advance, and these all have litters this year. Their last sale averaged \$115, which only goes to show that they have one of the greatest herds today in the West. Any of our readers who are thinking of buying a herd boar this year should write them and get their prices on some of these Junior Jim boars out of the Improver II and Oom Paul sows. They are now booking orders for future delivery.

Regarding the Percheron and Clyde stallions which he has for sale, Mr. A. H. Brett, of Mason City, Iowa, writes: "Happy Hooligan 45936 is a dark bay with black points, four years old and weighs 2,040 pounds, is sound, has good style and action, and can show a gait like a driver. He has plenty of bone and a good middle and will make a great horse for a company of farmers to buy. The other Percheron stallion is Cyril 42062, a black with white star. He is three years old and weighs close to 1,700 pounds. He carries exceptionally heavy bone, and is a low-down, blocky fellow. He will make a horse that will weigh 2,200 at maturity easily. He has good style and action and good feet. I also have a Clyde stallion, two years old, Royal Heir 12408. He has fair bone and is a colt that will weigh 1,800 at maturity easily. The blood of this colt comes from the prize-winning class on both the dam and the sire's side. Anybody wanting to invest a few hundred dollars can derive at least 50 per cent on their investment. I also have an imported coach stallion, seven years old; a nice bay horse with splendid bone and good style and action. He was a prize winner in Germany as a yearling and was sweepstakes winner at Indiana and Ohio State Fairs." Mention The Homestead when writing this advertiser.

Mr. J. J. Lehr, of Ransom, Ill., has been breeding Chester White swine for many years and has built up one of the good herds of the central West. At the head of his herd he is using a boar named Springfield Chief. This boar was first in the under six months class at the Illinois State Fair in 1906 and individually is a boar of excellent quality. He has a very good head and ear, is full through heart, has a very good arched hock and spring of rib and stands on good feet and legs. This boar is the sire of all but one litter of pigs on the farm, and among the number are several fit to go into any herd. The sows in the herd were sired by a boar which won first in class at Kentucky, Indiana and Illinois State Fairs. At this writing Mr. Lehr is offering several very good October boars for sale that will do to head herds. They are priced reasonably considering their breeding and individual merit and the farmer or breeder who is in the market for a bred boar can be suited in this lot. Twenty open gilts of October farrow are also offered for sale. They are sired by Springfield Chief (the boar mentioned above) and will make a valuable addition to any herd. Readers of The Homestead in need of very good Chester White swine will do well to write Mr. Lehr, as per his advertisement on page 22 of this issue, kindly mentioning this paper.

A representative of The Homestead recently inspected the herd of Durocs owned by Mr. Ernest Pancake, of Ransom, Ill., and found the spring crop of pigs coming along nicely. Mr. Pancake was a liberal buyer from some of the best herds the past season. His herd boar, Kant's Top Notcher, is a son of the noted Kant's Be Beat and out of Rubertha, the noted prize winning daughter of old Top Notcher. This boar was bred by Messrs. Watt & Foust, of Cedarville and Xenia, Ohio, who have given to the Duroc breeders many of the most noted prize winners of the breed. A number of spring litters are sired by this boar. He is a boar of great length and has a very good back, ham and smoothness of body, stands on extra good feet and legs. This winter Mr. Pancake decided to secure a younger boar and after visiting many of the leading herds selected a fall boar from the well-known herd of Mr. J. Coy Roach, of Girard, Ill. This boar is sired by Ohio Chief and is out of Heleu Blazes III, the \$1,000 sow purchased by Mr. Roach from Mr. H. E. Browning last year. This young boar will be bred to a number of good sows for fall litters and something good can reasonably be expected from the cross, a combination of some of

## The Small Buyer of Paint

who takes care that the Dutch Boy trade mark, shown below, appears on every keg of white lead he buys is perfectly protected; as perfectly as if he were a railroad official buying hundreds of tons, and with a corps of chemists at his back to see that no adulterant is palmed off on him.

Our booklet, "A Talk on Paint," shows why Pure White Lead and Pure Linseed Oil are absolutely necessary to good painting, and gives other money-saving information. Free to any reader of this periodical.

When you buy white lead, look for the Dutch Boy.

## Free Book For Men

A handsome illustrated book which explains a 11 about diseases of men such as Nervous Disorders, Weaknesses, Blood Poison, Skin Diseases, Prostate, Pelvic and Urethral Disorders, Etc., Kidney and Bladder Troubles, Etc.

This book tells the various stages of these diseases, at what stage they become incurable, and tells of a simple and effective treatment for the cure of the ordinary cases at home. This book tells how men who have broken nature's laws, become weak and run down can regain their strength and vigor and many other important facts which men should know. Those interested should write for the book today. Same will be sent free in plain sealed envelope. Address,

**DRS. FELLOWS & FELLOWS CO.,**  
323 Rollins Bldg., Des Moines, Iowa

the most noted breeding to be found anywhere. Mr. Pancake will be pleased to furnish prices and description of young stock and is now booking orders for spring pigs. Look up the advertisement on page 22 of this issue and kindly mention The Homestead.

Mr. W. F. Hemmerling, of Dike, Iowa, writes that the Model herd of Chester Whites are doing well. The spring crop will number around seventy-five fine youngsters. They are sired mostly by his Peerless boar, Modeler 13235. The winnings of this sire for 1906 are without equal, considering his age. He made a hit at five of the leading state fairs, namely, Iowa, Minnesota, Wisconsin, Kentucky and Illinois. At Iowa he was breeders' champion, and he won five firsts at as many fairs. The gratifying thing is the showing that his pigs are making. Mr. Hemmerling will book orders now, but will not ship before September 1st. Now is a good time to order, however, as the supply will not be up to the demand. A few fall gilts are being bred to Modeler to farrow in September. These gilts are choice, sired by the winning W. F.'s Model 12101. Drop a card for this breeder's catalog and note the change of advertisement on page 25. Address Mr. W. F. Hemmerling, Dike, Iowa.

## No-Tar Roofing

Flint-Coated, Waterproofed Toughened, Guaranteed Samples for Testing FREE

We want to send you a Free Sample of No-Tar Roofing and tell you 10 ways to test it. Test it with water, heat, acid and alkali. Note its strong wool fibers. Test its toughness. Test it for tar—you'll not find a trace. It's made from Asphalt. Compare its quality and price with other kinds of roofing. Then figure on cost per roof, and you'll find that No-Tar Roofing is cheaper and better than shingles, steel, tin or gravel roofing.

**FREE Roof Book and FREE Samples**

We will send with free samples a copy of our illustrated Roof Book. This handy little book tells just how to apply No-Tar Roofing to new buildings or over old shingles—Residences, Barns, Cribbs, Poultry Houses, Outbuildings, Stores and Factories. Shows you how to make valleys, gutters, etc. How to make the cuttings and flashings around chimneys, skylights and firewalls. How to make all joints water tight. How to cover old shingle roofs. How to measure a roof. It tells how No-Tar Roofing is made and why it is so economical and satisfactory.

Leading dealers sell No-Tar Roofing. Special nails and liquid cement FREE in every roll. Write for FREE ROOF BOOK and FREE SAMPLES today. Address **THE HEPPESS CO., 2482 Fillmore St., Chicago**

Dealers—Write and we will tell you how to quickly build up a profitable Roofing Department.

## WANTED

INFORMATION regarding good farm that is for sale and which can be bought of owner. No agents need answer. Wish to hear from owner only willing to close his own deal and save buyer paying big commission and fancy price to some agent. Would also like to hear of good small business for sale by owner. ## HOW TO SUCCESSFULLY GROW AND HANDLE YOUR BEAN AND PEA CROP.

Farmers from all over the country are becoming more and more interested in beans and peas. This is more particularly true where the land is becoming "worn out" and does not produce good crops of such grains as wheat, oats, barley, corn, etc. Beans and peas, being leguminous plants, bring nitrogen to the soil, which is just the element that other grains must have. Aside from the value of beans and peas as soil improvers, the grain is very valuable, and the vines make the best kind of stock food. The great drawback has been the proper machinery for thrashing beans and peas without splitting them. This difficulty has now been entirely overcome, however, as the J. L. Owens Company, of Minneapolis, Minn., are manufacturing and selling a strictly first-class line of bean and pea thrashers guaranteed to thrash in the most satisfactory manner. We thrashers are made in four sizes to suit the needs of the large and small grower. We should advise all of our readers who are interested at all in beans and peas to write for a copy of their new book entitled "How to Successfully Grow and Handle Your Bean and Pea Crop." This book gives a great deal of valuable information in regard to the market, feeding and soiling value of beans and peas, aside from telling all about the full line of thrashers. A copy of this valuable book will be mailed free to all who address the J. L. Owens Company, 614 Superior St., Minneapolis, Minn., and mention this paper.

OUR HOME DEPARTMENT.

LETTERS intended for publication should be accompanied by the name and address of the writer, not necessarily for publication, but as a matter of good faith. All communications intended for this department should be addressed to Postoffice Box 727, Kansas City, Mo.

WITH THE EDITOR.

It will not be long now till the agricultural schools, the girls' colleges, and the state universities will be closing their doors for the summer season, and, mayhap, you will be at the depot with the team and the light spring wagon waiting till a dear one steps off the train.

How your mind turns to look back into the past years, and to again view the pictures stored away there! One picture, never to be forgotten, is of that day when half-gladly, half-fearfully your darling parted from you to go out into that wider world—the world of away-from-home. Another is of the night when, the others having retired, you three sat in the lamp-light and having talked it all over once again, finally decided. It was like the splitting of a hair to decide "which way."

That first year—so long in hours and minutes—so quick in months and seasons—went by, and you were all expectation for the return. The train drew up and your breath caught in your throat. Yes, it was the same child, yet—somehow so different. Oh, a year's growth in the late teens means so much—more so when away from home.

The letters that came to you at home during the next year were not so satisfactory—they told less, and the money demands were greater. You two had expected a little increase, but—well, you two talked of it together with just a little bit of bitterness. You had to deny yourselves even more than you had intended.

At the next home-coming, you felt a vague yearning for a lost something, and down in your secret soul more than half wished that the "which way" had been decided otherwise. There was a difference in the child in lack of respect for things you held so sacred; things that you regarded as fundamental as the foundations of the earth were treated as being very inconsequential, and

many frivolous words and chafing expressions made your ears tingle. Your looks of pain were quite unnoticed, and your remarks set aside with youthful positiveness. Yet there was something in the manner in which the youngster behaved before others of like age that gave you a secret feeling of proper pride, and brought a healthy glow to your heart. Something down underneath all this shoddiness seemed to ring true with your own ideas and ideals, though never, in your mind, had they been pictured in similar ways nor with such college-bred words. This year there were such mixtures of sweet and bitter that you were in a state of unrest, a frightened hoping unrest.

And then the third year! That was the year you went east to bury your only sister, and stopped off at the college town on your way back, hoping that a sight of and a little visit with this dear one of yours would hearten you up again. Oh, the joy of that weekend; how near you seemed to each other, you two off there among all those strangers. How time seemed to roll back as you two went strolling about, and in and out of those great buildings that seemed to mean so much and were so overpowering to you with all the bustle and business-like method, the comings and the goings. The kind way in which the teachers spoke, and even the president himself, of that child of yours, meant much, very much. Students showed their regard, as they passed, by a cheery word, a kindly smile, and many gladly greeted their class-mate's parent. Here, you felt, you were being borne on a foundation not your own; you were received for not your own worth, but another's. And something awakened which had been slumbering in your consciousness and said, "My child lives not my life; nor I my child's."

That next summer was lonely. You two were alone; for things had not gone well on the farm that year, and one day a letter came, saying, "I am offered an opportunity to earn quite a sum during vacation and hope to accept it." You two looked at each other; you did not like it, but there seemed to be no other way, so at length you wrote giving permission.

And still another year sped on. That was the most anxious one yet. There was sickness at home; money matters were tight, and you did not feel quite right about the one away from home. Some disquieting rumors reached you. It was only when you stood under the old vine covered porch in the evening's calm for a moment's repose at the end of the day that you were able to collect these many and varied threads that were weaving themselves into your life. It was only then that you were able to free yourself from the bondage of the near, from the tyranny of the day's grind. That blessed evening time, though only a few seconds' duration, when the sky seems to breathe down peace, and the clear steadiness of the stars, always there, always shining, though cloud or sun intervene!

But the whistle of the in-coming train brings you to a recollection of why you are waiting at the railway station, and when, from amid the bustle of arrivals

\$4.20 WORTH OF SOAP ABSOLUTELY FREE

We give you \$4.20 worth of the Best Soap Absolutely Free if you accept our "4 Months Free Trial Offer" for the Wonderful, New, Ball Bearing, "Dan Patch Washer." This marvelous, new machine washes clothes snow white, in less time and without tearing off buttons or injuring the most delicate fabrics. A small child can easily and safely work the ball bearing "Dan Patch Washer." It is the Easiest, Fastest, Cleanest, Most Economical and Best Made Washing Machine. RHEUMATISM in your SHOES

THIS may sound peculiar, but it is a fact nevertheless. The fault is more than likely with your shoes. Cold, damp feet, sudden changes by stepping on cold, wet pavements and sidewalks, cause Rheumatism. Any sufferer from Rheumatism knows how gladly he would obtain relief.

Kirkendall's Cushion Soled Shoes

have met with wonderful success. To those suffering with Rheumatism, Corns, Calloused places or any foot troubles, we say: Wear our Cushion Soled Shoes six months; we guarantee relief, if not a complete cure.

These Cushion Soled Shoes have been worn with great satisfaction and relief by Rheumatic sufferers. Their benefits are plainly seen. First, they absolutely conform to the shape of the foot; the foot bears evenly; the sole of the foot, with its tissue-like skin and myriads of nerve-centers, is kept warm, dry, comfortable, and at a continuously even temperature. The jarring so irritating to nervous and rheumatic persons is lessened and removed, and one's walk through life is made easy.

Kirkendall's Cushion Soled Shoes are made in all lasts, leathers, widths and sizes. Often they have been prescribed by physicians for rheumatic, nervous, delicate persons.

If your dealer has not them in stock, write us and we will learn why, and at the same time will advise you the nearest place to obtain them.

F. P. KIRKENDALL & CO. 1101-1105 HARNEY STREET. OMAHA, NEBRASKA.

and departings, steps out that one, who is so much to you and of you, coming forward in all the brisk brightness of clean trim Americanliness, and the dearly loved voice—though so changed—rings in your ears once more, you feel with a swelling heart that you—poor little hard-struggling, narrow-circumstanced you—have something worth while to be thankful for.

That night, with this young picture made even more bright by the joy-drops trembling on your lids, you see that it was worth while, well worth the while to give to your country a being who will make a better citizen than you can be. And in your thought you visit round among your friends to tell of, to show your treasure, when it occurs to you, "That is what they, too, are striving for. Blindly it may be, even unconsciously, but all parents, each in his own way, wish the child to be finer, nobler, truer than they themselves were—or could be."

That is what makes an American!

HOME AND HOMEMAKING.

LITTLE HELPS BY THE WAY.

My life is a brief, brief thing, I am here for a little space, And while I stay, I would like, if I may, To brighten and better the place.

Let go the notion of being or doing anything in future. God knows no time but the Eternal Now. You can never know any other time, for there is no other. You cannot live an hour or ten minutes in the future. You cannot live it until you reach it, and then it becomes the Now.

A GARDEN SEAT.

If you are cutting down trees in the yard, save two stumps which are close together, for the purpose of making a substantial basis for a garden seat, or, if you desire, have two large pieces cut and put in the place where you wish this seat. Cover it with a large flat board for a seat, make a suitable rustic back and arms. If desired, the grape vines can be interwoven through the back and arms, and over it can be grown pretty trailing vines. This is a good idea for country people who have an abundance of room for just such benches, which adds so attractively to their spacious grassy lawns.

JUST A FEW SMILES.

"Sir, I want your daughter's hand."  
"You may have it with the greatest pleasure, dear boy, if you'll take the one that's always in my pocket."  
"Married him a week after meeting him?"  
"Yes; I didn't know him very well. That's true."  
"Well, nothing like marriage to get one acquainted."  
Baby Dolly, aged five, was out with her father one day, when he took her into a shop and bought her some chocolates. On the way home she felt rather tired. Suddenly a bright idea came to her. She looked up at her father, and said:  
"Daddy, I'll carry the chocolates if you'll carry me."

IN THE CELLAR.

Now is the time to hang the red flag in the cellar unless you propose to take out the de-

very uneven it should be covered with newspaper, then a linoleum will last twice as long as when the boards crease places in it. Unless badly soiled linoleum should be washed with warm water in which there is a little milk, either sweet or sour, but this is objectionable in summer, since the sweet odor attracts flies. Pieces at the doors should be bound with table oilcloth, as it is there where linoleum first breaks. Old pieces can be painted in bright colors to serve double time of usefulness.

#### WHAT TO DO WITH COLD POTATOES.

Potato Salad:—Boil potatoes without paring and only till barely done. Slice thin and if large cut in quarters before slicing. Slice one small onion. To one quart of potatoes mix one teaspoonful of salt, one salt-spoonful each of paprika, mustard and white pepper, add ten tablespoonfuls of oil, pour it over the potatoes and mix thoroughly. Then add four tablespoonfuls vinegar. When serving arrange at the base a circle of sliced eggs, from each of which clip a small edge, and garnish with celery foliage.

Hashed Potatoes au Gratin.—The possibilities of cold boiled potatoes are great. Chop eight medium sized ones and place them with a half cupful of milk over the fire. Add one tablespoonful butter and a pinch of salt and

pepper. Cover and cook five minutes. Remove and pour the potatoes into a baking dish. Sprinkle half a cupful of grated cheese and two tablespoonfuls grated breadcrumbs over the top. Pour over a little melted butter and bake a light brown in a hot oven. This could be daintily served packed in a cheese mold.

#### CHOCOLATE NUT FROSTING.

Boil one cup of sugar and half a cup of water, until it forms a thread when tried with a spoon. Pour in a fine stream, beating constantly, on to the beaten yolk of two eggs. Then pour this mixture on to a square of melted chocolate, add the chopped meats remaining from a pound of unshelled nuts, and half a teaspoonful of vanilla extract, and beat until cold enough to spread.

Eggs with Canned Corn.—Chop a quart can of corn; add four beaten eggs, a tablespoonful of cornstarch, a teaspoonful of half milk and half cream; season to taste with salt and pepper, and bake half an hour.

#### AMONG OURSELVES.

Some little time ago it was proposed that the men give us their ideas on prohibition. Whether they failed to notice the request, or whether they have no ideas on the subject, or whether they had not time or inclination to put their ideas on paper, it is, of course, impossible to say, but they have been very slow to accept the invitation given them. I am sorry about this. I hope we may yet hear from them, and today I have pleasure in presenting to the circle a gentleman who has been with us before, though under another name:

Aunt Jane's letter and Mrs. Walker's request for a discussion of the liquor traffic move me to give my opinion. One young man said to me that strong drink caused the ruin of all young men who go wrong. Strong drink brings the brute to the surface; it deadens man's conscience, it is first and always present in all forms of vice. I believe the only way to deal with the liquor traffic is to prohibit it by law. It is never right to license or allow evils to exist if it be possible to prohibit them. The liquor business is the greatest curse of our nation, and also the best organized industry to prevent laws being enacted and executed to prohibit its sale. The greatest lever we can use to force the enactment and execution of prohibitory laws is public sentiment. We must educate the people as to the effects of alcohol on a man's physical, mental, and moral being. This education will create public sentiment in favor of temperance. When we get laws to prohibit the liquor traffic, then, because of the great number who believe in the open saloon and love to have the laws enforced. The Kansas law prohibiting the sale of liquor became almost a dead letter. Political parties took opposite sides regarding the enforcement of the law, and, though we elected the men who declared no joint would be open thirty days after they took the oath of office, the liquor traffic continued by means of boycott, bribes and threats. The business men of the towns dared not take sides, so it was up to the farmers of the county. We organized through our Sunday schools. Every township had its superintendent. Each Sunday school gave special attention to temperance; the result was that the Christian people supported the law with their influence and pocket-books, and hired able attorneys to prosecute all joint keepers. They have paid fines of several hundred dollars apiece, and served time in jail. Now both political parties declare for the enforcement of the law. We hope for a national prohibitory law. Eternal vigilance is the price of freedom from the bar.

"A bar to heaven, a door to hell;  
Whoever named it, named it well;  
A bar to manliness and wealth;  
A door to want and broken health;  
A bar to honor, pride, and fame;  
A door to grief, and sin, and shame;  
A bar to hope, a bar to prayer;  
A door to darkness and despair;

The most important thing in the world to me is a lamp-chimney.

I have been for years and years making the best, and always trying to make them better. I put MACBETH on them and no one ever disputes my claim.

The Index explains how to get a MACBETH chimney to fit every lamp, and how to care for lamps. Sent free to everyone asking for it.

Address, MACBETH, Pittsburgh.

#### CYCLONE THE FENCE BEAUTIFUL

We build ornamental fence that looks well, and is as good as it looks. Strong steel wires, crimped and interwoven with cables so none can get out of position. Choice of several styles for Lawns, Public Buildings, Churches, Parks, Cemeteries. Our catalog will interest you.

Cyclone Fence Company, Waukegan, Ill.

#### Cheap as Wood.

We manufacture Lawn and Farm FENCE. Sell direct shipping to users only, at manufacturers' prices. No agents. Our catalog is free. Write for it to-day. UP-TO-DATE MFG. CO., 927 10th St., Terre Haute, Ind.

Ornamental Fence—Cheaper than wood—for lawns, churches and cemeteries—also heavy steel picket fence—sold direct to consumer. Catalogue Free. WARD FENCE CO., Box D, MARION, IND.

## A Shady Transaction

If anybody sold you some lumber and if upon careful examination you discovered that it was really not solid timber but merely short pieces spliced together you would call it a shady transaction. That is about the kind of a proposition you are up against when you buy cut stay fence.

It's really not a first-class, full strength product. About half of its strength is wasted—sacrificed to convenience and speed in manufacture. Our stay wire is NEVER cut. It runs continuously up and down across the fence for many rods without an end, thus preserving and utilizing ALL the strength and service there is in the wire.

**30 Days Approval.** Let us prove to you that Advance Fence is the best made fence on earth. We offer to ship you all you need on 30 days approval. We want you to examine it carefully and compare its construction with other fences. You may stretch up a part or all of it and turn your stock against it. In fact give it any kind of a test you wish.

Then we will let you be the judge—absolutely. If you do not like it send it back and it won't cost you a cent as we will pay freight both ways and refund to you every cent you paid. We know that Advance Fence will please you or we would not dare make this liberal offer.

**We Prepay Freight** and guarantee safe delivery of shipment. You take no risk whatever. Write for our Free Fence Book and Prices.

**Advance  
Fence Co.,**  
34 Old St., Peoria, Ill.

**ADVANCE**

## Use A NEW PERFECTION Wick Blue Flame Oil Cook-Stove

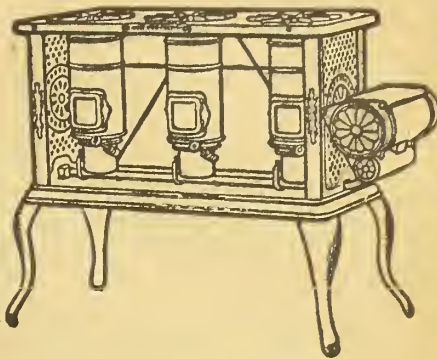

Because it's clean.  
Because it's economical.  
Because it saves time.

Because it gives best cooking results.  
Because its flame can be regulated instantly.

Because it is better than the coal or wood stove.  
Because it is the *perfected* oil stove.

For other reasons see stove at your dealer's, or write our nearest agency.

Made in three sizes and fully warranted.

The **Rayo Lamp** cannot be equaled for its bright and steady light, simple construction and absolute safety. Equipped with latest improved burner. Made of brass throughout and beautifully nicked. An ornament to any room, whether library, dining-room, parlor or bedroom. Every lamp warranted. Write to our nearest agency if not at your dealer's.

STANDARD OIL COMPANY  
(INCORPORATED)

A bar to honored, useful life;  
A door to frowning, senseless strife;  
A bar to all that's true and brave;  
A door to every drunkard's grave;  
A bar to joys that home imparts;  
A door to tears and aching hearts;  
A bar to heaven, a door to hell,  
Whoever named it, named it well."

This practical sort of talk is what a circle like ours needs. There is always the danger of doing too much theorizing. I wish we might offset this danger by hearing from those who are doing things, whether it be keeping the house clean or keeping the country clean, helping make the school better or helping make the community a more agreeable place to live in. Come, friends, you who are working, tell us what you are doing that we may catch your spirit, learn by your ups and downs and be stirred up to become workers also.

The circle was promised a continuation of the discussion of dancing—from a somewhat unusual point of view. Mrs. S. E. O., will talk to us from the standpoint of practical experience:

Ever since the subject of dancing was brought up for discussion, I have been waiting to see if there could be anything new said, either for, or against it. No! I do not think it is because we are becoming less strict in regard to amusements. The same conditions, and temptations, must be faced now that existed when we were young. If you will pardon me I will give you a leaf from my life. When a girl in my early teens, it would have been hard to find one more full of fun, and more ready for a good time, than I was in those days. We lived neighbors to a family whose young folks were lively, and danced. I was quite susceptible to flattery, and when they would tell me what a graceful dancer I would make (for they really taught me the first steps) and that I would appear better, etc., it seemed to me, that that was just what I wanted. I listened to many discussions between our neighbors and my parents on that subject. I would say right here, my father was descended from good old Puritan stock, and both parents strongly opposed dancing. Out of regard for their wishes I curbed my desires for that kind of amusement, and the current of my life soon changed. From being a weak Christian, "looker on," in the church, I became a worker. I was asked to teach a class in Sabbath-school which I accepted. The results of that change no one will ever be able to tell in this world, but let one once become interested in church work and new paths will continue to open up, till things like dancing and card playing, will seem very, very shallow. And now when asked by any young person, why it is wrong (for plenty of church members engage in it,) I tell them though there may be no sin in the act of dancing, much wrong has resulted from it, and there are plenty of amusements that are unquestionable. If you want to be a power for good in this world, choose the best in all things. I have been much interested in how to keep our boys from the Sunday ball game, and in the Sunday school. Some of the pieces were so to the point I felt like hanging them on the wall, where all could see. I should like to

## The Iowa gate - FOR THE FARM -

By sliding this ring back the largest hogs may pass under

AND have the run of two lots. Or raise your gate to drive hogs through, then your larger stock cannot get out. **RAISING THE GATE** is simple enough but very handy your gate swings on uneven ground or when the outer end drags. **IOWA gates** will raise up for winter use—are not bothered by wind, rot, or fire. Are easy for women to handle but strong enough for any stock.

**CHEAPER THAN WOODEN GATES** and will outlast a dozen. Write today for our circular.

**IOWA GATE CO. 9TH ST. CEDAR FALLS, IOWA**

## DON'T RUST FENCE

40 Carbon Spring Steel. Extra heavily galvanized. No Agents. 30 days free trial. Farm and Poultry Fence, Catalogue No. 140. Also 40 Styles Lawn Fence, Catalogue C. Catalogue Free. Write for one or both. **THE WARD FENCE CO. Box 404, MARION, INDIANA**

hear the question of Sunday visiting discussed, these two points especially: Should we let visiting, or visitors, keep us from church, and should we stay away from church, if we do not like the preacher as well as we might?

"As the twig is bent the tree inclines," is a proverb which has a wider application than is generally recognized. It would be interesting to know where Mrs. S. E. O. would be now had she yielded to the impetus of amusement instead of Christian work. And yet we must bear in mind that some of the sanest, most useful workers in the world have danced all their lives and see not the slightest harm in it.

Last week "Grey-Eyes" gave us her views; this week "Black-Eyed Susan" comes to give hers—on the relations which should exist between mother and daughter:

I have been for some time a silent reader in this circle, but at last I have decided I can keep still no longer. Should a girl give her mother her confidence? I say yes, by all means. But let me say right here that all the blame doesn't rest with the girl. Mothers, start from the first to teach your daughters

ter you are her truest friend, then she will come to you instead of going to some silly girl friend. A girl who has been taught this way from the beginning will never do anything she would be ashamed for mother to know. How many girls would be rescued from a life of shame if at the first wrong they would seek a mother's advice. Oh, girls, don't have secrets from your mothers. Another thing which I was interested in was what age a girl should be to keep company with a young man and the liberties he should be allowed. Sixteen is far too young for a girl to think of having beaux. Too many girls foolishly believe themselves to be in love and this often leads them to do things they'll afterwards be sorry for.

"Black-Eyed Susan" is a sensible girl. I hope all the girls in our circle will remember what she has said today. Perhaps mothers also will hide away in their hearts the little hint she gives them.

Most of the members of this circle live in the great central West and although this is the day of many railways and much traveling the Pacific coast and the Southland is more or less undiscovered country. Of course our friends who live there talk charmingly and allowance must be made for that, but I notice that there is an unusual flutter of expectation when it is announced that this or that friend from these far parts is to speak to us. Your curiosity is now aroused; this is what I wanted. Mrs. Clara S. Everts, of Ridgeland, Miss., will endeavor to gratify it:

We were much interested in the Poultry Symposium in the issue of April 14. Here in central Mississippi is as nearly an ideal poultry country as can be found. Winter eggs are as high or higher here as in the North, because comparatively few of the old residents give any attention to poultry whatever, and hens roosting in trees are not going to lay in the winter even in a mild climate. We all know that winter eggs bring the money. We know, too, that the nearer we can come to summer conditions, the more eggs we will get; as summer is the natural laying time. Here, by a little forethought we can have plenty of green feed all winter, and I have learned by experience that it makes the winter eggs. No matter what else is fed them, without plenty of greens of some kind they will not do their best. We are raising full blooded White Leghorns and White Plymouth Rocks and are having most excellent success. After the chicks are a week old we feed them entirely by the "hopper method." That is, we keep the feed before them all the time so they can eat whenever and all they please. We have runways about 3x6 feet attached to each brood coop, which gives the hen plenty of room for exercising and dusting, and keep her confined all the time until we find she is weaning her chicks or she begins to lay again. When we fed the chicks every two or three hours they stayed close to coops and spent little time foraging. Now they roam all over the garden and orchard, finding innumerable bugs and worms, but not doing the least damage, and consume no more food than formerly, but are growing better than before. This saves so much of my time and strength. I use small, shallow pans for their feed and fill them twice a day when I water.

ADDITIONAL FIELD NOTES.

Two coming Nebraska Duroc Jersey sales early next year are those of Mr. Robert Pritchard, of Carroll, and Mr. W. M. Lessman, of Wayne, January 23d and 24th respectively. These sales will no doubt attract the attention they deserve, and their merits will be enlarged on in due time in these columns.

Mr. J. J. Lehr, of Ransom, Ill., breeder of Barred Plymouth Rocks, is offering eggs for sale at \$1.50 per fifteen, from high scoring pens. The cockerel used by Mr. Lehr scores 92½ points and his flock has plenty of farm range and are big, strong boned birds. Write your wants. Kindly mention The Homestead.

A horse trading proposition, and a straightforward one in every respect, is made on page 22. Any owner of a young draft stallion who would like to trade the same for a fashionable standard bred three-year-old stallion should write at once to Mr. F. L. Williams, of Postville, Iowa. Kindly mention The Homestead.

THE GILSON.

On page 13 is advertised the Gilson Gasoline Engine. This shows only one size of the many different horse power that this factory turn out. Their machines have a reputation of "going like sixty." Fuller particulars may be learned by writing for catalog. Address Gilson Manufacturing Company, Park St., Port Washington, Wis.

A FINE HOG FARM FOR SALE.

One of the finest suburban hog farms, near Sioux City, Iowa, fourteen acres, good barn, hog and chicken house, granary, corn cribs, all kinds of small fruit, fenced hog tight, and cross fenced into hog lots, all equipped for hog business with 100 head of pure-bred Duroc Jerseys now on it, is offered for sale by Mr. Sol Frank, of Sioux City, Iowa. He will sell the farm and keep the hogs or will sell the whole to the right party. Mr. Frank must give his attention to his tailoring business is the only reason for selling. Here is a bargain for some good hog man. Write Mr. Frank for further particulars at once.

THE ELI GASOLINE ENGINE.

The Eli Gasoline Engine is regarded as one of the most trustworthy engines of its kind on the market. It can be trusted to run hour in and hour out, winter and summer, with the minimum of attention. This good feature about the engine is secured by simplicity of construction. Complicated levers, valves, pivots, and other features of this kind are eliminated to the greatest extent possible. Every engine is backed by a guarantee which represents progressive business of forty-four successful years. This engine is sold direct to the user. A free catalog will be mailed to anyone interested if he will write to the Moline Pump Co., 303 Twentieth St., Moline, Ill. See what they say in their advertisement on page 4.

CANADIAN WHEAT FARMS.

In the famous, well-known districts of the Saskatchewan valley, Goose and Great Quill lakes, plains and adjacent country are some of the richest wheat farming lands in the north. This is the great hard wheat district of the world. Over 500,000 acres of this land is available to settlers. This land has been producing, where it has been cultivated, from thirty to fifty bushels of No. 1 hard wheat to the acre. Here is an opportunity for those looking for wheat land at moderate prices to invest in lands that will undoubtedly prove highly profitable. For maps, price-list and other particulars, address, Stewart & Matthews Co., Ltd., 305 Jackson St., St. Paul, Minn. Kindly mention The Homestead when you answer the advertisement. See their advertisement on page 19.

HERD HEADING SCOTCH SHORT-HORN BULLS.

The Malaka herd of Short-horn cattle, owned by Mr. H. D. Parsons, of Newton, Iowa, has some attractions to offer the Short-horn world at this time. Mr. Parsons is recognized as not only one of the oldest breeders of Short-horns in Iowa, but a breeder in whom everyone has implicit confidence. As has been often stated to the writer by those who have had business relations with Mr. Parsons, his word is as good as a government bond. It certainly is a pleasure to do business with a man of this character. Mr. Parsons has for sale at this time some very choice bulls, fit to head good herds. Of course, his price on this character of bulls may be a little beyond that asked for more ordinary ones, but they are richly worth the difference.

ALFALFA, RAPE, CANE AND OTHER SEEDS.

are cataloged and priced by a reliable Iowa seed firm elsewhere in this issue. This dealer reports a nice season's trade and has a fine grade of seeds of all kinds in stock which he is making special prices on. Besides the seeds we mention in the beginning, this firm carries fancy Kentucky blue grass, flax, millet, buckwheat, field peas of all kinds, cane seed and kafir corn, and will price these seeds in bushel lots. Those who have clover, timothy or other seed of good quality should submit them samples for their prices, as they are buyers as well as dealers. They will also quote you prices on wool. Address Adams Seed Co., Decorah, Iowa, and when you write them say that you saw their advertisement in this paper. See page 12.

RHEUMATISM IN SHOES.

If it were more generally known that the kind of shoes one wears bears a close relation to the amount of rheumatism they suffer, people would be more careful about what they put on their feet. The purposes of shoes are to keep the feet dry and warm and protect them from sudden and unfavorable changes of weather. A great many shoes on the market fail to do this. Any sufferer from rheumatism is well aware of this. To those suffering from foot troubles, as well as rheumatism and similar muscular and bone afflictions, we would advise the trial of Kirkendall's Cushion Soled shoes. These shoes have been worn with the greatest satisfaction and relief by rheumatic sufferers in general. Kirkendall's Cushion Soled shoes are made in all lasts, leather, width and sizes. We would heartily prescribe them for the use of nervous and delicate persons, as well as others who desire a first-class article in foot-wear. If your dealer does not have

Simpson-Eddystone Silver Greys

The same high quality of these famous prints has always been maintained, with increasing beauty of patterns. Some designs with a new silk finish. All with fast color. For all the year round dresses.

Ask your dealer for Simpson-Eddystone Silver Greys. Three generations of Simpsons have made Simpson Prints.

The Eddystone Mfg. Co. (Sole Makers) Philadelphia.

PORTER'S Hay Carrier "Meadow King"

The carrier that represents the limit of all that is up-to-date in hay carrier construction, design, finish and manner in which it does its work. The carrier with wide open mouth and with swinging fork pulley. With this carrier you can fill the mow closer to the roof of the barn than with any other hay carrier. The throat of the carrier has a very large opening, which permits the pulley to approach with a swinging load and the load can swing in either direction when locked in the carrier. This carrier can be swiveled either on or off the trip-lock, or can be reversed by pulling the rope directly through the carrier. The lock is perfect. Write today for free, illustrated catalogue, explaining this carrier.

J. E. PORTER COMPANY, OTTAWA, ILLINOIS

Wealth in Irrigation

New Opportunities to Acquire Home and Independence Cheaper than Paying Rent—Crops Large and Certain

On Tuesdays, May 7 and 21 and June 4 and 18, 1907, I will personally conduct you to this LAND OF OPPORTUNITY, to the growing towns and fertile, irrigated valleys of the Big Horn Basin, Wyo., where you can enter 160 acres of irrigated land at 50c. an acre plus cost of water; also the Yellowstone Valley with its beet sugar factory and irrigated lands. Do you want to go?

The Government is spending millions for irrigation in these localities.

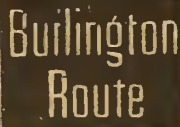

These lands, adjacent to the Burlington Route, are as rich and productive as any the sun shines on, and lie along beautiful streams with an abundance of pure mountain water. Plenty of timber and coal. Climate, ideal.

Why pay rent when for same payments you can own your own home?

I am employed by the Burlington Route to show these lands and my services to you are free.

SPECIAL ROUND TRIP RATES from Omaha, Lincoln and Kansas City, \$20, St. Louis \$23, Chicago \$25. Excursions leave Omaha 4:10 p.m., Lincoln 6:00 p.m., Kansas City 9:50 a.m. and 6:05 p.m., St. Louis 8:02 a.m., and Chicago 9:15 a.m., on dates named.

NEW FOLDER FREE. For our new folder with large map, telling all about these lands, the markets, what the farmers raise, how to acquire title, and much other valuable information, write to

D. Clem Deaver, General Agent, LAND SEEKERS' INFORMATION BUREAU, 1009 Farnam St., Omaha, Neb.

3320

Free WEAR "Buffalo Calf" SHOES

Say on a postal card to us that you would like to see and test

This Test-Tag on Every Pair

one of these "Buffalo Calf" Shoe Leather Tags. We'll be glad to have you. These tags are stamped from the best seasoned, best wearing, most comfortable leather for hard-wear shoes made by anybody anywhere. It is what we put in "Buffalo Calf" Shoes, which are worn by more practical men who have to give their shoes hard usage than any other shoes in the West. Try a pair. Ask your dealer for them. Put them through the hardest of usage, in rough work, and you'll find they will outwear any other shoes made for "General Durability." They are good shape, and look well for every-day wear, too. They are comfortable shoes and the best value—always made of choice leather for wear and comfort, and are stitched with waxed thread—stitched stronger than other kinds. Ask your dealer, or write us direct—

Bentley & Olmsted Co. "The Western People"

them in this herd. Messrs. Cumming & Son invite prospective customers to visit the herd and make personal selections. Notify them of your intended visit and you will be met at Tecumseh. To those who cannot come and wish to order by mail they promise square treatment and guarantee everything as represented. When writing please mention The Homestead.

#### RAIN PROTECTION.

A good rain proof coat is always a handy garment to have about the farm. As sure as a rainstorm comes up the careful stockman will be looking for certain animals that have strayed during the storm. In such an emergency there is nothing so satisfactory as a good waterproof, oiled garment. This kind of clothing is clean, light and durable and is so economical that anyone can afford to have a good suit on hand. The Tower's fish brand waterproof oiled clothing is standard throughout the country. Nearly every dealer can supply his buyers with Tower's fish brand. Those who are not familiar with the good wearing qualities of this brand should write for booklet describing the different kinds of waterproof garments to A. J. Tower Co., Boston, Mass. Kindly mention the fact that you saw the advertisement in this paper. Be sure to ask for Tower's brand the next oiled suit you buy as advertised on page 14.

#### HANDY STOCK SPRAYER.

A sprayer that is appreciated by every stockman and farmer is advertised on page 18. Those who have used it indorse it heartily and find that it is the best way of applying such dips as Zenoleum that has yet been offered to the user of disinfectants. The efficiency of a good disinfecting fluid is largely due to the thoroughness with which it is applied. The nearer the fluid comes in contact with disease germs the more effectual is its destructive power. Furthermore when applied in the form of a fine spray it requires less of the dip than where thrown about with some utensil. The advantages of a good sprayer are many and the one which is shown and described on page 18 should be in use in every stock barn where health is valued. You may order this sprayer direct from the Zenner Disinfectant Co., 131 Lafayette Ave., Detroit, Mich. Kindly mention this paper when writing.

#### PAINTING BUILDINGS WITH CLAY.

That's practically what some people do. Did you ever realize that a good deal of the filling in much paint on the market is nothing more than poor clay and cheap minerals? There is only one mineral which makes a dependable paint. That is strictly pure white lead. The form in which lead is used in paint is that of a semi-liquid state. The cost of pure white lead is the principal reason for so much paint adulteration. There are, however, still paint makers in the field who consider their reputation too valuable to sell cheap paints. The Carter White Lead Co. is one of these and they guarantee their paint to be pure in its ingredients, which consists of linseed oil, pure white lead and drier. Such a paint must wear well. "Pure Paint", a booklet highly illustrated and well edited, will be sent to any user of paints who will write for it, mentioning The Homestead. Address, Dept. D, Carter White Lead Co., Chicago, Ill. See page 2.

#### STRICTLY A FARMER'S PROPOSITION.

By that is meant the cream separator offer made by Mr. William Galloway, who wants a million owners of cows to have a copy of his catalog. The special offer means just what it says. The Galloway cream separator can be sold on special prices because the machine is sold from the factory. The catalog is the only salesman and it costs only a few cents of the factory's money to put it in your hands. If they had to sell their machines through agents it would cost several hundred times as much to acquaint farmers with the merits of the Galloway. Thus you can see how one expense is cut out. The machine on which the offer is made is a first-class one in every respect. It unites the good points of separator construction. All these points are fully and plainly described in the catalog. You should learn all about the free trial offer by writing for the catalog. Address Mr. William Galloway, President, the William Galloway Company, 103 Jefferson St., Waterloo, Iowa.

#### REISSER BROS. DUROC JERSEYS.

With this issue of The Homestead, the Messrs. Reisser Bros., Sanborn, Iowa, make their bow to the Duroc Jersey world. These young breeders have been conspicuous in the various sales the past winter, and they have laid a foundation that cannot help but command the respect of the Duroc Jersey breeders of the northwest. They have about 125 spring pigs now on hand, with a few sows to farrow, which will bring the total number up to about 150. Their present crop is sired by Junior Jim, the \$5,000 boar and a well known Nebraska state fair winner. As Jim is now dead, and the boys have about twenty-one of his pigs, it is fair to presume that they will have a good demand for them. Other litters are sired by the undefeated sweepstakes boar American Royal, I. X. L. Advancer, (an Iowa State Fair winner) Reisser's Tip Top Notcher, and G. P.'s Model, the boar that now heads Gus. Pederson's herd. They have a variety of breeding, and of the most noted strains known to the Duroc Jersey breed. One of their best purchases is Advance Lady, a daughter of Proud Advance out of an Orion sow. This sow was in the Manley first prize show herd in 1905, and was the second highest priced sow in their sale last winter. She has nine splendid Junior Jim pigs, and they are doing well. These pigs are bred along the same lines as those which produced Alix Heir, the highest priced young boar for his age ever sold. There are five boar pigs in this litter. They have another litter, one boar and four sows by Junior Jim out of Orion's Lady, a daughter of old Orion. They lost this sow, but saved the litter by putting the pigs on another sow. Proud Advance Lady, another daughter of Proud Advance, bought at the Garrett sale, has six male pigs by Junior Jim, and Lena Advance, also a daughter of Proud Advance, has a litter of seven by American Royal. They have two litters by Osceola Chief and one litter by G. P.'s Model. They also have a litter by Orion Boy, a son of Orion and several litters by their own two herd boars, I. X. L. Advancer and Reisser's Tip Top Notcher. The former boar is a son of the Iowa State Fair winner, Advancer, while the latter is a son of the \$5,000 World's Fair boar Tip Top Notcher. The boys also have several good Advance sows in

their herd. One of the best of these is Pansy Lady, out of Miss Owen, by the Roberts' bred boar, Owen. She will farrow May 17, to Reisser's Tip Top Notcher. Those who are figuring on buying a boar for future use and want something bred along the most up-to-date lines, will do well to remember the boys. They will be pleased to hear from Homestead readers at any time and invite a personal inspection of their herds.

#### HAITH'S DUROC JERSEYS.

Among the good herds of Durops of this section of Nebraska, is that owned by Mr. W. H. Haith, of Vesta, Neb. Mr. Haith has been breeding hogs in a quiet way for some years, but when the proper time seemed to present itself to him he stepped out and added some of the very best individuals to his already good herd that money could buy. His herd is headed by Ed's Improver, one of the very best sons of Improver II we have yet seen. His dam was May Markwell, by Missouri Boy. This boar has proven a good breeder and has put some extra good pigs on the Haith farm. Several of this hog's get have been retained, and with the many good sows Mr. Haith has purchased he is in fine condition to furnish breeding stock. One of the great finds of this season's many good sales, Mr. Haith purchased in the great sow Banner Top 119100, by the great Tip Top Notcher, from Mr. W. H. Putman, of Tecumseh, Neb. This sow was the top of Mr. Putman's sale, and well did she deserve to be as she is one of the great sows of the breed. Mr. Putman thought enough of her to pay \$100 for the service fee to the great Kan't Be Beat and she was later sold in his sale to Mr. Haith at \$510. This sow is a very large one, with wonderful back and even side lines, has great depth of body and is as smooth as an apple. She has an extra strong bone, good feet and very neat head and ears; in fact we think her good enough to show in the hottest shows of the season. She has a fine litter of five pigs by Kan't Be Beat and if there is anyone wanting a good prospect for next fall's show we recommend one of these youngsters. At the Kirkpatrick sale Mr. Haith made one of the good purchases of the season in D. Zerta, she by Aethelred and having for her dam Miss Clark, by Clay Chief. This sow has proven a great breeder and she now has a fine litter of eight pigs by Lincoln

Wonder. The man who wants Duroc Jerseys closely related to prominent sires can find them here and we recommend Mr. Haith's herd as a good place to buy the very best. There are many other good ones here which we will mention later. Write Mr. Haith your wants and mention The Homestead.

#### KUPER'S GREAT SHORT-HORN AUCTION, MAY 28TH.

The breeder of Short-horns or the farmer who contemplates building up a herd of good, useful, dual-purpose Short-horns should plan to be present at the sale of Mr. Henry Kuper, at Humboldt, Neb., on Tuesday, May 28th. To those who are in search of Scotch cattle of the choicest breeding we wish to state that we consider this sale an opportunity to secure the very best. In starting this great herd of cattle, Mr. Kuper got the very best of Scotch cattle for his foundation and by his good judgment and careful mating he has built up one of the good herds of the business. This great offering should claim the attention and presence of every breeder of Short-horns in the country. The cattle selected for this sale are of the very best breeding and many of them are of strong show yard character. The offering that Mr. Kuper will sell in this sale are far superior to any he has ever had and every animal of breeding age will be safe in calf or will have calf at foot. Most of them are in calf to his herd bull, Secret Champion, a bull that is considered by all who have seen him one of the best young bulls now in service in the state. We will have more to say of this female offering in our next issue. Catalogs are now ready and can be had by dropping a postal card to Mr. Kuper. When writing please mention this paper.

many ways is as good as his sire. Any breeder who can use this bull to advantage is assured good results. There are many other bulls of good Scotch breeding that should attract the attention of breeders who are in search of herd headers. The female offering is extra good and among them are about fifteen of straight Scotch breeding. Every animal of breeding age will be sold safe in calf or have calf at foot. Most of them are in calf to his herd bull, Secret Champion, a bull that is considered by all who have seen him one of the best young bulls now in service in the state. We will have more to say of this female offering in our next issue. Catalogs are now ready and can be had by dropping a postal card to Mr. Kuper. When writing please mention this paper.

#### HORNUNG'S BIG POLAND CHINAS.

A herd of Poland Chinas that is sure to make its mark in the Poland China business is that of Mr. Ernest Hornung, of Raymond, Neb. Mr. Hornung has raised a great many hogs in his time, but like many others was a long time in seeing the value of the thoroughbred in preference to the grade. Last winter Mr. Hornung decided that the best was none too good for him, so he went out and bought some of the very best sows that were offered in the many good sales of the season. In two instances topping the sales. On our visit to this herd some time ago we found Mr. Hornung caring for one of the nicest lots of young Poland Chinas that we had seen this year. He has one of the most ideal hog farms we have seen. His many good fields of alfalfa and blue grass are sure to be the making of many good, valuable animals to put out as herd headers. The present crop of pigs are growing and we wish to call special attention to the great show sow, Naomi Pansion, one of the best daughters of the great breeding boar, Expansion. Her dam was Naomi and she has a fine litter of eight pigs by the sweepstakes boar, Grand Look. This sow was the top sow in the sale of Mr. H. C. Dawson, made at Valparaiso on March 9th. Another of the good ones was a fine gilt purchased at the sale of Mr. John O'Connell, on February 8th, she being the top sow in that sale. She is a daughter of Allerton's Chief by Allerton's Girl, by L's What's Wanted. This sow now has a good litter by the great breeding boar, Big Te-

## 40-ACRE FARM \$320 CASH AND BIG PRIZES

Two Fine Pianos

To Be Given Away

CAN YOU

COUNT THE DOTS

On the Man and Around the Border?

**CONDITIONS**—50 cents pays for a year's subscription to **SUCCESSFUL AGRICULTURE** and one count; \$1.00 pays for two years and three counts and makes you eligible for the special \$50.00 prize given to winners of first prize if they have three counts. See below.

**AWARDS** will be made as follows:—The person giving correct or nearest correct count will get first prize. Next nearest second, etc.

**\$50 PRIZE**—We believe everybody should have three counts so they can have one each side of what they think is correct to be more sure to hit it. To encourage this we will give \$50.00 extra to winner of first prize if they have three counts.

**Remember** if you have one count you get the farm only, but if you have three counts and win the farm you get \$50.00 extra.

**TIME PRIZE**—\$25.00 Extra. We feel early counters should be rewarded and we will give \$25.00 to the person winning the farm if count is mailed by July 15th.

**OUR RESPONSIBILITY**—We are a responsible business house of 20 years standing and every prize must be and will be paid as stated. We refer to American National Bank, of St. Paul, Minn.; in fact any Bank, Express Company, business house or individual in St. Paul, or the publisher of this paper.

**JUDGES**—We have wholly disinterested judges to award prizes. Here is what they say:

**TO WHOM IT MAY CONCERN:** We have been asked by the publishers of **SUCCESSFUL AGRICULTURE** to act as judges in their contest and see that prizes are all awarded fairly. This we will gladly do guaranteeing each contestant absolute fair treatment. Signed Frank D. Levering, Asst. U. S. Nat'l Bank Examiner; Henry A. Castle, Ex-Postmaster, St. Paul and Ex-Auditor U. S. Postal Dept., Washington, D. C.; Judge J. R. Blackwell, St. Paul, Minn.

In case of tie we will write each person so tied asking them to make as few words as possible from the letters included in the name of our paper, "SUCCESSFUL AGRICULTURE," using each letter of the name twice and only twice, and no one word more than once, each letter left over counting as one word. To the one tied in the counting who gives us the fewest words as above will be awarded first prize. This practically eliminates all question of tie, but if there should by any possibility be a tie in this the prize will be divided equally between those so tying. Subscription without counts is 25 cents per year, additional counts after you have three entered as per our terms in paragraph "condition" above may be entered at 25 cents each. This contest is not to be confused with the guessing or estimating contests. Our contest is a test of skill in planning and counting and the best man wins. Nobody connected with our paper will be allowed to compete. Contest closes December 31, but get your counts in at once. See about time prize above.

Approved by the Post-Office Department at Washington, D. C., March 14, 1907.

If this chart gets destroyed another printed on heavy paper will be sent upon receipt of 2c stamp for postage.

The receipt of our paper will be our acknowledgement of your payment and count.

**SUCCESSFUL AGRICULTURE PUB. CO.,**  
24 Union Block, St. Paul, Minn.

#### PRIZE WINNERS IN PAST CONTESTS

**ONLY 50 CENTS FOR A FARM.**—I herewith acknowledge the receipt of the deed and abstract for the 40 acres of land which I received from you as a prize in the Farm and Piano Dot contest. I have made a personal examination of the land, and find it to be about four and one-half miles from the town of Clear Lake in the County of Pope, Wisconsin. It is in a good farming or grazing district and the land in that vicinity is selling from \$7.00 to \$15.00 per acre. A great many of my friends have asked me about my good luck and I told them how I came to get it, and gentlemen, I certainly am sincere in offering my thanks for the same. Can say that you do exactly as you advertise. Yours very truly,

GEO. E. DEAN, Minneapolis, Minn.

**40 ACRE FARM FOR \$2.00. (6 COUNTS.)**—I have to-day received yours of Sept. 10th with deed to 40 acres of land in Wisconsin, being one of the prizes awarded in the Mail Order dot contest, and also Abstract of Title showing a perfect title with all taxes and encumbrances paid to date. I thank you very kindly for you have done exactly as you advertised. Have been offered \$200 for the 40 acres. Shall I sell it for that price or is it worth more? Yours very truly,

OLE S. JORDET, Sacred Heart, Minn.

Publisher **SUCCESSFUL AGRICULTURE**,

cumseh, one of the good breeding boars of this part of the state. This is the class of hogs that Mr. Hornung has been buying and you need not be afraid of placing your order with him for a good pig. Write him and mention The Homestead.

### ASPHALT FOR ROOFING.

Asphalt comes from the famous island of Trinidad, off the north coast of South America. Tons of this material are brought to this country every year to be used in the making of pavements and roofing principally. The lasting and protective qualities of asphalt are recognized as being the best of any material known to manufacturers for this purpose. A large part of the asphalt which is imported is used in the manufacture of Huttig's Rubber Roofing. By a secret process the asphalt is impregnated into the body of the roofing material, which consists of long-fibered wool felt. This is heavily saturated with this specially prepared Trinidad asphalt which protects every particle of the fiber. Roofing made by the Huttig Mfg. Co. is guaranteed to stand any test to which it may be subjected. This guarantee is not merely verbal, but it is an iron-clad, legally binding guarantee signed by the company. Huttig's Rubber Roofing, by which this asphalt roofing is known, stands the hot weather without becoming sticky and the coldest kind of weather without cracking or checking. It requires no more skill to lay Huttig's Rubber Roofing than any other kind. When you buy this brand you are not getting a doubtful article. The guarantee means absolute protection. Ask your dealer about Huttig and his brand of roofing. If he cannot supply you with it, write for free sample book and special iron-clad roofing guarantee. See page 3. Address H. W. Huttig, president Huttig Mfg. Co., 707 E. Second St., Muscatine, Iowa.

### CHAPEL HILL BERKSHIRES.

A recent visit to the Chapel Hill herd of Berkshire swine, owned by Mr. W. D. McTavish, of Coggon, Iowa, who, by the way, is president of the Iowa State Swine Breeders' Association, as well as secretary of the national association of expert judges on swine, reveals the fact that Mr. McTavish is now in possession of 125 March and April pigs, among which are some very fine prospects for prize winning material as well as prospects for some choice herd boars. Mr. McTavish has probably had a larger number of pigs some other years, but has certainly never had more quality among his pigs. They are sired by a number of choice boars, but perhaps half of the offering are sired by Lee Duke, a son of Fitz Hugh Lee 47947; his dam Stella Lee 59318. This splendid boar was winner of first in the yearling class at the Minnesota State Fair in 1902, and was also champion at the same show the same year. Other pigs are by Ringmaster, a son of Royal Premier 67448 and out of May Blossom 14th 76333. Others are by Corporal, one of the best yearling boars that we have seen anywhere; his sire was Count Royal 87322, dam Ringlet 7th 92891; there are some exceptional pigs by another grand yearling boar Mr. McTavish has called Conqueror Premier; his sire was Longfellow Premier Pitts 89100; dam Conqueress 10th 92881; Conqueress 10th it will be remembered was one of the famous show pigs that Mr. McTavish exhibited at all the leading state fairs a few years ago that probably won more prizes in the various classes than any other litter of pigs that was ever shown;

he has a few other pigs by another good yearling Black Premier, also by Longfellow Premier Pitts and out of that famous May Blossom sow, May Blossom 46th, 93888. As has been previously stated in The Homestead, Mr. McTavish was sold out on boar pigs of the crop of 1906 very early in the season; he then announced through these columns, bred sows for sale; these were soon taken by our readers at good prices and were eagerly moved before the season was well advanced. A very notable sale of some very choice late gilts was eight to the Colorado Industrial School, of Golden, Colo. The state of Colorado is to be congratulated through their director of this institution for the splendid judgment exhibited in making this purchase. Mr. McTavish has certainly selected for them eight gilts that are a credit to any state institution and which, if purchased from some other Berkshire breeders, would have cost the state of Colorado fully three times as much money as Mr. McTavish is receiving for them. On May 10th our representative inspected this herd prior to the shipment of these eight gilts to the Colorado station. They are being held until all prove safe in pig before shipment. To the numerous readers of The Homestead who wrote Mr. McTavish for boars last winter, after he was all sold out, we would say that it would be a good plan to have their orders booked early, as the same conditions are likely to exist again this fall and winter. The Homestead heartily recommends Mr. McTavish as a safe and reliable man with whom to do business. His announcement appears in our columns at all times.

### "MAPLE LAWN" DUROC JERSEYS.

One of the oldest and best-known herds of Duroc Jerseys in the West is the famous "Maple Lawn" herd, owned by Messrs. C. H. Searle & Sons, at Edgar, Neb. This herd was established in 1883 by Mr. C. H. Searle, the senior member of the present firm. At that time the breed was comparatively unknown, and had it not been for the good judgment and shrewd foresight of Mr. Searle and other pioneer breeders the breed might still be reposing in oblivion. From this noted herd has gone the foundation stock for hundreds of herds all over the corn belt, the number of hogs sold for breeding purposes having reached the grand total of 2,000 head, and the end is not yet. The herd is at present under the active management of Mr. Ralph H. Searle, a graduate of the University of Nebraska School of Agriculture, and a born hog man. On page 22 of this issue will be found their advertisement offering two fall boars and a splendid bunch of March pigs for sale. Those of our readers who are in need of anything in this line should lose no time in communicating with Messrs. Searle & Sons. Their prices will be found surprisingly low. When writing kindly mention The Homestead.

### TEEL'S SHORT-HORN SALE.

The dual-purpose Short-horn never was in more demand than at the present time. The farmer and breeder of today recognizes the fact that the type of cattle which are most profitable on the farm are the dual-purpose sorts. The late Jas. A. Teel, founder of the Teel herd of Short-horns, at Rushville, Ill., was a great admirer of this type of Short-horn, and gave to the breed some of its most useful specimens. Mr. Walter Teel, the present owner of this good herd has selected a number of his best animals for the forthcoming sale which will be held on Friday, May 31. The herd bulls which have been used in this herd have been the very best that money could buy. Imp. British Prince 130-858, was got by the Cruickshank bull, Clan Alpine. He was in every way a satisfactory sire and breeding bull, was one of those low down, thick ribbed bulls and at times weighed more than 2,500 pounds. A number of his get are included in this auction, and will be found uniform in type. Marmion was another of the bulls used in the herd with much success. He was got by Imp. Lavender Lad, out of Imp. Lady Mysie 6th, by Field Marshal. Marmion produced many of the good things in the herd, and bred to Imp. British Prince these females have been uniform producers. In this offering are included the herd bull used by Mr. Walter Teel, and also that used by Mr. H. G. Teel, who consigns ten head. Cherry Grove Banff 3d is a three-year-old bull used by Mr. Walter Teel. He was got by the noted show and breeding bull, Imp. Lord Banff, now at the head of the famous Cherry Grove herd, of Mr. M. E. Jones. His dam was Queen Cup Bearer, by Imp. Cup Bearer, the bull which did much good in the herd of Mr. Jones. Individually Cherry Grove Banff 3d will please the breeder who is in the market for a herd bull. He would be sold at this time were it not for the fact that Mr. Teel cannot longer use him to advantage in the herd as all of the females either are in calf to him, or have calves at foot by him. He has a good head, extra good back and loin and is well filled behind. He has not been crowded, but is in very good breeding condition. Very few bulls of his merit are offered at public auction. Cherry Grove Banff 5th, another son of the herd bull at Cherry Grove, Imp. Lord Banff, and out of Lady Galatea by Imp. Cup Bearer is consigned to this sale by Mr. H. G. Teel, who has used him with success in his herd. British Prince 5th, is a two-year-old bull listed by Mr. Walter Teel. He is by Imp. British Prince and out of Umatilla 24th, tracing to Imp. Michigan Casket. This young bull is in fine shape for service in some good herd. He has been used by Mr. Teel, and would be kept in the herd but for the fact that he is closely related to the females. Golden Banff 2d is a good young bull that will be a year old in June. He is a red in color and was got by Cherry Grove Banff 3d and out of Lady's Baby by Lancaster, one of the best sons of Imp. Gay Monarch, one of the first bulls which attracted the attention of the American people to the well known herd of the late W. S. Marr. Gay Monarch made his owners famous throughout the entire country. Lancaster was bred by the Messrs. Rob-

bins, who sold him to Mr. Frank Cotton, and later bought him back and his entire crop of calves. The combination of blood lines in this young bull, that of Lord Banff and Gay Monarch are such that this young bull should find ready sale to head some good herd. Golden Banff is another young bull not yet a year old that will do for some good herd. He was got by Cherry Grove Banff 3d and is out of Lady Fulton 18th by Marmion. There are a number of these young bulls that will please both the breeder and farmer. They come from cows which have proven their worth in this herd and are sired by extra good bulls, and have the individual merit demanded by discriminating buyers. The females are a very useful lot. They are from noted milking families, and are sired by the noted Cruickshank bulls above mentioned. All females of breeding age have calves at foot or are safe in calf. We will give further particulars in regard to the female consignment in our next issue. Write Mr. Teel for catalog as per the announcement on page 23 of this issue, and plan to be present sale day. Kindly mention The Homestead when writing.

### CARPENTER & ROSS' SHORT-HORN SALE —LAST CALL.

The Short-horn breeder who is in the market for a herd bull will find no better opportunity than in the forthcoming sale of Messrs. Carpenter & Ross, of Mansfield, Ohio, which will be held on Wednesday, May 22. The imported bulls of which there are six, were mentioned in these columns last week, and represent the best money could buy in Scotland. Mr. P. G. Ross, the junior member of this firm, has superintended the importation of more Short-horns than any other man in this country. He has been an ardent student of pedigree and coupled with his good judgment and his wide acquaintance with the best herds of Scotland he has been able to secure bulls which will please both in point of breeding and individual merit. The home-bred bulls comprise a strong lot. Gloster Lad 2d is a yearling bull of the Duchess of Gloster tribe. He was got by Golden Hero, a son of the noted Hero's Knight. His dam is Lady Gloster 5th by the Dustin-bred bull, Victor Lad by Imp. Lavender Lad. Individually, this young bull will bear the most rigid inspection, and the bull buyer in search of herd header material will find a most excellent specimen in this young bull. Merry Robin is a yearling bull, by Imp. Royal Robin, the bull which has been used with so much success in the good herd, of Mr. Fred Ayres. His dam was Imp. Marigold by Diamond Jubilee. He has an excellent head and very good back and loin, and is a deep-bodied, low set bull of strictly show yard type. He will do well in any company. Strathclyde, is a yearling bull ready for service. His sire was Whitehall Count, one of the best sons of the noted champion, Whitehall Sultan. Messrs. Carpenter & Ross used this bull in the herd to good advantage and his calves, many of which are included in this offering are further proof of his breeding qualities. He was sold at public auction for \$1,000, and is now at the head of the good herd owned by Dr. W. H. Earles, of Milwaukee. The dam of this young bull was Rose of Strathclyde shown at several of the fall shows and won several prizes. Count Nicholas is another of the good calves to be found in the offering by Whitehall Count. He was a winner at a number of the state fairs last season and is fit to make trouble in any company this year. He is certainly the kind to breed general purpose cattle from, as he is a first-class individual and the family are all great milkers. Scottish Chief is a son of New Year's Gift, he by the Duthie-bred bull, Silver Mist, and out of Fairy Maid 2d by Missie's Champion. This bull has a very good head and is very nicely covered over back and loin. He will do well in any company. Goldicotte by Whitehall Count is one of the good bulls of the offering. He is out of Imp. Jane, an unbeaten yearling in England, and a thick-fleshed, low down, smoothly made cow. Goldicotte is a bull of even lines, and carries his flesh well distributed. Socrates is another son of Whitehall Count and out of Nonpareil 46th, by Imp. Clan Campbell. This young bull possesses all the quality and finish desired by the careful buyer, and is in keeping with the excellence of his breeding. Red Monarch belongs to the Mina family. His sire was Whitehall Count, and his dam Mina Princess 2d by Imp. Sittytton Stamp. He is a good, thick-fleshed, low down bull that will please those present sale day. The bulls are all in good thrifty condition and will please those who appreciate animals which have not been pampered, but which possess real merit. The bull buyer will be pleased with this offering. We wish to call the attention of our readers to some of the females included in the offering. Mention was made in these columns in our last issue of the females which were recently imported for this sale. Several of these are of show yard merit and have been prize winners in the old country. The home bred sorts cannot help but please. Ruth Rustic is by Rustic Chief by the Cruickshank Clipper bull Clan Alpine, and out of Imp. Ruth 8th by Silver Star. She is a typical Scotch cow and is safe in calf to Ury Count. Evening Baroness 2d is one of the top females of the offering. She is of the Misses Ramsden tribe, and was got by Cherub of Ashburn and out of Imp. Evening Baroness by Craihstone. Individually she is of strictly show yard type, being of the low down, thick-fleshed sort and possesses quality. Lady Dorothy 42d is a daughter of Imp. Best of Archers, the sire of the champion, Ceremonious Archer, and is out of Imp. Lady Dorothy 40th. She is in calf to Avondale, the prize winning son of Whitehall Sultan, for which Messrs. Carpenter & Ross have a standing offer of \$5,000. This is certainly an attractive proposition for the breeder who wishes to add some of this valuable breeding backed up with good individuality to his herd. Gold Dust Oak Leaf is one of the attractive

females of the offering. She is by Baron Goldust by Baron Gloster, and is due to calve before sale day. A strictly show heifer in every respect is Broadhocks Violet 2d by White Hall Count. She was shown with good success last year. Her dam was Imp. Broadhocks Violet by Prince Victor. She is a thick, low down sort and is safe in calf to Avondale. Roan Mina is an attractive heifer by Whitehall Count and is safe in calf to Avondale. Lady Zoe 6th is a cow of sterling worth. She was a member of Mr. W. D. Flatt's show herd at the Pan American Exposition, and is the dam of an excellent bull calf in the sale. She is one of those deep, broad-backed, smooth cows that always please. Primrose is a beautiful dark red heifer by Golden Hero, and is safe in calf to Avondale. Orange Blossom Queen 4th is a good, thick, sappy roan heifer by Bapton Gloster by Imp. Bapton Sovereign. She is safe in calf to Avondale. These females are in good breeding condition and many of them have calves at foot. Those in calf to Avondale will prove valuable additions to any herd. The catalogs are out and will be sent on application to Messrs. Carpenter & Ross, kindly mentioning The Homestead. This sale precedes that of Messrs. Forbes-Prather-Ayres and Hanna, at Chicago, and western breeders who wish to attend this sale can take advantage of the special Pullman sleeper which leaves Chicago on the Pennsylvania railroad, Tuesday evening, May 21st, at eight p. m. This sleeper will be set out at Mansfield, so that all may get a good night's rest. Plan to be present at this sale, one of the most important of the year. The imported animals will be sold to you at your price. They will not have been sent from sale to sale, but are brought to you fresh from the best herds of Scotland. Kindly look up the announcement on page 28 of this issue and mention The Homestead when writing.

### THE PALMER DISPERSION SALE OF SHORT-HORN CATTLE.

Dispersion sales always put cattle on the market, which if their owner was to stay in the breeding business would not be parted with. Such is the case in the dispersion of the Short-horn herd owned by Messrs. J. W. Palmer & Son, of Albion, Ind., which will occur on Friday, May 24. It is made necessary because the junior member of the firm cannot give the required attention to the herd and the senior member not caring to assume the responsibility. The cattle have been selected from the leading herds, and with all the ability their owners possessed, with the paramount object in view to make the animals suitable for the feeder, the breeder and the farm—an animal of the best type—combined with a pedigree beyond criticism. The herd bulls to which we called attention in our last issue are worthy of inspection by the most careful buyers. Especial attention is called to the young bull, Choice Master, a good photograph of which appears on page 8 of this issue. The writer has not seen a better young bull go through the auction ring this season. He was got by Choice Bud, by Choice Goods, and his dam, Lovely Nell, is a daughter of the Duthie-bred bull, Imp. Master of the Clans. This young bull in the hands of some breeder in search of a herd header or show bull will come up to the highest expectations. The females are a choicely bred lot. Primula is a three-year-old cow by Imp. Nonpareil and out of Imp. Primrose. She is a very good specimen and is due to calve before sale day to the service of King of Diamonds, the Scotch bull which Messrs. Palmer & Son have been using with much success in their herd, and included in this sale. Something may be seen of the breeding qualities of this young matron in Fair Sultana, a daughter of Fair Sultan, one of the best sons of Whitehall Sultan, and used successfully by Mr. John Gerlaugh. This heifer will make a show heifer if properly handled. Cinderella 5th is of the Roan Lady family, and was got by Imp. Pure Gold and out of Imp. Cinderella 4th by Remus, the sire of the noted champion, Imp. Choice Goods. This cow is safe in calf to King of Diamonds, and will be a valuable addition to any good herd. Lovely Lass is one of the attractive females of the offering. She is a Cruickshank Lovely and is a daughter of Valkyrie's Stamp, and out of Lovely Lady by Lavender Monarch. This heifer was a member of Messrs. Palmer & Son's show herd last year and will make a good show this fall, as she is strictly a show heifer in every respect. She is safe in calf to Choice Master. White Sultana is a daughter of the champion Whitehall Sultan, and is one of the few heifers by this noted bull to be sold at auction this year. Her dam, Imp. Bessie 51st is a Marr Bessie, and was one of the most highly prized females in the herd of Mr. E. S. Kelley. She is a beautiful heifer and is safe in calf to Choice Master. Lovely Nell by Imp. Master of the Clans and out of Nonpareil Lovely is the dam of the show bull, Choice Master, referred to above. She is also the dam of Lottie, shown by E. E. Souers as a calf and not defeated, and shown by Robbins & Sons as a yearling and two-year-old and not defeated except at the International where she won second in 1905 and third in 1906. Lovely Nell has a red bull calf at foot and is safe in calf to a King of Diamonds. Crimson Fuchsia is a show heifer by Valkyrie's Stamp, and is of great scale and smoothness. She is sold open and will make a valuable cow. Gladys 4th is a three-year-old daughter of Sittytton Hero and has been a very profitable breeding cow as her daughter Brawith Lady and bull calf in sale will show. She has a bull calf at foot by King of Diamonds and is bred again to Choice Master. Brawith Lady is a richly bred Cruickshank heifer by King of Diamonds and out of Gladys 4th, mentioned above. She is a show heifer in every way, and will suit the most discriminating buyer. Fidget 9th is consigned to this sale by Mr.

## ZENOLEUM COMP-AIR SPRAYER

\$4.00  
CASH WITH ORDER

Holds three gallons of solution and about one gallon of compressed air. Charged by a few strokes of the pump, and works automatically for six to fifteen minutes, according to the nozzle opening. Most State Experiment Stations, and many leading breeders in the United States and Canada have adopted it. "The Zenoleum Comp-Air Sprayer" is durable. It is made of the best and strongest materials by trained mechanics. Each machine is tested under high pressure and guaranteed against bursting.

The hose is four-ply, the very best in the market offers. It is heavier than hose used in any other sprayer. The brass coil spring prevents cracking of the hose. The brass connections, stop-cock, nozzle, etc., are turned out of solid brass. All movable parts are machine-turned and make absolutely tight joints.

BRASS SPRAYER identical with the above with heavy brass reservoir and otherwise just the same mechanically \$5.00 each.

THE ZENNER DISINFECTANT CO.,  
Makers of Zenoleum Dip and Lice Killer  
131 Lafayette Ave. DETROIT, MICH.

T. E. Adams. She is a daughter of Highfield Minister by Prime Minister and her dam was by Indian Statesman. Individually this cow is of show yard merit. White Heather by Choice Bud, the sire of the show bull Choice Master, is a Cruickshank Secret and will make a valuable addition to some good herd. She is safe in calf to King of Diamonds. Emma's Gem is by Imp. Nonpareil and out of Imp. Lady Emma by Morning's Pride by Pride of Morning. Golden Pansy by Golden Fame, and out of Pansy Ray by Indian Chief was first at Toronto, in 1900, as a calf and as sold to W. G. Pettit, of Ontario, at a long price. She is now safe in calf to King of Diamonds. Highfield Belle is a daughter of the noted show and breeding bull, Imp. Prime Minister, and was shown as a yearling and two-year-old. She will have a calf at side sale day, by King of Diamonds. We have briefly reviewed some of the females included in the offering. The bull offering is in keeping with the females. The herd bulls used by Messrs. Palmer & Son, mentioned above will meet with the approval of those present sale day. Count Royal, is one of the good yearling bulls of the sale. He was got by Valkyrie's Stamp and is out of White Rose by Imp. Royal Member. He has a well sprung rib, good middle and two good ends, and both in point of breeding and individual merit is strictly of herd header sort. Several sons of King of Diamonds are consigned by Messrs. Palmer & Son that will please. This sale will be held at the breeding farm near Albion, and those in attendance at the Forbes-Prather-Ayres-Hanna sale, in Chicago, on May 23, can easily reach this sale. Look up the advertisement on page 28 of this issue and write for catalogs at once, kindly mentioning The Homestead. Plan to be present at this important dispersion sale.

#### THE FORBES-PRATHER-AYRES-HANNA

##### SHORT-HORN SALE.

Of the noted Short-horn sales of the spring season of 1907, not one is more important than that of Messrs. Forbes, Prather, Ayres and Hanna, which will be held in Chicago, on Thursday, May 23d. The stock listed represents the produce from the herds of the gentlemen mentioned above. The offering is in keeping with the herds represented and that is a sufficient guarantee of its usefulness. The Messrs. Forbes have long been known as owners of what has been termed by many of the leading judges of the country "the best collection of breeding cows in this country or Scotland." They have a herd which has produced many winners shown by themselves, and in the hands of their customers the stock bred by them has done equally well. Mr. I. M. Forbes has imported more cattle to this country in recent years than any other man. He has been one of America's leading breeders and has selected from his herd such stock as will give to breeders some idea of the breeding matrons which his herd is made up, both in point of breeding and individuality. We wish to call particular attention to the two-year-old heifer, New Year's Queen, by Imp. Cock Robin, the principal bull in service in this noted herd. On page 21 of this issue will be found a good likeness of this noted bull. He is one of the few great combined show and breeding bulls. He has won important prizes at the leading shows of Scotland and America, and his get have also proven equally successful. The dam of the heifer just mentioned was Queen of Scots 9th, a daughter of the famous Baron Gloster. The pedigree of this heifer cannot be excelled and she is in keeping with her breeding. Not often are such matrons consigned to public sale, and breeders should not be slow to realize the fact that in this offering are many individuals that breeders are loath to part with, but are willing to put up at auction, to be secured at your own price, in order that profit may result to you in adding this noted blood to your herds. Linwood Clara is another daughter of Imp. Cock Robin and out of Imp. Comlity Clara by Archer's Heir by Brave Archer. The Clara tribe have given to the Short-horn breed some of its best producers. In Linwood Clara the careful buyers will find the kind that will prove profitable to him. She is thick from end to end and is due to calve shortly after the sale to the service of Victor Linwood, the young bull which has been used with good success in this herd. Victor Linwood was a winner at the International and is one of the good young bulls reserved for service in this herd. Scotch Rose 3d by Cock Robin and out of Imp. Scotch Rose is an unusually fine heifer and her dam is the best milkier which Messrs. Forbes have ever imported. She is safe in calf to Victor Linwood. The offering sent forward by Messrs. Forbes will please those present sale day and is worthy of careful inspection. Mr. J. F. Prather lists five head in this sale from his noted Village Park herd. Mr. Prather has always been a staunch supporter of the red, white and roan, and has been interested in many of the importations of recent years. He has one of the best herds in this country, and the cattle listed by him are in keeping with the excellence of his breeding matrons. Orange Queen by Lavender Viceroy and out of Orange Lady is due to calve before sale day to the service of Golden Crown. She is a very thick, short-legged heifer of excellent conformation. Her dam is a granddaughter of Imp. Orange Blossom 31st by Roan Gauntlet, and the three top crosses in her pedigree are of the most approved Scotch breeding and represent the greatest of prize-winning blood. Mr. Prather lists a good young bull in Delmas by Imp. Bapton Sovereign, and belongs to the Secret tribe. He is a good, straight youngster that will develop into a high-class breeding bull, and his breeding cannot be excelled. Mr. Fred Ayres, one of the best breeders of Scotch Short-horns in this country, lists twelve head from his well-known Athenian herd. Mademoiselle 14th is a Marr Missie by Imp. Golden Crest and out of Imp. Mademoiselle 13th. She is a very choice young cow and raised a good bull calf last year. She is due to calve shortly to the service of Missie's Archer, a son of Kelley's Archer and Imp. Missie 145th. Golden Venus 7th is a two-year-old heifer by Missie's Robin and out of Golden Venus 3d by Imp. Royal Robin. The Venus tribe have been good producers in both the Ayres and Forbes herds and this heifer will prove a valuable addition to some good herd. A young bull of exceptional merit of the Venus tribe is found in Athenian Coronet. He was got by Imp. Bapton Coronet, one of the greatest sons of Silver Plate, and is out of Golden Venus 4th by

## LANDS AND HOMES FOR SALE

### BUY A CANADIAN WHEAT FARM

IN THE LAST GREAT HARD WHEAT DISTRICT IN THE WORLD. RICH, VIRGIN PRAIRIE. DEEP BLACK LOAM CLAY SUB-SOIL. We offer for sale

CORN and Alfalfa farms for sale; good improvements. Write for prices, Jas. S. Sheeran, Solomon, Kansas.

Imp. Royal Robin. This calf properly handled will make a good show this coming fall and should develop into something extra good. He will bear careful inspection. Victor Missie's Victoria is a heifer of great substance and quality. She was got by Victor Missie and out of Victoria of Hill Farm 8th by Lavender Lad. This heifer was a winner at the International in 1906 and bred as she is through both sire and dam, should prove a valuable addition to any herd. Athene of Anoka by Viscount of Anoka, one of the most noted prize-winning bulls of this country, belongs to the Cruickshank Violet family and has been a wonderful producer. One of her daughters, Athene of Anoka 2d by Fearless Victor, is included in the offering. Athene of Anoka is safe in calf to Imp. Bapton Coronet. The offering which Mr. Ayres has listed for this sale is in keeping with the high quality of his herd. Mr. Ayres has bought nothing but the best and is listing only such cattle as will prove profitable to those who are in the market for good, well-bred Scotch Short-horns. The largest consignor to this auction is Mr. D. R. Hanna, of Ravenna, Ohio. Imp. Cluny Flora 85th by Royal Pride by Pride of Morning is one of the attractions of the offering. She has proven a valuable breeder, one of her bull calves being retained to show at the head of the young herd next fall. She is safe in calf to Diamond's Victor, one of the best sons of Imp. Bapton Diamond. Imp. Miranda by Prince Victor has a white bull calf at foot calving October 20th, sired by the champion Missie bull, Missie's Diamond. She was bred by Her Majesty Queen of England, and is one of the best things in the consignment. Silver Necklace by Imp. Silver Mist has a roan bull calf at foot that bids fair to make a valuable show calf. He was sired by Missie's Diamond. Two of her calves are included in this sale. Silverline is another daughter of Imp. Silver Mist, and her dam, Imp. Scotia 2d, was got by Crabstone. Silverline has a roan heifer calf at foot that will show for herself, by Diamond's Mariner. The breeding and individual merit of this entire consignment make it one of the most valuable of the season. Many show animals are included and the breeder in search of extra good Scotch cattle will find this auction one of the most important of the year. The cattle offered for sale represent the produce of four as good herds as the breed affords. They are not a lot of cattle bought up for speculative purposes, but in many cases are animals which could be used in the herds represented in this sale. Parties who wish to attend the Carpenter & Ross sale at Mansfield, Ohio, on Wednesday, May 22d, can easily make both sales at one expense. The details of the management are in the hands of Mr. W. C. McGavock, of Springfield, Ill., who will be pleased to send catalogs to all who write mentioning The Homestead. Look up the advertisement on page 28 of this issue.

#### Farms That Grow

"No. 1 HARD" WHEAT

(Sixty-three Pounds to the Bushel)

are situated in the Canadian West, where Home-steads of 160 acres can be obtained FREE by every settler willing and able to comply with the Home-stead Regulations. During the present year a large portion of

#### New Wheat-Growing Territory

has been made accessible to markets by the railway construction that has been pushed forward so vigorously by the three great Railway Companies. Grain-growing, mixed farming and dairying are the great specialties. **SAMUEL G. IVERSON**  
State Auditor St. Paul, Minn.

#### A Fine Kansas Farm For Sale

A FARM of 280 acres, nine miles North-east of Yates Center, (the County seat of Woodson County) and within one mile of Vernon, on the Missouri Pacific railway, running from Kansas City to Wichita, 119 miles from Kansas City. The farm is an excellent one, good rich soil, well improved, all under fence, divided into fields, with 25 acres of hog tight fence, and pasture fenced separately, and in Oil and Gas Belt.

The improvements consist of a five room dwelling house, with cellar and summer kitchen, well and cistern. A good barn, with stabling for a dozen horses, and hay-loft above; a cattle barn, pig pens, granaries, corn cribs, etc., with other outbuildings. A good orchard, with abundance of fruit, apples, peaches, plums and small fruit.

A never failing stream of water runs through the west part of the farm near the buildings, furnishing plenty of water for the stock, and with ten acres of timber along the creek. It is an ideal farm home in sunny Kansas.

If Sold Soon I Will Take \$40.00 Per Acre.

If you want a home free from the rigidity of Northern winters, and in the unmatched climate of southern Kansas, write me, or come to Vernon, and I will meet you and take you to the farm. No truces considered.

J. E. Seaton - - Vernon, Kan.

#### LAND VALUES IN THE GARDEN SPOT OF TEXAS

Will increase faster and go higher than anywhere else, because the soil is richer and deeper; will produce larger and more varieties of crops; is clear, ready for plow; crop failure impossible, because some crop can be planted any month in year; climate healthy; not cold in winter nor hot in summer; ample rainfall; competing railroads within two miles; close to best markets in world; good neighbors. Save agent's commission by buying direct from us. Do it now. Prices \$10 to \$20 per acre in any sized tract to suit. Next fall will be \$5 an acre more. Write or call for booklet, "Truth About Texas," and state map free. Cheap R. R. rates. Free fare to buyers.

PICKERT-HAMMOND LAND CO., Opposite Grand Central Station, Houston, Texas. N. W. Branch, 1039 and 1040, Lumber Exchange, Minneapolis, Minn.

## FIELD NOTES.

Short-horn bulls and Duroc Jersey sows and hogs are offered for sale by Jas. T. Dollison, Sac City, Iowa.

Messrs. Geo. W. Seckman & Son, of Mt. Sterling, Ill., will hold a public sale of Duroc Jerseys, on October 23.

H. S. Allen, Russell, Iowa, has a few Duroc Jersey hogs for sale. Read his advertisement on page 26 and write him.

Mr. Geo. R. Manifold, of Shanuan City, Iowa, claims October 29 and February 15, as dates for public sales of Duroc Jerseys.

A public sale of Duroc Jerseys is announced to take place on January 16, 1908, by Mr. S. G. Collicott, of Lake City, Iowa.

A three-days' sale of registered Hereford cattle is announced to take place at Kanass City, Mo., on February 25, 26 and 27, by Mr. C. A. Stannard, and others, of Emporia, Kan.

For descriptions and fuller particulars regarding the quarter section of farm land in Clay Co., Ill., write to Mr. J. J. Smith, Clay City, Ill., mentioning this paper. This farm is priced on page 19.

Mr. Geo. W. Custer, of Merville, Iowa, breeder of Duroc Jersey swine, who makes the claim of having the three largest hogs of that breed in Iowa, claims March 3, 1908, as date for a public sale.

H. L. Woltersdorf, Hartley, Iowa, is another one of the newer breeders of Duroc Jerseys who is founding a herd. He has been a purchaser of sows at several of the good sales last winter and has about forty spring pigs on hand, and a couple of sows yet to hear from. These are sired by Reisser's Top Notcher, G. P.'s Model, David Crimmon Wonder and Perfect Crimmon Wonder. One of his sows is Duroc Lass, a daughter of Reisser's Model, and out of a granddaughter of Iowa King M. He is using a grandson of

old Orion at the head of the herd. He will make a spring sale at which time we will have more to say about his herd.

One hundred young Duroc Jersey pigs to date is the report from Mr. S. G. Collicott, Lake City, Iowa. One fine litter is by Iowa Model, another by Corrector II, also one by S. G. Crimmon Improver, a boar of ten inch bone. This is good news from this well bred herd.

Messrs. Geo. W. Seckman & Son., Mt. Sterling, Ill., write us that their herd of Duroc sows has averaged eight pigs apiece and their pens are now filled with some 200 lively youngsters. Prospects are bright for the October sale. This is success that is well deserved.

A splendid young twenty-two-months-old Erica bull, a son of Imp. Edward R., is offered for sale by W. H. Jones, Quimby, Iowa. He also offers a nice young Blackbird for sale and several younger Angus hulis. These are bargains and they are bred right. Write Mr. Jones at once about these bulls.

Mr. Nick Loewen, Lawler, Iowa, advertises pure bred Single Comb Black Minorca eggs, also some mature fowls of last year's raising on page 11. Anyone wishing eggs or fowls of this breed should look up prices which are quoted in the advertisement. Kindly mention The Homestead when you order.

Mr. James Sheeran, of Solomon, Kan., dealer in real estate, advertises a number of first class corn and alfalfa farms for sale on page 19. These farms are represented as being well improved and anyone interested in Kansas real estate should write at once for prices, mentioning The Homestead.

Reisser Bros., Sanborn, Iowa, offer for sale their six-year-old Short-horn herd bull Red Duke 185361. He was bred by Elcoat Bros., Brucefield, Ont., and was sired by Vice Royal 140883 and was out of Susy 2d by Lynden Chief. He will weigh 2,150 pounds. They do not need him and price him at \$125 for quick sale.

Messrs. Sheldon Bros., Shannon City, Iowa, report a good string of pigs on hand and with a wide variety of blood lines represented. They have some choice litters sired by Top Notcher Chief, Savannah Belle's Chief, Brilliant Advance and Hambletonian, as well as others by sons of Old Advance, Teddy R., and Perfection Chief.

Record number 94640; fine pacer with bone spavin; pronounced utterly worthless and owner was advised to have him shot; used Fleming's Spavin and Ringbone Paste, and afterward sold the same horse for \$800. Write Fleming Bros., 210 Union Stock Yards, Chicago, for free copy of Fleming's Vest-Pocket Veterinary Adviser.

Five miles from Racine, Wis., is located a well improved farm of 150 acres that is being priced in our columns on page 19. The sale is made to close an estate, and as the farm is situated in the richest and best farming land in the state it is an offer that should have the immediate attention of prospective buyers as it should go quick. Address, Henry Warner, White Bear Lake, Minn., mentioning this paper.

A promising outlook for some first class breeding Durocs is offered in the herd of Mr. Geo. R. Manifold, Shannon City, Iowa. A number of fine litters are the pride of this breeder and they carry valuable blood. A fine family of nine pigs is sired by Iowa Chief out of an Orion sow; one of ten is sired by Ohio Chief out of a granddaughter of Nebraska Belle. Some of the best ones will be at the Iowa State Fair.

Carl Hanseu, Herman, Neb., is one of the hustling young Duroc Jersey breeders who has made good in the West. A few years ago he bred young Grant, the second prize boar at the Nebraska State Fair, and a considerable portion of his present herd is bred along the same line. Mr. Hansen has a ulce crop of 120 spring pigs, sired by his well known boar, Bar None, and Grant Challenger. He also has litters by Crimmon Critic, the second prize boar at the Nebraska State Fair, and Russell's Choice. Mr. Hansen is an excellent feeder and care taker and he always has some good pigs when the fall season comes around. Just now he is offering four fall boars for sale. These are sired by

The subject of the above illustration is the Scotch Short-horn bull, Golf-man 2d 247994, owned by Mr. R. H. Hadley, of New Providence, Iowa. This splendid Scotch bull was bred by Mr. A. L. Stutzman, of New Sharon, Iowa. His sire was Golf-man, the best Scotch bull ever owned by Mr. Stutzman. Golf-man 2d was sired by a great bull and his dam, Melba 2d, was unquestionably one of the great Scotch cows of the state. Her sire was Imp. Fearless Archer. This splendid bull is included in Mr. Hadley's public sale, May 22d. He was calved July 1, 1904, and as his picture shows is a dark red roan. His head is chock full of breed character, being strikingly masculine. At this same sale Mr. Hadley will sell forty-seven head of very useful, practical cattle, good milkers and good breeders. There will be sixteen hulis and thirty-one cows and heifers, mostly of breeding ages and a large per cent will have calves at foot or soon due to calve. Note announcement on page 28.

5 GALLONS

Grant Hero, a son of Duroc Paragon. He is making a special offer on these and the first man that sends him a twenty dollar bill gets a boar. Write him at once if you want one.

Mr. J. C. Thiele, Hartley, Iowa, is establishing one of the very excellent herds of Chester Whites in northwest Iowa, and he has about fifty nice spring pigs for the season's trade. He has a splendid lot of brood sows, and has been very careful in his selection of these. He has been a leading winner at the local fairs in his neighborhood, and he expects to have, in the near future, one of the best herds in the state.

Mr. W. R. Webb, Spencer, Iowa, breeds the O. I. C. hogs and has sixty spring pigs and several sows to farrow yet. Many of these are sired by his old herd boar Snowball, but he has five new sows this year in the herd, and they have pigs by other boars. He will, therefore, be able to furnish his old as well as his new customers with O. I. C.s this fall. Last year he sold seventy-five head and his customers were well satisfied.

Letters patent of the United States was issued last week to Mads H. Madsen, of Kimballton, Iowa, for a hay-handling mechanism for use in barns, by means of which loads of hay can be dumped from the slings or harpoon fork to either side of the track in the barn. This apparatus saves hand-forking the hay to the side. The patent was secured through Silas C. Sweet, patent attorney whose advertisement appears on page 8.

Mr. D. M. Norton, Sanborn, Iowa, the well known Shropshire sheep man has 175 head now on the farm, beside this year's lamb crop. He will have about forty-five head of rams for sale this fall as well as a choice lot of ewes. Most of his foundation stock was purchased from the best breeders in Canada. Each year his advertisement is to be seen in The Homestead, and he will have something to say through these columns later in the season.

A fine crop hearing farm is offered for sale near the Burlington railroad in south central Nebraska. The improvements on the land are represented as being good. The land is well adapted to farming and is free from stones and broken fields. Most of the farm is under cultivation and anyone looking for a farm of this kind should write to Mr. W. F. Dale, York, Neb., for particulars. Kindly mention this paper and refer to page 19 for the advertisement.

Mr. J. M. Janssen, Sibley, Iowa, breeder of Chester Whites, reports about forty early spring pigs on hand and a few sows to farrow in the near future. He had a good trade last season, and his customers were well pleased with what he sent out. He will be on the firing line again this fall with some good boars and a choice lot of gilts, and his advertisement will be found in The Homestead. Keep him in mind when you want anything in the white hog line.

Messrs. A. J. & L. L. De Young, Sheldon, Iowa, have about 180 Duroc Jersey pigs this year. The Messrs. De Young have been breeding Durocs in northwest Iowa for these many years and have had one of the good and practical herds. At the head of this herd is Perfection Wonder, a son of old Crimmon Wonder, and he is one of the few sons left of that noted old sire. Perfection Wonder has done good service in the De Young herd and he has proven himself to be a good breeder. He is assisted by Orion Advance, and many

## SHEEP.

## CLOVER HILL SHROPSHIRE

IN favor everywhere because of their good size, strong constitution and true type. We now offer a strong, growthy lot of rams and ewes, coming yearlings, sired by 275 to 305-lb. champions of England and America. Will import this summer, as usual, from England and Scotland and will execute orders for show or breeding sheep on a very low commission. If wanting home bred or imported, few or many, our offers merit your consideration.

CHANDLER BROS., Chariton, Iowa

## More Money For Wool.

SELL your wool where prices are highest. Ship direct and save middle profits. Small lots same price as large lots. Prices and full information free.

MYERS-BOYD COMMISSION CO., ST. LOUIS, MO.

## Allen's Shropshire Rams and Short-horn Bulls

I HAVE a bunch of very fine rams for sale, suitable to head the choicest herds; also 15 young Scotch bulls from 10 to 15 months old.

GEORGE ALLEN, Lexington, Neb.

## GOATS.

## 2,000 HIGH GRADE ANGORA WETHERS.

One and Two Years Old. THESE goats can be used for brushing and then fed and sold for mutton. Come and see me or write. Address, WYATT CARR, Collins, Iowa. Farm 3-4 mi. from depot. Phone 44

of the present crop are sired by the latter boar. They also have pigs by Achiever Boy, and Fashion Plate. The latter boar was formerly owned by I. C. Welch, of Cherokee, Iowa, and he sold him at a long price. The Messrs. De Young will have a nice crop of pigs to select from this fall, and a son of Perfection Wonder would look good at the head of any herd. They are now booking orders for fall delivery.

Rood Bros., Lake Park, Iowa, report that they have about fifty Duroc Jersey spring pigs on hand, and some sows are to come in yet. These are sired by Red Ribbon, Fortunate Maker and Belle's Model, their own herd boars. They say they enjoyed a good trade last year and were sold out early in the season. They expect to have some good things for their fall trade, and will be pleased to hear from all their old customers as well as the many new ones. They say they have had good results from The Homestead and will be with us again this year.

We wish to say to those who are in need of a good fall Duroc Jersey boar that Mr. W. A. Kirkpatrick, of Lincoln, Neb., has some extra good ones. They are very growthy, big boned fellows and are bred from matured stock. They are sired by such boars as Fancy Crimmon Wonder, one of the best sons of the great Crimmon Wonder. Others are by Crimmon Wonder's brother, a full brother to Crimmon Wonder. If you are in the market for a good pig write Mr. Kirkpatrick for description and prices. When writing mention The Homestead.

Mr. B. A. Shafer, Sanborn, Iowa, is one of the oldest breeders of Duroc Jerseys in northwest Iowa, and has been with The Homestead for these many years. This year he has a crop of fifty spring pigs, not quite as large as usual, but still enough to supply many of his old customers. These are sired by Orion's Advance, a son of Orion out of an Advancer sow; C. P.'s Model, the boar at the head of the Gus. Pederson herd; Sunny Jim, a grandson of the first prize Iowa State Fair boar, Perfection Chief; and he also has a few litters by Achiever Boy, a son of Achiever. Mr. Shafer has three granddaughters of old Crimmon Wonder in the herd, these being sired by Perfection Wonder. One of his best litters is out of one of these and is sired by Orion Advance. He has seven sows to farrow yet to Waneta King. The latter boar was sired by Duroc King Jr. 3d and out of Miss Orion by Orion. He was used in the Shafer herd until recently, having been killed by another boar. Mr. Shafer has been breeding Durocs for eleven years, having purchased his earlier stock from the pioneer breeders of the state. He will have some-

thing to offer his customers as usual when the fall season comes around.

Mr. J. H. Kuehl, Sanborn, Iowa, has one of the good herds of Poland Chinas in north-west Iowa, and has about eighty spring pigs on hand. He is using a boar called Waneta Duke, a son of Will Crow's well-known boar, Up-to-Date. Two of his best big sows are Waneta Delight and Waneta Lilly. These are sired by Waneta Lad and are out of a daughter of old King of the West, second dam by Empire Chief. He has two daughters of the sweepstakes boar Matchless Chief, Jr., and one by Correct I Know. He is a good feeder and he always has some good things when the fall season comes around.

Geo. A. Nordyke, Allen, Neb., is one of the younger breeders of Duroc Jerseys in northeastern Nebraska that has been doing things. His first sale averaged him \$58.25, and this was simply because he had a good offering and one that the breeders and farmers appreciated. This was encouraging enough to induce him to lay in more good sows, and everything that he bought last winter was the very best. At the Edmonds, Shade & Co. sale he purchased the Iowa State Fair sweepstakes sow, Royal Blossom 5th, considered one of the greatest sows shown at any of the fairs last year, and she was bred to Masterpiece, the first prize American Royal boar. She farrowed a good litter, but lost all but two during the cold weather. She has two very choice gilts left, and they are something that should be sought after by the best breeders. He has about 50 pigs and they are sired by Junior Jim, Dan Orion, (his present herd boar and a son of the great Orion), Col. Royal, a son of American Royal, and Masterpiece, the American Royal first prize winner. Mr. Nordyke topped several of the best sales last winter, and every sow that he purchased was a good one. With the foundation that he now has, he should come to the front as one of the best breeders in northeast Nebraska. He will have something to offer Homestead readers later in the season at which time we will have more to say of his herd.

A representative of The Homestead recently had the pleasure of visiting the herd of Mr. Gus. A. Pederson, Ocheyedan, Iowa, and found 150 head of Duroc Jersey pigs. Mr. Pederson is particularly fortunate this year in having at the head of his herd, G. P.'s Model, a yearling son of Duroc Paragon. He purchased the pig of O. E. West, last season and he is one of the best boars today in northwest Iowa. This young boar carries the blood of some of the most famous boars. His sire, Duroc Paragon, was a son of the sweepstakes boar King Perfection, he by Banker Boy II, by old Banker Boy. His dam is Lady West III, by West's Hero, by Crim-son Prince. He traces several times to old Crim-son Prince as well as to several other noted boars, who were familiar in the earlier days of the Duroc Jersey breed. This boar is just turned a year old, has lots of size, a splendid body, and is as smooth as an apple, there not being a crease in him. He made a good impression with breeders at Mr. Pederson's last sale, and he has continued to improve since that time. A detailed description of his many good points is superfluous at this time, but breeders can depend on his being an extra good young boar. He has about seventy-five pigs by him, and they are looking well. The rest of his pigs are sired by Osceola Chief and a few litters are out of sows purchased last winter and sired by other boars. One of these is a King of the West sow, bred by L. H. Roberts & Son, and she has a litter by King of Iowa. He has another litter by Henry Advance, and one litter by Dakota Challenger. Mr. Pederson has had splendid luck so far this year. He has one sow to farrow yet, and then all he will do is to look after his hogs. He is a good caretaker, and he will have something choice for his fall trade.

Frank Iams writes: "Mr. Stallion Buyer:—There is nothing that 'succeeds like success,' Iams of St. Paul, Neb., the largest individual owner of Percherons, Belgians and coach stallions in United States, is the 'architect' of his prosperous stallion business. For twenty-five years he has 'knocked against the rocks of business' and knows the 'tricks' of the horse business. By his keen judgment, his 'square dealing,' his characteristic advertising, his independent stand against the 'giant stallion trust,' by having the best stallions that money will buy in Europe, he is 'boosting' his business and saving thousands of dollars to 'stallion buyers,' by 'selling Peaches and Cream' stallions at \$1,000 and \$1,500, (few little higher), guaranteed better than any stallion sold to 'Farmers' Stock Co.s,' at from \$3,000 to \$8,000. If you don't find this true at Iams' barns, and every statement in advertisement or catalog true, you get the \$500 Iams hangs up. Iams has opened up a new barn of twenty state prize winners—the 'best ever'—Iams kind—big ton 'black boys' that are 'eye-openers,' worth going 2,000 miles to see. They are the best bunch of 'big boned' 'top notchers' imported in twenty-five years. All of Iams' famous prize winners in United States and Europe are in his barns and must be sold. He has 'lifted the lid' again and is knocking 'high prices' on stallions off the 'Xmas tree.' It is 'bargain day' at 'Iams' Stallion barns,' all your folks 'will take off their hats and say: 'Iams has the goods' as advertised. Iams wants your business. That's why he advertises. 'He will put your hair in a curl' with 'swell' ton stallions and save you \$1,000 or \$1,500 and a better stallion, then you can wear the diamonds, not the 'pedler' or 'auction blockman.' You say: 'Why can Iams sell better stallions at half the price of others?' Iams buys and sells every stallion himself at his home barns. He buys stallions by 'special train load,' eighty to 150 at a time. He speaks the languages, saving you 20 per cent. He is not in the 'stallion trust,' saving you \$300. He pays no 'slick salesman' \$1,000 to sell you a fourth rate stallion. He has no two to ten men as partners to share profits. He pays spot cash for his stallions, owns his farms, houses, barns, stocks and stallions. He sells stallions by 'hot advertising,' \$1,000 or \$1,500 insurance placed by Iams on stallions. Iams has on his 'selling clothes,' and they fit all buyers. No man that will 'talk business' and will pay cash or give bankable note gets away from Iams. Write for Iams' 1907 horse catalog, with 100 illustrations, an eye-opener that will save you thousands of dollars. Iams will receive from Europe, 200 Percherons, Belgians and coach stallions and mares by special express train,

Sept. 1, 1907. Watch Iams' smoke—He sells horses." See advertisement on page 27.

A representative of The Homestead recently dropped in on Carey Cameron, Hermon, Neb., known throughout the West as one of the successful Duroc Jersey and Short-horn breeders, and found him with a nice crop of spring pigs and a most excellent lot of calves. He has 148 pigs from eighteen sows, an average of eight to the litter. These are sired by Russell's Choice, a son of old Crim-son Wonder; West's Duroc, a son of Noble King; Diamond Jim, a grandson of the old sweepstakes boar, Gold Dust Jim, and he also has a litter by Grant's Challenger, one of the boars used at the head of Mr. Carl Hansen's herd. Mr. Cameron has some splendid litters at the present time, and while it is too early to say anything authoritatively on pigs, it is safe to say that should nothing go wrong, he will have some good ones for the boys later in the season. In Short-horns he has some nice young bulls and some very choice heifers that are coming on well. These are all sired by his well known herd bull, Imp. Victoria's Count. He is not offering these for sale, as he expects to grow them out and put them into a sale later on. One of these heifers is particularly attractive, being good enough to go into any herd. In fact, several of these are very desirable young things that any breeder could feel proud of. His last sale averaged \$145, and this in itself shows that he breeds a class of Short-horns that the people appreciate. Later on we will have more to say about these two herds.

"We have just had the pleasure," writes Mr. J. G. Truman, manager of Trumans' Pioneer Stud Farm, Bushnell, Ill., "of receiving a visit from our old customers, Messrs. William Stewart, Elmer and Charles Sunkel, of Paris, Ill., the owners of the celebrated Shire stallion Milestone Harold. The outcome was we sold them three of the fillies we recently imported. It is a great pleasure to see enterprising young farmers and breeders as these buying the very best live stock they can purchase and if all goes well there will be in the vicinity of Redmon some of the very best Shire colts in the United States. To those enterprising breeders, of Keokuk county, Messrs. N. H. and W. M. Horras, of Ollie, Iowa, we sold the black-brown imported Shire stallion Blackburn (24008.) He has the best of feet and joints, extremely heavy bone, standing well on to seventeen hands and weighing around the 1,900 mark and should prove an extraordinary breeder. He is among the best two-year-olds we have imported this season. The noted prize winning imported Hackney stallion "Bradney Ambition," has been sold to the Conneautville Hackney Horse Company, of Conneautville, Pa. He will be remembered as the sensational chestnut horse we showed at the different state fairs and horse shows and succeeded in winning his share of the blue ribbons and cups. We imported his sire, Copalder Bonny Gabriel, which was sold to Mr. J. Hobart Moore of Chicago. We still have quite a good many first class Shire and Hackney stallions for sale and about thirty imported mares and shall be pleased to hear from any readers wishing to purchase."

In looking over the many good herds of Duroc Jerseys in southern Nebraska, The Homestead field man had the pleasure of calling on Mr. M. W. Putman, of Tecumseh, Neb., and found there a very good bunch of spring pigs. They were moving along nicely for this time of the year and among them it was easy to see that many of them were extra good prospects. The majority of the this year's crop were the get of his herd boar, Crim-son Jim, a hog that has proven a wonderful breeder in this herd, as his get have already demonstrated in the sales and shows that Mr. Putman has made. Crim-son Jim is a son of Crim-son Jack and he by the great show and breeding boar Crim-son Wonder. His dam was Heavy Bone 3d, by Morton Boy. This boar's breeding is already too well known to need any further explanation, and as an individual Crim-son Jim is sure to

## Opportunities Along a New Line

Today the great opportunities in farming, in cattle raising, in timber and in commercial lines are in the country and in the towns along the Pacific Coast extension of the

## CHICAGO MILWAUKEE & ST. PAUL RAILWAY

It has been a long time since a transcontinental railroad has been built. It will probably be a longer time after the completion of this one before another one is built. It is worth your while to investigate these openings. This you can best do by a personal visit. Such a trip is made inexpensive by the low rates via this railway to

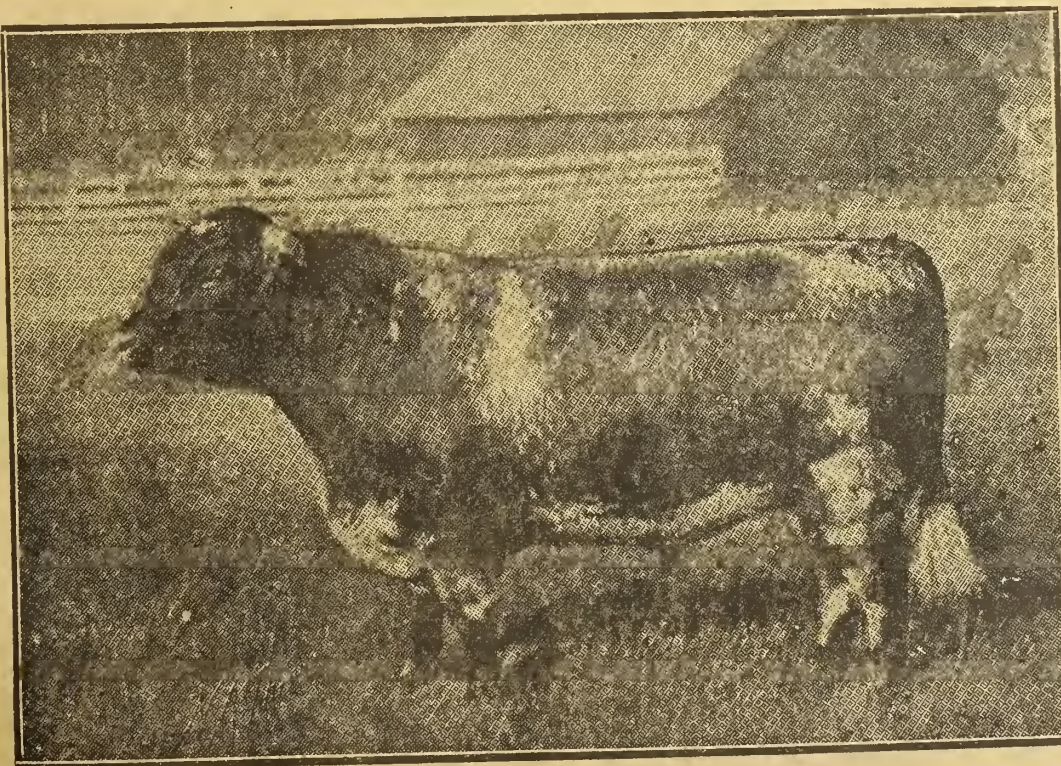

South Dakota North Dakota Montana  
Idaho Washington

If you are interested, write for information, asking specific questions. A letter and descriptive book and map will be sent by return mail.

**S. H. VAUGHAN**  
Division Passenger Agent  
DES MOINES, IA.

be classed among the good boars of the business. He was assisted in service in this herd by the great yearling boar Lincoln Top, one of the good prospects for a competent herd leader now in any Nebraska herd. He is a hog of great scale for one of his age, carrying a good even width from end to end, with a good arched back that is so pleasing to the eye of the good breeder. He has a good head and ear and as for good bone and feet

we consider that there are few boars in the business that will equal this youngster. Mr. Putman is offering some extra good gilts by Crim-son Jim, bred to this young hog Lincoln Top at very reasonable prices and if you can use a good sow due to farrow a fall litter you might do well by writing Mr. Putman for one of these as a litter of Lincoln Top pigs are liable to be a very profitable thing to have a little later on. Write

Imp. Cock Robin, one of the most noted show and breeding bulls of America, owned by Messrs. I. M. Forbes & Son, of Henry, Ill. Several of the females consigned to the Forbes-Prather-Ayres-Hanna Short-horn sale to be held at Chicago, on Thursday, May 23, are either sired by or bred to this noted bull. See field notes.

Mr. Putman for description and prices and mention The Homestead.

#### FARM BARGAIN IN COMANCHE COUNTY, KAN.

It will pay you if interested in Kansas farm lands to turn to page 19 of this issue and read the bargains that Ely, the land man, is offering. Wheat, corn and alfalfa are raised in Kansas in abundance. Buy now, while good land is still cheap. When writing please mention this paper.

#### S. H. THOMPSON'S SONS' SHORT-HORNS.

On another page will be found the announcement of some fifteen choicely bred Cruickshank Short-horn bulls for sale by S. H. Thompson's Sons, of Iowa City, Iowa. Among these bulls are several that this firm regard as herd headers. The entire offering is red in color and is from red sires and dams. These bulls are priced reasonably to make room for the spring crop that are now coming on.

#### GOOD FARMS WANTED.

On page 19 will be found an advertisement for information regarding good farms that can be bought direct from their owner. No agents need apply, as it is the desire of this advertiser to close his own deal, thereby saving the big commissions on the transaction. Anyone who has or knows of a good farm that is for sale would do well to write to Information Dept., Locator Pub. Co., Minneapolis, Minn., mentioning this paper.

#### SCOTCH SHORT-HORN BULLS FOR SALE.

Messrs. Cookson Bros., of West Branch, Iowa, are offering for sale some of the best young Scotch Short-horn bulls that they have had on hand for a long time. They are all sired by Young Commodore, considered the best individual Short-horn bull in Iowa. These bulls are of very desirable Scotch families and must be seen to be appreciated. They are all of the herd heading sort. They are all reds and range in ages from eleven to twenty months old.

#### WINDMILL INFORMATION VALUABLE.

For a number of years the Double Power Mill Company, of Appleton, Wis., has been offering a reward of \$1,000 for the equal of their two-wheeled power windmill. This same company, so satisfied of the superior merits of its recently invented single open wheel mill, offers a like reward for something better. The wheel has a new device by which it needs oiling only once in six months—a very desirable feature. We would suggest that you write them for full particulars, for which you should ask for Booklet 104. Address, Double Power Mill Co., Appleton, Wis. See page 10.

#### RED POLLED CATTLE.

On page 25 will be found the announcement of Mr. G. W. Sharp, of Marble Rock, Iowa. Mr. Sharp has been breeding Red Polled cattle for several years, but made his initial how last season to our readers as an advertiser. This journal was the means of his disposal of his entire crop of bulls. He breeds Red Polls on dairy lines, rather than for beef. Wherever sold his bulls have given the best of satisfaction. He now has but one bull to sell and few or no cows or heifers. He has a nice crop of Poland China pigs now on hand. Mention this paper when writing.

#### WHO DISCOVERED BLACKLEG VACCINE?

Biological products such as blackleg vaccines and other kinds which are furnished users by the Pasteur Vaccine Co., Ltd., are generally known as "Pasteur products." While the discovery of Anthrax Vaccine was made by the noted French scientist, Pasteur, the discovery of blackleg vaccine, a different product was made by Professors Arloing, Cornevin and Thomas, others noted for their work in this line of research. Blackleg Vaccine may be secured at most druggists or may be obtained by writing to the Pasteur Vaccine Co., Ltd., 441-5 Wabash Ave., Chicago, sending name of local druggist.

#### NEW IDEA IN LAWN MOWERS.

On page 14 of this issue we show an illustration of the Clipper Lawn Mower. This mower is a new design for lawn use, and, as will be seen, cuts the grass like an ordinary mower instead of like the old-fashioned revolving knife kind. The superiority of this kind of a mower is that it cuts any height of grass and does not cut any of it twice. At the same time it runs with light draft. Ask your dealer for Clipper Lawn Mower, and if he does not have it on hand send direct to the manufacturers. Prices quoted on page 14. Write to the Clipper Lawn Mower Co., Dixon, Ill., and mention this paper when you order.

#### AUTOMATIC WATER SUPPLY SYSTEM.

Elsewhere will be found an illustration of the Myers' Automatic Water Supply system showing in general the principle involved. The supply system should be of special interest to farmer and stockmen, as the idea is to raise and elevate the water to the supply tank at the least possible amount of expense and energy. This company desires a representative in every county. Any farmer who has a little side time could nicely handle this work and if he will write them he will receive full information. Address Myers Pump & Mfg. Co., Kansas City, Mo. Kindly mention this paper when writing and refer to their advertisement on page 8.

#### NOTED TRUNK FACTORY NOW SELLS DIRECT TO CONSUMER.

After twenty years of successfully making and selling trunks, suit cases and hand bags, of all patterns, the Des Moines Trunk Factory has decided to make a change in the method of supplying the consumer. Just recently this firm adopted the plan of selling from their factory direct to people who use these articles. The old way of getting goods on the market was too round-a-bout. Too many profits were added to the factory price of the trunk or suit case on its way to the final purchaser. By selling from the factory in Des Moines all this expense and middlemen's profit is eliminated. Where a trunk sold for fifteen dollars under the old method of retailing, it can now be sold for from one-half to two-thirds as much. Think of the money saved to the trunk user! And remember the quality of the goods remains the same. The Des Moines Trunk Factory make as high a grade of this kind of goods as can be found in the West. The writer has inspected the stock and knows this to be a fact. A trunk finished in brass and leather some of the patterns described in the cat-

alog is a most convenient and ornamental addition to the dressing room. A catalog for general distribution has been issued by the factory and it fully describes every article made by the company. Any article in the trunk or case line may be ordered direct from this catalog. Send for it today. Address, the Des Moines Trunk Factory, Des Moines, Iowa. Kindly mention this paper. See page 13.

#### A RELIABLE DRIVING CART.

There is only one way to break the colt that is to be used on the road. That is with the Champion driving cart. With a horse hitched in this cart the driver is perfectly safe. It is pleasant and agreeable to ride in, easy on the horse as well as the man. The seat is adjustable so that the cart can be balanced, thus doing away with any annoyance that might irritate the horse. Every person who breaks horses and colts should interest himself in this cart, which is manufactured by the Champion Cart Co., 107 Cahin St., Ligonier, Ind. They will consider it a favor if you mention this paper in your inquiry. See page 6.

#### N. P. HALGREN SELLS SHORT-HORNS.

On June 19th, at his farm, near Vinton, Ia., Mr. N. P. Halgren will sell at auction fifty head of Short-horn cattle. All are young and desirable. There will be thirteen bulls and the remainder young cows and heifers. Some fifteen calves will be sold with dams as one lot, and in some cases the dam will be again re-bred to that most excellent Scotch bull, Prince Royal 175494, a splendid red, thick Scotch bull also included in the sale. His sire is Imp. Prince Oederic, and on his dam's side traces to Imp. Day-break by Lorne (45178). The announcement and particulars of this sale will appear in this paper on June 6-13.

#### FARMING IN CALIFORNIA.

The enormous profits possible to the California farmer make the six free booklets which are being advertised on page 19 intensely interesting reading. No matter what has been the system of farming carried on by a man previous to removing to California he need not adopt new systems, as it is a country suitable to dairying, stock raising and general farming, as well as orcharding and gardening. These booklets give facts and figures that can be depended upon and explain the delightful features of living in California. Write for the booklets to the California Farm Land Co., 96 Grosse Bldg., Los Angeles, Cal.

#### A LITTLE PILL WILL DO IT.

Just a little pill placed under the skin of the animal by a single thrust of the instrument will make your cattle immune from the fatal disease of blackleg. "Blacklegoids" is the name of these pills and they are made in this form so they will be easily administered. They are a simple, safe and sure vaccination for the prevention of blackleg. No stockman can afford to run the risk of having a part or all of his stock lost by blackleg, when such a simple and effective remedy may be applied at an expense that amounts to nothing. For a descriptive circular of methods of vaccination and the use of Blacklegoids write to Parke, Davis & Co., Detroit, Mich. Kindly mention this paper in your inquiry. See page 6.

#### ABERDEEN ANGUS BULLS FOR SALE.

Messrs. Dunning, Johnson & Allen, of Greene, Iowa, again place their announcement in this issue, setting forth the fact that they are now prepared to offer the public fifteen choice "doddie bulls" ranging in age from twelve to twenty-four months old. They are big, strong, lusty fellows ready for a vast amount of hard service. They will also sell one of the herd bulls, Nuggett of Cottage Grove 20th 68671. This is a choicely bred bull whose tabulated pedigree shows some of America's most noted sires. He was sired by Nuggett of Cottage Grove (a Lessin & Burwell bull), he by Black Bird King. The other bulls now in use at Pleasant Grove Farm are Imp. Pride of Abolour, Lawlander and Newton Hero. The last named is a Heroine, sired by McHenry Black Bird 8th. Lowlander was sired by Gay Blackbird while his dam was Levity of North Oaks 5th. Imp. Abolour was sired by the Great Britain champion Allick of Abolour, while his dam belongs to the famous Pride family. The herd now numbers one hundred and seventy-five head of as practical, prolific and useful cattle as are to be found of the champion breed.

#### HEALY'S SOUTH OMAHA SALE.

The sale of South-horn cattle, at South Omaha, Neb., on May 27th, under the management of that veteran breeder and authority, F. P. Healy, promises to be one of the events of the season. Mr. Healy has had the reputation of always bringing to his South Omaha sales, a class of cattle that the breeders and farmers of the West desired, and the offering that he has gathered together for the occasion will maintain his previous reputation for bringing to this point just what buyers want. These cattle are by no means the culls and the tailings, but have been selected from some of the best herds in the state. There will be forty-nine head in the sale and over half of them are Scotch cattle. Some of these are pure Cruickshank, good enough to go anywhere. In the bull offering are several Scotch herds, while many of the females are bred along the most approved and up-to-date Scotch lines. It is an offering that farmers and breeders of the West cannot afford to overlook. It is a breeders' sale, and every breeder is well known and reliable, and every man stands behind his own cattle. When, therefore, you are doing these men you know just what you are doing and what you are getting. Mr. E. C. Holland, of Milton, Iowa, contributes ten head; seven of these are two-year-old heifers, and three are young bulls. Two of these are Scotch bulls and both are sired by Bold Prince 237479, a Thompson bred bull, and a grandson of Victor Mysie 2d. One of these is a richly bred Orange Blossom, while the other is an Acorn, and both are excellent young bulls. He also sells a nicely bred Scotch-topped young Mary bull. Every heifer that he sells is red in color, and have three and four Scotch tops on young Mary and Young Phyllis foundations. Mr. Holland has selected some of the best things he has in his herd for this sale. Mr. F. P. Healy is putting ten head into this sale, and all are Scotch cattle. Four of his consignments are young bulls. Two of these are

## FRUIT GROWING

The rich irrigated lands of the Arkansas, Grand, North Fork and Uncompahgre Valleys of Colorado, and the Farmington District of New Mexico, offer exceptional opportunities for the fruit grower. Pears, Peaches, Apples, Grapes, Apricots, Plums, Melons of all kinds and small fruit of every variety are raised with a greater average yield per acre—and a finer quality—than in any other section of the United States. Markets are close at hand and the demand exceeds the supply.

### The Denver & Rio Grande R. R.

"Scenic Line of the World"

reaches all the above districts and offers special inducements to those seeking locations. Write to-day for free descriptive booklets.

S. K. HOOPER, GENERAL PASSENGER AND TICKET AGENT, Denver, Colo.

TOO LATE TO CLASSIFY.

## POLAND CHINA FALL BOARS FOR SALE

I HAVE a number of good useful boars that I will price at a very reasonable figure and among them are some prospective herd headers. I will also offer my herd boar Neb. E. L., he by Perfection E. L. He is a good individual and a wonderful breeder. Write me for prices and mention The Homestead.

E. F. JACKSON, Raymond, Neb.

## HORNUNG'S BIG BONED POLAND CHINAS

I HAVE 15 good pigs on hand at present to supply the spring trade. They are of the most fashionable strains, and among them are prospective herd headers. I will book your order for a good one at once if you want your pick. Nothing but the very best will be shipped. Write me and mention The Homestead.

ERNEST HORNUNG, RAYMOND, NEB.

## PLEASANT VIEW HERDS DUROC - JERSEYS

140 SPRING PIGS. Sired by such noted boars as Junior Jim, American Royal, I. X. L. Advancer, Reisser's Tip Top Notcher and other sires. We have some good boar prospects. Write us. REISSER BROS., Samburg, Iowa.

richly bred Duchess of Gloster bulls, one is a Victoria and the other is one of those Minervas. Gloster's Baron is just two-years-old, and was sired by Baron Pride, a richly bred Queen of Beauty bull. Here is a good herd header for some enterprising breeder, and he is as nicely bred a Duchess of Gloster bull as can be found. Baron Gloster's Pride is bred along the very same lines, only he is about eight months younger. Top Round Baron is a yearling Victoria, sired by Baron Pride and out of a daughter of Scottish King and Baron Minerva is sired by the same bull and is out of a daughter of Imp. Red Light. In females he is selling five head of heifers and one cow with bull calf at foot. The latter is Secret Princess, a six-year-old daughter of Imp. Prince Oederic and her dam is a daughter of Imp. Ducal Crown. Here is one of his best breeding cows. She is a Cruickshank Secret, and has a bull calf at foot by the Duchess of Gloster bull, Gloster's Favorite. He also sells three good Secrets, one Duchess of Gloster, and one Brawith Bud heifer. His consignment is just as good as he has in his herd. W. R. Wilson, one of Iowa's oldest and best breeders, sells sixteen head, and fourteen of these are Scotch cattle. Among his offering is his Cruickshank herd bull, Straight Cruick 191132. Here is a five-year-old son of Violet's Galahad out of a daughter of the noted bull, Valley Champion. He is a richly bred Queen of Beauty, and he has been used with decided success in the Wilson herd. Mr. Wilson thinks enough of him that he is retaining his heifers, and this is the only reason he is disposing of him. He is all right as a breeder and he will have a string of young things in the sale that will prove it. Just keep him in mind when you go to the sale. One of his best young bulls is Red President 275967, a two-year-old in July. His sire is Imp. Roan

## BULLS FOR SALE

HAVING decided to breed Holsteins exclusively, the Mt. Pleasant State Hospital is offering for sale two fine Short-horn bulls, both registered. One two, the other three years old last February. Prices reasonable. Address,

C. F. APPLGATE, SUPT.

## J. J. LEHR, Ransom, Ill., is offering 6

Chester White boars and 20 open gilts, October farrow, for sale at reasonable prices, sired by Springfield Chief, first prize winner, Illinois State Fair, 1906. Barred P. It. eggs, \$1.50 per 15. Mention Homestead.

## GOLDEN QUEEN DUROCS

HERD headed by Crimson Jim, a grandson of the great Crimson Wonder, assisted by Lincoln Top by Morrison's Belle Top. I will offer a few good gilts bred to Lincoln Top that are right in every respect. Write me and I will tell you all about them. W. D. PUTMAN, TECUMSEH, NEB.

## PANCAKE'S DUROCS

HERD headed by Kant's Top Notcher. One of the best sons of Kant be beat. 150 spring pigs representing most noted blood of the breed. Write for prices and descriptions, mentioning Homestead. Ernest Pancake, Ransom, Illinois

## DUROC JERSEY BRED SOWS

I AM OFFERING THREE SOWS FOR JULY farrow, and I am now booking orders for fall farrow. Only the best strains in my herd. AUSTIN RENSHAW, BLAIR, NEB.

## RUSSELL'S DUROC - JERSEYS

GLENDALIE CRITIC, the greatest son of Crimson Wonder, at head of herd. Booking orders for fall delivery. 125 pigs to pick from. Address, E. Z. RUSSELL, BLAIR, NEB.

## STEERS FOR SALE

286 HEAD well-bred steers, the low-down, blocky kind, dehorned; weight 600 to 1,150 lbs. Must be sold at once. Call on or write H. I. BALL, FAIRFIELD, IOWA

## Table Backed Herefords

THIRTY-THREE bulls from 12 to 23 months old. Five of them are herd headers. Prices about half what you would have to pay for the same individuality and breeding from others. Try me. W. W. Wheeler, Box H, Harlan, Ia.

President, and his dam is a daughter of Scottish King. He is red in color, is a richly bred Cruickshank Secret, and the making of a good herd bull. Beauty's Cruick 2d is just at a year old sale day. His sire is Straight Cruick and his dam is Imp. Beauty 16th, and is a nice youngster for his age. Bapton Cruick is one of the best things Mr. Wilson will offer in the bull line. He is a son of Straight Cruick, out of Bapton Beauty by the Norton bred bull Bapton. He will bear inspection on sale day. In his female offering is one of his best breeding cows, Faithful. She is a daughter of Master Mason, out of a daughter

## POLLED DURHAM CATTLE.

**Botna Valley Herd Double Standard Polled Durhams**

SOME splendid young bulls for sale, ranging in age from twelve months to two years; mostly dark red. These bulls are bred right, fed right and prices are right. Public Sale, Oct. 30th, at which time we will sell 50 one, two and three-year-old heifers. Address, **JAMES WILSON & SONS, AVOCA, IOWA**

**F. A. MURRAY, MAZON, ILL.****Breeds POLLED DURHAMS.**

STOCK that will please you at prices you can afford to pay. **SCOTCH-TOPPED BULLS AND FEMALES FOR SALE.**

**BERKSHIRE HOGS.****1907 Crop of Berkshires at Chapel Hill.**

THE spring crop of big-boned English Berkshire pigs, has been arriving at Chapel Hill for some time, and to my Homestead patrons and others who wrote for boars and brood sows bred, only to find me entirely sold out, I would say "get your orders in early for the present crop." Address,

**W. D. McTavish, - Coggon, Iowa**

**BERKSHIRE SOWS AND GILTS**

I AM offering a splendid lot of bred sows and gilts for sale, of the most choice breeding. Write me for prices. Address,

**E. H. DANCER, Lamoni, Iowa**

of Imp. Red Emperor. She is one of those richly bred Campbell Rosebuds, and she will have three of her daughters in the sale. One of the best heifers that he will sell is Flora Aberdeen 2d, a three-year-old daughter of the Norton-bred bull, Secret Prince, that formerly headed the W. R. Whillans herd at Elgin, Neb. This heifer is one of the best to be sold at South Omaha this season, and she is of decided show character. She is one of those richly bred Floras. The most of the Wilson heifers belong to the Campbell Rosebud and the Cruickshank Secret tribes, and it is an offering that will need no man's apology when they come into the ring. Mr. E. E. Healy will sell two daughters of Count Ramsden in the sale, and one of these is a well bred Mary Ann of Lancaster. J. A. McFarlane, Fairfield, Neb., will sell five young bulls, all sired by the Scotch bull Golden Prince. Mr. N. D. Merrill sends six head of good strong young bulls, all sired by the Gentry bull, Victor Butterfly. Every reader of The Homestead who is interested in good Short-horn cattle should send for a copy of the catalog. Address F. P. Healy, Mgr., Bedford, Iowa, and kindly mention Iowa Homestead.

**LAST CALL FOR R. H. HADLEY'S SHORT-HORN SALE.**

As per previous announcements, Mr. R. H. Hadley and others will sell at New Providence, Iowa, at the home of Mr. Hadley, some forty-seven head of practical, useful, Short-horn cattle. These cattle are presented in plain farmer dress and are all tried and useful animals, except a few younger heifers and bulls, who have not reached the age limit of service until but recently. We present on another page the illustration of Mr. Hadley's herd bull, Golf-man 2d, also included in this sale. This splendid Scotch bull is sold for no fault, but for the sole reason that Mr. Hadley has a lot of his calves on hand and finds it needful to procure another bull. He was calved July 1, 1904, sired by Golf-man, one of the best breeding Scotch bulls in the state of Iowa. Golf-man 2d belongs to the celebrated Mayflower family; his pedigree shows conclusively that he is rich in the best Campbell, Booth and Cruickshank blood. His age is in his favor for anyone who needs a bull to put into immediate hard service. He is a bull of splendid conformation, is rich roan in color and has for his dam the splendid cow Melba 2d by Imp. Fearless Archer; she out of Imp. Melba by Beau Ideal. In addition to this bull are fourteen younger bulls, a number of them sons of Golfman 2d. Others are sired by such bulls as Red Trooper, Lad's Fame, Hampton's Fashion, Scottish Chief and Lord Hampton. While the percentage of Scotch females offered in this sale is not large, still several will be offered. Mr. Hadley offers a good one in Lot 1, a red two-year-old, called Orange Bell, a daughter of Hampton's Fashion and traces to Imp. Orange Blossom 15th by Viceroy. This splendid Scotch heifer was bred Dec. 26th, to the Scotch bull King Victor. Mr. Hadley consigns in Lot 2, a choice red three-year-old daughter of Duke of Oakland 2d; she belongs to the famous Cruickshank family of Brawith Buds; she was bred March 11th to Golf-man 2d. Lot 12 is a choice bred Bates heifer of the famous Bates Duchess tribe; she was sired by Waterloo Duke of Riverside 2d and he by the \$1,100 Waterloo Duke of Hazlehurst 14th; out of Waterloo Duchess 20th by Waterloo Duke 8th. This is one of the choicest bred Bates heifers to be sold this spring; she was bred Nov. 22d to Golf-man 2d. The remainder of the offering is of such families as Young Marys, Young Phyllis, Lady Elizabeth, Clarksville, etc. The major portion of this offering is cows with calves at foot, while there are some young heifers carrying their first calves. There are all told thirty-one females and fifteen bulls. It has been the aim of Mr. Hadley as manager of this sale to see to it that nothing but desirable cattle should be offered; hence he has excluded all culls and believes that every animal cataloged is a breeder, and furthermore guarantees the same. Free entertainment to parties from a distance will be furnished at Gifford, Iowa, and free transportation to and from the sale. The other contributors to the sale are F. F. Clappet, E. G. Shelton, G. W. Mitchell & Son, W. B. Armstrong, J. J. Wood & Son. Commencing at 10:30 o'clock, the forenoon of sale, there will be sold fourteen head of two-year-old draft horses, which are not cataloged with the cattle. Col. A. P. Mason, of Union, Iowa, will dispense the offering in his usual humorous manner. He will be assisted in the ring work by F. P. Menzie and D. M. Gogerty. All applications for catalogs of this important sale should be made to R. H. Hadley, New Providence, Ia. In writing for the same, kindly mention The Homestead.

**DOUBLE STANDARD Polled Durham Short-Horns**

HERD headed by Secret Knight, he by the \$1,000 Idle Knight X1374-15952. A few young bulls and heifers of this famous Polled breed for sale at reasonable prices. Farm five miles from town. **Scotch and Scotch Topped**

In this our closing out sale we are selling our entire herds. They are such a lot of cattle as we think should interest those wanting choice breeding stock. When founding our herds, individuality as well as breeding was given much attention. We are selling nine head of pure Scotch, Duchess of Glosters, Victorias, Sybils, Miss Ramsdens, a Marr Emma and an Imp. Beauty. The Scotch-topped sorts are good American-bred families. Some excellent young herd bull material aside from our Duchess of Gloster herd bull, Baron Gloster, will be found in the sale. The cows are a desirable lot of useful breeding matrons. Write for catalog. It tells all about the breeding lot. Address either of us, mentioning this paper.

## THE LORD BANFF SALE

WILLIAMSVILLE, ILL., TUESDAY, JUNE 4.

## 60 Scotch-Bred Short-horns 60

You will notice this sale is unique in character inasmuch as the great show and breeding bull, Imp. LORD BANFF, is connected in some way with almost every lot. This warrants me in calling this a strictly Lord Banff sale. You know what Lord Banff blood is worth to your herd and there will be sixty head in this sale. You certainly cannot afford to lose this opportunity to secure some of this breeding. I would suggest that you watch the advertisement of this sale from week to week, as it will contain much of interest to you.

Cattle here for Farmers who want to buy the best at reasonable prices to improve their stock; cattle not loaded down with fat.

Cattle suitable for Short-horn Breeders who want the best. Sale includes both Imported and home-bred Scotch Cattle.

# Iowa's Greatest Auction Sale of HIGH-CLASS ABERDEEN ANGUS CATTLE

The World's Fair Grand Champion, Prince Ito 2d Offering  
**TO BE HELD AT ADAZA, IOWA, TUESDAY, MAY 28, 1907**  
The Property of C. J. Martin, Churdan, Iowa  
BLACKBIRD 26TH, THE FIRST WORLD'S FAIR GRAND CHAMPION COW, TO BE SOLD AT PUBLIC AUCTION, AND HER  
BULL CALF BY THE WORLD'S CHAMPION, PRINCE ITO 2D.

**55 Head of Bulls, Cows and Heifers**  
of the most fashionable families, Blackbird, Trojan Ericas, Prides, Queen Mothers, Heatherblooms, Drumin Lucy, Barbara, Coquette, Zara, Maggie and Heroine. Every animal in the sale will either be a son or daughter or have a calf at foot, or bred to Prince Ito 2d. Rarely, if ever before, was there such an opportunity to get the blood of the greatest show cattle the world has ever seen. You will find in every family more individual merit than ever seen in any sale before. Anyone looking for a crackerjack

bull, all in a class by himself, anyone looking for show cows, anyone looking for a two-year-old, yearling calf, here is where you can select for the show at your own price. If you want to see the greatest lot of cattle ever offered in one draft from one man's herd, come to this sale; if you don't find the goods, your expenses will be refunded. You will find what will please the old breeder, the young breeder, the new beginner, and the farmer. Let every lover of Aberdeen Angus cattle be present, if you should like the best object lesson in Aberdeen Angus cattle Iowa has ever exhibited. I cordially invite all who are interested in good cattle to attend the sale.

Send for a catalog. Kindly mention The Homestead.  
**M. A. Judy, Beecher, Ill., Sale Manager.**  
**C. J. MARTIN, CHURDAN, IA.**  
Auctioneers, Col. F. M. Woods, Col. Silas Igo and Col. F. F. Luther.

For Sale

S. H. THOMPSON'S SONS,  
IOWA CITY, IOWA.

We offer for sale until sold, nine Cruickshank red bulls from 13 to 24 months old, two Victorias, one Miss Ramsden, one Princess Royal, one Mysie, one Violet, one Lavender and two Beauties. One of the Beauties is a bull that we have been using at the head of the herd. These are all very low, thick, heavy-quartered bulls. A number of herd headers among them. Their breeding cannot be excelled, and our prices are below competition for bulls of this character. Telephone from Iowa City to the farm. Mention The Homestead when writing.

SHORT-HORN CATTLE SALE!

At Evergreen Stock Farm, Vinton, Ia., June 19.

HORSES.

FRANKIAMS'

"Peaches and Cream"

"Black Boys"

Largest pair of Stallions in U. S.

Sweepstakes Winners.

A Whole Horse Show

All of Iams' "Superb bunch" of "show stallions" are offered for sale. Dad, it's a "100 to 1" they are the "best ever." Get into "Iams' band wagon." All railroads lead to Iams' Importing Barns at 2 cents a mile, and Iams'!

SUMMER PRICES

are pushing competitors "off the roof" hypnotizing buyers with "top notchers" at "LET-LIVE-PRICES." John, if you pay cash or hankable note you will buy a stallion of IAMS. IAMS' "SELLING CLOTHES" "FIT" "all the boys." He saves thousands of dollars to stallion buyers. He is not in the "STALLION TRUST." He places \$1,000 or \$1,500 Insurance.

\$1,000 — SAVED AT IAMS — \$1,000

Ikey! what a rich graft these "SLICK STALLION SALESMEN" are working on the honest farmer, selling fourth rate stallions at \$2,000 to \$5,000. Iams sells "top notchers" so good, big and cheap THAT THEY DO NOT NEED TO BE PEDDLED TO BE SOLD. Mr. Buyer, see Iams' stallions yourself. Take no "GOLD BRICK STALLION SALESMAN'S WORD." Iams has "THE GOODS" you read about. His establishment is worth going 2,000 miles to see. Iams makes his competitors "HOLLER." He is knocking "HIGH PRICES" out of the Xmas tree. Iams saws wood, "BUTTS IN," sells more stallions each year. He makes every statement good. George, dear! Buy a stallion of Iams. His \$1,200 stallions are MUCH BETTER than our neighbors paid those Ohio men \$4,000 for. Then I can wear the diamonds. Iams speaks the languages, buys direct from BREEDERS, pays no buyers, salesmen or interpreters, has no two to ten men to divide profits with. Iams guarantees to sell you a BETTER stallion at \$1,000 to \$1,500 (a few higher), than are sold to Stock Companies at \$2,500 to \$5,000 by SLICK SALESMEN, or pay you \$100 for your trouble, you the judge. Iams pays horse's freight and buyer's fare; gives 60 per cent breeding guarantee.

Write for eye-opener and greatest horse catalog on earth.

THE OLD OR THE YOUNG SOW, WHICH?

Elsewhere in this issue will be found a contribution from one of our subscribers, Mr. Henry S. Roth, on the subject, "Something More About Pig Raising." Mr. Roth is decided in his opinion that the gilt is more profitable than the old sow, and on this phase of the subject we desire to make a few remarks.

The view that the gilt is more profitable than the old sow when it comes to the raising of a litter of pigs will not meet with the approval of many swine breeders, especially those who raise pure-breds. At a convention held in Sioux City, Iowa, during the past winter, Mr. Lovejoy, the noted Illinois Berkshire breeder, stated that he had sows on his farm more than ten years old. His advice to the members of that convention was to hold on to a sow that proves herself to be a good breeder. Another member of the convention went still further and stated that he had kept sows even after they were unable to raise their pigs, his plan being to have the young sows raise the old sow's pigs. He claimed that a sow is never too old as long as she can give birth to a strong litter of pigs.

While we do not deny that there are a number of arguments that might be advanced in favor of the gilt as a breeder over the old sow, at the same time we believe that those who raise pure-breds make a great mistake when they do not retain their tried sows and add to the breeding herd only a select few of the gilts each year. Necessarily, in large herds some of the old ones have to be dropped every year, thus necessitating the placing of young ones in their stead.

Methods of feeding have much to do with the crankiness of an old sow or her lack of crankiness. If she is not fed much corn during the winter and is turned away from sleeping quarters and straw stacks so that she is compelled to rustle every day, and fed well on flesh-forming foods, there is no reason why she will not raise as large a percentage of her pigs as a gilt. On the other hand, if she is allowed to loaf around all winter, is fed a good deal of corn and spends most of her time in a nice straw bed you may be disappointed if you expect to raise many pigs from such a sow. There is this to say of the litter of the old sow providing her udder has not previously been spoiled: She will raise a more uniform litter than a gilt; she will make them heavier by the time they are weaned; she will make more use of pasture and therefore require less feed; and we think that her pigs will be just a little stronger constitutionally than the pigs of the gilt. Those who have never made a study of the relative merit of pigs from a gilt and those from an old sow would find it interesting to conduct this little experiment: In August or September, after the pigs are all weaned from gilts and old sows alike, just when the first

shipping orders are beginning to come in, go out among the bunch and pick out one or two or even half a dozen of the best pigs in the whole lot. It is our experience that about 90 per cent of the pigs that you select will be from old sows, in case your herd is about equally divided; that is about half gilts and half old sows. This indicates that the pigs of an old sow are not only given a little better start in life, but they may maintain the pace and generally keep ahead.

We do not mean to infer that it is not profitable to breed from a good, growthy gilt, but when it comes to the matter of comparisons we will take our stand behind the old sow.

If these views run counter to the opinions held by any of our subscribers we shall be pleased indeed to give space to those who desire to sustain the reputation of the young sow.

THE DUST MULCH OF 1907.

It is not a difficult matter to "miss fire" on a subject of this kind. The petulant weather god is at any time apt to change his tactics, and from one extreme to which farmers have become accustomed change to the very opposite.

The precipitation thus far this spring has been below normal throughout a very large part of the great central and southwest. Possibly the season is too early to call it a "drouth," nevertheless meadows and pastures have already been affected, while small grain has been considerably retarded for lack of moisture and because of the soil being unusually cold.

There are those who are already predicting a short crop, though The Homestead cannot see its way clear to sympathize with that view. There is plenty of time yet to raise not only an average crop, but even a bumper crop, though field tactics must be adapted to the needs of the situation.

In the case of cultivated crops it is not

too early to adopt dry-weather methods in the system of cultivation employed. This means frequent and shallow cultivation. It is surprising what use can be made of a half-inch of rainfall providing the soil is stirred in the surface shortly after its precipitation. In dry farming districts this amount of rainfall is regarded as a great boon to crops, though of course men in those localities have learned sensible methods of conserving the moisture supply.

Although much of the corn is already planted and some of it, indeed, is far enough along to be cultivated, yet in the northern half of the corn belt there is still some planting to do and much of the crop has not yet made its appearance above ground. In these areas the harrow should be a constant visitor to the corn fields. We advise this for more than one reason, but principally because of the fact that harrowing the surface breaks up the smooth crust left by the planter wheels and therefore prevents the escape of moisture from that part of the field where it is most desired. Where the corn is already up the best that one can do is to rush the cultivators and run them rather more shallow than if the soil were wet. This can be done for the reason that weeds have not yet taken a strong hold, and a two and a half or three-inch mulch will conserve more moisture than will a deeper one.

So long as we cannot look into the future and determine just what the precipitation will be, it behooves corn growers to have faith in the possibilities of corn belt soil even with the moisture supply that is at present locked up in the surface four feet. Capillary action will be steadily at work all summer, though the greatest benefit can be derived by such natural force only by cutting the capillaries on the surface and thereby stopping surface evaporation. To become discouraged because you believe

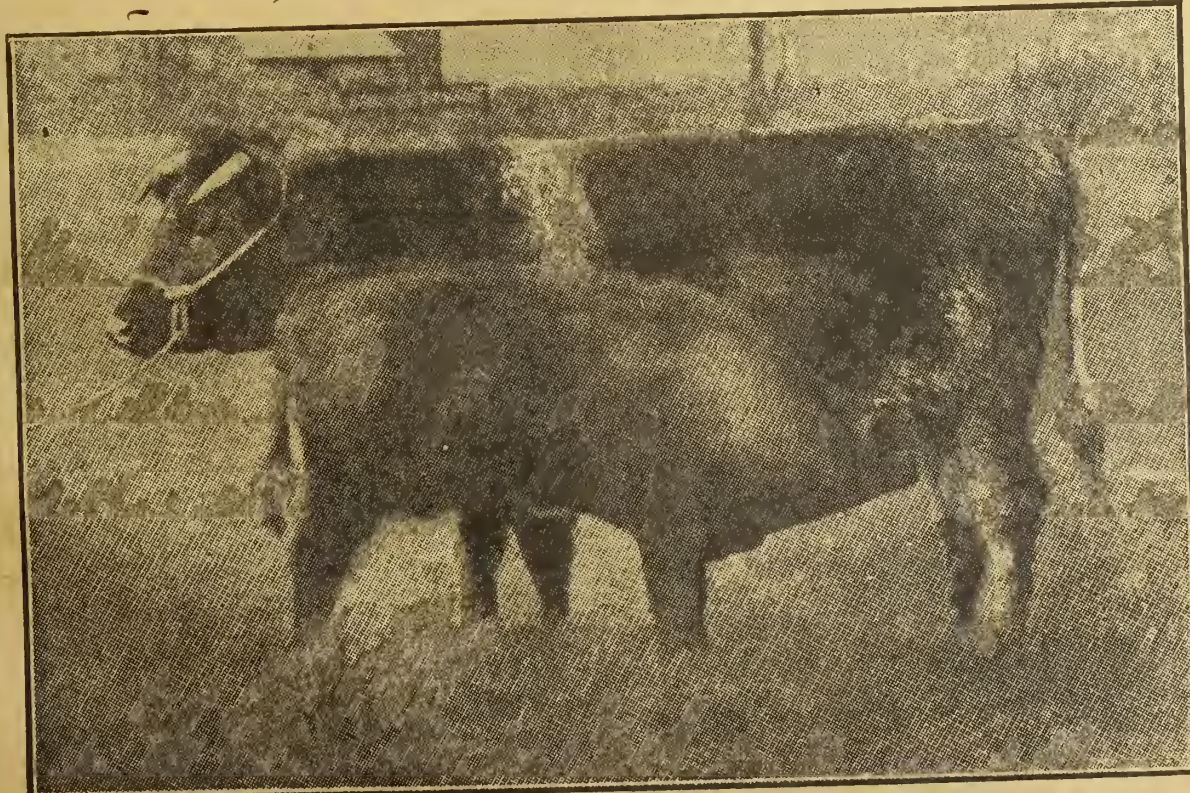

that the moisture supply will not bring forth a crop is to meet disaster half way.

We can only hope in the giving of this advice that the so-called dust mulch will not be a crying need during the next three months, and yet in case the precipitation should continue as light during the next two months as it has been during the last two, men should not hesitate to make the most strenuous kind of effort to employ this, the only way of conserving moisture on an inter-tillage crop.

THE FARMER AND HIS BANKER.

Nobody has a better right to rejoice over the present excellent financial situation than the western farmer and stock-raiser. It is admitted on all hands that the West is at last financially independent of the East and is now one of the creditor sections of the country, not a debtor section as formerly. During the financial flurry on Wall street a few weeks ago, it is estimated by a Chicago banker that one hundred millions of dollars of western money was placed at the disposal of the panicky financiers of the eastern money centers and was one of the prime influences in saving the country from a severe crisis. The federal government's special payments and deposits to relieve the stringency were also in existence largely owing to the great and growing wealth of the West.

The wealth of the West is no accident and no mystery. It is mainly the accumulated result of the intelligent labor of the western farmer and stock-raiser applied to the utilization of our vast and practically inexhaustible natural resources. This wealth is distributed among thousands upon thousands of carefully managed local banks, and through them is made available as capital for both local and national manufacturing, commercial and other industrial enterprises. The farmer, as a depositor or stockholder in his local bank, thus becomes the creditor of the country's great business enterprises, and draws financial support from them, as well as remaining their strongest support as a consumer of their output. He thus helps himself in both ways. The relations of the western farmer and his banker are extremely intimate and friendly, as well as mutually beneficial. They are neighbors and friends, and meet as social and intellectual equals. They know each other thoroughly, and that acquaintance is the basis of a mutual respect and confidence which enables each to benefit the other. Never in the history of the West have the farmer and his banker been so close together as in the past few years. National, state, savings and private banks are now well distributed throughout the country, the laws having been modified by experience so as to encourage their establishment in much smaller

Good Lassie and calf. This cow is sired by Imp. Choice Goods, 186802, and is included in M. E. Jones' sale of Short-horns at Williamsville, Ill., June 4, 1907. [See advertisement on back page of this paper.]

places than formerly, greatly to the advantage of the people. The farmer now makes many, if not most, of his payments by check, a most convenient and business-like method; and he is in many cases a stockholder or heavy depositor, or both, in the banks of his vicinity. An intimate acquaintance with the banking business at first hand has dispelled prejudice and vastly improved the relations of farmer and banker. It is no longer doubted among farmers that banking is not only a legitimate business, performing an important social and economic function, but that it is the very foundation of a general prosperity of all classes. This satisfactory condition of things accounts, in large measure, for the increased wealth and now thoroughly established financial independence of the middle West.

#### IOWA SWINE BREEDERS' ASSOCIATION.

The summer meeting of the Iowa Swine Breeders' Association will be held at Des Moines, on Tuesday, June 11. The headquarters of the association for this meeting will be at the Savary Hotel, in the parlors of which the sessions will also be held. While the program is not as yet fully completed, enough has been arranged for to insure a highly interesting meeting. The complete program will be announced later. The secretary has completed arrangements with the railroads by which a reduced rate of one fare and one-third, plus twenty-five cents, is assured for the round trip, from all points in Iowa, where the fare to Des Moines is over fifty cents for one way.

The annual meeting of the National Association of Expert Swine Judges will follow on Wednesday, June 12th. In addition to the usual scoring exercises and examination of candidates for certificates as expert judges, a most interesting lecture on the benefits of the score card has been provided for, and a practical carcass demonstration illustrating its application. This is a feature that has never before been presented, and it is of such value that both farmers and swine breeders must find it highly instructive.

#### Glenfoyle Short-horn Sale a Success.

One of the best Short-horn sales in many years was that of Mr. A. Chrystal, of Marshall, Mich., proprietor of The Glenfoyle Herd. The exceedingly large number, seventy-four lots, provided many bargains for those present. The cattle were sent forward in good breeding condition and were widely distributed throughout the middle West. Thirty head were bought by residents of Michigan. Dr. Van Ness, of Windom, Minn., topped the sale, paying \$700 for Lady Nonpareil 2d, a daughter of Imp. Lovat Champion, Col. F. O. Lowden, of Oregon, Ill., was a persistent bidder on the best lots and secured several head of richly-bred Scotch cows at reasonable prices, among the number being Marios' Heiress 3d, a full sister to Marios' Heiress 2d which he secured from Mr. Chrystal last year at \$1,200. This young cow had a splendid bull calf at foot by Imp. Lovat Champion. Mr. George Allen, of Lexington, Neb., secured the good Scotch heifer, Imp. Golden Chain, a daughter of Silver Plate at \$675. Messrs. J. G. Withers & Son, of Independence, Iowa, were liberal buyers, securing fifteen head. Mr. W. A. Hart, of Caro, Mich., was a persistent bidder and secured many of the bargains of the sale. The bull offering was topped by Mr. N. A. Lind, of Rolfe, Iowa, who secured Village Sultan, one of the best sons of the champion Whitehall Sultan, at \$1,125. Mr. Lind is to be congratulated on this purchase, and much good should result from this valuable addition to his noted herd. Messrs. Lester Bros., of Pontiac, Mich., were the opposing bidders. Imp. Pennan Commander, one of Mr. Chrystal's herd bulls and the sire of some of the best calves during the past year at Glenfoyle, went to Mr. F. B. Niles, of Toledo, Ohio. Messrs. D. & C. Minzier, of Caledonia, New York, secured a hargain in the young Scotch bull, Harvester, at \$250. They also purchased a number of females at moderate prices. Col. Woods did the selling

and was ably assisted by Cols. Belkows, Jones and Cottingham, in the ring. No sensational prices were paid, yet very few sales are recorded where but ten head sell under the \$100 mark. A list of animals selling for \$100 or over is given below:

#### FEMALES.

Cherry Blossom 4th, 7-years, Sittytton Prince, F. O. Loudon, Oregon, Ill.	\$ 525
Mario's Heiress 3d, 5-years, Scottish Victor, and b. c., Same	665

## Swift's Arsenate of Lead

Destroys all Leaf-Eating Insects

It is estimated that insects destroy  $\frac{1}{4}$  to  $\frac{1}{2}$  the entire yield of farm and orchard produce. Swift's Arsenate of Lead is the best insecticide for the use of the farmer and orchardist, because it destroys all leaf-eating insects, sticks to the foliage in spite of rain and wind, and because it cannot burn or scorch the foliage no matter how strong a solution is used. Swift's Arsenate of Lead is used and recommended by leading fruit growers, truck farmers, horticulturists and shade tree owners.

Write for booklet giving valuable information for combating the Codling Moth, Potato Bug and other insect pests.

MERRIMAC CHEMICAL CO., 41 Broad St., Boston, Mass.

### A METAL BALL

OF non-corrosive babbit resting on a rubber seat forms the valve guaranteed for 5 years in this Hawkeye Automatic Hog Waterer. Leakage is therefore impossible as the union is close, without sticking. Substantially constructed and large enough for four hogs to drink together. Recommended by agricultural colleges and practical breeders. Thousands in use. Satisfaction guaranteed or money refunded.

## A Chance to Make Money

I have berries, grapes, peaches and apples two years old, fresh as when picked. Do not heat or eat the fruit, just put it up cold; keeps perfectly fresh and costs almost nothing. Last year I sold directions to over 120 families in one week. As there are many people poor, like myself, I feel it my duty to give you my experience, feeling confident anyone can make \$100 around home in a few days. I will mail bottle of fruit and full directions to any of your readers for 21-cent stamps, to cover cost of bottle, fruit, mailing, etc. Address FRANK I. TURNER, 170-172 Eighth Avenue, New York. Let people see and taste the fruit and you should sell hundreds of directions at \$1 each.

All your money back if patent is not allowed. For full particulars, address SILAS C. SWEET, Patent Attorney, 721 L. & T. Bldg., Des Moines, Iowa.

FITS St. Vitus' Dance and all Nervous diseases permanently cured by Dr. Kline's Great Nerve Restorer. Send for FREE \$2 trial bottle and treatise. Dr. R. H. Kline, L. 931 Arch St., Philadelphia, Pa.

The above is a correct likeness of the new automatic swinging gate, manufactured by Rice Bros., of Harvard, Neb. It is an entire steel gate, can be hung on any gate post and can easily be operated from wagon or carriage. Write them for new, illustrated catalog and mention this paper.

# Farm Furrows

Turned by a Practical Farmer.

Good roads are pretty well ridden both in and out of print.

When a man says that he feels as young as a boy he generally begins to feel old.

They say that there will be a lot of "dry farming" done in Kansas this year, if the liquor laws are enforced.

A few heads of cabbage left to their own vile inclinations in the cellar these days will make limburger seem fragrant.

The poorly built fence shows that the owner believes in the old saying, "Eat, drink and be merry, for tomorrow you die."

Very little wisdom indeed is shown by the breeder who attempts to run down other breeds in order to promote his own.

A piece of cheesecloth with a rubber cord drawn around the edge makes a good cover for the can of milk that is set to cool.

The young man who can see where his neighbors beat him at farming has one point that will help make him a good farmer.

Supply and demand exert a wonderful influence undoubtedly under natural conditions. The trouble is that too often conditions are artificial.

It is a too common experience that when a boy wants to go fishing for sure he asks permission of his father and tells his mother he is going.

The new disk harrow that never clogs is a poor tool in one way. It causes the farmer to go into the fields sometimes when he should stay out.

I am acquainted with very few folks who are smart enough to raise a thousand chickens a year, though I know lots who have the ambition to do it.

An Ohio sheep herder recently had eighteen of his flock killed on account of rabies, they having been bitten by a mad dog several weeks before.

To some feminine minds a harness is an exasperating confusion of straps and buckles. I once knew of a woman hitching and driving a horse in the halter.

When you smack your lips over those delicious spinach, horse-radish or dandelion greens imagine how silage or grass would taste to the stock in the dry lot.

The Black Hills spruce makes a fine evergreen for windbreak. It bears transplanting well and is a longer lived tree than the Scotch pine or the Jack pine.

A few hours spent brushing down the year's accumulation of cobwebs and dust from the stable ceilings will make you wonder why it had not been done before.

The staff of life will soon be more expensive, according to the government crop report for May, if the present

crop expectations are realized. In our own country there will be 100,000,000 bushels of grain room to rest for a year, while a similar condition seems to prevail in wheat-raising lands over the sea.

I don't like the thought of our best young men leaving the central West for newer countries where there is cheaper land, but if I were in their shoes I would do the same trick.

Appointments may be made by 'phone with business men in town before starting from home. Thus the time spent in attending to business matters can be reduced about one-half.

Bicycle manufacturers claim that the once universally popular "bike" is again to be installed in popular favor. The new models will certainly need to be pretty sure fool killers in order to compete with any degree of success with the automobile.

Spring lambs that go to market in the fall at a hundred weight are usually able to associate their early existence with a lamb creep in which was a nice trough of meal and a rack of crisp clover or alfalfa.

The young fellow who leaves his buggy top down and crumpled, and throws his hat in a corner of his room and hangs his best suit on the closet floor has a pretty good start for traveling the back alley road of life.

To my observation the study of civil law in rural schools is taught backwards. Why not instruct the young mind concerning the government of local affairs, then with that foundation lead up to state and national government.

Agents are busy selling outfits for pressing stacks of green corn fodder so as to exclude the air and make ensilage in this way. The experience of those who have tried the experiment would make interesting reading.

I'm a friend of the hired man, and borrowing some of Bailey's philosophy would say: In preparing prunes and dried apples as well as late pie-plant for the hired men don't forget to place the "sass" in the cow yard over night to cool.

Reading farm journals will not make a good farmer any more than will reading medical journals make a good doctor, but each needs to read his own particular journals in order to keep up with the times and gain additional knowledge about his work.

Court proceedings in a small Iowa town revealed the fact that in one year there had been sold in violation of law enough liquor to make 374 drinks per voter. Some of the gentlemen of that town are said to be completely out of excuses.

The stock lot is no place to dump refuse, tin cans and scrap iron. Absurd as it may seem, I have seen the mud-holes treated in this way. Just recently I observed a horse being thrown by a half buried loop of iron. Result, a sprained shoulder.

Spring weather is so deceiving. One judges the temperature of the day by the brightness of the morning sun and goes to the field too lightly clad. The noon hour is the only comfortable one of the day. Weather has been unusually changeable this season.

Lack of parsnips and other long keeping garden vegetables this spring should remind you that you failed to tend the garden properly last season. An abundance of these, should make you appreciative of their goodness sufficiently to plant a nice bed again.

My observation is that buggy cushions wear out in a very short time, and while it may seem strange, the wear is more noticeable on the family buggy cushions than on that of the young fellows. The point is that the boys keep the cushions protected with spreads.

There are some details in the work of the farmer that must not be neglected. They belong to the "rush orders" class, by which I mean they should be given special attention. This furrow was prompted to me the other day as I was passing by a neighbor's plum orchard, where among the blossoms could be seen still hanging the dried-out fruit that had died from black rot infection, blight and

curculio. No crop of nice fruit will ever come from such trees if left unattended.

Isn't an old gobbler about the most aggravating thing on a farm? If you start up a long-distance conversation with your hired man, the gobbler is sure to chip in and punctuate your remarks with his gobble, gobble, gobble. I believe it was that which taught me to swear. Being a family man my swearing is, of course, done in silence.

Lack of substance or bone is not only a condition undesirable, but an indication that signifies that the frame of the animal is also lacking the proper amount of material of the right kind to make the sturdy, rugged animal. When the porcine pastern is weak, the back is liable to be similarly afflicted.

The finest-looking, ablest-appearing man I ever hired in my life was the most useless man I ever had on the farm and strange enough the dullest, dumbest-looking fellow was the best workman I ever saw. This simply goes to prove what most of us know, namely, that you can't tell by the look of a frog how far he can jump.

With due respect to every worthy entomologist, I feel that much improvement could be made on the names of insects. "Musca domestica" for the common house-fly might convey the idea of some important domestic relation to many, where something like obnoxious pesticator domesticus would at once signify the rank.

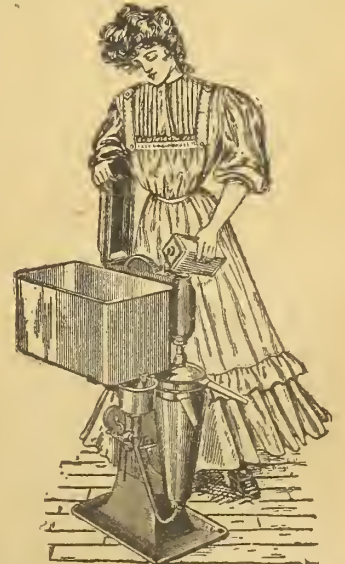

WHY NOT SWAP SKIMMING FORCES and have an easier time and more dollars for the work you do? You can come near to doubling your dairy profits—perhaps even more than double them—simply by swapping the force of gravity for centrifugal force in the skimming of your milk. Suppose we get right down to rock bottom regarding this skimming business. Cream and skim-milk don't separate just to accommodate anybody, but because some force compels them to. There are just two forces known to man that can be used for the profitable skimming of milk. One is the force of gravity—the old-time crock, pan or can setting system in use ever since man learned how to milk. But how about this other and newer skimming force—this centrifugal force? How does it work? How strong is it? What does it accomplish that gravity fails to do? Centrifugal force is the power that makes whirling bodies pull away from the center about which they are whirled. When a vessel containing milk is rapidly spun around, top like, centrifugal force is generated and pulls outward on the particles of skim-milk and cream. But centrifugal force, like the force of gravity, pulls harder on the skim-milk particles than on the cream particles so that the skim-milk is drawn outward against the sides of the vessel and the cream is squeezed inward toward the center. Add to this spinning receptacle proper driving mechanism and proper tubes for drawing off the skimmed milk and cream into separate vessels, and you have a centrifugal cream separator—a machine that separates cream and skim-milk by the use of centrifugal force. So what will you gain in dairy profits by using centrifugal force, as applied in the centrifugal separator, instead of some gravity system in the form of pans, crocks or cans? (1) A skimming force which may be made ten thousand times as strong as gravity, the amount of force depending upon the make of cream separator you select. (2) A gain of one-third to one-half—sometimes even more—in the quantity of butter you get from the same amount of milk under the same conditions, the amount of increase depending upon the kind of separator you select. (3) A gain in butter quality that will

usually run from five to ten cents per pound, according to local conditions, the increase in quality depending partly upon the simplicity of the separator you select. (4) You will have fresh, sweet skimmed milk, still warm with the heat of the cow, which will be much better for your young stock than the stale, sour or diluted skimmed milk

A light-running, strictly modern Centrifugal Cream Separator that can be turned by one who is seated.

from pans, crocks, cans or creamery. (5) You will have a single can of cream to set away or haul to the creamery instead of several crocks, pans or cans of whole milk to care for, and your trips to the creamery will be decreased by at least one-half. (6) You will require less storage room, less ice and practically no pans, crocks or cans, thereby greatly reducing the cost and labor of handling milk and cleaning milk utensils. The illustrations used in this article have been loaned to us through the courtesy of The Sharples Separator Co., of West Chester,

A strictly modern Centrifugal Cream Separator with enclosed, self-oiling gears and ball bearing.

Pa., Chicago, Ill., and Toronto, Can., manufacturers of the Sharples Tubular Cream Separator. Should any of our readers desire more knowledge on this subject, we suggest that they write for a copy of a very useful book called "Business Dairying," which the Sharples Separator Co. offer to mail, free, upon request. This book will benefit you and explain much more fully the actual cash advantage to be gained through exchanging your gravity system of skimming for a centrifugal cream separator. Be sure to mention The Homestead when writing for this book, thus insuring the very promptest attention to your request.

# THE HOMESTEAD

A Practical Journal for the Farmer, Stockman, Fruit Grower, Poultryman, Gardener and Housekeeper.

BY JAMES M. PIERCE.

JAMES ATKINSON, Editor in Chief.

ESTABLISHED IN 1855.

Entered at Des Moines Postoffice as second class matter

PUBLISHED EVERY THURSDAY.

**SUBSCRIPTION RATES**—Single subscriptions, \$1 a year; ten copies one year, \$10, and an extra copy to getter up of club. In clubs of fifty or more, 30 cents a year; in clubs of one hundred or more, 25 cents a year. Single subscription three years in advance, \$2; five years in advance \$3; ten years in advance \$5. Subscription price in Canada, \$1.50 a year. Remit by draft, registered letter, post-office or express money order. In renewing subscription, use same name and initials as address on paper, or explain why you change. In changing your postoffice address, send your old address as well as the new. Errors in address or failure to receive paper within two weeks should be promptly reported to the publisher.

Address all communications and business letters to

THE HOMESTEAD COMPANY,  
Des Moines, Iowa.

## Something More About Pig Raising.

To the Editor of The Homestead:

In a late issue of this paper there appeared an article headed "Some Hints on Pig Raising." This came just right for me, as I had been thinking of calling it a hit-and-miss affair. When others have had bad luck with pigs we call it poor management; when we lose our pigs we call it bad luck. It would not sound right to acknowledge poor management and say the other fellow had bad luck. What others have is good, and what we have is just a little better. There may be exceptions to this, but it holds out with us all right.

In the spring of 1906 I succeeded in saving seventeen out of 118 pigs. In this case I had a combination of causes. First, the sun was too far south; second, the litters were a little too large, averaging eleven pigs to the sow; third, too much bedding was given some sows and in some cases not quite enough, and I was not with each sow to hold her pigs in my arms each time while she was stirring up her bed and lying down to keep her from using her pigs as a mattress. And then some of the sows hadn't all the sense in the world, either—some seemed to be quite sensible, always aiming to feed their pigs at feeding time so they would be at their best by the time the slop was being poured in their trough, suddenly kick out, jump up, scatter pigs all over her stall against the wall, until one could almost hear their bones crack. Some sows were so orderly and hustling in keeping their beds in shape that their pigs were all used up for bedding, while a few sows succeeded in raising one. Well, this I called poor management, but did not know where to lay the blame, on the sows or myself.

This spring, out of sixty-five pigs from five sows I have twenty-six left, three of which are fed by hand, and yet they seem to have too many, as they do away with one every now and then. Some big 400-pound sows have two left each. They are not bad specimens, indeed they are fine, but I can't see why they should not be. I have come to the conclusion that a sow after her second litter of pigs are old enough to wean should at

once be crowded with corn and good slop, or anything she likes, to make her lazy and lie around so she will take on fat fast. A drink of good water does not go bad once in a while in a case of this kind, for the sooner she will be on board the train for market, the less worry the old hen will have in protecting her flock of chicks, anyhow if she be allowed to associate with the old sow. Young sows for me after this, as five or six nice live pigs are worth more than two or three live pigs and ten or twelve dead ones. Henry S. Roth, Washington county, Iowa.

## What Short-horns Owe to Imported Young Mary.

Mr. E. K. Thomas, of Paris, Ky., the senior member of the Short-horn breeding firm of Thomas, Jameson & Mitchell, of Allen, Kan., has recently prepared a brief history of the notable strain of Short-horn cattle tracing to Imp. Young Mary. According to Mr. Thomas, Young Mary was imported in 1834 by the Ohio Importing Co. and sold in their sale in 1836 for \$1,500. That notable cow is said to have produced sixteen heifer calves and in each she transmitted her good qualities so uniformly that her record stands today in Short-horn history unequalled. The showing character of the Young Mary's, as pointed out by Mr. Thomas, would indicate that as a family this useful strain of Short-horns is deserving of the high esteem in which it is held.

We believe that all of our readers who are in any way interested in Short-horns would be interested in this historic matter prepared by Mr. Thomas, and we therefore direct attention to the fact that, although this material is simply in manuscript form, it will be sent free to those who make application for same. Address E. K. Thomas, Paris, Ky.

## No End of Orders.

Mrs. G. E. Ostheimer, of Eldora, Iowa, writing under date of April 29th, and sending in new copy for her classified advertisement under heading of Rhode Island Reds, says in her letter: "I have had a fine trade and no end of orders."

## THE THOMAS, JAMESON & MITCHELL SHORT-HORN SALE.

Short-horn breeders throughout America should feel an interest in the partial dispersion sale of Short-horns announced by Messrs. Thomas, Jameson & Mitchell, of Allen, Kan., the sale to be held at Kansas City, Mo., on Thursday, June 13th. This herd was founded over thirty years ago by Mr. E. K. Thomas, of Paris, Ky. Some years later the present firm was formed, the herd was moved to Kansas and Mr. S. D. Mitchell, the junior member of the firm, assumed active management. Now, just as Mr. Mitchell has gotten settled in the West, one member of the firm wishes to withdraw and in order to settle the partnership the cattle must be sold. Not in years has such an old and well-established herd been exposed to public treaty. That this will be one of the important sales of recent

## Binder Twine

Partners wanted as agents AUGUST POST Moulton, Iowa.

pedigree is the great Roan Gauntlet, sire of Imp. Orange Blossom 31st. Beyond this straight Cruickshank breeding is found for many generations. Orange Viscount is to go in the sale and it is to be hoped will go to some good herd where he will have an opportunity to continue getting stock that will be shown, as they are the type that hold the breed up to its present high standard. Last week we saw Orange Viscount and found him looking fully as well as ever in his life. He carries the thickness so much sought after and is looking fully as well as when in the show ring, but with less flesh, as he has been in everyday service since his last show. The man who buys Orange Viscount gets a hull whose record is established and a hull that will be of untold value to his herd. The second hull in the herd and one that promises even greater things is White Goods, a son of the great Choice Goods, and out of Imp. Bessie 51st. He has been in the herd since his calfhood and in the show rings of the larger shows has been gaining such prestige as to make him one of the factors in the aged bull classes this fall. Since his appearance last year as a two-year-old he has developed even more than from his yearling form to his two-year-old form, and if carried on for this year's shows must be recognized as one of the great hulls of the breed. As a sire he is making good, siring a class of stock that has but to be fitted and shown. A strong lot of young things by him are in the sale and some show material for the fall shows will be found here. White Goods sells and should go where he will be carried on. Some younger hulls will be found in the sale from which to make selections, but as bull sales from the herd have been good only four are left. One of these, Orange Lavender, got by Orange Viscount and out of Lavender Bud, will be found an even-lined fellow, covering well over loin and crops and a Cruickshank hull that will please some critical buyer. In females the Thomas, Jameson & Mitchell sale will be stronger than any sale held in recent times. In the advertisement will be found a partial list of a number of Cruickshank and Scotch cattle that go in the sale. We see in some sales a cow that is worth the four-figure price, but in this sale there are several that should go to the \$1,000 mark if ever there has been sold a cow that is worth that price. About thirty head are either pure Cruickshank or Scotch. Ten head are two-year-old heifers got by the great Orange Viscount and all in calf to White Goods. The cross of these two show hulls, both sons of champions, should make these heifers especially attractive, as they are individually and collectively as great a string of heifers as are often found. The Barrister Young Marys are of the same type, beef from the hoofs up, and must be seen to be appreciated. In future issues more will be said of the various individuals that go in the sale and we urge all our readers interested in the Short-horn to write at once for a catalog, as it will be found a book of valuable reference, with many illustrations of the cattle to be sold. The announcement of the sale will be found on page 19. Kindly mention this paper when writing for catalogs.

## SOME GOOD FALL BOARS FOR SALE.

On page 17 of this week's issue will be found the Duroc Jersey advertisement of F. E. Garrett, Lohrville, Iowa, who offers for sale three good fall boars. These are sired by I Am A Wonder, a son of the sweepstakes boar, Crimson Wonder I Am, and out of the \$1,500 sow Ruberta. One of these boars is particularly fancy in head and ear, good in color, with a nice body, and good, wide and deep hams. This boar should make a good herd boar for any herd. Another one is particularly good, but not so rich a color. The third one will make a great big boar, and while not as fancy as the other two, will make a good herd boar. Some wide-awake breeder could do worse than to buy one of these fall boars. Mr. Garrett's present crop of pigs are sired by Tientsin, (the sire of the first prize sow, Ruberta), I Am A Wonder, Junior Jim and American Royal. He has three Ruberta gilts in the herd which he is reserving for his next year's sale. He has a good Tientsin and a good Proud Advance sow in the herd which he may carry along for fair time. Mr. Garrett recently purchased a half interest in Young Advance, a son of Proud Advance, and he is breeding him to a few sows for fall litters. He also has old Tientsin and I Am A Wonder, and he has pigs by both of these boars. If any of our Duroc Jersey breeders want a herd boar, just write or go out and see these sons of the great sow Ruberta.

## ORION JR. 56887 FOR SALE.

Farrowed March 27, 1905, sired by old Orion 5293, dam Maudie Darling II. J. by Young John 20575. This good two-year-old boar is offered for sale by Mr. J. W. Pittman, of Lohrville, Iowa. Write him at once or go and see the boar.

The accompanying illustration is from a photograph taken at Hughesdale Farm, owned by Mr. H. J. Hughes, of Trenton, Mo. It is here that the Dual Purpose Short-horn is raised and developed. To the right will be seen Mr. Hughes holding the great Short-horn bull Viscount of Anoka, for three years champion show and breeding bull of America. Next to Viscount of Anoka is Rowena 2d, the champion dual-purpose cow at the World's Fair, held at St. Louis. To the extreme left is Rowena 2d's yearling son, and gathered around this group of Short-horns are the students of the Missouri Auction school, taking a practical lesson in judging Short-horns. This is one of the important features of Col. W. B. Carpenter's school and a very important one, as an auctioneer should be a competent judge of individual merit and values. See page 22 for advertisement of the Missouri Auction school.

# CLASSIFIED ADVERTISEMENTS

ADVERTISEMENTS are inserted in this department of The Homestead (and, by special arrangement, also published in The Wisconsin Farmer, of Madison, Wis., and The Farmer and Stockman, of Kansas City, Mo., without additional charge) for the low price of five cents a word for each insertion, no insertion being accepted for less than \$1.20; and cash must invariably accompany the order, as we keep no books for this class of business. No display type or illustrations are admitted. Each number and initial letter or abbreviation, including the address, counts one word. Form for printing this page closes on Saturday of the week preceding publication, hence copy must be mailed so as to reach The Homestead on or before Saturday morning. Guaranteed combined circulation of the three papers over 190,000, reaching a farm population of at least 950,000 in the states of Iowa, Illinois, Nebraska, North and South Dakota, Minnesota, Wisconsin, Missouri, Kansas and Oklahoma.

NEURALGIA—Positive, permanent cure. One dollar guaranteed. A. S. Way, Springfield, Ohio.

## Rape Blistering Hogs.

To the Editor of The Homestead:

Every year I see a good deal said in the papers about rape blistering hogs. I have used rape for twelve years for pasture for hogs and have turned shoats and pigs on it when the rape was large enough for them to lie in the shade of its leaves, but have never had one of them blister. I sow rape on all the lots that are tramped in winter, by the stock, usually sowing it in April or the fore part of May. I turn March and April pigs on it about July and leave them there through all kinds of weather. Of course they have a large hog barn and other places for shade. Twice in the twelve years I have had

the pigs break out with the measles, or a sort of breaking out of small lumps like mosquito bites on a person's hands. But I could always find the same thing on the pigs of the same litters that had tame grass pastures and fed in the same building with only a partition between. I sometimes think these measles are mistaken for rape blistering. My hogs are Poland Chinas.

I have seen white hogs blister in the sun from getting wet in large weeds or clover. I have seen them with big sores on their backs. Of course they could get in this condition in rape, too, because they are very tender-skinned hogs, but that is the hog's fault and not the fault of the rape or clover. I have also had pigs get fevered and their ears swell up

and peel off, and have even had them lose their ears and yet live through the trouble and I have lost a few in this condition. However, this does not occur any more on a rape pasture than on blue grass, white clover, or any other pasture. If pigs are properly fed, kept well disinfectated and the worms kept out of them there will be but little trouble among the black hogs on rape or any other kind of pasture. John Blain.

Fawnee county, Neb.

Arrangements have just been completed by Manager Irwin, of the St. Joseph Interstate Fair, whereby four great auction sales of swine will be held on the grounds during the week of the show, the dates designated being as fol-

lows: Tuesday, September 24, Duroc-Jerseys; Wednesday, September 25, Berkshires; Thursday, September 26, Poland Chinas; Friday, September 27, Chester Whites. Exhibition as well as other swine can be entered for these sales and breeders interested can obtain further information by addressing Mr. Frost at Springfield, Ill.

There will always be good opportunities in this country for the man who will use good common sense in breeding pure-bred stock. One can safely make this assertion because the great majority of farmers will persist in mixing the breeds, and therefore from time to time must get back to foundation stock pure breeding.

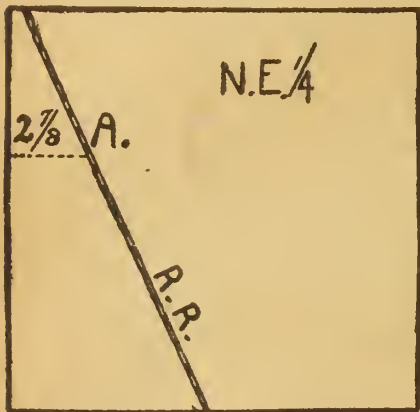

## OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer, who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to any considerable number of our readers. Subscribers who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should remit \$1.00, addressed as above.

## LAW QUESTIONS CONSIDERED.

## MISTAKE IN DEED.

Mr. Peter Larsen, Suring, Wis.—A had a warranty deed to the east half of the north-east quarter of a section of land. A railroad runs through it. About thirty acres of the land is west of the railroad as shown in diagram. In 1892 he sold two acres and seven-eighths of an acre in the northern point of this thirty acres to his neighbor B.

and gave him a warranty deed therefor. In 1900 he sold the balance of the thirty acre tract, about twenty-seven acres, to C, and gave him a warranty deed therefor. C claims to have discovered that A's deed to B really conveys all of the land in the northern forty, instead of only two and seven-eighths acres, and C threatens to make trouble. He found in looking over the abstract which A furnished him, that A's deed to B read as follows: "All of the northeast quarter of the north-east quarter that lies west of the road, two acres and seven-eighths of an acre, more or less according to government survey." C claims A sold the land twice,—once to B and once to him. Can C do A any harm on account of the error in deed?

Answer.—He cannot, except perhaps to bother him with a lawsuit to quiet title and correct the error by a decision of a court. C's threat to make trouble for A by accusing him of deeding the land twice as a crime, is nonsense. He could not possibly succeed in having A convicted of a crime. It is simply a mistake, which a court would correct, and that would be the end of it. An easy way to correct it and without ex-

## 10 Points to Consider When You Buy A Buggy.

Buy direct from the factory. My \$45 Knox Special Top Buggy is sold that way. No dealer's profit for you to pay. No salesmen or jobbers for me to pay to sell my buggies. I sell direct to you.

Get my Knox Buggy on 30 days' trial. Use it a month, test it in every possible way, and send it back if not satisfied. And I will pay the freight both ways.

Be sure your buggy is guaranteed by a reliable maker. I guarantee the Knox for two years. That is another advantage of dealing directly with me.

My \$45 Knox Top Buggy is a comfortable rider. It has a wide, roomy seat. That very same buggy at your

local store sells from \$75 to \$90. So you easily save \$30 in jobber's and dealer's profit.

The body is 24 inches by 54 inches. The gear is oil tempered. Long distance, full clipped axles. Easy riding spring. Full plated reaches.

The shafts and wheels are guaranteed to be split hickory. Oval edge tires.

My Knox buggy is handsomely painted and tastefully upholstered.

It has a four bow leather top. In short, it's the leader of my big line of huggies, carriages and vehicles of all kinds. Remember, I sell them all straight from shop to buyer, guaranteed, and a big saving to you.

Send for my big huggy book. It's free. Tells more about my line. But order my \$45 Knox Buggy now, right from this advertisement. You are safe. Address

R. M. Knox, President, Western Harness & Supply Co., 613 Commercial St., Waterloo, Iowa. P. S. Have been advertising in The Iowa Homestead for six years.

pense would be for B to make a quit claim deed to C for all the land in the N. E. 1/4 of the N. E. 1/4, west of the railroad, except the 2 7/8 acres.

## ADOPTED CHILD—WILL.

A Subscriber, Toluca, Ill.—(1) A husband and wife in this state adopted a child, but took out no papers. Can the child claim any share in the property of its adopted parents when they die? (2) In case a married man wishes to leave all his property to his wife, is it necessary for him to make a will to that effect? (3) Is a will signed by two witnesses valid?

Answer.—(1) It cannot. (2) It is. (3) It is.

## LANDLORD AND TENANT—REPAIRS.

A Subscriber, Eldora, Iowa.—I am renting land for a share of the crops, except pasture and hay land for which I pay cash rent. There is nothing mentioned in the lease about furnishing a water tank. There is a wind mill on the place, but the old water tank is worn out. Can I compel my landlord to furnish a new water tank?

Answer.—You cannot. A landlord is not bound by law to make repairs for a tenant unless it is provided for in the contract.

## HOSPITAL OR INSANE.

A Subscriber, Cedar Rapids, Neb.—Where a person is suspected of being insane, what steps are necessary to have him or her put in an asylum?

Answer.—An application for admission to a hospital for the insane must be made in writing and sworn to, setting forth that the person is believed to be insane and a fit subject for custody and treatment in a hospital, and that he is a resident of the county, etc. This application is filed with the board of insanity commissioners of the county and the board at once takes steps to investigate the matter—calls a hearing, examines witness, etc., and if the person is proved to be insane, the board sends him to an asylum or hospital for the insane.

## ROAD TAX—RENTS.

A Subscriber, Prairie City, Iowa.—(1) A man became forty-five years old in July 1907. The road supervisor did not warn him out to work until the following September. Can he be compelled to either work or out his poll tax or pay it with his other taxes? (2) A rented a farm to B and took a landlord's lien on B's property, including live stock and the increase thereof. B hired a man to work for him on the place, and the man brought a horse along, and worked it some on the farm. Can A hold the horse as security for the payment of B's rent?

Answer.—By law the liability to work on the roads or pay poll tax in lieu thereof commenced on April 1st. At any time between that date and the first day of September, a person might work out his road poll tax if called up on by the supervisor. In your case the man became liable for this tax because on the first day of April he was between twenty-one and forty-five years old. (2) A cannot hold the horse as security for B's rent, because it does not belong to the tenant.

## THE U. S. PURE FOOD LAW.

A Subscriber, Jacob, Iowa.—(1) What are the requirements of what is called the pure food law with reference to dairymen? (2) What is the required milk and cream test in Iowa?

Answer.—(1) What is called the pure food law is a United States law. It prohibits the manufacture within any territory or the District of Columbia, of any article of food or drugs which is adulterated or misbranded; and it prohibits the introduction into any state or territory or the District of Columbia, from any other state or territory, or the District of Columbia, or from any foreign country, or shipment to any foreign country of any article of food or drugs which is adulterated or misbranded. It does not apply to any article consumed in the state where it is manufactured, hence it would have no application to dairymen who sell their milk and products in the state where the dairy is located. (2) It makes no specific milk or cream test for Iowa or any other state.

## USE AND OCCUPATION.

A Subscriber, Egan, Ill.—A rented a farm from B, by oral agreement. B was to build fences and fix up the buildings, and A was to farm the place as long as he and B could agree. No writing was signed or notes given. A has now farmed the place for two years. B has not built the fences nor fixed up the buildings as he agreed to do. (1) Can B recover all the rent agreed upon? (2) Does a verbal contract for lease of land hold good, for more than one year? (3) Can B have a lien for rent without a written contract?

Answer.—(1) He can recover what the use of the premises for the time A occupied them was worth, considering the condition they were in during that time. (2) A verbal contract made for the leasing of real estate for more than one year is not binding at law, but if the lessee goes into possession of premises by virtue of such contract, he is liable for the rental value during the time he occupies them. (3) By the law of Illinois, B has a lien on the crops grown

## OLD-FASHIONED WHEAT CROPS

Big stalks, well-developed heads and large kernels—the best, whether you sow for hay or wheat—will be assured if you use

## Nitrate of Soda

The two wheat fields illustrated above tell their own story. By tests carried on all over this country, it has been demonstrated that 100 lbs. of Nitrate of Soda to the acre has resulted in an average increase of 300 lbs. of wheat on each acre. It is the standard nitrogenous fertilizer, and the cheapest.

## TEST IT FOR YOURSELF ENTIRELY FREE

Let us send sufficient Nitrate of Soda for you to try, asking only that you use according to our directions; and let us know the result. To the twenty-five farmers who get the best results, we offer, as a prize, Prof. Voorhees' most valuable book on fertilizers, their composition, and how to use for different crops. Handsomely bound, 327 pages. Apply at once for Nitrate of Soda, as this offer is necessarily limited. Books of useful information will be sent free to farmers, if paper is mentioned in which this advertisement is seen.

Send name and complete address on post card.

WILLIAM S. MYERS, Director, John Street and 71 Nassau, NEW YORK

# FRUIT GROWING

The rich irrigated lands of the Arkansas, Grand, North Fork and Uncompahgre Valleys of Colorado, and the Farmington District of New Mexico, offer exceptional opportunities for the fruit grower. Pears, Peaches, Apples, Grapes, Apricots, Plums, Melons of all kinds and small fruit of every variety are raised with a greater average yield per acre—and a finer quality—than in any other section of the United States. Markets are close at hand and the demand exceeds the supply.

## The Denver & Rio Grande R. R.

"Scenic Line of the World"

reaches all the above districts and offers special inducements to those seeking locations. Write to-day for free descriptive booklets.

S. K. HOOPER, GENERAL PASSENGER AND TICKET AGENT, Denver, Colo.

or growing for the rent and also for the faithful performance of the terms of the lease, whether in writing or not.

## POLL TAX—IOWA.

A Subscriber, Pisgah, Iowa.—This year I offered to work out my poll tax at several times, but the road boss kept putting me off till late in the fall, when he was taken sick and died. The township trustees say I will have to pay in money. Is that correct?

Answer.—It is.

## INHERITANCE IN SOUTH DAKOTA.

A Subscriber, Spencer, South Dakota.—A and B are husband and wife, and own a quarter section of land in this state. In case A should die without a will, what portion of the property, including both real and personal property, would B get according to the laws of South Dakota?

Answer.—This correspondent is like hundreds of others who seek legal information from this department. They are careless and indifferent in the statement of facts. Apparently they give the matter but little thought or attention. Often necessary facts are entirely omitted; sometimes in a rambling, incoherent letter, full of minor circumstances and trivial details, the main facts of the case will be missed entirely. The foregoing statement is not so bad as that, but it is very lame, and has to be guessed at. We guess that the property is in A's name. We also guess that there are no children. If these guesses be correct, B would be entitled by law to one-half of the property, and the other half would go to A's father,—if he has no father

living, then to his brothers, sisters and mother in equal shares.

## HUSBAND AND WIFE.

An Illinois Subscriber.—(1) A husband and wife in this state have no children, and own a farm and personal property. Suppose the husband should die first, without a will, what share of the property would the wife get according to the laws of Illinois? (2) In the year 1901, a husband and wife were living in this state. A child was born to them, but died; then the wife died. When the wife's father shall die will the husband be entitled to any of his estate?

Answer.—(1) One-half of the real estate and all of the personal property. The other half of the real estate would go to the deceased husband's parents and brothers and sisters in equal shares. (2) He will not.

## MUTUAL TELEPHONE COMPANY.

A Subscriber, Murray, Iowa.—A farmers' mutual telephone company, incorporated under the laws of Iowa, is doing business in this vicinity. A section in its by-laws reads as follows: "Any stockholder wishing to sell his share, shall first offer the same to the company; the company agrees to buy the same at not to exceed its par value until the second day of January, 1905, and at a ten per cent discount after that date." (1) Can the company legally take such discount? (2) Can a member of the company rent his share to an outside party to use the line, without the consent of the company?

Answer.—(1) The section of the by-laws above set forth, probably cannot be enforced at all. It is vague, uncertainty and most likely not valid for any purpose whatever. (2) No facts are stated as to this question,—simply the, bald-headed question. We guess not, but no one can give a reliable answer

without an inspection of the articles and by-laws of the company.

#### HEIR'S PORTION—DEBTS.

A Kansas Subscriber.—A and B were husband and wife living in Iowa. A owned 160 acres of land there. They had six children, named C, D, E, F, G and H, all married. A died without making a will; later G, a daughter, died leaving a husband. At the time of G's death her husband borrowed \$100 from B, and gave his note therefor. (1) Can B get judgment against G's share of A's estate, for the amount of the note? (2) C borrowed money of a man by the name of J. Can J collect the amount of the loan from C's share of A's estate?

Answer.—(1) She cannot, but she can sue G's husband and get judgment against him for the amount of the note, and then attach or garnishee money going to him from A's estate, or rather, his deceased wife's share of A's estate. (2) We think he can.

#### CONDEMNATION PROCEEDINGS.

A Subscriber, Galesburg, Iowa.—(1) Where an electric railway is constructed along a public highway which is sixty-six feet wide, how many feet can the electric company take from the land owner? (2) In such case does the electric company remove the fences, rebuild them, and afterwards keep them in repair?

Answer.—(1) None whatever, without the land owner's consent, unless they obtain it by condemnation proceedings, and paying compensation to the land owner. (2) It does not. The compensation decreed for the land owner is supposed to include the trouble and expense he will be put to in the matter of fences.

#### DOWN AND OUTSIDE.

A Subscriber, Tama, Iowa.—A telephone company owns and operates a line in this vicinity. The line is two miles long, east and west, with a side line nearly a mile long at the east end. Each member of the company has a three dollar interest in it. A, who is not a member of the company, lives at the west end of the main line, and he made application to buy an interest in the company. A meeting was called and it was proposed that if A would pay into the company's treasury five dollars, he might go on the line, and have the rights and privileges like the members of the company, except that he could neither vote nor have a voice in their meetings. A accepted the proposition, and the matter was duly voted on and carried by the meeting. Some of the members now want a division of the line. In case it should be divided would A lose his interest in the company?

Answer.—We think he would, because he was never taken into full membership. He really bought no interest in the company, but only got the privilege of being put on the line, and using it for his money. This plutocratic com-

pany did not, in fact, receive him as a member of it, but only sold him a privilege. He is down and outside. Truly the common people seem to be at the mercy of the corporations.

#### INHERITANCE IN KANSAS.

A Kansas Subscriber.—(1) Where a wife owns land in her own name, what share of it does her husband inherit in case of her death? (2) In such case, what shares go to her children by law?

Answer.—(1) One-half. (2) One-half.

#### ADOPTION OF MINORS.

A Subscriber, Shellsburg, Iowa.—(1) Can a widow who has one child of her own, lawfully adopt a boy who is over twenty-one years old?

Answer.—She cannot. The law provides for adoption of minors, and does not contemplate the adoption of adults.

#### GARNISHMENT.

A Minnesota Subscriber.—A is a laboring man, and B is a merchant. A owes B a sum of money for merchandise. (1) Can B garnishee A's wages? (2) How much money can A hold free from garnishment? (3) Can a company or corporation be garnished for the debts of its employees?

Answer.—(1) B can garnishee A's wages, except \$25 earned by A during the thirty days preceding the garnishment. (2) \$25 earned during the thirty days preceding the garnishment. (3) It can.

#### DEATH OF LEGATEES.

A Subscriber, Van Buren Co., Iowa.—Several years ago A made his will in which, among other bequests he bequeathed \$2,000 to his wife, and a certain portion to his son. The wife and son both died recently. The son left a wife, but no children. A has no children living, but has five grandchildren by another son. A is still living and is over ninety years old. Since he made the will he has lost his mind, and a guardian was appointed for him a few years ago. His property consists of money, notes, etc. (1) When A dies, who will get the \$2,000 which he bequeathed to his wife? (2) What portion of A's property, if any, will the wife of the son first above named get?

Answer.—(1) If the five grandchildren are the grandchildren of the deceased wife, they would get the \$2,000 bequeathed to her. (2) None of it. The portion bequeathed to the son will go to the five grandchildren,—children of the other son.

#### The Coal Situation.

In an interview with Mr. W. L. Park, general superintendent of the Union Pacific railroad, he states that the coal situation is the most serious that confronts the people, particularly in the West. The population is growing so fast that the demand upon the mines are very much beyond their capacity. "It is quite likely that next winter

## Hay Makers Implements

### Clean Sweep Loader

The business hay loader, but not the kicking kind. Does not bunch, wad, tangle nor thresh hay, and does not elevate manure nor trash. Divides a swath—the only machine for satisfactory cloverseed gathering. Works on hillside or level, in wind or calm. Carrier raises as load increases. Detach without getting off load. Light draft, strong and durable.

## SANDWICH Side-RAKE

### Delivery RAKE

TEDDER AND RAKE IN ONE—BETTER THAN EITHER

Does not rope the hay, but teds it into light, fluffy windrows so it cures perfectly. No need for second stirring, which breaks up stems and leaves. It rakes clean and it requires no dumping. The easiest of all rakes to operate, a boy old enough to drive can do it.

Best Pair Hay Making and Saving Tools on the Market. Send for catalog and get all particulars.

will see a much more serious condition than existed during the past, for the reason that the country west of the Rock Springs mines is settling up very rapidly and requires the entire commercial output at the present time. Recently very little Rock Springs coal has been shipped east of Cheyenne and practically none has left the rails of the Union Pacific or its affiliated lines during the past year. It may be possible for the consumers along the Union Pacific, east of Rock Springs, to obtain this coal, if the dealers store it during the summer. This we are urging them to do, knowing how much the people appreciate the quality of this fuel. This would also give them some insurance against a coal famine in the winter of 1907-1908, to which they are entitled. As the railroads will be entirely segregated from the coal business next winter it is up to the dealers to provide such facilities for storing and it is up to the people to see that they do it. Heretofore, the railroads protected the people against coal shortages by selling from

their company supply coal to individuals and to dealers. Under the Hepburn bill this will not hereafter, be permitted. Personally, I intend to lay in a year's supply of coal and I am glad to give the people the tip that they had better do likewise. If their dealers do not store it, it would be wise for small families to club together and put some in storage or those who can afford it, to fill their bins and cellars; of course it will be much better for the dealers to provide facilities for storing, if they will do it. It is by no means a question of transportation. The problem will be producing the coal in sufficient quantities to meet increased demands. I would not like to see the people along our line suffer as they have done in Montana and Dakota and in Canada during the past winter, and I want to get on record this early that they must look out for themselves to a greater extent than they have done heretofore, on account of the changed conditions."

## VETERINARY MATTERS

PROFESSIONAL veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of \$1.00. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. All veterinary inquiries should be addressed to this office.

### SYMPTOMS AND TREATMENT.

#### SPLINTS.

I have a colt four weeks old that has a sharp bone on each of its front legs between its ankle and knee. It was there when the colt was foaled. I would like some remedy to get rid of them.

We would advise you to let them alone, as they were present at birth and may remain throughout life or be absorbed by nature. It seems likely that they merely are extra large splint bones.

#### WOUND.

I have a three-year-old bay mare which was cut in barb wire on the right hind leg, just a little below the knee joint, last November. I used carbolic acid in it to wash the wound twice a day for a month and after that once a day. I also used a liniment. Have kept the proud flesh away with burnt alum, but it seems that her leg and joint are enlarged.

Remove hair from about wound and blister thoroughly with cerate of cantharides. Repeat if necessary in two or three weeks if the skin will stand it. Apply oxide of zinc ointment to wound if still raw.

#### ITCH.

I would like to know what is the matter with my pigs. When about three weeks old they get the scours and then get an itch. They rub and scratch most of the time and do no good. I have dipped them and tried other things, but have failed. They have a dry house to stay in.

Keep them out of the house, giving free range on grass and do not feed corn in any form. Their food or that of the nursing mother has been too rich or corn has been too lavishly used. The itch indicates either lice or dirty bedding. After dipping rub them thoroughly with flowers of sulphur.

#### LOSS OF PIGS.

I would like to know what is the matter with my pigs. When born they seem to be healthy and I think I never had finer looking pigs before. My sows are healthy and in good condition. I have fed them oat middlings as slop and corn, a little more corn than oats. My hog house has a wood floor which I keep very clean with dry bedding. Last fall hog cholera killed the hogs for some of my neighbors, so I sometimes think it is hog cholera. What do you think?

There is nothing in your description to give a hint as to what disease is causing death. A post mortem examination should be made and if the disease is cholera, ulcers will be found upon the lining of the first large intestine (caecum) and red spots will be found elsewhere throughout the body. It seems improbable that it is cholera. More likely it is from worms or something amiss with the feeding. Write again giving a full description of the symptoms shown by the sick pigs and what you find on opening one that dies.

#### PARALYSIS.

About four weeks after my sows farrow they get lame and stiff and then they break down behind and dry up in milk. I have two old sows and one young sow afflicted in this manner. I feed one-half bushel of corn, dry, one-half bushel ground oats and wheat in a thick slop to twelve head. They have the run of blue grass and timothy pasture. Is this contagious? Would it be advisable to save sows for next year out of the afflicted sows?

As often explained in these columns, this trouble is induced by over-feeding corn and by lack of exercise, but there is a hereditary tendency to it in all plethoric, lard hogs. It is to be avoided by feeding no corn to growing and breeding stock and by allowing plenty of out-door exercise on grass, clover or alfalfa. Lime water given freely two or three times a week also proves beneficial as a preventive. The sows should not again be used for breeding purposes if they recover. Feed them slop of bran, middlings, oil-meal and water and in it mix lime water once daily. Rub loins twice daily with druggist's soap liniment.

### IN TIMES OF EMERGENCY

When a bad burn, scald, sprain, wound, cut, bruise or other accident demands instant attention **OLEO CUREINE** (guaranteed under the Pure Food and Drug Law) is invaluable. It is antiseptic—allays pain instantly—stops inflammation and cures with great rapidity. Indispensable in every household. By mail 35 cents a bottle. Send for booklet. Agents wanted everywhere in rural districts.

## OUR DAIRY DEPARTMENT

ALL communications relating to dairy matters should be addressed to this office. Inquiries of general interest regarding dairy management and production will be promptly answered.

### DAIRY IMPROVEMENT ASSOCIATIONS.

Dairy farmers are organizing. The plan suggested recently by an Illinois dairy expert—that of moving herds from "guessland to fact pasture"—is being approved of by dairy men in the corn belt by concerted action, as those who follow current events may have already noticed.

Wisconsin takes the lead generally in these matters for natural reasons. One of the first cow testing associations in that state was recently established and instigated through the efforts of a creamery. Under the rules adopted each patron is to provide himself with a milk scales, sample bottle, and preservative. The idea is to have the cow owner merely keep a record of the annual yield of each cow by weighing each milking and taking samples which will be submitted to the creamery operator for testing for butter fat. The plan will be watched with interest.

It is still news to many that a progressive northern Minnesota buttermaker has started a similar association. The members are patrons of the creamery and the purpose is to improve the herds of the members, indirectly increasing the

receipts of cream for the buttermaker. This too, is the first association of its kind in the state.

In the same spirit of improvement leading dairymen in Illinois, including representatives of different breeds and experiment station men recently gathered and formed a state improvement association. The purpose of this body differs from those mentioned before in that the prime object is to encourage the use of pure-bred sires on the herds of the state. It is not the intention, however, of promoting the interests of any one breed. The testing of cows is left to the individual members and in comparison to the need of pure-bred sires it was the general opinion that the testing of cows is more of minor importance, though of course fully essential to careful management. The importance of grading up a herd no doubt is given as little attention as the weeding out of boarders.

In all moves of this kind the creamery operator or buttermaker can exert a great deal of influence. As a class these persons are well posted and more progressive of dairy lines than the farmer. Much can be expected from these associations where the leader is a good manager. The difficulty to encounter will be the hesitancy of farmers to adopt new methods which will entail what appears to them to be more labor.

### Variation in Test.—Increases Returns When Made Into Butter.

To the Editor of The Homestead:

You submit to us the following inquiry received from a subscriber:

I wish to ask a few questions in regard to cream tests. Why is it when we sell cream we find our test running from 30 per cent to 50 per cent whereas when we make our own butter it yields from 70 per cent to 80 per cent?

Variations in test is, to the seller of cream, a somewhat perplexing problem. Not knowing its causes he is almost certain to lay the blame upon dishonest practices of the creamery-man. The wonder of it all, to the writer, is that the variation is not more than it is. Such a catechism as the following is a common thing when the question of variations in test of cream is being discussed by the producer and the creamery operator:

Q. You say you use the same separator?  
A. Oh, yes.  
Q. And you have not moved the cream screw?  
A. Have not touched it for six months.  
Q. How much rinsing water did you use?  
A. I don't know.

Ah, there is the cause. You probably use variable amounts of rinsing water and the test of your cream, of course, must vary. The correct solution of the difficulty and then again not correct.

What about the constant speed? What about constant temperature? The writer recalls an experiment conducted by students of his class where over 36 per cent variation was caused by a temperature range from 34 degrees F. to 103 degrees F. So many causes there are that the producer should be more alarmed because of constancy of test than because of ever present variability. Yet, there is before the writer a record of a patron whose cream test has not varied 2 per cent during the last three months.

The question has been asked, "Why is it that when we sell cream we find our test running from 30 per cent to 50 per cent, whereas, when we make butter it yields from 70 per cent to 80 per cent?" In other words, account for the variation in test, and the greater returns when made into butter. The first question has already been answered. The answer to the second is to be found in a knowledge of the composition of butter. Speaking generally we say that 100 pounds of butter contains eighty-two pounds of butter fat, two and one-half pounds salt, one and one-half pounds caseous matter and fourteen pounds of water. That is, if eighty-two pounds of butter fat contained in cream were churned and all recovered as butter you would have an increase of eighteen pounds. This, in the language of the creamery-men, is the over-run. Evidently the figures given in the question asked are but estimates. If we take 100 pounds of 30 per cent cream we have thirty pounds butter fat. If 70 per cent is returned as butter we would have seventy pounds of butter.

If the cream yields 50 per cent as butter fat and 80 per cent as butter, the over-run would be 60 per cent. Either of these percentages are far beyond the possibility of the most enterprising mak-

## "CHEAPEST" AND "BEST" CREAM SEPARATORS

More truly is the best the cheapest in the purchase of a cream separator than in the purchase of any other farm machine. The really cheap cream separator is the one which will perform your work in the most profitable and satisfactory manner, and last the greatest number of years. Basing the value of the separator upon durability, without considering quality of work, if it lasts but two years it is worth only one-fifth of what the separator is that lasts ten years, and one-tenth of what the one is that lasts twenty years. In addition, if it loses a large percentage of the cream and is difficult and expensive to operate its value is placed at even a still lower level. DE LAVAL cream separators are today admitted by every experienced user to do as near perfect work as a cream separator possibly can. Proof of this is seen in the fact that over 98% of the world's creameries and all the largest users employ the DE LAVAL exclusively. As to durability, the DE LAVAL has an average life of twenty years. The very best of other separators do not last over eight or ten years at the very longest, and the poorest generally become worthless in from six months to two years. At the same time these machines are incapable of doing good work except under ideal conditions, such as cannot possibly be had in farm use, otherwise they lose a large percentage of the cream, are hard to operate, and in reality are but little better than gravity setting systems. It is therefore seen how little the first cost of a cream separator really means. The cost in the end is what counts. All in all, considering dollar-for-dollar value, a DE LAVAL machine gives from five to ten times more true separator worth than any other machine on the market today. These are not mere paper claims, but facts, the proof of which can be had for the asking.

will make more money for you and give you less trouble than any other. You surely are anxious to make no mistake in buying a separator—why not investigate our claims and make us prove them? That's all we ask. Send today for book "More Milk Money," and our Golden Rule Guaranty.

Omega Separator Co., 35 Concord Street, Lansing, Mich.

er of butter. From 20 to 25 per cent is counted excellent work. A larger over-run than that would be to make a poorer quality and place a maker liable to fine and imprisonment for making unlawful butter.

The question in itself is good, in that it shows an inquiring mind. Much doubt and many questions as above would be readily answered in part by the asker if the producers of the country were possessed of a Babcock test. They would then be able to lay the blame at the proper door. A tester in the hands of an intelligent man would also be the source of some surprise to him, and in some cases, to the buyer of the cream and to some of the cows as well.

John Bower.

Dairy Dep't. Iowa Ag. College.

Do not neglect the spraying, no matter how rushing the work may be. The rot is a great enemy to the plum, peach and grape and nothing but effective spraying will prevent it. While applying the Bordeaux for this, it is little more trouble to add some arsenic for the insects. Paris green will do, a half pound to fifty gallons of Bordeaux for apple, pear and cherry; half that for peaches and plums. The strength of the Bordeaux must also be made in the same proportion for these trees as the copper sulphate or blue stone will also burn the leaves if applied too strong.

### Conner & Cochran Make Good Sale.

The sale of Short-horn cattle made by Messrs. M. T. Conner & S. J. Cochran, of Auburn, Neb., on April 30th, was quite a success, considering the very bad condition of the weather at that particular time. The bad snow storm kept a good many of the

buyers away and the consequence was that some of the cattle sold away below their value. The top price was \$190, paid by Mr. Henry Kuper, of Humboldt, Neb., for No. 13 in catalog, a daughter of Merry Marshal, and having for her dam Flower Girl. This great cow is a straight Scotch animal and will make a good addition to the great herd now owned by Mr. Kuper. The great Scotch bull, Gloster Prince, went to Mr. F. E. Houston, of Brock, Neb., at \$150, and was one of the best bulls sold this year for the money. Below is a list of those selling for \$75 and over:

Lot 1, William Daly, Auburn, Neb. .. \$125  
Lot 2, A. M. Engles, Auburn, Neb. .. 75  
Lot 8, A. M. Engles, Auburn, Neb. .. 75  
Lot 12, F. E. Houston, Brock, Neb. .. 150  
Lot 13, Henry Kuper, Humboldt, Neb. .. 190  
Lot 14, Henry Kuper, Humboldt, Neb. .. 80

Lot 17, E. H. Euhling, Falls City, Neb. .. 75  
Lot 25, A. M. Engles, Auburn, Neb. .. 90  
The average on the entire sale was \$65.

### The Cream of Cream Separators

The Sharples Dairy Tubular is the cream of cream separators—the pick of the whole bunch. Supply can wait low, you can fill it with one hand. All gears enclosed, dirt free, absolutely self-cleaning—no oil holes, no bother—needs only a spoonful of oil once or twice a week—uses same oil over and over. Has twice the skimming force of any other separator—skims twice as clean. Holds world's record for clean skimming.

Bowl so simple you can wash it in 3 minutes—much lighter than others—easier handled. Bowl hung from a single frictionless ball bearing—runs so light you can sit while turning. Only one Tubular—the Sharples. It's modern. Others are old style. Every exclusive Tubular feature an advantage to you, and fully patented. Every Tubular thoroughly tested in factory and sold under unlimited guaranty. Write immediately for catalog J-121 and ask for free copy of our valuable book, "Business Dairying."

## IN THE LIVE STOCK FIELD.

Mr. J. W. Pitman, of Lohrville, Iowa, has sixty head of spring Duroc Jersey pigs this year, together with a lot of fall stuff. He also has a lot of spring yearlings and these he will hold for future sale. His present crop is sired by his well-known herd boar, Young Advance, Orion Jr., Crimson Chief, Ohio Chief II. and two litters by another son of Ohio Chief. He has a splendid three-year-old daughter of Orion in the herd called Orion's Queen. She is out of Nebraska Queen by Red Chief, and she is one of the best daughters of old Orion now living. He sold a litter sister to her for \$205, and he has another litter sister to her in the herd. Mr. Pitman can spare one of his herd boars, Orion Jr., a good son of old Orion, also a few good sows at any time to anyone who may want them.

Mr. Harvey Johnson, of Logan, Iowa, one of the foremost and one of the most reliable Poland China breeders in the state of Iowa, has a nice crop of 110 spring pigs, mostly sired by J's Ideal, a son of the Nebraska State Fair winner, Expansion Sec. He has a splendid lot of fall sows and some good fall boars sired by J's Dude, his former herd boar, and also by Chief Tecumseh 4th. Among these fall boars are several that breeders could use at the head of herds. One of the best things we have seen in recent years on the Johnson farm is a yearling boar sired by J's Dude and out of Columbia 8th. Here is a boar among boars, not only bred right, but is right, and he belongs to the celebrated Columbia family. This boar has plenty of size and ample finish and he will pass the most critical inspection. Mr. Johnson also has two other good yearling boars on the farm. Should any of our Homestead readers want a boar it will pay them to write Mr. Johnson.

## SUTTON HERD OF DUROC JERSEYS.

A recent visit to the herd of Duroc Jerseys owned by Mr. Chas. Van Patten, of Sutton, Neb., found the spring pigs coming along fine. At the present time Mr. Van Patten has about 100 head mostly of March farrow and in few places have we been able to find as growthy a bunch of pigs as was seen here. They are mostly the get of Brooklyn Boy, a son of the great Keep On, and having for his dam Lady Advance by Advance. This young hog has proven a wonderful breeder as his get will show that are now on the farm and Mr. Van Patten considers them far ahead of anything that he was able to get from the many good purchases he made in the spring sales. The value of this young hog as a sire is sure to contribute much to the present standard of excellence of this herd. Reuben Lad, a son of Red Reuben, is a very promising fellow and Mr. Van Patten thinks enough of this hog that he will be seen in show shape at the state fairs this fall. He is very strong in those characteristics that have made the Duroc Jersey breed admired in the eyes of those who are interested in the economic production of the high class market hogs. The sows now in use in this herd are very strong in individual merit and as breeders they would be very hard to beat. Sows of great length, good depth and of great breeding quality, has always been Mr. Van Patten's hobby and it was he that bred the great sow Rosebud Lady, that sold in the Gilbert Van Patten sale last spring at \$1,575, going to the well-known herd of Henry Warren, of inland, Neb. One of the good sows of the herd is Red Lady II she by Red Reuben, dam, Sutton Lady, the show sow that Mr. Van Patten made a first prize winner at the Nebraska State Fair in 1902. This sow is raising a litter of ten good pigs by Brooklyn Boy. Mr. Van Patten made many good purchases at the good sales last spring and among them was Red Bird, a daughter of Red Chief I Am, who now has a fine litter by Medoc, a son of Kan't Be Beat. Another of the good purchases was a gilt by Red Chief I Am, who is now raising a good litter by Billy K.'s Model. This is only a mere mention of the many good sows in this herd and we can safely say to those who will be in the market for a good male pig this fall, that this would be a good place to put your order. Write him your wants and mention The Homestead.

## LAST CALL HARVEY &amp; SON AND WRAY &amp; SON'S SHORT-HORN SALE.

The last announcement of the dispersion sale of Short-horns to be held at Maryville, Mo., on Wednesday, May 29th, by Messrs. J. H. Harvey & Son, of Maryville, Mo., and B. F. Wray & Son, of Hopkins, Mo., will be found on page 24. It is in these dispersion sales that buyers get the advantage of having an opportunity to buy the best that good breeders have spent time and money gathering together. Of the forty-four lots, the larger part are the property of Messrs. Harvey & Son. Eleven of the offering are bulls. The thirty-three females are just such cattle as will go on breeding as they have done for these gentlemen and will make their new owners money. The bulls, of which mention was made last week, will be found good propositions, but have not been highly fitted. Both gentlemen sell their herd bulls on a Duchess of Gloster that has been used by Messrs. Harvey & Son for two years, giving excellent satisfaction as a breeding bull. Among the females is the Cruickshank Victoria, a cow, Scottish Victoria, listed as Lot 2. She is just two years old, was got by Gallant Son, a pure Cruickshank bull tracing to Imp. Gladiolus by Pride of the Isles. Her dam, Violet Rose Victor, was got by the Bellows-bred bull, Scottish King. Then follow such sires as Red Victor, Commander, Imp. Julius, Roan Gauntlet, etc. Individually she is one of the good ones, a fine red and a thick, meaty young cow, due to calve by sale day to the service of Messrs. Harvey & Son's Scotch herd bull, Baron Gloster. Her dam, Violet Rose Victor, is listed as Lot 3. She sells with a six-months-old calf at foot by Baron's Gloster, and is in calf since December 26th to the service of the same bull. No better-bred Victorias are found, and both are the kind that prove valuable investments. A Cruickshank Sybil, Longbranch Sybil 4th, is listed as Lot 4. She was got by Victoria Baron, a Cruickshank Victoria bull, that is considered one of the best of this tribe. She is a good roan, a low-down, easy-keeping cow, and sells with a good red roan bull calf at foot and is in calf since January 19th to Baron's Gloster. A Scotch Miss Ramsden is listed as Lot 5, Lady Aberdeen 2d. She was got by

Columbian Lord, a pure Scotch bull got by the Secret bull, Sovereign Lord. Her four-year-old daughter got by Capt. Ramsden is listed as Lot 6. Among the Scotch-topped sorts that have given such good results in Messrs. Harvey & Son's herd is the four-times Scotch-topped Young Mary cow, Elsie's Darling, a three-year-old cow got by the Gerlaugh bull, Morning Flash, a Missie bull that was got by Imp. Sittytton Flash. Scotland's Crown, one of the best breeding bulls in Missouri, Prince Rupert and Victoria Baron are the four top sires. Messrs. Harvey & Son purchased this young cow at the Bellows Bros. sale in 1905, paying over \$200. She calved Sept. 3, 1906, to the service of Good Choice. The calf is a fine roan bull and an individual fit to head any herd, he being a low-down, easy-keeping fellow, true in all his lines. Lot 9, Gloster's Lavender, is a pure Scotch Duchess of Gloster got by Imp. Lavender Champion, a Duthie-bred bull. Nine pure Scotch bulls follow in her pedigree and all were bulls that made reputations as sires of good stock. In Highland Gem, listed as Lot 10, buyers will find a double decker got by the prize winner, The Lad For Us, he by The Lad For Me, Messrs. J. G. Robbins & Son's great show and breeding bull. She sells with heifer calf at foot, Oxford Belle, her two-year-old daughter, got by Gloster's King 2d, is listed as Lot 11 and is a promising young brood cow. The entire lot of mature females in Messrs. Harvey & Son's herd are cattle selected by them with the idea of building a herd second to none. They would not be offered, but other business compels them to let the cattle go. Messrs. Wray & Son have not been in the business so long, but they started with some very useful stock, among which is the Imp. Beauty cow, 4th Valley View Beauty, got by Valley Knight. She is a mixed Scotch and Bates-bred cow, a red and a good producer. Her three-year-old daughter, got by Rosemont, a C. C. Norton-bred bull, is listed as Lot 25. She sells with heifer calf at foot by Baron's Gloster. Rosegold 3d by the same sire and of the same family sells with heifer calf at foot by Baron's Gloster, Messrs. Harvey & Son's herd bull. This pair should be appreciated and especially so as the heifer promises to make a grand cow. Messrs. Harvey & Son and Wray & Son are offering an exceptionally useful lot of cattle, but do not expect fancy prices and buyers who take their cattle will get stock that will do good. If you have not received a catalog write for one at once and arrange to attend the sale.

## ALLEN'S MULBERRY GROVE HERD.

A representative of The Homestead recently passed the time of day with Mr. H. S. Allen, of Russell, Iowa, one of the foremost breeders of Durocs in the state of Iowa. Mr. Allen has never failed to land on both feet and his winnings at the World's Fair and the Iowa State Fair have won for him an enviable reputation as a breeder of red hogs. At the head of the Mulberry Grove herd stands two herd boars whose reputation in the leading show rings and as sires have won for them a place among the foremost sires in the state. Crimson Wonder Again, the first-prize and sweepstakes boar at the Iowa State Fair, and Top Notcher Again, the World's Fair boar, share the honors of herd boars in this herd. Crimson Wonder Again is a son of Crimson Wonder I Am, also a first-prize and sweepstakes Iowa State Fair winner, and here is the first instance at this great show in Duroc Jersey classes where a son of a sweepstakes winner came out and repeated the performance. As a sire Crimson Wonder Again has come up to expectations, and he has some splendid pigs to show what he is doing as a sire. While looking over the Allen herd we saw daughters of Crimson Wonder Again that would be good in any company. It will be remembered that he was bred to Ohio Belle, the \$2,000 gilt that Mr. Sam Murphy sold last winter. Mr. Allen has some good pigs to show by him again this year. Top Notcher Again has also been used very liberally and his reputation as a sire is well sustained. This boar has been a proven sire for the past few years and Mr. Allen has sent out some of his get that made good reputations for themselves in other herds. With these two boars at the head, breeders can well expect some good things to come from the Allen herd again this year. Just now Mr. Allen is offering a few good sows for sale bred to Crimson Wonder Again for fall litters, and he has a few choice fall boars for sale sired by Top Notcher Again. These sows that Mr. Allen offers for sale are nearly all sired by Top Notcher Again and bred to Crimson Wonder Again certainly make them desirable enough to go into any herd. Should any of The Homestead readers want one of these they had better write Mr. Allen at once. He is pricing these right if taken soon, as he wants the room and has more now on the farm than he cares to take care of. His spring crop of pigs number 125, besides a lot of fall stuff. Write Mr. Allen or go and see these sows and boars. See page 21.

## TEEL'S SHORT-HORN SALE—LAST CALL.

The offering of Short-horns which Mr. Walter Teel, of Rushville, Ill., is offering at public auction at the breeding farm, on Friday, May 31, will please the buyer who is in the market for the dual purpose type. This herd, founded by the late Jas. A. Teel, has been conducted along these lines for many years, and those who have been customers in the past will find this offering in keeping with the general excellence of former sales. The breeder who is in the market for a good Scotch bull will find in Cherry Grove Banff 3d, one of this sort. Many of the calves which sell with their dams in this sale are sired by this bull, so that those present sale day will have an opportunity to see how this bull breeds. He was sired by the noted show and breeding bull, Imp. Lord Banff, now in use at the head of the well-known herd of Short-horns, owned by Mr. Milton E. Jones, of Williamsville, Ill., and his dam was one of the best cows in the herd, being sired by Imp. Cupbearer. Mr. Teel would not part with this bull, but has two crops of calves in the herd and can no longer use him to advantage. This is an opportunity that breeders should not overlook. The females are in good, thrifty condition. Every one of breeding age is either safe in calf or has calf at foot. We wish to call attention to some of the females to be sold. Orange Blossom 5th is a daughter of Imp. British Prince, (a good likeness of this

bull appears on another page of this issue) a bull used in this herd with very good results, and his dam, Marmion, was got by Marmion, another bull which the late Jas. A. Teel, used in the herd. Orange Blossom 5th is due to calve before sale day to the service of Cherry Grove Banff 3d, and should prove a valuable cow in any herd. Lady Cruickshank 6th by Marmion, is a cow of great scale, smoothness and quality. She has been a valuable breeder in this herd, and will meet with the approval of those present sale day. Princess Orange Blossom is a three-year-old daughter of Imp. British Prince and is out of Schuyler Orange Blossom 3d. Orange Blossom 4th by Marmion, is the mother of two of the attractions of this sale. She is heavy with calf to the service of Cherry Grove Banff 3d, and is one of the attractions of the offering. Schuyler Orange Blossom 3d is also the dam of one of the best heifers in the auction. She has been a valuable breeder and is only placed in this offering as an attraction. Schuyler Rose 23d is an attractive proposition. She was got by Marmion, and out of Schuyler Rose 18th. This family have been very reliable breeders in the herd, always producing good calves. Individually this cow is of the deep, wide, low-down, thick sort, that find ready sale at any time. There are listed in this sale ten two-year-old heifers by Imp. British Prince, that will prove attractions in any herd. Mr. H. G. Teel consigns ten head to this sale, including his herd bull, Cherry Grove Banff 5th. This young bull is also the son of the noted Lord Banff, and is in good condition to be used in some good herd. The females which Mr. H. G. Teel included in this offering are of the Orange Blossom, Michigan Casket, Umattila and other noted families. They are sent forward in good breeding condition, but have not been pampered. There never was a time in the history of the breed when dual purpose Short-horns were in as much demand as now, and this offering is made up of cattle which will suit the buyer in search of this type. The Teel herd has long been noted as being one of the representative dual purpose Short-horn herds of this country, and we are sure that this offering will find favor with the breeders and farmers who are in the market for this class of Short-horns. The catalogs are out and will be sent to all who write for same as per the announcement on last page of this issue. Plan to be present at this sale and mention this paper when writing.

## LIEBHART HAS GOOD CROP OF DUROCS.

There is not one thing that gives us better hope for the future of the pure-bred stock industry than to find a new breeder who has launched in the business with a full conception of what requirements are embodied in the successful breeder. It is not an uncommon thing to find those newer converts to the business striking along ill-defined lines without the least idea of what is necessary to be done in the care and mating of pure-bred animals in order that successful and satisfactory results may emanate. It was the pleasure of a Homestead field man to visit recently the well-kept farm of Mr. Chas. Liebhart, of Marquette, Neb., where is to be seen one of the very good herds of Duroc Jersey hogs in this section of Nebraska, and this in view of the fact that Mr. Liebhart is not of the older breeders. To be sure he has been breeding Durocs for about two years, but the quality and character of his herd would indicate that he had been in the business for a much longer term than this. We are absolutely surprised to find there so many individuals of such outstanding excellence. At the head of this herd is Echo Wilkes, one of the most promising young boars we have had the pleasure of looking at this year. He is a son of Beauty Wilkes and having for his dam Lulo Girl, the sow Mr. Van Patten, of Sutton, Neb., showed with much success in 1904. This boar is very large for a yearling and carries an even width from end to end that you seldom find on a boar. He has great depth of body, a good head and ear and an extra good bone. The present crop of pigs now on the farm by him show up exceedingly well for him as a breeder. He is assisted in service by I Can Win, a son of the great breeding boar, Medoc, he by the \$6,000 Kan't Be Beat. His dam was Miss Advance by Advance, she being a litter sister to Proud Advance. The breeding of this boar is too well known to need any explanation and his value as a sire has contributed much to the present standard of excellence of this herd. Most of this year's crop of pigs are by this hog and among them we find individuals that have a right to make winners. Mr. Liebhart offers this great boar for sale at a very reasonable figure and anyone wishing a boar of good breeding and a proven sire should come and look him over. There is a very strong bunch of sows now on this place, of which we will make mention in a later issue. If you are in the market for a good boar or would like to place an order for a spring male write Mr. Liebhart, as he can supply your wants. When writing please mention The Homestead. See page 17.

## KUPER'S HEAVY MILKING SHORT-HORNS AT AUCTION, MAY 28TH.

We wish to make special mention of some of the great Scotch and Cruickshank cows to be included in the sale of Short-horns, to be held at Humboldt, Neb., on May 28th. This sale will surely be the breeder's opportunity to buy some breeding stock that is not only right individually, but that has the breeding so much sought in Short-horn circles. In order that he might make his sale the more attractive, Mr. Kuper has gone into his breeding herd and without fear or favor, selected therefrom those cows that have proven his best and most profitable producers. In saying this the writer speaks advisedly as we have known this herd almost since it was founded and in this way have become acquainted with the cows in the herd that have made good. As a partial verification of the splendid milking propensities of his cows Mr. Kuper offers one with a splendid milk record and we aver that there are several others in the offering that if tested out would make just as good a showing as is accredited to Scottish Daybreak whose pedigree and likeness are exhibited on another page in the advertisement. For instance there is Prophetess that is a most wonderful producer. We have known this cow and her produce for some time and it would be a sore trial upon us to find one that we could more heartily recommend, taking her

## GOATS.

**2,000 HIGH GRADE ANGORA WETHERS.**  
One and Two Years Old.  
THESE goats can be used for brushing and then fed and sold for mutton. Come and see me or write. Address, WYATT CARR, Collins, Iowa. Farm 3-4 mi. from depot. Phone 44

breeding, individuality and past record as a producer as measures of excellence. Mysie Grace is another that deserves especial mention. This cow has suckled a pair of twin bull calves during the past six months that are the very best possible evidence of her ability to produce the good kind and raise them. When a cow raises two as growthy and as good calves as this cow raised during the past six months there is little left to be said but good of her. And there are many others. It will be noted that one-half of the offering is of straight Scotch breeding, and not only this but they are of Cruickshank breeding. The offering throughout will be brought into the ring in the very nicest of breeding condition. Since locating on his new farm adjoining town, Mr. Kuper has labored under the difficulties that are common under any such change, but he has given his cattle good attention and has developed a strong demand, the large part of which he can ably supply from his deep-milking cows. This strong demand for milk will the more encourage the tendencies to strengthen the herd along this line. Besides the mature cows, there will be a line of beautiful red heifers, mostly sired by the Cruickshank bull, Baron Sumrise, whose pedigree was published in last week's issue. Nearly the entire offering has been mated with the new Scotch bull, Secret Baron, whose pedigree was also published last week. This young bull is a good one of the first water. He has been bred in the richest lines and descends through a line of sires and dams whose names are known throughout the entire world of Short-horn popularity. This young bull is a fit descendant of such noble ancestry and we believe that anyone buying a female bred to him will be highly elated with the results of the mating. We urge our readers to procure a catalog of this sale and mention this paper when you do so. See advertisement on page 19.

## Good Roofing Cheap.

The cost of shingles nowadays is very great and many people are using Rubber Roofing instead. The Century Mfg. Co., of East St. Louis, Ill., are offering Century Rubber Roofing at very low prices. This makes a splendid roof. It is made of the highest grade of Wool Felts, is absolutely weather and water proof, does not crack and outlasts shingles or metal roofing. This roofing can be laid over shingles. Nails and cement are furnished with the Roofing and anyone can put it on. See the advertisement on page 4 and write the Century Mfg. Co., Dept. 769—R., East St. Louis, Ill., for particulars and prices.

## Her Advertising Paid.

Mrs. O. W. Thomas, of Manchester, Iowa, a breeder of Wyandotte chickens, in sending in copy for an advertisement under date of April 30th, for her silver Laced Wyandotte eggs, says: "Advertising in The Homestead and its associate papers has given me excellent sales."

## POULTRY DEPARTMENT.

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

### Brought Excellent Results.

"I have sold a nice lot of eggs from advertisements in The Homestead," writes Mrs. C. P. McLochin, of Gray, Iowa. "It is one of the best mediums I know of for selling poultry and eggs."

### POINTERS.

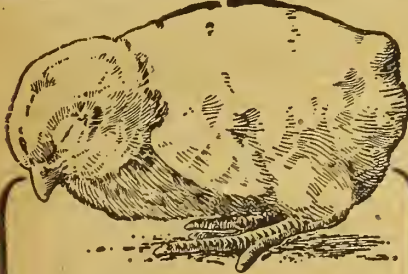

—Buff Plymouth Rock eggs are offered for sale by Mrs. Grant Hockett, of Manning, Iowa.

—Colored Muscovy duck eggs are offered for hatching, on this page, at prices that should bring orders. Your wants in this line will be supplied by Mrs. T. W. Glass, of Sac City, Iowa. Kindly refer to The Homestead when ordering or making inquiry.

—Eggs from high-scoring pens of Silver Spangled Hamburg, Rose and Single Comb Brown Leghorns are offered by Mr. Edwin Dooley, of Selma, Iowa. Kindly refer for prices to the advertisement on this page. Those answering this offer will confer a favor to both this paper and the advertiser by mentioning The Homestead.

—Mrs. Nelson Hyde, of Manson, Iowa, advertises Rose Comb Brown Leghorn eggs that are guaranteed to hatch a satisfactory number of chicks. For prices, which are very reasonable, see this page. Kindly refer to The Homestead in any correspondence regarding this offering.

—A guaranteed cure for rump and cholera is advertised on this page. Agents are now wanted to introduce these remedies among poultry raisers and samples may be obtained on request. The maker of these remedies offers nice, pleasant employment and states that no canvassing is necessary. Write for sample and full particulars of the offer to the Walker Remedy Company, Lamoni, Iowa. Mention The Homestead when writing.

## Lice Kill the Chicks

That sleepy-acting chick is infested with lice. Act promptly or you will lose the whole brood. Dust each chick with a very little Instant Louse Killer, and dust the hen thoroughly. When you next set a hen, do not fail to dust both hen and nest with this wonderful insecticide.

## Instant Louse Killer

is sure death to lice on poultry, horses, cattle, ticks on sheep, bugs on cucumber, squash and melon vines, cabbage worms, slugs on rose bushes, etc.; and is also a reliable disinfectant and deodorizer. Comes in convenient shaker-top cans and being a powder may be used winter or summer with equal convenience. Sold on a positive written guarantee. Be sure to look for the word "Instant" on can as there are many imitators.

1 lb. Can 25 cents } Except in Canada  
3 lb. Can 60 cents } and extreme  
west and South.

If your dealer cannot supply you, we will forward 1 lb. can by mail or express for 35 cents prepaid.

Manufactured by

**Dr. HESS & CLARK**  
Ashland, Ohio.

## Save the Chicks

Don't let your chicks die from Bowel Complaint. Don't let Cholera and other diseases cut down your poultry profits.

### GERMOZONE CURES

Bowel Complaint, Cholera, Roup and other poultry diseases. Germozone goes immediately to the seat of the trouble. A teaspoonful in the drink will prevent disease and keep your fowls healthy. Price 50 cents. Write today to GEO. H. LEE CO., Omaha, Neb. Write for free book, or 1907 Egg Record, free.

## OUR HOME DEPARTMENT.

LETTERS intended for publication should be accompanied by the name and address of the writer, not necessarily for publication, but as a matter of good faith. All communications intended for this department should be addressed to Postoffice Box 727, Kansas City, Mo.

## WITH THE EDITOR.

Although country clubs were not so well represented as I had hoped for at the "Twelfth Annual Meeting of the Kansas Federation of Women's Clubs," I am persuaded that many women in the country are interested in the club movement and that many will be interested in a little talk about this gathering of club women.

In the first place, it is of interest to know that the Kansas Federation of Women's Clubs represents over 7,000 women. This does not mean that there are only 7,000 club women in the state, but that this number of women believing that "union is strength" have federated, trusting thereby to be a greater force for good than they could hope to be standing alone.

Time may have been when intellectual, studiously-inclined and public-spirited women neglected their personal appearance. That time is evidently passed. The ladies in attendance at the twelfth annual meeting of the K. F. W. C. were as fine a looking company of women as one could wish to look upon. Some of these Kansas club women are notably handsome; the majority is decidedly intelligent looking, and almost all were becomingly appareled. Oddly enough, although clothes had not been neglected at all, clothes seemed of no consequence. There were all kinds of dressing from skirts and shirt-waists to "confections" of voile and silk and lace, but the simply gowned woman received as much consideration as her sister who wore an elaborate costume. At a federation meeting it seems to be the woman herself, her brains and her manners, not her wardrobe or her social position, which counts.

The Kansas City meeting occupied several days; the first and the last were given up to social functions, the three between to long programs teeming with good things.

The first day's meeting was devoted to speeches of welcome and reports from the various district and city federations and from special clubs. The speeches were charming, bringing as they did, their very best from women whose best stands for culture of the highest type. My heart swelled with pride for my sex as those women talked; it kept on swelling as report after report was presented. These club reports revealed unmistakably that the club movement has a tremendous hold upon the women of Kansas, and that the scope of the Kansas club movements is worthy of the highest ideals of the state.

It is both astonishing and inspiring to learn what Kansas club women have done and are doing. Some clubs think only of studying to become more intelligent, more attractive, more useful as individuals. This is all praiseworthy, but the end of self-culture should be social service; many clubs have made and others are making this beautiful discovery, and these seek to serve the home, the school, the community and society.

I love literature and music and art; I am a firm believer in their power to ennoble and beautify life, but, much as I enjoyed the programs devoted to pictures and music and talks about books, I think those which give me the highest pleasure, and are likely to do the most good, were not these, but those which drew attention to "The Call of the

Child," to "Our Public Schools and What Club Women may do for Them," to "Forestry Work and Its Benefits to the Community," to "The Kansas Pure Food Law," to "Civic Improvement—a Woman's Problem," to "Civil Service Reform as Applied to Charitable Institutions."

It is inspiring to learn from things done and things proposed that the horizon of the club woman is broadening all the time, that from being interested in herself, her child, her home, her place of abode, she is becoming interested in other people, other children, other homes, and that she is showing her altruism by working for kindergartens and manual training in connection with our schools, for public libraries and public parks, for pure food legislation and for better laws for the protection of wage-earning women and children.

Club women taken on the whole are a splendid body of women, high-souled, broad-minded, well-mannered, but in so large a body there are some who have not learned to love the highest, to sink self, and to work for the good of all rather than the gain of the few. The public is prone to judge women's organizations by unpleasant happenings precipitated by a few women who leave no stone unturned to secure place and power. While this is inevitable, it is both unfair and unfortunate. Still it is not an unadulterated misfortune. Thoughtful women, knowing that much is expected of them, and that they are being watched by critical eyes, unconsciously hold themselves more strictly to high ideals than they might otherwise do. May we not trust that these women will gradually leaven the whole body and bring about a fixed standard of single-heartedness and high endeavor for all organizations of their sex? I believe we may, and when the sky is black with clouds, for me the star of hope does not cease to shine.

## HOME AND HOMEMAKING.

## LITTLE HELPS BY THE WAY.

Are you worsted in the fight?

Laugh it off.

Are you cheated of your right?

Laugh it off.

Don't make tragedy of trifles.

Don't shoot butterflies with rifles—

Laugh it off.

Does your work get into kinks?

Laugh it off.

Are you near all sorts of brinks?

Laugh it off.

If it's sanity you're after,

There's no recipe like laughter—

Laugh it off.

(The Late Henry Rutherford Elliot, in the November Century.)

## A RHYME FOR THE CHILDREN.

How do robins build their nests?

Robin Redbreast told me.

First a wisp of yellow straw

In a pretty round they lay;

Then some shreds of downy floss,

Feathers, too, and bits of moss,

Woven with a sweet, sweet song,

This way, that way, and across;

That's what Robin told me.

Where do robins hide their nests?

Robin Redbreast told me.

Up among the leaves so deep,

Where the sunbeams rarely creep.

Long before the winds are cold,

Long before the leaves are gold,

Bright-eyed stars will peek and see

Baby robins—one, two, three;

That's what Robin told me.

—Little Funny Folks.

## GETTING RID OF ANTS.

Ants like dry quarters, and if the safe or refrigerator is surrounded with wet carpet for a day or two, the ants will leave. It is a good idea to spray the cupboards with a strong solution of carbolic acid, afterwards washing with strong borax water. To place pans of burning sulphur in these haunts where cupboard pests like to remain, will also drive them away, kill them and destroy their eggs. Tansy boiled in water and sprinkled on the shelves is a splendid thing to prevent them from inhabiting places. Dirty shelves are very inviting to these hungry little eaters, and a cupboard must be spotlessly clean or ants will survive some of the worst treatment to destroy them.

## HINTS ABOUT PILLOWS.

Not only should the outside pillow-tick receive a good airing and washing if necessary, but occasionally the inside feathers should have the benefit of a purification of the same kind.

You can freshen the pillows if you will beat out all dust, rip one corner, pour in one cup of hot water, sew up, then shake and pound well and pin on the line in the sun.

Some housekeepers use pillows with ticks decidedly soiled, because they dread the bother of emptying the ticks to wash, but this should be done as soiled pillows are unattractive and the sooner they are washed the less trouble it will be. To wash the pillow tick, shake the feathers into one end; then rip open the other end and baste to a stout pillow case, then shake all the feathers into the case before removing the pillow tick. Wash the tick perfectly clean, then boil and rinse it and put a little starch in the blueing water, then put the feathers back in the same manner in which they were taken out.

If both tick and feathers must be washed, put the pillows in a strong suds to

The Eddystone Mfg. Co. (Sole Makers) Philadelphia.

which a tablespoonful of ammonia has been added and rub the pillow on the board as if washing clothes, then rinse through several waters and squeeze and press as much of the water out as possible. Hang the pillows in the shade to dry and it will require three or four days.

It is well to go out several times a day and beat the feathers and shake them thoroughly, then when dry give the pillow a good beating up and it will be clean and light, and will seem to have about twice as many feathers if the cleaning and drying have been carefully done.

## COCOANUT PIES.

Here is a delicious recipe for making coconut pies. First make the shells by covering the bottom of a pan with the dough instead of lining the inside of the pan. This makes a deeper crust. As the dough makes little blisters over the bottom of the pan, do not push the dough down on the pan, but run the tines of the fork through the places to let out the air. This makes the crust light and flaky. For the custard, use three eggs, one quart of fresh milk, three tablespoonfuls of cornstarch, one teaspoonful butter, one tablespoonful of vanilla. When the mixture has been boiled in a double boiler, add half a cup of shredded coconut and cook for five minutes. Fill the pie crusts with this pudding and cover the tops with the beaten whites of the eggs, which have been scalded on top of the boiling milk. Sprinkle lightly with sugar and coconut, put in the oven to turn a rich golden color, which takes only a few seconds.

## NUT LAYER CAKE.

Cream half a cup of butter. Add gradually one cup and a half of sugar, then half a cup of milk, one teaspoonful of vanilla extract, two and one-fourth cups of flour, sifted with one-fourth teaspoonful of soda and three-fourths teaspoonful of cream of tartar. Lastly, fold in the whites of five eggs. Spread in two layer-cake pans. Press halves of English walnuts into the top of one of the layers to make lengthwise rows of nutmeats. Sprinkle the whole with white sugar, and bake about twenty minutes. Put the layers together with chocolate nut frosting.

## YEAST ROLLS.

Soften a yeast cake in half a cup of scalded and cooled milk. Add a pint of scalded and cooled milk and two cups and a half of flour. Cover, and let stand, to become light. Then add half a cup of melted shortening, a teaspoonful of salt, and about three and one-half cups of flour, to make a soft dough. Knead the dough about fifteen minutes, cover, and set aside to become light. Then shape into small rolls about two inches wide and four and a half long. Set close together in a buttered pan, giving room to lengthen uniformly. When very light, bake about half an hour. Glaze with beaten white of an egg when nearly baked.

## AMONG OURSELVES.

"Do none of the friends read anything but fiction?" was the query of our editor some weeks ago. Yes, they do; and as the answer seems to be slow in coming I wonder if I might talk about some of my books? First, I am going to name "What Is Worth While" by Anna R. B. Lindsay, Ph. D. In her final summary she bids us to let go "the unworthy things—pretence, worry, discontent, and self-seeking," and to take "loyal hold of time, work, present happiness, love, duty, friendship, sorrow and faith." In the book she gives her reasons for each of these conclusions. And have you read "The Imitation of Christ," by Thomas à Kempis? It is "worth while." Let me give you just a couple of extracts which I have marked: "It is vanity to desire to live long, and not to care to live well." "Write, read, mourn, keep silence, pray, suffer crosses manfully; life everlastingly is worthy of all these, yea, and of greater combats." And I find some excellent thoughts in "The Rubaiyat of Omar Khayyam." This—"The Bird of Time has but a little way to flutter and the Bird is on the Wing." What does that say to you? To me it says, "Time is passing, moments are flying; make the most of every day; you will pass this way but once." And if you find yourselves like Martha, "careful and troubled about many things," let us read: "And fear not lest Existence closing your Account, and mine, should know the like no more. The Eternal Lake from that Bowl has poured Millions of Bubbles like us, and will pour." "When You and I behind the Veil are past, Oh, but the long, long while the World shall last." And then I have "Dreams" by Olive Schreiner. It is a little book of allegorical sketches. I like the one about the search after truth, entitled, "The Hunter." It seems to me that all can read English history, beginning with the Druids and ending only with the present day, with profit. Read "Hyperion" and wander with Longfellow along Germany's wonderful Rhine, among her quaint old castles, and through the great Black Forest. Enjoy the genial philosophy of George W. Curtis in "Prue and I." I like poetry and have "Snowbound," "Hawthorne," "Evangeline," "In Memoriam." Yes, and Longfellow, Kipling and Stevenson all in a row. Rather a motley crowd, aren't they? Oh, there are so many other books I should like to talk about; "Walden," then a big

**KEELEY INSTITUTE, INC.,**  
706 Fourth St., Des Moines, Iowa

book of natural history, and so on, but space forbids. I'd like to say, though, don't rush after every new book to the exclusion of those which have stood the test of time. Many of the so-called popular books will scarcely be heard of in three years. Some time ago I was induced to read a certain "historical novel," a much-talked about book, and after reading it I felt inclined to agree with the verdict given on it by a young man of my acquaintance—"It's just rip-roaring all the way through, but it isn't worth while."

"Worth while! Worth while!"

"The Bird of Time has but a little way

To flutter—and the Bird is on the Wing."

"A happy wife" has given us such a treat, I feel sure everybody feels that her coming to us was "worth while" and hopes that she will come again sometime and give us another book talk.

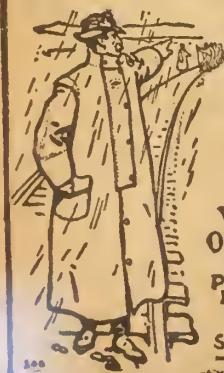

Preparations for June weddings are already well under way in many of the homes of this circle, but wedding goes on all the summer and there is no more beautiful time for marriage festivities, in the country, at least, than early fall, so that what we are to have from "A Happy Iowa Bride" should prove timely as well as interesting:

By all means, be married in your own home, even if you can have only the immediate family present and if you can invite your friends so much the better.

I attended a beautiful home wedding on February 14th. The ceremony was at half past two in the afternoon and a two-course luncheon was served afterward to seventy guests. The south end of the sitting room is octagonal and has a large window with single windows on either side. Here was a background of white lace curtains. A few potted plants set on the floor and asparagus rope looped across the curtains and hung from a hook in the ceiling to the tops of the windows, made a very pretty place for the bridal couple. The asparagus rope was dotted with carnations and bows of ribbon, and at the center, suspended from the hook was a large white paper bell with a huge bow of white ribbon and six white carnations at the top. At the other end of the sitting room the open stairway was decorated with green and white tissue paper rope with bows of pink crepe paper on every loop. The bridal party descended the stairway as the wedding march, so sweet and solemn, was played by a beloved classmate. The minister came first, then the best man and bridesmaid and lastly, the bridal couple. They descended slowly, a number of steps intervening between the couples. The bride was dressed completely in white, even the combs and hair pins. The colors, pink, green and white were used in the other rooms. In the dining room the table was in the center. Green rope from a hook above went to the four corners of the room and white ribbon came down to each corner of the table, ending in a pretty bow. A white bell hung from this hook also.

The table was decorated with ferns and pink and white carnations. The bride's cake, on a glass stand, was placed on a looking glass, whose frame was concealed by ferns. The guests were seated around the room and served by a number of girl friends of the bride. The refreshments consisted of: First course, jellied chicken, bread and butter, fruit salad and pickles; second course, ice cream and cake. The bride's cake on the table was cut into small pieces after luncheon and given to the lady guests by the bride. Also she had a dainty basket in pink and white, filled with pretty little valentines, each in a white envelope, and these she gave to everyone as souvenirs. Flowers or a box of cake would be nice on another date. Two girl friends arranged the presents on tables in a room downstairs. And now let me add some advice: Plan everything and tell your plans to the ones who are to assist, that all may go well. Prepare the cooking and arrange the house as far in advance as possible. Have the luncheon or dinner as elaborate or as simple as you please, but have it dainty. Loving hearts and hands will do much toward making a home wedding beautiful, as they did at mine, for I was the bride at the one I have just described.

A wedding means work and sometimes worry, but the returns are generally considered adequate and where the affair is as prettily managed as that described by our young Iowa friend, its happy memories make it a sort of potpourri jar to be opened at will.

Right now while the thought of weddings is on the tapis let me suggest that a year's subscription to our paper under the magnificent clubbing rates offered by the management would make a wedding present which would not fail to give a young couple solid satisfaction.

It was not, of course, this talk on weddings which inspired him, but "Illinois Bachelor No. 2," comes to us with some thoughts on love and marriage.

Having been a reader of this paper for quite a while and especially the Home Department, I am somewhat interested in it. I am also an Illinois bachelor and I heartily agree with the article written by "An Old Maid" in your issue of April 29th. I believe she understands how to cook a husband properly and am sorry she hasn't one. Also agree with "One of the Girls." I believe as she does in regard to men who are not polished or refined, being sometimes snubbed, as I am somewhat old-fashioned myself. I believe the giddy young man who spends all his earnings for fine-cut garments, who is sleek and smooth, is much better liked than the poor, struggling young man who saves his earnings and is somewhat of a practical turn of mind. The practical man looks to the future, while the giddy young fellow lives altogether in the present and lets the future care for itself; as for myself I believe in having a little saved up for a rainy day in case I or my own should need it. I agree with her also to there being a difference in men and women. Quiet young men and modest girls often remain single because of the nature of their dispositions; they lack the faculty of putting

themselves forward, so to speak, and so remain single and lose the best of life which their Creator intended they should enjoy.

Illinois Bachelor No. 2 is a sensible fellow; it's a pity there is not more of him. By the way, how would it be for us to talk a little on a subject suggested by this young man's remarks on the advisability of putting something by for a rainy day or for "my own." This is a "worth while" topic. Let me put it in a definite shape, say, like this: Is it right for a young man to spend as he goes and propose marriage to a woman when he has nothing saved to make a home for her? Let us hear on this subject from the young men themselves, from the young women, and from married people who have experience. Please make your contributions to this discussion about the length of Illinois Bachelor No. 2's, and let us have at least a score.

Talking of love and marriage, etc., we are to have thoughts on love from Mrs. Ida Hausman:

I will write a letter for Among Ourselves, on the definition of love. Love is a sacred ordinance of God, and it should reign in every home. No home can be happy without love. Love makes men and women better and purer and its radiance is seen plainly in the lives and hearts by those around us. Love never degrades anyone, it lifts them up higher, it makes home a heaven of contentment, hope and blessedness. There would be no divorces if love ruled. Many men never have time to love their wives or never even sympathize with them, which goes to make the whole of a true woman's life. A man may not have money to build a palace, but he can build a tower of love, which I for one would appreciate far more. I would rather have one little flower of kind love while I am living than a bushel of roses when I am dead. I always have lived on the farm and toiled late and early, yet I have time to love my family. I have time to make them happy with the devotion of love. I have time to smile and welcome my loved ones, time to make home pleasant and comfortable. Oh, the power of the influence of love my heart gives out in this little poem: "Could I but live with one that Loved me in a home with a sanded floor. I'd be richer far than a loveless one With fame and a golden store."

Mrs. Hausman's definition and application of love will commend her to our circle, I feel sure. I wonder how they will regard the next corner, "A Young Bachelor," he calls himself:

Undoubtedly the average reader will ridicule a seventeen year old youth's opinion on the vital subject of love, but as I think the contrast between the opinion of myself and that of an experienced and more sensible person might be of interest, I cannot resist. Love is undoubtedly the devotion or attachment that one "should" have for another.

Love is that which makes unhappy men happy, and happy men unhappy.

Love is like a pair of suspenders, it helps a man to keep up his ambition.

Love is that which makes youths of my own age go temporarily silly, that is, sometimes, and sometimes not. I think that love is not such a bad thing for a boy who will look at the matter sanely, for will it not make him ambitious? Will it not make him have more respect for himself and those of the opposite sex? Will it not help him to break off from his bad habits? Had he not better be in love than in a saloon or some den of vice?

I must close by saying that love to me is a mystery.

It is good for us to relax a little and smile as we have been doing while this young fellow has been giving us his ideas on love. And, friends, let me say here that I think it would be good for us all could we have at least one of the young folks with us every week. There is a breeziness, a freshness about the point of view of the young which we ought to avail ourselves of more than we do.

Two calls for information have come in. One member of the circle asks for a tried recipe for rhubarb wine. This I hope someone will kindly send at once. Another member wishes for directions for the making of the pretty bead chains which are popular just now. The forget-me-not pattern is the one she seeks. These bead chains are so dainty and so pretty that they make charming gifts. Please, somebody come and tell us how to make them.

#### ADVERTISING NOTES.

Whether you want to buy a farm or sell one, or whether you want to exchange or trade real estate of any kind you should submit your proposition to Messrs. Fraley & Graham, Ulrich, Mo. They are prepared to make bargains of this kind. When you write them say you saw their advertisement in The Homestead.

In Van Buren county, Iowa, is a tract of land 636 acres in extent, of which 200 acres is timber, which is seeking a buyer. The farm buildings include a house, barn and granary, and terms will be made to suit the buyer. Write for fuller information to Box 291, general delivery, Farmington, Iowa. See page 14 and mention The Homestead when you write.

Choice Wisconsin farm land, either improved or unimproved, well adapted to cropping and stock raising, is advertised on page 14. This land is well located as regards schools, churches, creameries and railroads and will bear the investigation of careful investors or home seekers. Write for full information to Matton Railway Company, Mat-

ton, Shawano county, Wis. Kindly refer to this paper in making application for particulars.

Farmers looking for locations on well-improved and prairie lands in South Dakota should write for prospects and inducements to Mr. M. Loftus, of Mitchell, S. Dak. See page, 14 for prices and mention The Homestead when writing.

In the clover belt of Wisconsin, regarded as the finest dairy country in the world by many, are two very well-timbered eighty-acre farms which will be sold at very low prices by Messrs. Morse & Tradewell, of Antigo, Wis., as advertised on page 14. Mention this paper when writing.

U. S. Patent has been allowed to J. T. Ramsden, Ft. Dodge, Iowa, for an improvement whereby the piston and cylinder of a pump can be removed for repairs without disturbing or lifting the well-tubes. The work was done by Silas C. Sweet, patent lawyer, whose advertisement appears on page 2.

Eight hundred acres of choice Nebraska grass land is offered for purchase on this page. This tract is in the alfalfa and grazing land and grows within its own borders fine tame and wild grasses. It is also the best kind of farm land. Parties who mean business should write or inspect this land, as the holder will make a good proposition to such. Address Mr. J. H. Brown, of Ansley, Neb. Mention this paper in your correspondence, please.

#### RELIABLE INFORMATION ON LAND.

Not every day offers an opportunity like this one for securing reliable information on land conditions in the great Southwest. The makers of this offer have no land to sell, but they merely wish to do patrons of their transportation facilities a favor. Write for prospects for new homes, crop conditions, prices, etc., to the Missouri Pacific Immigration Bureau, 1704 Missouri Pacific Building, St. Louis, Mo.

#### THE CALL OF THE RAILROAD

is for men. Men who are strong and willing to earn big wages as firemen. The chance is extended to become engineers after an apprenticeship. During spare time a young man can fit himself on the technical points necessary for holding a position of this kind by taking a course in training such as is offered by the Railroad Men's Correspondence School, Box 705, Freeport, Ill. Write for prospectus as offered on this page.

#### FRANKLIN COUNTY FARM.

The fact that a farm lies in Franklin county, in the state of Iowa, is assurance that it is a good farm. When Mr. C. W. Soesbe, cashier of the Merchants' National Bank, of Greene, Iowa, says that it is a good farm, well improved and a bargain at the price he quotes for it, that is assurance to us that that is a fact. The farm in question consists of 240 acres of the best land in Iowa. Read the advertisement of Mr. C. W. Soesbe, of Greene, Iowa, on page 14 of this issue and mention The Homestead when you write for particulars.

#### LOW-PRICED LAND.

On page 14 is offered three tracts of western land. The first of these is in southeastern Wyoming and in alternate sections to the amount of 5,816 acres. Two towns are on this land and it will be sold on easy payments. The second tract comprises 880 acres in central Nebraska, half of which is level, some in alfalfa and some improvements. Four towns are situated thereon, and three are very enterprising business places. The last offer is that of a 240-acre alfalfa farm, all in cultivation, and nearly half in alfalfa. Improvements are good. For further descriptions, photos, etc., write, mentioning The Homestead, to Mr. H. J. Hill, 1802 E. St., Lincoln, Neb.

#### RICE BROS.' AUTOMATIC GATES.

With this issue of this paper appears the advertisement of Rice Bros. Manufacturing Company, of Harvard, Neb., who are offering some leaders in automatic gates. These gates are in use in most every section of the country and everywhere have proven a decided success. They are made entirely of steel, can be hung on any common gate post and can be operated from wagon or carriage with perfect ease. They are made any size to suit. Their twelve-foot gate sells at \$10 and if larger size is desired a cost of \$1 per foot will be added. At the price this gate is sold you cannot afford to bother with old-fashioned gates. Write them for their new illustrated catalog and mention this paper. See illustration of swinging gate on another page. They also make steel rod yard fencing of any design.

#### STANDARD CREAM SEPARATOR PRICES.

It is now possible to buy standard cream separators straight from the manufacturers very close to actual factory cost. The machines we have in mind are made of the best materials throughout, fully guaranteed in every respect against defects and with a further guarantee that they cannot be surpassed in close skimming or ease of running. As this paper thoroughly investigates the standing of each advertiser before accepting their advertising we can say that this advertiser is reliable in every way and will do as they agree. They have been manufacturing cream separators for nearly twenty years. Their machine has all late up-to-date improvements, such as low-down supply can, simple enclosed gearing and the only separator howl on the market which is not balanced with lead or soft metal. We would advise any of our readers interested in cream separators to write at once for the free catalog. This will insure prompt and careful attention. Address Davis Cream Separator Company, 54L North Clinton St., Chicago, Ill. See page 9.

#### ANY GASOLINE ENGINE WILL RUN.

That any gasoline engine will run something, somewhere, somehow is a statement made and admitted by experienced users or makers. The engine that does its work in the way just mentioned is a constant annoyance and bother. The manufacturers of what is known as the "Flour City" gasoline engine are well aware of the objections to poor makes of engines. They have taken particular pains to produce and place on the market an engine that will run anything, anywhere, all right, and up to the capacity that their engines are rated. From the number of satisfied users of their engines it is safe to conclude that they have

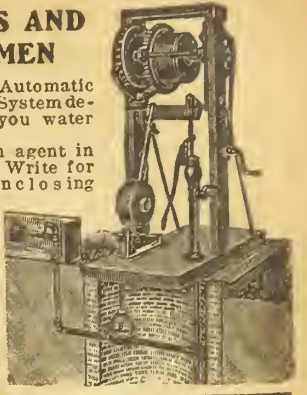

#### FARMERS AND STOCKMEN

The Myers Automatic Water Supply System designed to give you water at all times.

We want an agent in each County. Write for information, enclosing Postage for reply. Address,

Myers Pump & Mfg. Co., Beals Bldg. 9th & Wyandotte, Kansas City, Mo.

What town wants our Factory?

#### RAILROAD MEN WANTED

The railroads are calling. Our business is to train and supply Firemen and Brake-men.

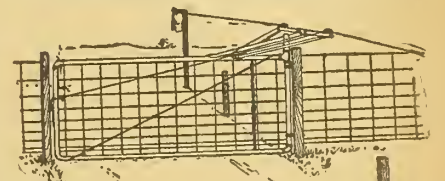

Our Men Make Good at railroading. Only spare time required. Young man, write today for book "Railroad Training for the Millions." FREE. Railroad Men's Correspondence School, Box 705, Freeport, Ill.

#### Traction Engines For Sale.

We have on hand ready for delivery several 18 Horse-power Traction Engines, new and second hand, also one 8-horse-power Traction Engine second hand, that we will sell very cheap in order to close them out within the next few months. A great opportunity to buy a good engine at practically cost price.

THE O. S. KELLY MFG. CO., IOWA CITY, IOWA.

#### Nebraska Automatic Gate.

OPENED from wagon or carriage. Any lady or eight year old child can operate this gate. All steel. Can be hung on any gate post. Nothing to get out of order, 12 ft. gate \$10. You can't afford to be without this gate for the price. Hog and cattle proof. Also Rice's Automatic Tilt Gate. Ornamental steel. Gates and rod fences a specialty. Catalog upon application.

RICE BROS. MFG. CO., HARVARD, NEBRASKA.

#### Lightning Rods

Farmers wanted to buy 98% Pure Copper Cable Lightning Rods. Write for prices and samples to

JOS. H. BARNETT & CO. Riverside, Iowa

#### FOR SALE.

One Peerless 16-Horse Engine, one Peerless Separator, Self-feeder and Wind Stacker, also one Joliet No. 2 Cornsheller.

This machinery is good as new. Will sell for half its cost when new. Will sell for cash, or write what you have to trade.

W. R. HAINLINE,

Blandinsville, Illinois

#### WE ARE BUYERS

at all times of CLOVERS, TIMOTHY, and seeds of all kinds. Send sample and get our offer. We are paying high prices for WOOL. Send us a trial shipment. The Adams Seed Co., Decorah, Ia.

#### The Jewell Nursery Co.

(Box 16), Lake City, Minnesota  
Capital \$500,000.00. 1200 acres. Largest Nursery in Northwest. Established 1868. Hardy seeds, trees and plants. Agents wanted—Good pay.

accomplished their purpose. The "Flour City" engines are built for traction, portable, stationary and pumping purposes. The very best materials are used in their construction. The cylinder is properly proportioned, accurately and smoothly bored and fitted to the frame by planed surfaces, strongly bolted and doweled. Other parts of the engine are made with equal care and with the object of insuring long life to the engine. All the other points of construction are fully explained in the catalog which

should be in the hands of every person having use for power, which for economy is best secured in a good gasoline engine. Address your request for catalog to Kinnard-Haines Company, 824 44th Ave. N., Minneapolis, Minn. See page 2.

"MONEY WITH BEES."

Under the above title is issued a book containing the hints and practical experience of a man who has handled bees for nearly half a century. The writer of the book is Mr. Kretschmer, who is also prepared to furnish a complete line of bee supplies which he has found practical. Write for the book, mentioning The Homestead. Address Kretschmer Manufacturing Company, Council Bluffs, Iowa. See page 2.

CHRONIC CATARRH CURED.

Dr. Williams offers the readers of this paper absolute proof of his ability to cure chronic catarrh of the nose, throat, ears, bronchial tubes, stomach, liver, bowels, kidneys and bladder. His cured patients very gratefully testify to the cures made in their own cases. He has so much faith in his ability to cure chronic catarrh and its allied diseases that he offers a full month's treatment free of charge to all who will write for his symptom blank and free book. His special announcement will be found on page 16.

YOU MAY EITHER WALK OR RIDE

behind the Hapgood corn cultivators. These plows are made in all styles, including the riding, walking and tongueless patterns. All the different styles of beams are to be had on these cultivators and the shovels are arranged according to the latest ideas. The four and six shovel plows generally suit the needs of most soils. In fact all the latest ideas in the construction of cultivators are embodied in the Hapgood. This is the only factory which sells direct to the farmer. They also sell huggies and other farm implements. Write for their complete free catalog and study the new models before buying. Address, Hapgood Plow Co., Box 36, Alton, Ill. It is to your interest to write them without delay. See page 3.

A SPLENDID HOG FARM FOR SALE.

One of the finest suburban hog farms is offered for sale by Mr. Sol Frank, of Sioux City, Iowa. It contains fourteen acres, nine-room house, barn, chicken house, hog houses, corn cribs, fenced and cross fenced, all kinds small fruit and shrubbery, three acres alfalfa, all equipped for an up-to-date hog farm. He now has 100 head of pure-bred Duroc Jerseys and will make a deal for everything or will sell the farm alone. Mr. Frank must give his attention to his tailoring business and therefore is compelled to sell. Here is a great proposition for some man who wants an up-to-date hog farm, where a splendid business has always been done. It is one of the snaps for somebody. Write Mr. Frank for further particulars and mention The Homestead.

THE GOLDEN PRAIRIE OF WYOMING.

We again call the attention of our readers to the page advertisement of The Federal Land & Securities Company, which appears on page 15. If any further indorsement were needed of that country, the testimonials of Mr. McCormack, Mr. Nye and others reproduced in the advertisement referred to, are sufficient to set at rest all doubts as to the quality of the soil and yield of crops. As is well known a prejudice always exists against any new section of country and this prejudice is ever encouraged by the stockmen and others who profit by the free use of lands of which they will be deprived upon the country becoming more densely settled. This has been true of Iowa, eastern Nebraska, southern Minnesota and other districts where only a few years ago vast herds and flocks were raised by men owning but little, if any, of the land. This has been the condition of the Golden Prairie district of Wyoming and when the order of the government was issued to tear down the fences surrounding homestead land, cattlemen considered it only a joke and some of them paid no attention to the order. That it was no

joke is proven by the fact that a few months ago a United States marshal with a posse of men left Cheyenne for the Golden Prairie and within a few hours had destroyed many miles of fence while the unlawful occupiers of the land were arrested and heavy fines were inflicted upon them in the United States courts. We have personally interviewed a large number of residents of Des Moines and central Iowa who have purchased Golden Prairie land, some of whom have located there, and it is the universal judgment of these people that that country is truly the Eldorado for the man who at this late day is searching for a place either to invest his savings for profit or to make a home for himself and family. We advise all our readers to write the Federal Land & Securities Company, 210 Fifth St., Des Moines, Iowa, and secure the free map and descriptive literature which this company is sending out. Thousands of first-class dealers all over the country. See page 15.

IMMIGRATION TURNING SOUTHWARD.

The attention of homeseekers is being directed today to the South more than ever before in the history of the country. This is due to two facts: The public lands of the West are about exhausted and its good farming lands are now comparatively high in price. The climate of the Northwest is severe in winter, while the climate of the South is well-nigh ideal all the year round. Hence the farmer in the West and Northwest is selling his high-priced lands and moving southward where he can buy low-priced, but fertile, lands and be free from the rigors of severe winters. No part of the South is attracting such attention in this respect as is the coastal plain known as Tidewater, Virginia, and eastern North Carolina. The lands there are of exceeding fertility and wondrously productive. New railroads are opening up virgin lands and development is rapid, to say the least. Naturally, real estate values are advancing, but as yet they are remarkably low compared to real estate values in the West and Northwest. The farmer who is contemplating moving South will be wise if he takes advantage of the low rates offered during the Jamestown Exposition to visit that country and make an inspection of the advantages and opportunities there offered. Those desiring further information on this subject can obtain it by addressing Mr. F. L. Merritt, Land and Industrial Agent, Norfolk & Southern Railway, 302 Citizens' Bank Building, Norfolk, Va. Advertisement appears on this page and when writing for information kindly mention this paper.

SEVERE ECZEMA CURED

Southern Woman Suffered Three Years-- Hands and Eye Affected--Gives Thanks Because She

TRIED CUTICURA REMEDIES

"My wife was taken badly with eczema for three years, and she employed a doctor with no effect at all until she employed Cuticura Soap and Ointment. One of her hands and her left eye were badly affected, and when she would stop using Cuticura Soap and Ointment the eczema came back, but very slightly; but it did her a sight of good. Then we complied with the instructions in using the entire set of Cuticura Remedies and my wife is entirely recovered. She thanks Cuticura very much, and will recommend it highly in our locality and in every nook and corner of our parish. God bless you for the sake of suffering humanity. I. M. Robert, Hydropolis, La., Jan. 5 and Sept. 1, '06."

The above illustration shows Flint-Coat roofing being applied to the Minnesota State Fair buildings. The quality of a roofing material on these structures, as well as on others is a most important consideration. Flint-Coat roofing is made from the most lasting materials. These are combined in such a manner as to be practically weather proof as well as fire proof. Every roll is guaranteed. For these reasons Flint-Coat is popular. The Standard Press Steel Car Co., at Hammond, Ind., have contracted for 8,000 squares of this asphalt roofing. This firm, like others, has tried this roofing thoroughly and found it to be as good as is claimed. See page 3 for these claims and prices. Write for samples to Rock Asphalt Roofing Co., Commercial Station, Dept D, St. Paul, Minn.

LANDS AND HOMES FOR SALE

WANTED farmers to locate on well improved and prairie land, near Mitchell, \$15 to \$50. Write M. Loftus, Mitchell, South Dakota.

BEWARE OF LAND AGENTS WHO

FOR the sake of a commission try to sell bad lands in a good country. Save commissions by buying direct from us in the Garden Spot of Texas, where values will increase faster than elsewhere because the soil is richer and deeper; will produce larger and more varieties of crops; is clear, ready for plow; crop failure impossible, because some crop can be planted any month in year; climate healthy; not cold in winter nor hot in summer; ample rainfall; competing railroads within two miles; close to best markets in world; good neighbors. Save agent's commission by buying direct from us. Do it now. Prices \$10 to \$20 per acre in any sized tract to suit. Next fall will be \$5 an acre more.

Write or call for booklet, "Truth About Texas," and state map free. Cheap R. R. rates. Free fare to buyers.

PICKERT-HAMMOND LAND CO.,

Opposite Grand Central Station,

Houston, Texas.

N. W. Brauch, 1039 and 1040, Lumber

Exchange, Minneapolis, Minn.

For Sale

A FINE, rich, improved farm without hills or stones. Located only two miles from a good town on the main line of the Burlington railroad in south central Nebraska. Mostly cultivated. Prices \$25,000. For particulars address the owner.

W. F. DALE, YORK, NEB.

Do You Want Reliable Information About the Southwest?

If you are looking for a better location we will give you reliable information about any locality—price of land, crops best suited to it, in fact any information you want before locating. We have no land to sell and will give interested information to any one seeking a better location.

MISSOURI PACIFIC IMMIGRATION BUREAU.

1704 Missouri Pacific Bldg., St. Louis, Mo.

**WELL IMPROVED** 160 acre farm in Clay Co., Illinois. Price \$40 per acre. J. J. Smith, Clay City, Illinois.

**CORN** and Alfalfa farms for sale; good improvements. Write for prices. Jas. S. Sheeran, Solomon, Kansas.

# The Golden Prairie of Wyoming

There, within from one to six miles of railway station, you can now buy at from \$8 to \$15 per acre on ten years' time, land equal in fertility and productiveness to the best in the central states. The rain-fall is ample and uniform, assuring abundant yields of grain and grass crops. No hot winds, gumbo, alkali, stone or other imperfections.

**DO YOU ASK WHY, AT THIS LATE DAY, THIS LAND CAN BE HAD AT PRICES SO LOW?**

## The Question is Easily Answered

BECAUSE—Over thirty years ago the government gave the U. P. Railroad Company each alternate section of the land in a strip forty miles wide. Because—This being the best grassed, best watered section of the "eastern slope" ranchmen at once secured the railroad land, enclosing in their fenced pastures the alternating homestead sections, making it impossible for the homeseekers to locate there. Because—Only last year the government at Washington decided that the "little fellow," the man looking for a home, should have a chance, and all fences surrounding government land were ordered torn down. Because—This put the ranchman out of business, and threw open for settlement some 150,000 acres of choice homestead land, while we purchased the deeded lands, 10,000 acres of which we are improving and the remainder we are placing on the market.

## The Movement is Now on and Quick Action is Required

Although we only placed the first of our land on the market June first of last year, we sold during the balance of the year, 40,000 acres, nearly all of it to practical farmers. We have now placed on sale 50,000 acres lying south of the main line of the Union Pacific railroad track. None of this land is more than six miles from station on either the Union Pacific or the B. & M. R. Ry. Each alternate section of the land is deeded and belongs to us, the other sections being free government homesteads. For description of this particular tract, read the testimonial of Mr. McCornack found on this page.

A Golden Prairie stack yard scene. Reproduced from photo taken Sept. 22, 1906, on farm of A. L. Bengsten, and surrounded by our lands.

## A Present of a 160-Acre Farm

The opportunities offered in the Golden Prairie District are unequalled anywhere else in the world to day. Consider for a moment that on your purchasing 160 acres or more from us, we will locate you, free of charge, on an adjoining government homestead, of as choice land as the sun ever shone on. This virtually cuts the price of your land in two. Then, if you are buying as an investment, do not fail to note that these homesteads, being taken up and improved by farmers, insures a steady and rapid advance in the value of your purchase.

All of this Golden Prairie country has been in possession of the stock men and fenced by them for the past thirty years, with the exception of a small neighborhood known as the Albin settlement which was established over 20 years ago. This settlement is composed chiefly of Swedish people and they have been remarkably successful in farming, raising all sorts of grain crops, besides timothy and alfalfa on the upland prairie without irrigation and by using only the ordinary farming methods employed in the central states. Their farms produce yields of 50 to 75 bushels of oats per acre of a very high quality, grading for the oatmeal mills and commanding for the crop of 1906 a premium of 10 cents per bushel over the oats raised in Iowa.

Their yields of spring and winter wheat, flax, barley and potatoes are equal to the best on high priced land in the central states. A visit to their settlement will prove the correctness of these statements.

Low rate round trip home-seekers tickets can be secured on the first and third Tuesdays of each month; the next excursion being Tuesday, June 4th.

Clip out and mail us the coupon found on this page and you will receive much valuable information. References: Publisher of this paper and The Des Moines National bank. Railroad fare refunded to purchasers.

### Wonderful Indorsements of the Golden Prairie Country by Prominent Iowa Men.

Mr. Peter McCornack, of 1618 6th Ave., Des Moines, is one of the largest farmers in Iowa. In addition to the Golden Prairie land he purchased from us last week, he owns 2,200 acres of farm lands, all highly improved and 2,000 acres of which is now in growing crops. Mr. McCornack visited our lands on the excursion of May 7th, and purchased the W. one-half of Sec. 19, Twp. 13, R. 62, paying all cash. He will at once proceed to put this land into cultivation. There is no man in the state of Iowa whose judgment on farm lands is superior to that of Mr. McCornack.

Des Moines, Iowa, May 16, 1907.

The Federal Land and Securities Company, Des Moines, Iowa.  
Gentlemen:—I have just returned from a hurried trip through your lands for sale in Laramie county, Wyoming.

Having had nearly forty years' experience in buying, improving and selling land in Iowa, Minnesota and South Dakota, I think you have the best proposition I ever saw, both for the speculator and homesteader.

Your land lies well, can be easily improved, has excellent railroad advantages, agreeable climate, fine water at reasonable depth.

I visited farms of settlers and saw winter and spring wheat, oats, barley and speltz of excellent quality in their bins, and saw wheat, barley, oats, timothy and alfalfa growing in the fields.

I think your country would be a paradise for the homesteader where he can have his choice of fine lying land with the very best of railroad privileges right at his door. There a man of limited means can file on his claim and live on it and buy land adjoining at reasonable price and long time payments.

Your price and terms of payment are very reasonable and your generous advice and help to homesteaders should be appreciated by all who do business with you. From my own experience. (Signed) Peter McCornack.

STATEMENT OF T. M. RIDER AND W. A. RIDER.

Mr. T. M. Rider is one of the best known breeders of thoroughbred Clydesdale horses in Iowa. The following testimonial from him and his son affords us great satisfaction. They are now located on the Golden Prairie with Postoffice address, Egbert, Wyoming:

Fairfield, Iowa, February 20, 1907.

We wish to state for the benefit of those who are interested in cheap land, that on December 4th, we mailed to The Federal Land & Securities Company, of Des Moines, Iowa, our order and draft for a section of land in the Golden Prairie district of Wyoming to be selected by them subject to our approval. On December 18th we went out to see this land and were highly pleased with the country and the selection made for us, in fact so much so that we refused an offer of Nine Hundred Sixty dollars advance over purchase price on our section, two days after our arrival.

We also took homesteads adjoining and expect to locate on our land in the spring. We think this one of the best cheap land propositions that remains in the United States today, and is well worth anyone's time to in-

vestigate. Also the chance to obtain a free homestead adjoining makes it doubly attractive.

We have found this to be a very gentlemanly and obliging company to deal with and feel that we can recommend them to any who wish to make a paying investment in good, cheap land.

Sincerely,

(Signed) T. M. Rider, W. A. Rider.

R. F. Graeber, Banker of Sheldahl, Iowa, is an extensive land owner. He is recognized as an authority on land and land values, and his investment in, and indorsement of the Golden Prairie was made only after careful investigation. He says:

"Before investigating I was somewhat prejudiced against the Wyoming country, but I was most happily surprised to find smooth, level prairie land, black loam soil with clay sub-soil, well grassed, plenty of moisture to grow any kind of crops, best of water. I believe the country will all be developed in a very short time. I have bought a section of the land."

It gives us great pleasure to publish the testimonial of Mr. Edwin A. Nye, Editor-in-chief of the Des Moines Daily News.

Des Moines, Iowa, June 26, 1906.

I bought a section of land in the Golden Prairie country of Wyoming, without seeing it, and upon the recommendation of J. R. Carpenter, President of the Federal Land & Securities Company. I have known Mr. Carpenter for several years. He is a careful and conscientious land man and has wisely advised me in land purchases heretofore. Last week I went to see the Golden Prairie country. I am more than pleased with it. I am enthusiastic over the future of that beautiful section. I have never examined a finer soil or a better lying country. The climate is of course almost ideal, the altitude being the same as that of Denver. Hot winds can never get over the range of mountains which protect this highly favored section. I shall invest further in this Wyoming country. (Signed) Edwin A. Nye.

Editor Daily News.

Note:—Mr. Nye has since purchased an additional section of Golden Prairie land.

THE FEDERAL LAND & SECURITIES CO.,

## FIELD NOTES.

Crulckshank herd bulls are for sale by the old and reliable firm of Messrs. Isaac Novinger & Sons, of Kirksville, Mo. See page 17 and when writing mention this paper.

A pair of good Young Mary Short-horn bulls, both red and Scotch topped, one a yearling, the other two years, are offered for sale by Mr. T. A. Davenport, of Belmont, Iowa, on page 17. Write or visit the farm. Mention The Homestead.

Relative to their crop of spring pigs, Messrs. Watson Bros., Creston, Iowa, write that they have at present some 200 March and sixty April Duroc Jersey youngsters, with more to follow. The averages have been very satisfactory and one of the late litters from a Perfection Chief sow numbered fifteen of which eleven are doing well. Another sow by Ohio Chief has nine good ones and others have done as well. Most of the pigs are sired by Echo, Choice Goods's Best

and Nidlinger's Improved. Their fall sale comes October 29th, of which announcement will appear in due time.

An average of eight pigs to the family is what Mr. Will S. West, Hanna City, Ill., reports on his herd of Duroc Jersey swine. If all goes as anticipated some of the best of this bunch will get their names in the catalog for the fall sale, Oct. 10th.

Mr. W. B. Porter, of Cameron, Mo., is hooking orders for O. I. C. pigs of spring farrow. The blood of Jackson's Chief, the St. Louis World's Fair champion, predominates in Mr. Porter's herd. Write him now if wanting as good as is found in O. I. C. hogs.

Messrs. J. M. Reynolds & Son, Defiance, Iowa, are among the Duroc Jersey breeders who have their pens full of lusty little porkers. In all something like 165 pigs have made their appearance on this farm and no doubt among that number will be some that will be heard from later on.

Mr. A. C. Berry, of Unionville, Mo., is offering a few heifers got by Imp. Mutneer, his Marr Missile herd bull that is proving one of the best breeding bulls in Missouri. A few bred to him are also priced worth the money. See page 23 for Mr. Berry's advertisement and if in the market go and see the stock.

"While the weather has been abominable," writes Mr. T. E. Laurie, of Jacksonville, Ill., breeder of red hogs, "my crop of pigs numbers about 200 head and as they are out of ten different boars the variety of blood which I will have to offer should draw good trade. The young rascals are getting good attention and are coming along nicely."

Mr. F. G. Paul, of Laurel, Iowa, who made a very successful sale of Poland Chinas and Chester Whites last winter, claims October 23d for his fall sale of both breeds. He reports a fine lot of spring pigs regardless of unfavorable weather. Watch these columns for later notice of sale and remember that for large, deep-bodied, extra heavy-bodied hogs Mr. Paul is ready to show you.

If you want a good Scotch herd bull or a thick, blocky steer getter or some young cows or heifers that pay more than their board, you should look up the advertisement of the Wildwood get on page 23. This is an opportunity to get foundation material of the sort that will breed on. If you can't visit the herd, write Mr. W. W. Vaughn, of Marion, Iowa. Attractive prices for thirty days. Make reference to The Homestead when writing.

Hereford females are advertised on page 20, sired by some very noted bulls. One breeder who is selling on account of short pastures has three females sired by Columbus 29th, the bull that sold for \$1,005. Stock sired by this bull has been selling to everyone who looks it over. This is the last chance. Prices are very reasonable. Write or visit, referring to The Homestead advertisement. Address, Mr. Frank Festl, Nora Springs, Iowa.

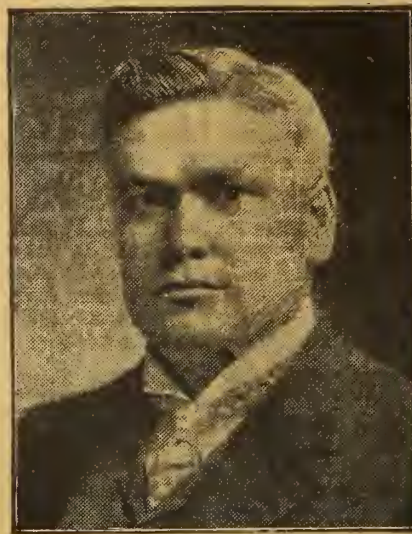

Mr. F. M. Erschen, of Odell, Ill., successful breeder of leading strains of Duroc Jersey hogs, sends us word that he has over 100 pigs thus far and the March pigs are exceptional. Pasture is now available and the material for the fall and winter sales will be making good progress, harring accidents. About thirty fall and winter gilts will be available by buyers at this herd and all the breeding varieties of blood are represented. Buyers should keep this herd in mind.

Mr. Ernest L. Mear, of Neponset, Ill., reports very steady sales of improved Chester White hogs from his advertisement in The Homestead and wishes to advise those looking for something choice in the line of herd headers of August and September farrow to write him at once. Only two left and \$40 gets either. The October boars will be priced at \$25 and they should sell quick at that. These boars are sired by Prince O. K. and are from the same lot that buyers have been selecting from for herd headers. Write, addressing as above, and kindly mention The Homestead. See page 20.

Mr. W. W. Wheeler, of Harlan, Iowa, breeder of table-backed Hereford cattle and mastodon Poland China hogs, writes that his sales of both kinds of stock have been the best. His stock is doing well and one of his imported cows has a pair of fine twin calves a month old which are the pride of the farm. A list of twenty-seven buyers who have visited the farm and bought in the last month is enclosed, and while their addresses are not given, we know them to represent a nice constituency of breeders. Write for anything in the line of stock mentioned above to Mr. Wheeler, or visit the farm. See page 20 and kindly mention The Homestead when writing for information to this breeder.

It is now Weighton & Ashby, Audubon, Iowa, breeders of high-class and up-to-date Duroc Jerseys, if you please. No herd in the state has been better known than that of Mr. John Weighton, and no herd has had a greater measure of success, both in the show and sale ring than this herd. Mr. J. B. Ashby, his well-known herdsman, has been taken into the firm, and it will hereafter be known as the Weighton & Ashby herd. This will be a combination that should insure its continued success. This year they have 250 pigs sired by Clearmont's Model (the first-prize Iowa State Fair boar), Proud Advance, Ohio Chief, Tip Top Notcher, I Am Advance, Clearmont Prince, Proud Model and Valley Chief. From these noted herd boars it is fair to presume that they will be out again this fall with something to show the boys. This herd won first last year at the Iowa State Fair on Clearmont's Empress and with her three litter mates they secured second prize on produce of sow at the same show. Clearmont's Model, the first-prize Iowa State Fair boar, heads the herd and is assisted by Proud Model, a son of Proud Advance and out of S. E.'s Model 9th, the \$1,025 sow. They also own S. E.'s Model 8th for which they paid \$600 at the Fagin, Browning & McCabe sale, and she has a litter by the great World's Fair boar, Tip Top Notcher. They also have a daughter of Belle's Perfect King, out of old Pottawatamie Belle, with a good Ohio Chief litter. They also have a litter by Proud Advance, bred the same as their Iowa State Fair litter last year. The latter boar is still doing service in the herd and he has a good bunch

## ONE MONTH FREE

T. F. WILLIAMS, M.D.  
Consulting Physician.

Popejoy, Iowa, March 21, 1906.  
I feel well, so I do not need any more medicine. If I ever have any symptoms again, I shall send for your treatment. I shall highly recommend your medicine to everyone afflicted with that dreadful disease, catarrh.  
Thanking you for your kind attention to my case I will close.

NAME .....  
ADDRESS .....

of pigs this season. Few herds have litters sired by as many good and noted boars as will be found in the Weighton & Ashby herd this year. They have two good boars in Proud Model and Clearmont's Model, and they are carrying them along in nice shape for the fall season. They also have a few good sows in preparation for the fall, and they expect to be out to the leading shows this fall. The Weighton & Ashby herd is one of the best Duroc Jersey herds in the state and no breeders in the state have bought better herd boars or better sows for foundation stock. They will be pleased to hear from or have any of the breeders call and see them and inspect the herd. Their advertisement will be found on page 17 of this week's issue.

Messrs. Isaac Novinger & Sons, of Kirksville, Mo., write that their efforts to get their Short-horn herd on a high producing basis are being well rewarded and the calves are coming at the rate of two a day. Their unusual thrift and heartiness is largely due to the good shape in which the herd wintered. Good sales are being made right along and still the assortment offers a fine chance for picking a choice male or female of gilt-edged Scotch breeding. Six females were recently sold to Mr. Amsbaugh, of Kirksville, Mo., and other large buyers were Messrs. M. Beltzer, J. Voss and W. A. Sanborn, of northern Missouri. The fall sale will be held at their farm, the Elm Grove, October 30th. Watch for the notice of this event later. When writing this advertiser kindly mention this paper. See page 17.

Mr. John Norris, of Audubon, Iowa, one of the oldest breeders of Duroc Jerseys in this section of the state, reports sixty spring pigs so far this season. These are sired by Botna Wonder, a son of Crimson Wonder, Model Chief II, and Perfection King, the last two hogs being herd boars at the head of the Johnson Bros. & Newkirk herd. One of his recent purchases is Lucy D. 8th, a daughter of old Advance, and she is a full sister to Proud Advance and has a nice litter of six pigs by Model Chief II. Model Queen, a daughter of Model Chief, and one of the best gilts sold in the Johnson Bros. sale, has a nice litter by Perfection King. He has another splendid sow called Iowa Belle that he purchased of Messrs. Geo. Briggs & Son, and she will farrow a litter in August. This is a most excellent sow all over and is one that can go out in any company. Mr. Norris will make a sale with Mr. James Law, one of his neighbors, and these two gentlemen intend to select the tops of their two herds for the occasion.

## MEDDLER BOARS FOR SALE.

The well-known Poland China breeders, Messrs. Wm. Ray & Son, Defiance, Iowa, write as follows: "We are now offering two good yearling boars for sale sired by the great Meddler 99999, and these will make splendid herd boars. We also offer a yearling boar for sale sired by Perfection I Know 38192, and a few good fall boars sired by Dude's Wonder 42564 and Happy Medium 31334. These are bargains and we will make the prices right if taken soon. We have 100 fine spring pigs and these are sired by our splendid herd boars L. & W. Perfection 32482, Impudence 3d, Dude's Wonder and Perfection L. & W. 42566. We are now booking orders for these pigs and we have some good ones." Anyone who wants a Meddler boar should write Messrs. Ray & Son at once or go and see them. They will do just as they say they will and their prices

For some time I will make the liberal offer of one month's treatment of catarrh of the nose, throat, lungs, bronchial tubes, bowels, stomach or liver. Many cases are cured in one month. You at any rate can test the truth of my statement free of charge, that I can and do cure catarrh in all its forms. Read what cured patients say, then send me the coupon and I will take up your case with you.

I had catarrh of the stomach for years, and could find no relief until I began your treatment and am now perfectly cured. You can refer my case to anyone, and anything I can do for you I will be only too glad to do.

MRS. E. ELLEFSON.

are always right. Write them and mention The Homestead.

NEW CHESTER WHITE SWINE BOOK  
Copyrighted and printed by veteran breeder. Artistic, fully illustrated, national in scope, with 4,000 subscribers' names contained; this book should be in the hands of every breeder of Chester Whites. Full information on every subject in which the hog man is interested from breeding crates to ear tags. Cuts of representative hogs of the breed. If you want your herd represented write Mr. F. F. Moore, Rochester, Ind. Mention Homestead.

## BAYNE HAS FALL BOARS FOR SALE.

With this issue of The Homestead appears the advertisement of Mr. John O. Bayne, of Aurora, Neb., in which he announces that he has two extra good fall boars to sell. They are very growthy and are exceptionally good individuals. They are sired by the great boar, Cole's Duroc, which won first in his class at the Nebraska State Fair in 1904 and their dam was one of the best daughters of the great Orion. He also has about fifty good spring pigs on hand and among them are some good show prospects. Mr. Bayne is now in shape to supply your wants in the Duroc Jersey line and those who are in the market for a good fall boar or a spring pig should write him before buying. When writing please mention The Homestead. See advertisement on page 17.

## MESSRS. MCKERROW &amp; SONS' SHROPSHIRE, OXFORDS AND SOUTHDOWNS.

At Pewaukee, Wis., is situated one of the largest and best-known sheep breeding and importing farms in the West. Under recent date a letter from the establishment reads as follows: "We do not own the earth, or all the good sheep thereon, but do claim to have more high-class Shropshires, Oxford and Southdown rams on our farm than can be found on any farm in America. If you don't believe it come and see. Our new English importation lands in July. We guarantee values in everything we sell. Our English address until June 25 will be Waverly Hotel, Shrewsbury, Eng. Home address, Geo. McKerrrow & Sons, Pewaukee, Wis." Mention The Homestead when writing.

## BLUFF ROAD CHESTER WHITES.

Mr. D. H. Lewis, of Geneseo, Ill., proprietor of the Bluff Road herd of Chester White swine, is offering two of his herd boars for sale in a new advertisement on page 17 of this issue. Mr. Lewis has on hand about 150 head of spring pigs sired by his four herd boars. Neponset Boy was first in junior yearling class at Michigan, Wisconsin, Kentucky and Illinois State Fairs in 1906, and is the sire of ten spring litters. The Winner was the third-prize pig in the under year class at the Illinois State Fair in 1906 in a large show. He is now offered for sale by Mr. Lewis at a reasonable price. There are six spring litters in the herd sired by this boar and a number of the sows sold in the winter brood sow sale were bred to this hog. A very good likeness of this boar appears on another page of this issue. There are five litters by Mear's Medium, a son of the noted Fisher's Medium that as a pig and yearling won first at some of the largest county fairs in Illinois, and was in 1906 pronounced by competent judges one of the best Chester Whites on the Illinois State Fair grounds. His dam, Iowa 2d 32094, was shown at the World's Fair in 1904, winning second in class, second as produce of sow, and was in the young herd which won second. Mr. Lewis is also offering Perfection

tion 16419, another of his herd boars, for sale. There are a number of the spring litters sired by this boar. These boars are offered for sale for no fault, but simply because Mr. Lewis cannot profitably keep so many herd boars. He is also offering for sale fifteen fall and early winter boars and will be pleased to correspond with readers of this paper in search of Chester Whites. Look up his new advertisement on page 17 and write him for particulars, kindly mentioning The Homestead.

#### HEREFORD BULLS AND HEIFERS FOR SALE.

With this week we begin the advertisement of the Messrs Hood & Baker, Dunlap, Iowa, well-known breeders of Hereford cattle and Duroc Jersey hogs. Just now they are offering a splendid bunch of young Hereford bulls for sale, ranging in age from six to twenty months of age. These are all strongly bred in the blood of Anxiety 4th, and one of these is a double-bred Anxiety 4th bull. Two of these are full brothers to the young bulls that they sold in their last June sale for \$250 and \$205, both being sired by Rival 68768, a grandson of Beau Real 3d. They also have a twenty-months old bull sired by Gudgeon & Simpson, a son of Beau Dandy 145564. He is a grandson of Beau Brummel on both sire and dam side. These bulls are just right to go into service, and are priced at a very reasonable figure. They will also sell a few choice heifers bred to St. Elmo of Shadeland 17th, their 2,260 pound herd bull. If any of our Homestead readers are wanting a young bull or a few nice heifers it will pay them to go and see what Messrs. Hood & Baker have to offer.

#### HUFFMAN'S DUROCS.

Few of the younger breeders of Duroc Jerseys in the state have made greater strides in the hog business than has Mr. Claude Huffman, of Scranton, Iowa. A good feeder and an excellent care taker, coupled with a lot of good common sense and a keen judgment, he bids fair to become one of the best of the young breeders in the state. He has about 175 head of hogs on the place this spring and over 100 head of these are spring pigs. For herd boars he is using Proud Orion 31337 and Manly King 50299. The former boar is a son of old Orion and was third-prize pig in six-months-old class at the Iowa State Fair in 1904, and was fifth-prize senior yearling boar at the same show in 1905. Mr. Huffman purchased him of Mr. S. P. Alsins, of Boone, Iowa, and some of the very best sows in the Alsins sale last winter were sired by him. He was purchased late last fall, but Mr. Huffman has eighteen spring pigs by him. His other boar, Manly King, is a son of Manly Orion, the well-known boar at the head of the S. P. Fréed herd. This fellow is a great hog and yet is a very smooth fellow all over. He could easily make this boar weigh 1,000 pounds. His spring pigs are sired by the above two boars, also by Proud Advancer, Ohio Chief II, Crimson Model and old Rural. Mr. Huffman has a splendid two-year-old sow in Malcolm's Maid, a daughter of the Minnesota sweepstakes boar, Dale, and she is out of a daughter of old Malcolm's Model. This sow is bred in the purple and she is an excellent individual and she may be seen at the fairs this fall. This sow farrowed ten pigs last year and raised nine, and this year she has ten pigs by Manly Orion. Mr. Huffman's last sale averaged \$46.15, and considering it was his first brood sow sale was a very good one. He will have some nice stuff to offer the trade this fall and the boys will not make any mistake if they remember him when they want something in his line.

#### A PROMINENT DISPERSION SALE OF SHORT-HORNS.

At Farmersburg, Clayton County, Iowa, on June 14th, Mr. H. H. Diers, whose postoffice is St. Olaf, Iowa, will sell his entire herd of Scotch and Scotch-topped Short-horns, an offering that certainly should attract the attention of those who are in search of some high-class Scotch cattle. As this is our preliminary notice, we shall not enter into detail at this time, but leave that for future articles. We will, however, say that of the forty-one cattle to be dispersed, there is not a plain individual in the bunch. Aside from the fact that they are not only good individually, more than half the offering are Scotch cattle of the most choicely bred sorta. Of the twenty-nine females offered, twenty are Scotch, and of the twelve bulls consigned, six of them are Scotch, so that it will be seen the offering is more than an ordinary one, considering the fact that it is a dispersion sale. At dispersion sales the breeder have an opportunity at the reserve portion of the herd; this is a privilege they cannot enjoy where draft sales are made. In this instance every animal on the farm will be sold but two, and these would be consigned but for the fact that they are badly out of condition and would in no way be desirable to prospective purchasers. For many years the senior Mr. Diers, who was a member of the firm of F. W. Diers & Son, endeavored to breed the best class of cattle that money would procure. The elder member of the firm has retired from actual work and Mr. H. H. Diers finds his duties more than he can successfully attend to and give the Short-horn herd the attention that has been his custom. A number of these Scotch females are descendants of Imp. Sunflower 22d, the highest-priced Scotch cow sold into the state of Iowa in 1895. Mr. Diers paid this long price for this cow because of her superior merit. The best imported bulls have been used, such as Imp. Avalanche, a son of Spicy Monarch, and out of Averno 12th, by British Leader. Spicy Monarch was sold by Mr. Marr to Wm. Duthie; his sire was Spicy Robin and his dam out of Alexandra 20th, a full sister to the Champion Gay Monarch, she by William of Orange, and British Leader was by this same noted bull, William of Orange. Following Avalanche, Imp. Gladstone was used, he by the great bull, Druidstone, his dam being Imp. Snow Lily by Prince of Rettie. Druidstone was by the great bull, Cornerstone, which many American breeders have had occasion to read much of. Following this bull was Imp. Crown Imperial, a son of Village Fancy 2d and out of Imp. Minorka Maid by Crabstone 2d. Minorka Maid belongs to Mr. Cruickshank's Mayflower family. These are the bulls that have been used up to the present time and at present all the females in this offering are bred to that most ex-

cellent bull, Imp. Great North. This is a red bull sired by First Choice, he by Abotsford 2d, his dam, Imp. Blossom 6th, was by Favorite; he by Chamberlain out of Buttermilk 2d and she by Sunray. We speak of these bulls to show that Mr. Diers has never operated on economic lines in an endeavor to build up a herd of Short-horns of the highest type and character. While he has been quietly building this herd, there has not been much noise made about it, hence breeders are apt to overlook this sale by virtue of this reason. It nevertheless is a fact that few breeders can offer a better lot of Scotch cattle than will go through this sale on June 14th. Particulars of some of the animals to be sold during the next two weeks.

#### LAST CALL FOR THE HEALY SOUTH OMAHA SALE.

On Monday, May 27th, Mr. F. P. Healy and a number of other well-known breeders will be at South Omaha, Neb., with a draft of Short-horns, one-half of which are Scotch cattle, and it is one of the best offerings that will be sold at this point this season. Breeders who are in search of herd bulls or cows and heifers should by all means attend this sale. Twenty-seven head are Scotch cattle of the Queen of Beauty, Duchess of Gloster, Orange Blossom, Secret, Foxglove, Mary Ann of Lancaster, Rosebud and other popular Scotch tribes. There will be some well-bred Scotch bulls in the sale, including the five-year-old herd bull, Straight Cruick 191132, belonging to Mr. W. R. Wilson. Mr. Wilson will also sell some younger Scotch bulls, all sired by Straight Cruick, and Mr. E. C. Holland and Mr. F. P. Healy will also have some young Scotch bulls in the sale. Straight Cruick is the bull that has recently headed the W. R. Wilson herd and is a son of Violet's Galahad out of a daughter of Valley Champion. He is a Queen of Beauty and as good a breeding bull as Mr. Wilson ever owned. Mr. Healy sells two good young Duchess of Gloster bulls, both sired by Baron Pride and both out of daughters of Scottish King. Mr. Holland sells a nicely-bred Orange Blossom and an Acorn, both being sired by the Thompson-bred bull, Bold Prince. Mr. Wilson and Mr. Healy are sending some good Scotch cows and heifers to this sale. These are as good as either one of these breeders have in the herd. Mr. Wilson is sending a two-year-old heifer that is good enough to go into the show rings this fall. We called particular attention to these in our last issue, and we now ask all of The Homestead readers who are in need of some more cattle to come out and attend this sale. Messrs. N. D. Merrill, of Creston, Iowa, and J. A. McFarlane, of Fairfield, send some good young bulls to this sale. Mr. F. P. Healy has taken particular pride in bringing to South Omaha a good class of cattle and he has never disappointed his buyers. The offering that he has gathered together for this occasion is as good as he has ever brought to South Omaha, and buyers will say so when they attend the sale. Anyone who is in need of a herd bull or Scotch cows and heifers will find them in this sale. He has issued one of the nicest catalogs that has been gotten out this season and it will be sent for the asking. Write Mr. F. P. Healy, of Bedford, Iowa, for it at once, and kindly mention The Homestead.

#### LAST CALL FOR THE MARTIN ANGUS SALE.

Preeminently the greatest offering of Aberdeen Angus cattle that will go under the hammer this season will be that of Mr. C. J. Martin, at Adaza, Iowa, on Tuesday, May 28th. Every Angus man that possibly can attend should come out to this sale, as it will afford an opportunity to not only witness the sale of what is considered the very best collection of Angus cattle that has passed under the hammer in recent years, but will also enable lovers of Angus cattle to meet with the foremost breeders in this country. Much has already been said about the offering, but for the benefit of those who have not kept in touch with this great event we will again say that it may be considered a Prince Ito 2d offering. Nearly everything in the sale will either be sired by him or bred to him, and it will be a long time again before such an opportunity will be offered to buy the get of the grand champion bull of America. Prince Ito 2d has won his honors in the most fiercely-contested show rings in America, and his winnings at the World's Fair, the American Royal, the International and the leading state fairs stamp him as the premier Aberdeen Angus bull on this side of the water. As a sire he has even surpassed the expectations of his owner, and he will have a string of young heifers and young bulls in this sale that will prove all we have said about him as a sire. All the females not related to him will be bred and about fifteen will have calf at foot by him. The breeder who is wanting a future herd bull will find him in the December calf, Black Defender. He is a son of Prince Ito 2d and his dam is Blackbird 26th, the grand champion World's Fair cow, also included in the sale. Not in recent years has such an opportunity been offered to buy a young bull bred as he is, coupled with an individuality that will make him one of the greatest herd bulls of the future. Mr. Sam Johnson, the well-known herdsman, who has not a superior on this side of the water as an authority or as a fitter of Angus cattle, says that this calf is superior to Prince Ito 2d at his age, and that if he falls into good hands will become one of the future Angus bulls in this country. Mr. Johnson is a man of few words, but when he comes out in a statement of this kind it will certainly have weight among the Angus breeders who know him. There will be several other young bulls in the sale sired by Prince Ito 2d, also a most excellent lot of young heifers. There will be several of his best imported cows in the sale, many of them being the dams of some of the best things in the Martin herd. The great attraction in females, however, will be Blackbird 26th, the grand champion World's Fair cow, and the first grand champion female to ever go under the hammer at a public sale in this country. The record of this great cow, both at the World's Fair, the American Royal and the International and the leading state fairs, stamp her as the greatest Blackbird cow today in America. There will be about fifteen head of Blackbirds in the sale, together with a nice lot of Queen Mothers, Trojan Ericas, Prides, Barbaras, Coquettes, Heatherblooms, Drumin Lucys, Zaras, Maggies and Heroines. The

# PILES NO MONEY TILL CURED.

TOO LATE TO CLASSIFY.

## THREE SPLENDID FALL BOARS

Sired by I Am a Wonder, a son of the sweepstakes boar Crimson Wonder I Am, and out of the \$1500 sow Ruberta. Come and see these if you want a herd header. Address, F. E. Garrett, Lohrville, Iowa.

## YOUNG HEREFORD BULLS FOR SALE

RANGING in age from 6 to 20 months, all bred in the best blood of Anxiety 4th, and out of daughters and granddaughters of Beau Brummel, Dale 3d and other noted bulls. We will also sell a few choice heifers, bred to St. Elmo of Shadeland 17th, weight 2,260 pounds. Write or come and see us. Address, HOOD & BAKER, DUNLAP, IOWA.

## BLUFF ROAD CHESTER WHITES

I AM offering for sale at reasonable prices The Winner 13765, an Illinois State Fair winner, and Perfection 16419, two of my herd boars. 15 fall and winter boars at prices that will move them. Am booking orders for spring pigs from prize winning ancestry. Write for particulars.

D. H. LEWIS, R. F. D. 6, GENESEO, ILLINOIS.

## TWO YEARLING MEDDLER BOARS

FOR SALE. Sired by the great sweepstakes wonder Meddler 99999. Also one by Perfection I Know 38192, and a few fall boars sired by our Dude's Wonder 42564 and Happy Medium 31334. Also booking orders for spring pigs sired by our great herd boar L. & W. Perfection and Independence 32. Dude's Wonder and Perfection L. & W. Address, WM. RAY & SON, DEFIANCE, IOWA.

man who is wanting to fill out a show herd this year should by all means attend this sale. This is true of the older matrons, and there are several heifers in the offering that can go right into show herds. The Martin offering is unquestionably the greatest lot of Angus cattle that has gone through a public sale ring in recent years. We might go on and enumerate the good things in the sale, but there are so many of them that we will leave it to the personal inspection of the breeders who will attend the sale. We feel certain of one thing, and that is there will be no disappointments when breeders see the cattle. Every arrangement has been made to attend to the wants of the breeders and Mr. Martin extends a cordial invitation to everybody to come to the sale whether they want to buy or not. Kindly write for a copy of the catalog and please mention The Homestead.

#### COL. FRANK O. LOWDEN SELLS SHORT-HORNS.

A sale extraordinary is announced by Col. Frank O. Lowden, of Oregon, Ill., from his celebrated Siniissippi Farm. It has been the aim and ambition of Colonel Lowden to make a sale of Short-horn cattle whereby the public could have an opportunity at a larger number of strictly first-class Short-horns than had yet been their privilege on American soil. It was first contemplated holding a two days' sale, but after due deliberation it was found that in order to offer nothing but Scotch cattle of breeding ages and get the requisite number of cows with calves at foot without offering an animal for which any apology need be made, that a one day's offering of Scotch Short-horns of this high character was all that could be found ready for sale. We believe we are speaking within bounds when the statement is made that there has never yet been an offering in a one day's sale of so many strictly high-class Scotch Short-horn cattle as will be offered from the Siniissippi Farm on June 11th. There will be over forty calves selling with dams and not a female offered but what is in calf or has a calf at foot. There will only be four bulls consigned, each of which is a herd header, and of the entire sixty-five head cataloged there are only two that are not Scotch cattle. The offering is especially attractive in a variety of ways. The highest-priced Short-horn bull of modern times is included in this sale. Who will get him and how much he will sell for is on every tongue in the Short-horn world. The reader can readily guess that this bull can be none other than the invincible white bull, Cumberland's Last 229822. This beautiful white bull that has never suffered defeat in a show ring has been used in the herd with marked success; he is not only a sure breeder, but a sire of calves of a very high class. He is fully in keeping with his stable companion, the \$5,000 Ceremonious Archer. We doubt if there has been a bull of such character and reputation as this fellow offered the public in many years, outside of the single exception of Choice Goods. Cumberland's Last won first in the senior calf class at the International Live Stock Exposition in 1904 and championship at the Iowa State Fair in 1905; also first prize and junior championship at the International in 1905, since which time he has been retired to that high position of chief herd bull, which reputation he has most excellently gained by the good quality of his offspring. We pass this bull for the present for the reason that he will be heard from again during our succeeding issues. The splendid list of two-year-old heifers that are consigned to this sale, sired by Ceremonious Archer, bear evidence that this famous bull is second to none as a sire of choice females. Ceremonious Archer stands without a peer among modern-day Short-horns in the show ring. We present a few of his winnings, both as a calf, as a yearling and a two-year-old. As a calf in 1901 he was first at the Wisconsin State Fair, second at Iowa, first at the American Royal at Kansas City and first at the International in Chicago. As a yearling in 1902 we find this unbroken record: First at each and all of the following shows: Iowa, Minnesota, Kentucky and American Royal; junior champion, Wisconsin, Illinois and at the

## CRUICKSHANK ....Herd Bulls....

FIVE Top Notchers, four reds and one dark roan, one Lavender, one Victoria, one Dorothy, one Mary Anne and one Splenwort or Secret. These bulls will compare favorably with the best. If you have any doubt, say, just come and we will take pleasure in showing you. We are from Missouri.

ISAAC A. NOVINGER & SONS, Kirksville, Adair Co., Missouri.

#### CLAREMONT

HOMER of S. E. Model VIII and IX, Claremont Model, Proud Model and Proud Advancer. 250 pigs of spring crop. 7 fall boars for sale. Orders booked for future delivery. Address: Weighon & Ashby, Audubon, Iowa.

## TWO GOOD SHORT-HORN BULLS

FOR SALE at the Pike timber stock farm. Both red Scotch topped young Marys, one a yearling, the other nearly two years old.

T. A. DAVENPORT, BELMOND, IA.

## NORTH BLUE DUROC JERSEYS

MY herd is headed by Echo Wilkes, the \$305 male pig, 120 pigs on hand, mostly of early farrow. I can supply your wants, be they large or small. Write me your wants and mention The Homestead. Chas. Liebhart, Marquette, Neb.

## SUTTON HERD OF DUROC JERSEYS

HELD headed by Brooklyn Boy by Keep On. I have 120 good pigs on hand and will book your order for one at any time. Write me and mention The Homestead.

CHAS. VAN PATTEN, SUTTON, NEB.

BAYNE'S Duroc Jerseys. I have 2 extra good fall boars; will price at a very reasonable figure if taken at once. Are bred right and good individuals. Write for prices and description. John O. Bayne, Aurora, Neb.

Chicago International. As a two-year-old he was first at Lexington, Ky., first and senior champion at Kentucky, Missouri, Iowa, Wisconsin, American Royal and Chicago International; first at Minnesota State Fair, Indiana and Illinois. This is an unbroken record second to no bull of his age in modern times. We speak of these two bulls at this time for the reason that all of the cows in this sale of sixty-five head, numbering sixty-one, are bred to the two above bulls. It is certainly worth the while of every breeder who expects to buy high-class Scotch Short-horns in the near future to keep in mind the fact that there never has been such an opportunity nor such a large field to select from of cows bred to bulls of the great prominence possessed by Cumberland's Last and Ceremonious Archer. Detailed mention of this superb offering is withheld for the two succeeding issues of this paper. The success of Colonel Lowden in building up his herd is in a large measure due to his able lieutenant, Mr. Thomas Stanton, the present manager, who has made practically all of the purchases for the Siniissippi herd. Colonel Lowden is not unmindful of the good work done by Mr. Stanton and gives him much credit for the very useful and profitable Scotch Short-horns selected by the latter. Mr. Stanton will manage the sale, however, after which he goes in business for himself, having formed an association with Dr. Earles, of Milwaukee, Wis. After the 1st of July Mr. Stanton will have charge of the famous Burwood Stock Farm, at Milwaukee, Wis., where he will have an opportunity to build up another herd on the same lines as the Siniissippi. The sale catalog of the Siniissippi sale is now ready to mail and should be an encyclopedia of Scotch breeding second to nothing that has ever been presented to American people. Watch future issues of this paper for more particulars concerning this phenomenal offering of Scotch Short-horns and make arrangements to attend this sale June 11th, as it will doubtless be one of the great days in Short-horn history. See advertisement on page 18.

# OFFERING OF SCOTCH SHORT-HORNS

## EXTRAORDINARY

..... FROM SINNISSIPPI FARM AT CHICAGO, ILLINOIS, JUNE 11, 1907 .....

On June 11th I will sell 65 head, 4 bulls and 61 cows and heifers. All of breeding ages. Forty females have calves at foot, and all are bred to Ceremonious Archer, Cumberland's Last, or other noted bulls.

**JUNE  
11,  
1907**

**E**VERY female is fit to grace any herd and every bull a herd header, including Cumberland's Last. Many of the best imported females from Aberdeenshire and the cream of America's best breeding establishments are to be found in this consignment. I am told that no breeder ever offered at one day's sale the equal of this selection (numbers considered). Every animal is of breeding age. It has been my ambition to sell an offering of Scotch cattle second to none. In parting with Cumberland's Last I am selling what I believe to be the best individual Short-horn bull I have ever seen. His calves are very promising. Every breeder and admirer of Short-horn cattle in America is earnestly invited to be with me at Chicago, Ill., June 11, 1907, to inspect these cattle.

**JUNE  
11,  
1907**

**F. O. LOWDEN,**  
THOS. STANTON, MANAGER.

**OREGON, ILLINOIS.**  
COLS. WOODS, BELLOWS, JONES AND GARDNER, AUCTIONEERS.

## Dispersion Sale of Scotch and Scotch Topped SHORT-HORNS

ON JUNE 14th

at Farmersburg, Clayton County, Iowa,

I will disperse my entire herd of Scotch and Scotch topped Short-horn cattle, consisting of

**29 FEMALES AND 12 BULLS**

**T**HERE will be 20 Scotch females and 6 Scotch bulls in the offering, among which are as good Scotch Short-horns as are to be found in America to-day. The cows are in calf to Imp. Great North 179848. This is the best lot of Scotch cattle ever offered in this section of Iowa. Farmers-

burg is on the Elkader branch of the Milwaukee system southwest of North McGregor, Ia. Parties from Illinois, Wisconsin and Iowa will find this a convenient point to reach by way of the Milwaukee system. Good judges pronounce much show material in this offering. All parties from the west coming the night before the sale should get off at Monona, where free livery will be in waiting the following morning for the sale. All others from the southeast and north get off at North McGregor and arrive at Farmersburg at 10 o'clock the morning of the sale.

**H. H. DIERS, Proprietor.**

Auctioneers: Cols. F. M. Woods, R. W. Barclay and F. O. Cubbage.

### The Dispersion of the Canna Hill Herd of Short-horns.

On Saturday, June 8th, at his farm near New York, Iowa, Mr. W. E. Cutler, of Corydon, Iowa, will disperse his herd of Short-horn cattle. The Canna Hill herd is one of the best herds of Short-horns in southern Iowa, and its owner has been one of the most painstaking and reliable breeders. Ill health, both of himself and wife, is the reason for dispersing his herd at this time, and were it not for this they would never be sold. There will be forty-five head in the sale. Thirteen of these will be bulls and the rest are cows and heifers. At the head of the herd stands the pure Cruickshank bull, Baron Victor 250111, a royally-bred Victoria and one of the best herd bulls to be sold this year. This bull will be three years old in October, is red in color and an excellent individual. Mr. Cutler had visited many of the leading Short-horn herds before he got his eye on this bull, and when he did he had to top the M. L. Logan sale in order to get him. Short-horn breeders who are in search of a herd bull will find here an animal that is fit to head any herd. His breeding is strictly all right, and as an individual he is away ahead of the average herd bull sold in public sales. He will be bred to most of the cows and heifers in the sale and some will have calves at foot by that time. The bull that formerly headed the herd was Victor Maple 203379, a son of Mr. Geo. Bothwell's noted Grand Victor, and many of the heifers and young bulls in the sale are sired by him. This bull was purchased by Mr. C. A. Saunders, of Manilla, Iowa, and he is doing service now at the well-known Greeley Stock Farm. The bull used before him was Vallery 2d, a grandson of Victor Mysie 2d, bred by Messrs. S. H. Thompson & Son. Several of the young bulls and heifers in the sale are also sired by this bull. Breeders may thus realize that this herd has been well topped by the best bulls that judgment and money could buy. The Scotch tribes represented are Rosemary, Victoria and Lavender families. Among the Victorias is Victoria Funke 7th, a three-year-old daughter of Golden Champion. This heifer was purchased by that well-known breeder, Mr. Ernest Funke, and she has a bull calf at side by Victor Maple. Miss Lavender 2d is a five-year-old daughter of Imp. Fairhaven. She was bred by Uncle Benny Whitsitt, of Preemption, Ill., and is one of those well-known Lavenders. She will have a heifer calf at foot. There are a couple of Cruickshank Rosemarys in the offering, one of which is sired by Victor Maple, the other by the B. O. Cowan bull, Pilot. There will be a splendid lot of heifers in the sale by Vallery 2d that are just right for some man who is starting a herd. One of the best individuals in the sale is Canna Hill Lady, a daughter of Vallery 2d. She will be safe in calf to Baron Victor. One very noticeable thing in the Cutler herd is the number of large, roomy cows and most excellent milkers. There are a choice lot of young bulls in the sale, about thirteen in all. This sale will be a splendid place to get some bargains. Readers of this paper should write for a copy of the catalog and if they are in need of some good cattle we

will recommend that they attend this sale. Kindly mention this paper when writing.

### Grant Hockett's Duroc Jerseys.

A representative of The Homestead whiled away a few hours recently with Mr. Grant Hockett, of Manning, Iowa, owner of the "Old Gold" herd of Durocs. Mr. Hockett is in the swim this season and has never had a better prospect, so far as spring pigs go. He will not be behind the procession when it comes to herd boars, either. His purchase last year of I Am Advance, from the Messrs. Johnson Bros. & Newkirk, was a wise move, and this boar made a most favorable impression on breeders at his winter sale. This boar has had a great come out to him, and is going to make the strongest competition in the aged class this year. Mr. Hockett has used considerable caution in carrying him along, and he is today in ideal condition, without being loaded with surplus flesh. He is a son of the old sweepstakes boar, Advance, and is out of Lucy D. II., and is therefore a full brother to Proud Advance, Reed's Banker and other well-known boars. He is a boar that breeders must reckon with this fall at the fairs, so they may as well keep their eye on him. He recently purchased Chick's Chief 16043, a son of Ohio Chief and out of Chick's Belle by Orion II. He is a full brother to Ohio Chief II., now at the head of the Proud Advance Stock Company herds at Shannon City. This is a well-bred hog, and four of his litter sisters were premier champion sows at the World's Fair at St. Louis. He is not so large a hog as I Am Advance, but is a hog of lots of quality. He was secured to cross on the get of the latter boar. These two boars are now the herd boars in the Hockett herd. He has 125 spring pigs and he has a nice crop that show much promise. These are sired by I Am Advance, Crimson W., a son of Crimson Wonder, E. L. Perfection, a son of old Rural, and he also has litters by Waverland Ohio Chief 10th, Proud Advance Jr., Clearmont's Model (the first-prize Iowa State Fair boar), Advance Dandelion, Perfection Boy and Royal Finch, a son of old Gold Finch. He has some good yearling sows that he is feeding along for the fall shows, and he also has about twenty fall sows that he will hold for his next year's sale. We have known the Hockett herd for these many years, and we can say that we have never seen it when the prospects looked more encouraging. If nothing happens to Mr. Hockett this season he ought to be able to show the boys some good things this fall.

### The Cherry Grove Short-horn Sale.

With the exception of dispersion sales it is doubtful if any Short-horn sale of the year contains as many sons and daughters of a noted bull as does the forthcoming Cherry Grove Short-horn sale. Mr. Milton E. Jones of Williamsville, Ill., the proprietor of this noted herd, has made more than an even division of the get of Imp. Lord Banff with the Short-horn breeders of America in making up the list for his sale to be held

**45 HEAD--13 bulls including my Cruickshank  
Herd Bull, 20 cows, 12 choice  
two year old Heifers.**

BARON VICTOR 250111, considered one of the best Cruickshank Victoria bulls in Iowa, will also be sold. There will be eight head of Scotch cattle of the Victoria, Rosemary and Lavender tribes in the sale. The rest are well Scotch-topped. Most of the young things are sired by Victor Maple, a son of George Bothwell's Grand Victor, and Vallency 2d both richly bred Victoria bulls. My cattle are good milkers and there will be some excellent cows and some very choice heifers in the sale. While I am dispersing my herd I am also guaranteeing everything, and it will be a splendid opportunity to buy Short-horn cattle. Parties from a distance can come to Chariton and stop at the Bates House or at the Rhea hotel, Corydon, Iowa, at my expense, and there will be free conveyance to and from the farm. Address me for catalog as follows:

**W. E. CUTLER, - CORYDON, IA.**

Col. Geo. P. Bellows, Auct., Fennell and Hasbrouck, Assistants.

on Tuesday, June 4. There are many animals included in this sale that will prove their value in the show ring, as well as in the breeding herd, and the large number of calves at foot by Lord Banff, make it one of the most valuable offerings of the year. Mr. Jones is not expecting sensational prices, but the cattle listed are worthy the attention of all Short-horn breeders. There are a number of large bull calves to be sold with their dams in this offering that are sired by Lord Banff and in view of the fact that out of the season's crop of bull calves Mr. Jones was only able to retain two, and these after refusal to place a price on them, is evidence of the many bargains found in this lot. Nearly every female of breeding age is either safe in calf or has calf at side. We wish to direct the attention of our readers to some of the females which have been sent forward in this sale. Imp. Scottish Rose is a daughter of Earl Marshall, a Duthie-bred bull of practically the same breeding as Marengo. This cow has been a wonderful breeder. Her first bull calf was Imp. Scottish Principal, a bull used in Cherry Grove herd for two years and sold in the last sale from this herd, to Judge A. K. Vickers, of Vienna, Ill., at \$530. Her second bull calf is Fire King, a bull which Mr. Jones has used in the herd with very good results, and included in this auction. Her last bull calf is being retained for use in the herd, while her daughter Mr. Jones considers the best daughter of Lord Banff in the herd and has sent her to be bred to Lavender Viscount. She now sells with a beautiful red roan heifer calf at foot by Lord Banff, and

should prove a valuable addition to any herd. May Violet 2d belongs to the Cruickshank Violet family and comes from the noted Tebo Lawn herd. She has a good bull calf of the herd-header sort at foot by Lord Banff, and is one of the attractions of the offering. Imp. Golden Welcome 3d is another attractive proposition. She was imported by Mr. Jones and in his opinion is one of the best females which he ever had in his herd. She has a beautiful heifer calf at foot by Lord Banff, and a yearling bull calf by Lord Banff out of her is also included in the sale. Good Lassie by Imp. Choice Goods is one of the desirable things in the auction. Her dam was placed in Teho Lawn herd at a cost of \$2,000, and she is of the Cruickshank Victoria family, so highly prized by the late Colonel Casey. She sells with an extra good October bull calf at foot, Choice Prince, by Prince of Tebo Lawn. Ruby of Fairview is a cow of superior merit. She is included in this sale owing to the fact that Mr. Jones wishes to give Short-horn breeders an opportunity to secure some of his best females at their own price. She has a red bull calf at foot by Lord Banff, and has herself been an International and Royal winner. Fancy 26th by Royal Wonder and out of Imp. Fancy 25th is a three-year-old Scotch cow, and has a very good bull calf at foot by Lord Banff. The breeder in search of a herd bull will find a bargain in this pair. Bull calves dropped in November are not often sold with their dams, and this pair should be appreciated. Scottish Rose 4th is a daughter of Lord Banff just two years old. Her dam was Scottish Rose 2d

by Imp. Chamberlain's Heir 2d, a bull personally selected by Mr. Jones from the herd of Mr. Philo Mills and used with much success in Cherry Grove herd. Anyone in the market for a good Scotch heifer will be pleased with this one. Queen Cup Bearer by Imp. Cup Bearer is one of the old stand-bys in this herd. She is the dam of Cherry Grove Banff 3d, the bull which now heads the well-known herd of Mr. Walter Teel, of Rushville, and Mr. Jones sold another of her bull calves at \$800. Sarepta May 6th by Nonpareil Prince 2d and out of Sarepta May by Prince Bishop 2d by Imp. Prince Bishop belongs to the Cruickshank Secret tribe, and sells with a red heifer calf at foot by Lord Banff. Another of this good family by Lord Banff. She is Cherry Sarepta 2d by Lord Banff. She is a heifer of show-yard merit and her breeding cannot be excelled. Pomegranate's Pride is a good red heifer by Prince of Tebo Lawn. Mr. Jones, it will be remembered, was one of the most liberal buyers in the dispersion of sale of Tebo Lawn herd, securing many of the best cattle included in this noted herd. In order that breeders may secure something from this herd Mr. Jones has listed this heifer and is retaining her dam and full sister in the herd. Constance Cherry by Imp. Bapton Spice sells with an eight months calf at side by Lord Banff. Seldom is such value found in an auction as in this one, when bulls practically ready for service sired by such a noted bull as Lord Banff are offered with their dams. Jessie R. is a daughter of Golden Charity Prince, the good bull at the head of the Short-horn herd owned by Mr. W. B. Rigg and out of Jessie by

Spartan Cupbearer, one of the best sons of Imp. Cupbearer. She is a thick-fleshed, smooth young cow and has an August heifer calf at foot by Lord Banff. This is an attractive proposition and should not be overlooked sale day. There are a number of daughters of Lord Banff included in the offering. Breeders are loath to include females by noted herd bulls, such as Lord Banff, in public sales and seldom part with them, but Mr. Jones is anxious that those present at his sale should be pleased, and to this end is listing some of his best cattle. Many of these will probably sell at prices within the reach of all, and this opportunity should not be overlooked. The bull consignment is the strongest yet made from Cherry Grove. Sons of Lord Banff that have been used with much success in the herd are listed, and the breeder in search of a herd bull will find in this auction bulls that will fill the wants of the most discriminating buyers. Further mention of these will be made in our next issue. The catalogs will be sent to all who will write as per the announcement on last page of this issue. Write for one at once, kindly mentioning this paper, and plan to be present sale day. The sale will be held at the farm, adjoining Williams-ville, Ill., and parties from a distance can easily reach this point by coming to Springfield and taking the interurban cars. Lord Banff was never in better breeding condition than at present and the breeding herd is one of the best in this country. Those attending the sale will have an opportunity to inspect this herd, the reputation of which is known to all Short-horn breeders.

## A PARTIAL DISPERSION

— OF THE —

Thomas, Jameson and Mitchell

HERD OF

# SHORT-HORNS

In Sale Pavilion, at Kansas City, Mo.,  
Thursday, June 13, '07.

50

HEAD. 30 straight Cruickshank and Scotch; also the famous Barrister Young Marys.  
45 Cows and two year old heifers, all in calf to or with calves at foot by our great herd bulls, Orange Viscount or White Goods.

50

Attention is called to the following great brood cows: Duchess of Gloster 45th, and bull calf by White Goods; 47th Duchess of Gloster, a show heifer that has always stood first or second in the big shows; Imp. Bessie 51st, bred by Mr. Marr. She is the dam of White Goods; Sunbeam, a Secret, with bull calf by White Goods; Rose of Strathleven and heifer calf by Orange Viscount; this is one of the greatest cows of the breed; Cowslip's Pride, a Clipper, with show heifer by White Goods; Gratitude 2d, a Brawith Bud, with bull calf by White Goods; Lavender Bud, with bull calf by White Goods; she is the dam of our 1905 and 1906 show heifer. Ten two-year-old daughters of Orange Viscount all alike and all in calf to the show bull White Goods. Such a line of pure Cruickshank and Scotch cattle have not been offered in recent years if ever in a single sale in America. The famous Barrister Young Marys, all of one type will be found as great a lot of square framed, thick-fleshed cattle as are often found.

## 5 - BULLS - 5

Our herd bulls, Orange Viscount, a straight Cruickshank Orange Blossom bull, got by the Champion Lavender Viscount, and White Goods got by the champion Choice Goods and out of Imp. Bessie 51st, by Sittytton Pride are included. Two such herd bulls will not soon again be exposed at public treaty. The others are desirable young Scotch bulls, just of serviceable ages. Write today for illustrated catalog which gives complete information mentioning this paper.

RED POLLED BULLS for sale cheap. Also 30 coming 2 year old males and horses. W. H. Hazlet, Leon, Iowa.

Tatro's Chester Whites.

A herd of Chester Whites that deserves much attention from leading breeders is that of Mr. F. C. Tatro, of Geneva, Neb. It will be remembered by those who visited the late Nebraska State Fairs, that from this herd came the great boar, Extra Finish 7607, conceded one of the largest prize-winning boars known to this breed. Extra Finish was a hog of much scale, weighing 1,200 pounds in show condition last fall and as a breeder we find after a careful inspection of this herd that he has a right to be ranked among the very best. Most of the breeding stock on the place at present are daughters of this animal reproduces himself on the greater part of his get. Mr. Tatro had the misfortune to lose this great hog, but he leaves a number of his get that will mark the Chester business for many years to come. At the head of this herd at the present time is Teddy R., a son of Combination 12313, he by Alto H. and having for his dam Sue 17572 by Tom Thumb. This young hog was good enough to win first at the Nebraska State Fair last fall and the majority of this year's crop of pigs are from him. We are not overestimating when we say that he has one of the most uniform lots of pigs to his credit that we have seen produced by one boar this season. Among the many good sows now on the Tatro farm we wish to call the attention of our readers to Josie 10606, a daughter of Iowa Chief. Her dam was Queen by Duke of Mirable. As a brood sow we consider her a wonder, having farrowed four litters of sixteen pigs each time, and this spring she capped the climax by farrowing twenty. It would seem to the average breeder that from such large litters, good pigs could not be produced, but not so with this sow, for she has produced many pigs that were capable of winning in the hottest shows. Another of the good producers now on the place is Mandy 18832, she by Jester 8319. Her dam was Lady by Chester County Lad. A litter shown at Nebraska last fall from this sow won the following places in the under six months class: second on boar, fourth on produce of sow, fourth on get of sire. She now has a litter by Teddy R. and they are hummers. Eleven sows at the Tatro farm this spring farrowed 156 pigs, which is a wonderful record. Mr. Tatro is now booking orders for spring pigs in pairs or trios, just to suit the buyer. He ships nothing but the very best and the earlier you get in your order the better it will be. Write him for prices and mention The Homestead. At this place you will also find a grand lot of Rose Comb White Leghorn chickens, which would be sure to interest anyone raising this kind of fowl. They would be glad to book your order for 100 eggs, which can be bought for \$4.00.

POLAND CHINA FALL BOARS FOR SALE

I HAVE a number of good useful boars that I will price at a very reasonable figure and among them are some prospective herd leaders. I will also offer my herd boar Neb. E. L., he by Perfection E. L. He is a good individual and a wonderful breeder. Write me for prices and mention The Homestead.

# Iowa's Greatest Auction Sale of HIGH-CLASS ABERDEEN ANGUS CATTLE

The World's Fair Grand Champion, Prince Ito 2d Offering  
TO BE HELD AT ADAZA, IOWA, TUESDAY, MAY 28, 1907

The Property of C. J. Martin, Churdan, Iowa  
BLACKBIRD 26TH, THE FIRST WORLD'S FAIR GRAND CHAMPION COW, TO BE SOLD AT PUBLIC AUCTION, AND HER  
BULL CALF BY THE WORLD'S CHAMPION, PRINCE ITO 2D.

## 55 Head of Bulls Cows and Heifers

of the most fashionable families, Blackbird, Trojan Ericas, Prides, Queen Mothers, Heatherblooms, Drumin Lucy, Barbara, Coquette, Zara, Maggie and Heroine. Every animal in the sale will either be a son or daughter or have a calf at foot, or bred to Prince Ito 2d. Rarely, if ever before, was there such an opportunity to get the blood of the greatest show cattle the world has ever seen. You will find in every family more individual merit than ever seen in any sale before. Anyone looking for a crackerjack

bull, all in a class by himself, anyone looking for show cows, anyone looking for a two-year-old yearling calf, here is where you can select for the show at your own price. If you want to see the greatest lot of cattle ever offered in one draft from one man's herd, come to this sale; if you don't find the goods, your expenses will be refunded. You will find what will please the old breeder, the young breeder, the new beginner, and the farmer. Let every lover of Aberdeen Angus cattle be present, if you should like the best object lesson in Aberdeen Angus cattle Iowa has ever exhibited. I cordially invite all who are interested in good cattle to attend the sale.

SEND FOR A CATALOG. KINDLY MENTION THE HOMESTEAD.

M. A. Judy, Beecher, Ill., Sale Manager.

C. J. MARTIN, CHURDAN, IA.

Auctioneers, Col. F. M. Woods, Col. Silas Igo and Col. F. F. Luther.

# FRANK IAMS'

"Peaches and Cream"

"Black Boys"

Largest pair of Stallions in U. S. Sweepstakes Winners. -:- A Whole Horse Show

All of Iams' "Superb bunch" of "show stallions" are offered for sale. Dad, it's a "100 to 1" they are the "best ever." Get into "Iams' band wagon." All railroads lead to Iams' Importing Barns at 2 cents a mile, and Iams'

## SUMMER PRICES

are pushing competitors "off the roof" hypnotizing buyers with "top notchers" at "LET-LIVE-PRICES." John, if you pay cash or bankable note you will buy a stallion of IAMS. IAMS' "SELLING CLOTHES" "FIT" "all the boys." He saves thousands of dollars to stallion buyers. He is not in the "STALLION TRUST." He places \$1,000 or \$1,500 Insurance.

## \$1,000 — SAVED AT IAMS — \$1,000

Key! what a rich graft these "SLICK STALLION SALESMEN" are working on the honest farmer, selling fourth rate stallions at \$2,000 to \$5,000. Iams sells "top notchers" so good, big and cheap THAT THEY DO NOT NEED TO BE PEDDLED TO BE SOLD. Mr. Buyer, see Iams' stallions yourself. Take no "GOLD BRICK STALLION SALESMAN'S WORD." Iams has "THE GOODS" you read about. His establishment is worth going 2,000 miles to see. Iams makes his competitors "HOLLER." He is knocking "HIGH PRICES" out of the Xmas tree. Iams saws wood, "BUTTS IN," sells more stallions each year. He makes every statement good. Georgie, dear! Buy a stallion of Iams. His \$1,200 stallions are MUCH BETTER than our neighbors paid those Ohio men \$4,000. BREEDERS, pays no buyers, salesmen or interpreters, has no two to ten men to divide profits with. Iams guarantees to sell you a BETTER stallion at \$1,000 to \$1,500 (a few higher), than are sold to Stock Companies at \$2,500 to \$5,000 by SLICK SALESMEN, or pay you \$100 for your trouble, you the judge. Iams pays horse's freight and buyer's fare; gives 60 per cent breeding guarantee.

Write for eye-opener and greatest horse catalog on earth. References: St. Paul State Bank, Citizens National Bank

## ST. PAUL, - NEBRASKA

## PINE RIDGE STOCK FARM

Has the biggest and best barn in the United States and it contains the BIGGEST and BEST lot of

Percheron and French Draft Horses.

The last chance to obtain a colt by SAMSON 27238, as his last colts are now yearlings. Over 150 head of horses showing more bone, size and quality than any similar number in America. TAVENNER P. 35719 and F. D. 12610 now at head of the stud. Prices below competition.

Born at Moose Jaw, Sask., Can., in charge of E. F. Muxey.

L. M. HARTLEY, SALEM, IOWA.

## Rhea Bros., Arlington, Neb.

Breeders of Percheron Stallions. We exhibited 11 stallions at late Nebraska State Fair and won 9 prizes as follows: 2d and 4th on four year-olds, 1st on three year-olds, 2d, 3d and 4th on 2 year-olds and 1st, 2d and 3d on yearlings. At Interstate Fair at Sioux City, Ia., we had 7 entries and got 5 places, 2d on 4 year olds, 1st and 3d on 3 year-olds, 2d on 2 year-olds, 1st on yearlings. Our horses are home bred and acclimated, have size, bone, quality, are raised in pastures, not pampered with grain and drugs, thus insuring good service from the start. Every stallion sold under a positive breeding guarantee. Arlington is on main line N. W. Ry., 25 miles northwest of Omaha, eight miles east of Fremont.

## M. L. AYERS - SHENANDOAH, IOWA.

Importer and Breeder of

## PERCHERON HORSES

100 Stallions and Mares. Big ton stallions and a fine selection of young two and three year-old home bred stallions, home bred and imported. The imported Brilliant bred stallion Blande (36577) at head of stud. Thirty years draft horse breeding. Red Oak Branch C. B. & Q. R. R.

## PERCHERON STALLION COLT FOR SALE

I HAVE a fine yearling stallion colt that I will price at a very reasonable figure. He is by the great prize-winning stallion Castro 27830; his dam was Marcella 19377, an 1,800-lb. mare. Write me for prices or come and see this great colt.

E. C. Gwinner, Haldrege, Neb.

## PERCHERON STALLIONS FOR SALE

IMPORTED and home bred, from two to seven years old. All coal black. Best of bargains. If you want a stallion, come and see me.

G. C. HARRISON, Blencoe, Iowa

I WANT to buy good grade draft Stallions and Mares from one to 5 years old Black Normans preferred. Address: E. B. Thompson, Cumberland, Ia

## FOR SALE OR TRADE.

A GOOD young black Jack, coming three, and a big, home-bred stallion: will weigh 1,800 lbs., a worker and sound, coming five years old.

Buy from the breeder, not the dealer.

BERT FRY, PLAINFIELD, IOWA

## TWO PERCHERON STALLIONS

BLACK U.S. 47895 (black) and Billy U.S. 47894, each three years old. Good ones with good and plenty of bone and are broken to harness.

J. L. SLICK, LANARK, ILL.

IMPORTED and Home Bred Draft Stallions and Mares for sale. Geo. W. Bilbo, Trenton, Ia., successor to Bilbo & Wilson. Also Bilbo & Van Patten.

# I WILL SELL SIXTY SCOTCH BRED SHORT-HORNS

AT MY CHERRY GROVE FARM, WILLIAMSVILLE, ILL., JUNE 4, 1907.

## AT NO SALE IN ... AMERICA ...

this year has the proprietor opened up his heart to allow the public to bid on so many of the get of one GREAT BULL as I have on the get of LORD BANFF. There will probably be 25 head of young cows, heifers, calves and herd-heading bulls sired by Lord Banff and probably 25 females bred to him. This is a chance of a life-time. No doubtful breeders offered. Every animal of breeding age has proven a breeder or a reliable guarantee that is absolutely good backs it. I own all I represent without incumbrance.

## I HOPE TO MAKE ANNUAL SALES

but I never offered as good a bunch before, and I cannot assure their equal for next year's sale. My cattle are running out on pasture, so they will not be hog fat, but I am offering cattle SUITABLE TO ENTER THE BEST HERDS IN AMERICA, and also some plainer ones which ANY FARMER can afford to buy. For catalogs address, HENRY DODGE, (Sec'y Cherry Grove Short-horns), Williams-ville, Ill., Box 68.

LORD BANFF WILL BE HERE DAY OF SALE SO YOU CAN SEE HIM.

You can easily reach Williamsville one-half hour from Springfield, one hour from Bloomington, two hours from Peoria, three hours from St. Louis, five hours from Chicago on C. & A. Ry. New Interurban Electric Line now runs cars every one and one-half hours from Springfield to Lincoln, passing through Williamsville. Parties from Peoria can reach these cars at Sherman, Ill. These cars connect with interurban from Decatur and St. Louis.

# SHORT-HORNS

At Maryville, Mo.,  
Wednesday, May 29th

44

HEAD

11 Bulls, 33 Females

Scotch and Scotch Topped

44

In this our closing out sale we are selling our entire herds. They are such a lot of cattle as we think should interest those wanting choice breeding stock. When founding our herds, in individuality as well as breeding was given much attention. We are selling nine head of pure Scotch, Duchess of Glosters, Victorias, Sybils, Miss Ramsdens, a Marr Emma and an Imp. Beauty. The Scotch-topped sorts are good American-bred families. Some excellent young herd bull material aside from our Duchess of Gloster herd bull, Baron Gloster, will be found in the sale. The cows are a desirable lot of useful breeding matrons. Write for catalog. It tells all about the breeding lot. Address either of us, mentioning this paper.

WOODS, COTTINGHAM & RILEY, AUCTS.  
Please Mention This Paper When Writing.

#### THE MAKING OF PEDIGREES.

A small percentage of those engaged in breeding pure-bred stock are careless, or, to say the least, are slow about the matter of making out and mailing pedigrees to their customers. We do not refer simply to the delay of a few weeks, but rather to the practice of putting men off month after month.

The large volume of mail order business that is annually transacted in the corn belt in the selling and buying of animals makes it a specially urgent matter that business principles be used about the question of making out pedigrees as well in the buying as in the selling.

The following inquiry from one of our subscribers shows how annoying a case of this kind may be to the man who makes the purchase:

Last December I purchased four Poland China gilts from Mr. ———, but up to the present time have not received the pedigrees of those gilts. I have written several times, but my letters seem to have no effect whatever. Now, when I purchased those gilts it was with the understanding that they were pure-breds and I certainly expected that there would be no difficulty about getting the pedigrees. I paid a long price for a male and bred him to these gilts, so you can see that I am a heavy loser if I am unable to record them, as I will have to sell them for pork and not as pure-breds. I wish you would write the party and if possible induce him to send me the pedigrees of those sows.

This shows up the exact situation. It leaves a man, after paying for pure-breds, virtually with grade stock on his hands. In most cases we find that where trouble of this kind is ferreted out it is due simply to carelessness or indifference about making out the pedigrees, and we are pleased to state that the instances where men represent stock to be pure-bred when it is not are exceedingly rare.

The point that we desire to make at this time is that it always pays a breeder to treat his customer with the greatest degree of promptness when a legitimate request of this kind is made. If you let the matter run on for weeks or months the chances are that even though he does in the end receive the pedigree he has lost confidence in your ability as a business man, and the probabilities are that he will never make another purchase from you. He will likely tell his neighbor about his disappointment and of course feels, and justly feels, free to mention your name, so that in this way he is helping to establish a reputation for you that is not easily lived down.

Most breeders of pure-bred animals find it the best policy to record all their breeding stock before any of the progeny of said stock is ready for shipment. The fact that many associations record a young animal cheaper than they will an older one offers special inducement to the man who is ambitious to be prompt in matters of this kind. All the pure-bred young sows on the farm that have good litters that are not recorded should be recorded before their pigs are weaned, so that at any time when there comes an order for a shipment you can send the pedigree in the same letter in which your customer is notified of the shipment. The recording fee of the dam is so small a matter when considered in connection with the value of the offspring that it does not pay to wait and be nagged by your purchasers about the pedigrees.

#### CEMENT FLOORS FOR CORN CRIBS.

The following communication has been received from a Kansas subscriber:

I have been using cement in building a cave

and making walks, and find where one has plenty of sand and gravel close at hand that cement structures are not only cheaper but more permanent than anything else you can use. I would like to know, however, how a cement floor would do in a corn crib or granary.

This is a question which we would like to have discussed by those who have had practical experience with the cement floor in corn cribs. Some hold the opinion that the cement floor will collect moisture and therefore mold the grain in the lower part of the crib. If anyone has had this experience we shall be pleased to have him give the result of that experience through these columns.

#### CROPS TO SOW IN CORN FIELDS.

It is surprising what success men have attained during the last few years in growing a second crop in corn fields. In almost the entire corn belt under ordinary conditions an excellent stand of clover and timothy may be obtained by sowing the seed just before the crop is plowed the last time. Under such circumstances it is generally advisable to cover the seed with a shallow cutting cultivator so as to leave the surface as nearly level as possible. So much the better if the time is taken to cover the seed by running the cultivator both ways,

because in that case there will only be left the space in which the corn grows without covering. Under ordinary circumstances we believe that the chances for getting a good stand of clover are rather better in the case of sowing it with corn than where small grain is seeded down early in the spring.

Of course it is hardly necessary to call the attention of stockmen to the fact that it pays, and pays well, to put pumpkins in a few acres of the corn. The pumpkin crop seems to have a very little effect in the way of reducing the yield of corn, and there is not a farm in the middle West where a good supply of pumpkins cannot be fed out at a good profit this fall. By the use of a hand corn planter it only takes a short time to do the planting and the common practice is to put about three pumpkin seeds in every fourth hill in every fourth row.

Where one is in a position to hog down a certain part of his corn crop the sowing of cow peas will be a profitable venture. Like clover and timothy seed, the cow peas are generally seeded just before plowing the ground the last time, but, unlike clover, it is advisable to cover the peas somewhat deeply, otherwise germination may be very slow. As the

peas are large, there is not much danger of getting them too deep with the ordinary cultivator, as the stem is vigorous and will shove itself through two or three inches of soil without difficulty. Green cow peas will balance the corn ration and will furnish a very excellent and inexpensive food for hogs.

In making out a list of crops that may be profitably seeded in corn one should not neglect the mention of rape. It only requires four or five pounds of seed per acre and if this is covered when the corn is plowed the last time it will furnish excellent pasture both for hogs and sheep. Where it is known in advance that hogs must be turned in to pasture down a certain acreage of corn, one should by all means sow some of the crops mentioned; that is, either cow peas, pumpkins or rape.

Fall rye is another crop that might well be placed in the same category, and if sown before the corn crop is cultivated the last time it will make a heavy fall growth and if not eaten down too close will flourish the following spring and make a full crop. Rye usually comes on quickly after it is seeded, and even if it is not pastured it has a value because of the fact that it checks weed growth and when it is plowed under late in the fall or early the next spring it leaves the soil in a splendid condition for the next crop.

In giving a list of the crops that may be seeded in corn we do not desire to convey the impression that it is practicable to sow a second crop in one's entire corn acreage, but simply desire to hint that there is an opportunity on every farm for getting considerably more out of part of one's acreage by doing a little seeding previous to the last time of cultivation.

#### HORSE IMPORTATIONS.

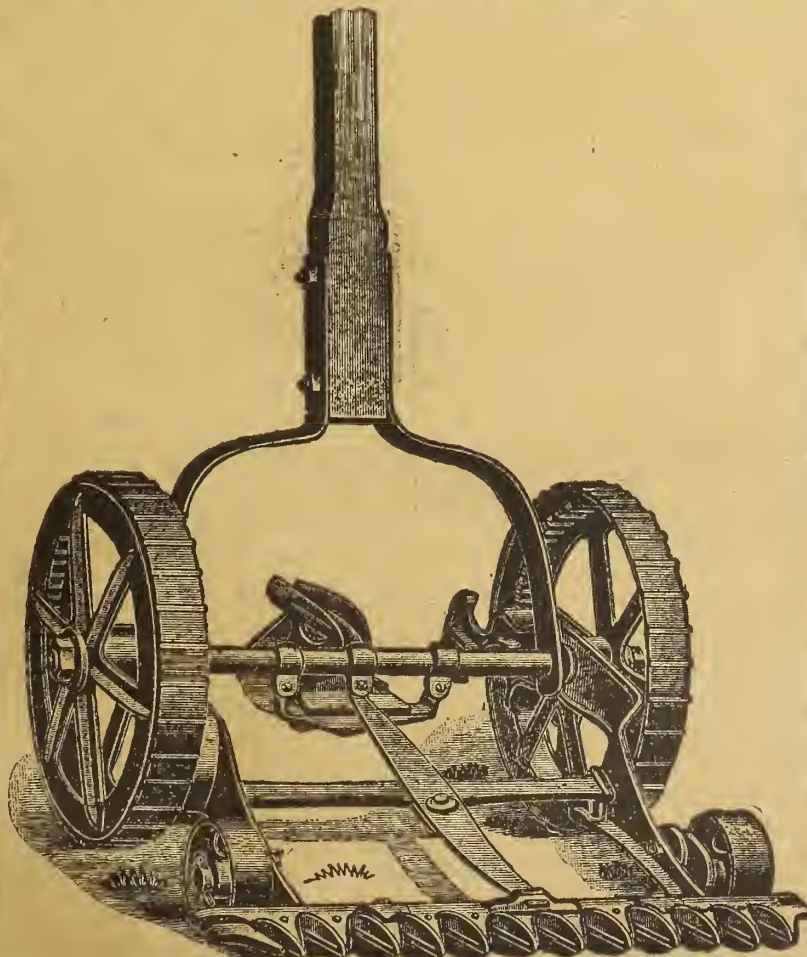

Alarm is sometimes sounded over the fact that American farmers are giving too little attention to the breeding of draft horses and too much attention to the importation of same. Were the figures not available showing the comparative number of horses imported in recent times as compared with former years, it would be difficult to convince men that the business of importing horses has not only decreased, but decreased many fold.

For example, in 1905 there were 2,271 horses imported to the United States, while in 1885, or twenty years earlier, the number was 17,425. The following year, or in 1886, the number reached 20,880. The average yearly importation during the five-year period from 1883 to 1887 was 15,140. During the next five years it dropped to an average of 7,547. Beginning with 1893, we find a five-year period where the average importation was only 497 horses. This of course included the lean years as applied to every industry. The next five-year period, or from 1898 to 1902, the average number per year was 998 horses, while in 1903-4-5 the number has run a little above 2,000 horses annually.

It will be seen, therefore, from the above figures, barring the years of industrial inactivity, that the horse importing industry has fallen off in a very marked degree. The fact that the number imported in 1905 was less than in 1903, would indicate that we are not likely to suddenly increase the industry to its former proportions.

Even the arguments that European importations are largely made up of stallions are not altogether founded on fact. According to a table prepared by the department of agriculture from records furnished by secretaries of American

The clipper Lawn Mower, manufactured by the Clipper Lawn Mower Company, of Dixon, Ill., is a new departure in the building of lawn mowers, as shown by the accompanying illustration. That it has many advantages over the old style mowers is suggested by this illustration, as the cutting bar projects a trifle farther than the wheels and the wheels cannot run on the uncut grass. Then, too, the height of grass to be cut makes no difference, as in the case of the rotary knives. The "Clipper"

may be set to any desired height by adjusting the small wheels immediately behind the cutting bar. A commendable feature is that the knives do not pull the grass while cutting and thus strain the roots, as is apt to be done with the rotary knives, especially when they become dull. The "Clipper" cuts weeds, dandelions, etc., equally as well as grass and leaves a beautiful lawn. That it is popular is evidenced by the fact that the manufacturers are flooded with orders from all parts of the country.

can Stud Books showing the sex of imported animals, it was found that of the light breeds there were 4,092 stallions and 2,370 mares. Of the drafters there were 19,845 stallions and 9,064 mares. Of course this showing indicates that there were just about twice as many stallions as mares imported, and yet we are of the opinion that it will be a surprise to horsemen to find that the percentage of mares is so large.

As our readers are aware, pedigreed horses are admitted duty free into this country at the present time. In certain quarters there is a demand that a duty be imposed in order to foster home production. The Short-horn Breeders' Association is pointed to as an example where encouragement of this kind is given the home breeder by imposing a registration fee of \$100 on all animals imported from foreign countries except Canada. This rule, which met with such violent opposition at the beginning, is not likely to be repealed in the immediate future. Seeing that we only import about half as many mares as stallions, it is suggested by Professor Rommel, of the department of agriculture, that a feasible plan would be to put a duty on males, but allow the importation of females of approved pedigree without duty. Going one step further, if all mares as well as stallions that are imported were inspected for unsoundness and the unsound ones refused admission, it would result in fostering the horse industry on a practical, progressive and altogether likely profitable basis.

#### THE PRACTICE OF DIPPING HOGS.

The following communication has been received from a Kansas subscriber:

Some time ago I noticed a contribution in your paper from Mr. C. H. Fairall, of Cedar county, Iowa, who advises the use of carbolic acid and machine oil as a lice killer. He apparently applies this mixture with a brush, dealing with each hog individually. I fail to see how such a method can be practicable on the average farm. For example, at the present time I have 250 hogs and I notice that some of them are getting a little bit rough in the skin. I am waiting for a cloudy day before running them through the dipping tank. My hogs are white and I find if they are dipped on a bright, sunny day that their skin gets very red afterwards, and while I have never had anything serious result from this condition, yet I fear that some time I might have my hogs blistered. Because of this I always take the precaution to do my dipping in cloudy weather. It would be utterly impossible for me to go over my hogs individually with a brush, and, furthermore, I think that it is somewhat dangerous to advise the use of carbolic acid on the skin of a hog. A neighbor of mine used carbolic acid in water and sprayed this mixture over the hogs, with the result that he blinded every hog he had and burned the skin so badly that practically all the hair came off. I favor the use of a good dip, though I know of swine breeders who object to their use on account of the price, yet when you consider that a gallon of good dip will make anywhere from fifty to one hundred gallons of dipping material the mixture after all is not expensive. I would advise your readers to leave these keen-edged products like carbolic acid alone and try something that is effective though mild in its action—something that will not injure the skin or the eyesight of the animal.

We find upon inquiry into the practice that prevails at the experiment stations in regard to the dipping and spraying of hogs that carbolic acid in any form is rarely, if ever, used, and we also find upon inquiry that the reason for its non-use is that it is too harsh on the skin of the animal and too dangerous when used for dipping purposes in case an animal gets some of the carbolic mixture on its lungs.

The coal tar dips have powerful disinfecting qualities without the corrosive effect, hence their use and indorsement by the state experiment stations. Even a dilute solution of coal tar dip is deadly to all germ life, so that its application to the skin contributes to the healthfulness of same without in any way destroying the delicate tissue.

The Homestead can not indorse the practice of applying crude carbolic acid to the skin of any animal, because the danger attending its use and the loss that might follow its indiscreet application is too great.

#### The Disk Plow.

To the Editor of The Homestead:

I have used a disk plow for three seasons, at all times of the plowing year, on soils varying from light sand to gumbo, and I am strongly in favor of the disk plow in its place.

There are some things it will not do. It will not turn under straw or heavy manure, corn stalks or trash. It will not lay a furrow burying all the stubble because its furrow is thrown on edge and not bottom side up, as in the case of the mold board plows. It will not run right unless it is sharp and the lays and

mold boards scoured, nor unless the draft is very carefully adjusted.

It will do more plowing with less team power than any other plow on earth. It cuts a dishing furrow and will ride over an obstruction that would clog an ordinary plow. By plowing deeply with it the effect of sub-soiling may be in part gained, as the center of the furrow cuts below the average plowing depth of the lay plow. Some who use it say that land plowed with it from year to year grows up to roses and buck brush. If one plows one year from east to west and the following from north to south, there should be no trouble along that line, as crossing the furrows cuts away the small ridge of shallow plowing.

I bought a three-disk plow and used four horses on it, but have since taken off one disk and run the other two deeper, using the same horse power. It fines the soil better than the lay plow, leaving a pulverized level surface. My land has been very stony. My average repairs have been \$10 per year per plow for the lay plows, for the disk one sharpening at the blacksmith shop in three years covers all the expense. Where my ground has heavy litter on it, or where it is soddy or covered with a growth of roses I prefer the lay plow, but for land free from surface truck, for stony ground, for wet, sticky land, give me the disk plow every time. It is a time-saver, because your team can travel farther and faster during a day with it than with the lay plow. It is a time-saver because its draft is light. It is simple to handle. It is cheap to operate. It will do its own class of work to a nicety. It will not replace the lay plow, but under the stated conditions of surface it will work all right.

To definitely answer your correspondent's inquiry, will say that I have used my plow for the plowing of over 300 acres of ground under all conditions as to moisture and wet or gumbo spots never once have clogged it. It suits me.

Griggs Co., N. D. Hugh J. Hughes.

In answer to your subscriber from Polk county, Iowa, in regard to disk plows, will give my own experience with one we have used for two years. We have had the gang (two disks), and we find it an excellent implement in dry, hard ground no matter what the nature of the soil and it will go right through dry, hard places, as well as do deeper work with less draft than other plows.

We say it is the plow for dry, hard ground, but it has its objections. It will not work well on hilly ground or where there are stones and ground that is full of rose bush or other roots, which have a great tendency to keep it from scouring, as it does not always cut them off. In wet clay ground it does not work well, for the soil does not slip on the disks very readily; but, as we said before, it will work in any dry, hard ground no matter whether clay or otherwise just so it is free from obstructions. We could not make it work well in corn stalk ground.

Should your subscriber from Polk county buy one I would advise him to see that the disks fit snugly on the hub, for a wobbling disk does not work well. We experienced some trouble along that line.

A. M. Blackmer & Son.

Pierce county, Neb.

I noticed in a recent issue of your paper that a subscriber asks for information about the disk plow. As I have had considerable experience with this kind of a plow, I will try and answer his inquiry.

The disk plow will scour in any soil that I have ever found, and I have used it in gumbo and all kinds of clay under all conditions. Of course it does the best work when the soil is in good condition. If the soil is wet and tough it will not lay it as smooth as the mold board plow, but under proper conditions it will do the work just as well, if not better.

Another advantage is in the draft; it pulls lighter than any other plow doing the same work. The disk plow will work in very hard ground where it is next to impossible to make any other plow work. The disk plow is not a success in sod because it leaves it so rough that it requires a good deal of work to get it in condition to plant.

Wilton, Iowa.

A Subscriber.

Sensible Listing.

To the Editor of The Homestead:

In the article you published on listing corn, Mr. Pettit says: "It cannot be denied by the most strenuous advocates

of listing that it takes less water to start little rivulets down the listed rows than on top planted corn."

Now this is correct only when the lister is run up and down the hill. If the farmer will take the trouble to run the rows across the face of the slope, he will find that in the matter of soil washing listing is much better than surface planting. Also, it keeps more water on the land in case of heavy rapid rains. I have practiced this method for eleven years and believe that I would quit listing if it were not for its superiority in the matter of washing.

Otoe county, Neb. Hector Maiben.

#### HOT WEATHER AHEAD.

Many a housewife is wondering how she will pass through the coming summer months with the stove she well knows will make the kitchen unbearably hot—to say nothing of the dirt, dust and ashes that will add to the discomfort. There is a way out of it all—a way that not only lessens the work and keeps the kitchen cool, but that also reduces fuel expense. This convenience, comfort and economy is all effected by the New Perfection Wick blue flame oil cook stove, an oil stove so superior to other makes that it is fast replacing the coal and wood range, the old-fashioned oil stove, and in many cases the gas stove. The New Perfection gives a strong working flame at moment of lighting. "Blue flame" means the hottest and cleanest flame produced by any stove. The flame is always under immediate control and can be raised or lowered instantly. The convenience of this will be understood when it is considered that while the flame of one burner is boiling the kettle or roasting a large joint, that of another can be reduced to simmering point—in this way enabling the housewife to cook a variety of dishes at one time. On washing and ironing days the comfort and convenience of the New Perfection will be greatly appreciated. It gives best results in the least time, and does away with all coal and wood carrying and the many other disagreeable jobs that have to be done with other stoves. The New Perfection is made in three sizes with one, two and three burners, and is warranted to give full satisfaction. Another home comfort is the Rayo lamp, which produces a light of unusual brightness, yet soft and mellow—a light that will not hurt the eyes. The Rayo Lamp can be used in any room. It is highly ornamental and beautifully nickel-plated. Every lamp is warranted. The New Perfection wick blue flame oil cook stove and the Rayo Lamp are two real essentials to home comfort. Their easy operation, absolute safety and handsome appearance commend them wherever stoves and lamps are used. Inquire at your local dealers. See page 13.

#### A VALUABLE VETERINARY BOOK.

A little book which our readers have seen mentioned frequently in advertisements and in live stock discussions, called the "Zenoleum Veterinary Adviser," holds much that is of interest to farmers and stockmen, whether owners of few or many animals. It is valuable because it gives methods of treating along lines of the commonest troubles that all classes of live stock are heir to. The book is carefully indexed, and was designed primarily to show the relation of the celebrated Zenoleum Animal Dip and Disinfectant to domestic husbandry economy. Zenoleum has come to be a very popular thing among owners of live stock in every state in the Union, in Canada and other foreign countries. Its standing among high authorities appears from the fact that forty-two agricultural colleges unhesitatingly give it their recommendation. The Zenoleum Veterinary Adviser shows in their own words, just what the professors and various directors connected with these institutions have said of it, and the suggestions they offer for its use. The most important fact is that the book is more conclusive than merely stating the uses of Zenoleum. It gives many descriptions of diseases and ailments, their causes and symptoms, etc., that could hardly be had in such compact and reliable form in any other book we can now call to mind. There are sixty-four pages, splendidly printed in large readable type, and well bound in a serviceable cover. This book can be had free by any reader of this paper by writing to the Zenner Disinfectant Company, 131 Lafayette Avenue, Detroit, Mich., for it. We believe readers who send for it will have cause to be gratified that we have called this matter to their attention. Take our advice and send for it right away.

#### HOOSIER STOVES BAKE EASY.

Nothing throws the housewife into such confusion as a defective stove. The kitchen range is one thing in the equipment of the house that should be absolutely reliable. The Hoosier steel ranges and stoves are known in every part of the land as the stoves that do baking and cooking with the finest results. Instead of spending much money in agents' profits the makers of the Hoosier prefer to use it in paying for high-grade materials to be used in the different parts of the stove or range. Thirty days' trial is given to buyers who wish to test the stoves before buying. This is certainly a fair offer. Freight is paid, so that the listed price of each stove or range in the catalog is the actual net price. Send for their catalog, which contains full descriptions, etc. Address, Hoosier Stove Co., Factory 140, State Street, Marion, Ind. See page 3.

#### A PERSONAL REQUEST.

"Send me your manure spreader proposition." That is exactly the sentence that a large manufacturer of these implements wishes to have every farmer who is interested in buying, write on the back of a postal card and send it to him. The proposition is, no doubt, as grand a one as this firm is noted for sending out. It is no empty offer either, for the company stand back of every word they say. They are making and selling manure spreaders everywhere. Why do you suppose they are doing this in the face of strong competition? You might gain some idea of the reason by looking for the manure spreader advertisement on page 3, of The William Galloway Company, 109 Jefferson St., Waterloo, Iowa. Just say on the postal, "Send me your Manure Spreader Proposition."

#### WHAT DO YOU SAY?

Several hundred thousand farmers say that the best investment they ever made was when they bought an

#### Electric Handy Wagon

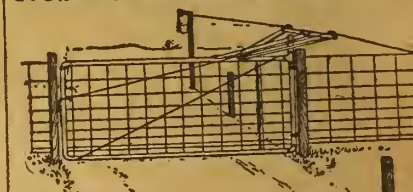

Low wheels, wide tires; easy work, light draft. We'll sell you a set of the best steel wheels made for your old wagon. Spoke united with hub, guaranteed not to break nor work loose. Send for our catalogue and save money. ELECTRIC WHEEL CO., Box 43, Quincy, Ill.

#### Fresh Water

Get our Automatic Pumping System to supply fresh water as needed in feed lots, barns and under pressure, in house all at same time. No Tank; No Stagnant Water. Great demand for machines everywhere. Agent wanted in each county. For information write or call WESTERN PUMP & MFG. CO. Reals Building, 9th & Wyandotte Kansas City, Mo.

#### Nebraska Automatic Gate.

OPENED from wagon or carriage. Any lady or eight year old child can operate this gate. All steel. Can be hung on any gate post. Nothing to get out of order, 12 ft. gate \$10. You can't afford to be without this gate for the price. Hog and cattle proof. Also Rice's Automatic Tilt Gate. Ornamental steel. Gates and rod fences a specialty. Catalog upon application. RICE BROS. MFG. CO., HARVARD, NEBRASKA.

## Farm Furrows

Turned by a Practical Farmer.

The best outlook for hogs is the clover or alfalfa meadow.

Dyspeptics usually get their food on the brain instead of the stomach.

Did you ever notice what a race of imitators we are? When one person in an audience coughs, a score or more repeat it.

I cannot put up with a dog that goes out nights. If there is any going out at night at our house the Furrows man wants to do it.

The silo is a strong competitor for the best kind of a pasture. There are some pastures where the cactus and sage brush would not look out of place.

Why is it that a thorough lambasting is just what the kicking horse needs to correct this habit, while in the case of a cow it only makes her worse?

If variety is the spice of life it is certain that the weather prophets and forecasters have had a spiey time of it this spring. May they rest a piece.

Angel's food cake is nice to look at, but I don't believe it ever made a governor or even a good farmer. It always seemed to me a waste of good eggs and cream.

Bologna bulls, so-called in stock markets, have come to be so named for the reason their flesh is rather dry and keeps well when made into bologna, which supplies cheap trade.

Screen the windows on the out-buildings where they are most liable to be broken out. It is a good deal easier to stop the stones than to stop the boy from throwing them. He never means to.

I have slept in houses where there would be a small drift of snow on the bed in the morning and never entertained any evil thoughts, but to have the roof leak rain is too much simple life for me.

That men's names frequently predestine their occupations would seem to be a natural conclusion if observation counts for argument. Originally men were named after most evident traits in their character.

A new ruling regarding special delivery stamps has been made by the postal department. After July first ten cents' worth of any denomination will do in place of the special stamp, where prop-

erly licked and affixed to the hurry mis-sive.

In as seemingly simple implements as the corn cultivator or the hay rake there are points of construction that should be fully understood. Durability of material, rigidity of frame and simplicity of handling are all of major importance compared to price.

Speaking about kicking cows, reminds me that there is only one thing worse on a farm. That is a biting horse. If you are bitten real hard on the ribs by Old Charley a good thing to do is to go out on the grass and roll over a few times, but that is possibly what you will do without telling.

The failure of animals to reproduce themselves with any degree of exactness creates one of the most difficult problems that the farmer is called upon to solve. The breeding of animals is not an exact science, never was and never will be. This does not mean that there is not room for the exercise of much skill, but you want to be prepared to be disappointed.

Did you ever know a person who under all circumstances exaggerated his statements? If he were telling how many acres of corn he had planted in a week and had actually planted 100 acres, he would make it 125. If he had sold a hog weighing 400 pounds, just for good measure he would say that it weighed 450. If his corn actually yielded seventy-five bushels per acre, according to his statement it would yield ninety. I know one or two of those fellows and have come to the conclusion that they believe their own falsehoods.

While a large portion of foreign immigration has been deflected from cities to the country, the effort has been largely futile when compared with the numbers who are taken by the building trades and factories. Possibly as much as 30 per cent of the immigration finds homes on farms.

Reports from swine breeders in all parts of the country has been a leading feature of the field notes column of this paper this spring as in the past. The notes of the field correspondents supply reading material that is not appreciated as it should be by even the general farmer.

Every one has their particular method of starting a calf on dry feed, of course. I believe, however, that more people are agreed on the plan of keeping a small pan of fresh meal before them all the time till they are eating, than any other. The calf has a full share of animal curiosity.

A notable divine is author of the statement that there are three kinds of unrest, namely, vicious, visionary and noble. The vicious discontented are pessimists; the visionary sort is harmless, wastes time and effort, and the noble kind sees the vision and climbs toward it patiently.

A Kansas farmer has the "cake" for large gains in steer feeding. Literally speaking, the cake is of the cottonseed variety. On six carloads of steers recently marketed he made a gain of 3.4 pounds a day for 140 days, feeding three pounds of the cake at the finish.

Red cedar for lead pencil making is the only wood that is sold by the pound. The supply of this wood is being rapidly depleted. Steps are being taken for the development of new timber lands. Every American old enough to use a pencil consumes a half dozen on the average every year.

Fat foods produce a desirable condition of health which many people do not appreciate. Some persons can "stomach" more oil or fat than others. Medical authorities agree that every person should eat some animal or vegetable fat daily. Fats and oils have been recommended for lung trouble for half a century.

Now that it looks like a shortage in the quantity of the hay crop, the thing to do is to insure a good quality by replacing worn tools and putting in carriers to do away with as much slow hand pitching as possible.

City streets are now kept clean by the use of a slushing machine which throws a heavy spray toward the gutter as it passes along. Wonder why kitchen

AUGUST POST, MOULTON, IOWA.

floors can't be made of tile and a hose or force pump do the scrub work? I think all the family would be ready to help in such an event.

If I had any advice to give those who teach domestic economy in colleges it would be this: Teach the pupils to bake good bread, to cook potatoes well, and to properly prepare the various kinds of meats. If you have any time left during the four-year course, you may then indulge in the superficialities, beginning with johnny cake.

The mad dog season is on. In commenting on hydrophobia a well known national medical body states that for the most part the stories are sensational. Symptoms often described are more of ten excitement, due to fear than to the malady. Many of the best known physicians have yet to see a case, which leads them to believe that the disease is rare indeed.

SORE SHOULDERS.

At this season of the year a good many horses are troubled with sore shoulders, necks and backs. It is not surprising as a horse goes into hard work after a winter of comparative idleness, and it is easy to get him out of shape notwithstanding that you take good care of him all the time. A remedy for this very thing will be found in the Security Gail Salve, made by the Security Remedy Company, of Minneapolis, Minn. They claim for this salve that one application will relieve pain from the most severe sores and that it will heal and cure them. This company also make an antiseptic healer for barb wire cuts which will cure the cuts very quickly. They would like to send a free sample of their gail salve to Homestead readers and authorize us to make the offer, the only condition being that those who ask for the free sample mention this paper when writing. If you have horses that are troubled with sore shoulders or necks don't fail to write them at once, mentioning The Homestead. See advertisement on page 8.

HAVE YOU SEEN THESE LANDS? Good farmers who want homes will be given every encouragement to see farms that are now offered in 35,000 acres of cut-over lands in Minnesota. Situated in Beltrami and Clearwater counties, this section is right in the best dairy, sheep and general farming region of the state. Three markets, namely, St. Paul, Minneapolis and Duluth, compete for the produce from this section. Tracts of land suitable for large or small farms may now be secured. Professor Shaw is quoted as saying that the possibilities of this region are far beyond popular estimate. Now is the time to investigate this land and make selections of farms before it is cut up. Colored maps and illustrated folders will be sent to anyone looking for a home by writing to Mr. Roger C. Spooner, president Donald Land and Lumber Company, Drawer N., Bemidji, Minn. See page 15.

FARMERS AND OTHER LAND PURCHASERS are rewarded by careful selection of land. Good farm land in what is held by many to be the best wheat land in the world is for sale on page 15. The person offering this land is seeking a good representative in every town. He will pay a nice commission also to anyone who directs buyers to him who make a deal. This land which he offers is in a fine community with modern advantages. For particulars of this offer, write Mr. John Mueller, Lisbon, N. Dakota. Mention The Homestead when you write.

No Lightning Risk!

This Keeps it Out of Your Trade Mark TELEPHONES "NO RISK"

THIS is our Improved "No Risk" Metallic Arrester. Will cut out a metallic line or two single lines. Absolutely disconnects telephone without grounding the line wire. Leaves it free! It's the only arrester sold that gives absolutely safe protection—the only one we know of whose makers guarantee telephones against lightning. Thousands of pleased customers vouch for its merit. Pull the knob and your telephone is absolutely cut out. SIMPLE, POSITIVE, SURE. Protects home against fires. Keeps family safe. Book Free.

FREE TRIAL OFFER Just send your name and address. Our book explains everything. Tells how you can try the Improved "NO RISK" Lightning Arrester FREE. Or send \$2.00 and get the arrester at once. Fully guaranteed to protect as we say or money back. Reliable agents wanted. One man sold 300 last year, besides farming.

W. E. ASHBY TELEPHONE CUT OUT CO. 101 Square Street Charlton, Iowa

5 DRESSES ANY MAN

FREE TRIAL OFFER

I WILL give you my splendid outfit on a 60-day free trial entirely at my own risk, providing you are the first from your locality to accept my generous offer. I have always sold these splendid outfits to dealers, but this season, commencing with this very day, I have made up my mind to sell direct to the wearer and save every man the enormous profit that has always gone into the pocket of the dealer. To make my new plan a success right from the start I decided to place with one reliable person in each community my complete outfit for \$5.00 and not one cent more. This is my stylish ten-piece outfit — 1 Stylishly tailored suit, 1 President dress shirt, 1 King Edward cap, 1 pair Empire suspenders, 1 pair mending-proof hose, 1 Chesterfield tie, 3 fine handkerchiefs, 1 set golf buttons. To be safe in securing this offer send at once for tape, order blank, etc., for I can give to but one in a locality at this advertising price.

HON. ALTON F. MILLS, President CANADA MILLS CO., Dept. 27, GREENVILLE, MICH.

Don't Pay Two Prices for Stoves and Ranges

Order direct from our Stove Factory and save all dealers' profits. HOOSIER Stoves and Ranges are the "Best in the World." Fuel savers and easy bakers. Sold on 30 days' free trial. We pay the freight. Guaranteed two years. Our large illustrated catalog gives descriptions, prices, etc. Write for our catalog.

HOOSIER STOVE CO., Factory, 140 State Street, Marion, Ind.

other stocks and the list price by a large brokerage firm. This firm offers to sell stocks in these companies below the regular treasury price. Quotations are made on page 10. If interested in obtaining fuller information write, mentioning this paper, to Clawson-Strean Brokerage Co., Kansas City, Mo.

BUY TWINE EARLY. Basing this advice on past experience we feel it is a profitable thing to buy binder twine reasonably early in the season. It is not an uncommon occurrence for twine to advance a half cent to a cent in wholesale dealers' lists and several cents in the retail dealer's list. Much twine is now purchased direct from the factory. The advantage is a lower price, including freight, and a fresh, newly-made twine. If you are dissatisfied with the treatment your local dealer gives you, then why not send for price of twine to a good Iowa jobber, namely, Mr. August Post, of Moulton, Iowa? Farmers are wanted as local agents. Mention The Homestead when writing and see this page for this twine offer.

Soft Harness

You can make your harness as soft as a glove and as tough as wire by using Eureka Harness Oil. You can lengthen its life—make it last twice as long as it ordinarily would.

EUREKA Harness Oil

makes old harness like new. Made of pure, heavy-bodied oil, especially prepared to withstand all weathers. For all axle troubles use Boston Coach Axle Oil. Better and more economical than castor oil. Will not gum or corrode. Lasting, reliable, satisfactory. Highest Award, World's Columbian Exposition.

SOLD EVERYWHERE—ALL SIZES Made by Standard Oil Co. Incorporated

PROF. DEAN'S KING CACTUS OIL

THE BEST LINIMENT FOR MAN OR ANIMAL

CURES CUTS, SPRAINS, BURNS, BRUISES, SCALDS AND ALL EXTERNAL HURTS.

1/2c, 50c, and \$1 Bottles, \$3 and \$5 Cans at Drugists.

OLNEY & MCDAID, MFRS. CLINTON, IOWA.

# THE HOMESTEAD

A Practical Journal for the Farmer,  
Stockman, Fruit Grower, Poultryman,  
Gardener and Housekeeper.

BY JAMES M. PIERCE.

JAMES ATKINSON, Editor in Chief.

ESTABLISHED IN 1855.

Entered at Des Moines Postoffice as second class matter

PUBLISHED EVERY THURSDAY.

**SUBSCRIPTION RATES**—Single subscriptions, \$1 a year; ten copies one year, \$10, and an extra copy to getter up of club. In clubs of fifty or more, 30 cents a year; in clubs of one hundred or more, 25 cents a year. Single subscription three years in advance, \$2; five years in advance \$3; ten years in advance \$5. Subscription price in Canada, \$1.50 a year. Remit by draft, registered letter, post-office or express money order. Errors in address or failure to receive paper within two weeks should be promptly reported to the publisher.

Address all communications and business letters to

THE HOMESTEAD COMPANY,  
Des Moines, Iowa.

The preventive effect against tuberculosis of a considerable amount of fat in the body has led some scientists to assert that since fat cows are not as liable to be affected with tubercular disease, the daily removal of milk fat from the heavy milker makes her system more susceptible to the disease. It is said that in the South where cotton seed products are fed, cases of tuberculosis are rare. Here is a line for thought—who can tell?

## FREE DEAFNESS CURE.

A remarkable offer made by one of the leading ear specialists in this country. Dr. Branaman offers to all applying at once two full months' medicine free to prove his ability to cure permanently Deafness, Head Noses and Catarrh in every stage. Address, Dr. G. M. Branaman, 1300 Walnut Street, Kansas City, Mo.

## AMONG OUR ADVERTISERS.

Mrs. Eva E. Girard, proprietor of Evergreen Poultry Farm, Schleswig, Iowa, still has some nice Barred Plymouth Rock cockerels for those who have late purchases to make. They are nice birds and cheap considering their quality. See page 11 for the advertisement and mention The Homestead when you write.

The free trial ten piece men's clothing outfit which is advertised elsewhere contains one tailored suit, one dress shirt, one summer cap, one pair suspenders, one pair mending hose, one necktie, one set gold buttons and three handkerchiefs. All this goes at their special price as advertised on page 3. Write for order blank to Canada Mills Co., Dept. 27, Greenville, Mich.

"Glengarry," a 900-acre plantation farm in Tennessee, with 750 acres in cultivation and with extensive improvements, is offered for sale on this page. This land is represented as being a good crop-growing soil and has been a paying investment. As the owner wishes to return to the old country the property is thus offered. Write, mentioning The Homestead, to Mr. Harry Shaw, Somerville, Tenn.

At a very reasonable price on easy terms a fine 820-acre stock farm in central Minnesota is offered for sale elsewhere. Of this farm, 520 acres are fenced with woven wire and as water is abundant and grazing good this tract should make an ideal sheep grazing and fattening farm. Improvements are up to date and there is plenty of timber on the place. Rural delivery and telephone service, with good roads make this farm one of splendid location. Write for prices and particulars or see page 15. Mention this paper when writing. Address, Mr. Geo. W. Somerville, Sleepy Eye, Minn.

## THE PLAN OF "LUMPING OFF."

The method of "lumping it off" in selling stock is a constant source of loss to the farmer. Someone is bound to lose, and as the trader or stock dealer usually has the longer experience, it is a foregone conclusion that he is not going to be the loser. The progressive farmer of today recognizes the scale as an absolute necessity to farm economy. With it he knows to a certainty what he is doing. He can weigh his hogs or steers before feeding and again when they are ready for market, weigh the corn that it takes to place them in prime condition, multiply and subtract and tell beyond doubt whether it is more profitable to feed his corn or sell it on the cob. The accuracy of the scale depends upon the sharpness of the knife edges. In ordinary scales where the knives bear the whole brunt of heavy loads, driving on and off the knife edges soon become dull and as a consequence the scales are incorrect. The Howe Scale Company, of Chicago and elsewhere, have by a very ingenious device eliminated this trouble. They have inserted ball bearings between the platform and the frame, which relieves the knife edges of all this wear and tear. As the Howe scale rests on an independent platform and as the frame swings absolutely free there is no possible chance of binding, unless from an obstruction lodging between the frame and foundation which is easily removed. When an absolutely faultless beam is placed on a scale containing so many valuable and exclusive features as the Howe, then perfection in scale construction has been attained. These are the three chief mechanical features of a scale which should be

carefully studied by every prospective scale buyer. Write for illustrated catalog. Address the Howe Scale Company of Illinois, 1321 Wabash Ave., Chicago. See page 8.

## FRESH WATER WHEN YOU WANT IT.

Wouldn't it be a fine thing to have fresh water in your barn or house, just when you want it? The Myers Automatic Water Supply System will furnish this water just where and when you want it. It pumps automatically. This is one of the greatest inventions for the convenience of farmers that has ever been put on the market. The company will be glad to send particulars free to all those who will write them. They also want an agent for each county. Write The Myers Pump & Mfg. Co., Beals Bldg., Kansas City, Mo., mentioning this paper.

## AN ACKNOWLEDGMENT.

We are in receipt of the J. Stevens Arms & Tool Company's latest Book of Reference. It is by far the largest and most complete catalog this enterprising company has gotten out. From the exceedingly attractive full color front cover to the new cuts of their mammoth factory on the back page this book is full of facts interesting and valuable to the sportsman or anyone in fact who is interested in firearms and their proper care. Interesting chapters on ammunition, points on shooting, how to purchase firearms, sights, etc., make this a valuable acquisition to any man's library. Anyone who will write the J. Stevens Arms & Tool Company, Chicopee Falls, Mass., asking for catalog No. 52 and enclosing five cents to cover postage will receive this valuable publication free.

## LIFE PROTECTION

from piles, fistula, fissure and other diseases of the rectum is the guarantee which Dr. Josiah Johnston, Des Moines, Iowa, offers to those who take his treatment for these afflictions. Wonderful progress has been

made in the curing of these common troubles. Dr. Johnston cures by a system of mild treatment which results in permanent relief. No money is asked for until the patient is satisfied of a cure. No inconvenience is suffered in taking this treatment. In fact the doctor has many patients return home immediately after receiving his treatment. Associated with the doctor is his brother, Dr. Edw. A. Johnston, of Minneapolis, Minn. The same method of curing the afflictions mentioned is practiced in both offices. The object of having two places of business is to be more accessible to sufferers. If you wish to consult these authorities you may visit whichever one is most convenient. Remember their motto is "no cure, no pay." On page 16 will be found a long list of those who have been cured. They represent only a few of the many. If you are a sufferer from any of the afflictions which these specialists treat, write them for advice, which is free. Address, Josiah Johnston, M. D. 512 W. Walnut St., Des Moines, Iowa. Kindly mention The Homestead when writing.

## T. H. ISAAC'S DUROC JERSEYS.

One of the most popular breeders of Duroc Jerseys in western Iowa is Mr. T. H. Isaac, of Red Oak, Iowa. We have known him and his herd for several years and can truthfully say that no other breeder has given more satisfaction to his customers than has Mr. Isaac. He breeds a type of Duroc that has been popular with his customers and a type that is demanded by his patrons. We want to add to this and say that his will be the type more Duroc Jersey breeders will want in the near future, and that is with plenty of bone and lots of size. He has made it a rule of late years to never buy a boar or a sow that has not got these qualifications, and his present crop of pigs show that to get the necessary size of bone desired you must breed it. For herd boars he has the following boars, and they are the sires of

those bred by him this year: Belle's Red Chief, a son of Red Chief I Am and out of Nebraska Belle; Educator, a son of Indicator and out of a Nancy sow; Royal Knight, a son of the sweepstakes boar, Red Knight, and Peerless Chief, a son of Ohio Chief. Mr. Isaac also has litters by W. L. A.'s Choice Goods, Proud Lady's Orion, F. A.'s Choice Goods and one litter by the great young boar, Valley Chief. He has 112 spring pigs and thirty fall stuff. Lady Advance, a granddaughter of Proud Advance, has seven nice pigs by F. A.'s Choice Goods, and Miss

Orion, a granddaughter of Orion Dandelon, has a litter by Valley Chief, and one of the boar pigs in this litter is a good one. He has a great litter out of a sow called Belle Roberts and sired by Royal Knight. We might also add that some of the pigs he has this year are sired by this boar. Another splendid litter is out of a daughter of Carroll Jumbo and sired by Peerless Chief. These pigs came March 16th, and are big, stretchy fellows. Mr. Isaac has a good litter of seven by Proud Lady's Orion, the \$425 boar, and these are out of a granddaughter of old Gold Dust Jim. He has other good ones, but they are too numerous to mention. Suffice it to say that he has some good ones, and he has plenty of size in them. He has the reputation of being one of the best feeders in the state and he always has some good things to show the boys when the fall season rolls around. He always makes a fall and spring sale and has never failed to have a good one.

## GOVERNMENT ORDERS FENCES DOWN.

Wyoming is going to be a good farming country, as it was just recently that the United States government ordered all fences removed that had any government land inclosed, and all the ranches had more or less United States land in their inclosure. It has put the ranchman out of business, and this land is thrown open for settlement. The ranchman has held this land for about thirty years, keeping out the settlers and farmers; but now the time has come when you can get this land. This is the best-watered section of the southeastern slope. The soil is a dark chocolate loam, underlaid with a good clay subsoil. The climate is exceedingly fine. No long, cold winters nor summers too hot, and hot winds are unknown. Good water can be had at a depth of from fifty to 125 feet, as this country is all underlaid with sheet water. The rainfall is sufficient for all growing crops. Observations prove that the heaviest rainfall comes during the growing months of April, May, June, July and August, which assures a good crop every year. This land can now be bought at from \$8 to \$15 per acre. The Arcade Land Company, of Des Moines, Iowa, have 40,000 acres of this land for sale on very easy terms. See their advertisement on page 15 of this paper.

# An Open Letter

DEAR SIR:

What would your conscience say to you if lightning would strike your house and injure some member of your family, possibly cripple them for life, or possibly kill someone outright? This is often done you know. You could not claim ignorance on the subject and say you did not believe in lightning rods and that they would not do any good, as we have had our advertisement in this paper for a long time and have offered to send you our booklets free. You can understand the theory of lightning as well as anyone else.

Now-a-days protection from damage by lightning is not mere guess work, nor a hit or miss proposition, but it is all figured out on a scientific basis, and experts acknowledge that where Dodd & Struthers rods are used the danger from lightning is almost, if not entirely eliminated.

We, ourselves, are so sure that a building rodged with our rods will never be injured by lightning that we give a written guarantee with every job we put up. In this guarantee we agree that if you have any damage that we will refund the money paid for the rods. We do not agree to give you \$500, nor re-build your barn, as that would be illegal and such a contract could not be enforced, for it would conflict with the insurance laws, but we do agree to give you back the money paid for the rods if they are not as they are represented.

The papers have been full of stories of how lightning struck and burned buildings within the last two or three weeks and several deaths have already resulted from lightning strokes. Your property and the lives of your family are in danger from lightning if you do not have properly constructed rods properly erected on your buildings. This is not a sentimental proposition entirely, as insurance statistics show that 75% of their losses on detached buildings are caused by lightning and none where Dodd & Struthers rods are used. There is no loss where our rods are used, because they are carefully manufactured and they are only put up by men who not only understand how the work should be done but who do it in the proper manner.

The National Insurance Company of Omaha, Nebraska, gives a discount of 25% where our rods are used.

Write to us for further information along this line and we will be glad to explain to you why lightning strikes your buildings and how the rods protect them. You are not under any obligation by asking for this information, but we want to acquaint you with the facts, then we want you to decide the matter according to the facts and according to your own best judgment. We are willing to risk your judgment if we once get the facts before you.

In dealing with us, if you have any doubt as to our responsibility and reliability, ask your banker about us and he can tell you our financial standing. Write to the editor of Wallaces' Farmer in regard to our rods and we feel sure he will say a good word in regard to our rods and our system of doing business. Write to us for our free booklet on the subject of lightning and ask us any question concerning lightning that you wish to ask and we will take pleasure in sending you our booklet without charge and answer your questions to the best of our ability.

Every time we see a loss by lightning we feel that we are in some measure to blame, for we know that the loss could have been prevented had we only acquainted the man with the merits of our rods.

Remember the word "Light-ning-rod" is a broad term and covers a great deal. In order that you may be sure of getting the best rods on the market and have them properly erected, and that you are not imposed upon by someone selling an imitation of our goods, we have burned our initials, D. & S., into every spool of our rods, and if you will look for this trade mark you are insured against fraud—for we vouch for our agents as well as for our goods.

Remember the Trade Mark, D. & S., and look for it on every spool of rod.

Yours very truly,

**DODD & STRUTHERS, Des Moines, Ia.**

The Winner 13765, was third prize boar in the under one year class at the Illinois State Fair, 1906, in a large show. He is a low-down hog with fancy head and ear, good bone, and extra length with good ham. Mr. D. H. Lewis, of Geneseo, Ill., the proprietor of the Bluff Road herd of Chester White swine, is offering this boar for sale at a very reasonable price. See field notes.

# CLASSIFIED ADVERTISEMENTS

ADVERTISEMENTS are inserted in this department of The Homestead (and, by special arrangement, also published in The Wisconsin Farmer, of Madison, Wis. and The Farmer and Stockman, of Kansas City, Mo., without additional charge) for the low price of five cents a word for each insertion, no insertion being accepted for less than \$1.20; and cash must invariably accompany the order, as we keep no books for this class of business. No display type or illustrations are admitted. Each number and initial letter or abbreviation, including the address, counts one word. Form for printing this page closes on Saturday of the week preceding publication, hence copy must be mailed so as to reach The Homestead on or before Saturday morning. Guaranteed combined circulation of the three papers over 190,000, reaching a farm population of at least 950,000 in the states of Iowa, Illinois, Nebraska, North and South Dakota, Minnesota, Wisconsin, Missouri, Kansas and Oklahoma.

MICHAELISE BARGAIN—Invoice \$3,500; annual sales, \$20,000, \$80 per month. Postoffice in store. Hickey Agency, Williamsburg, Kansas.

NICURALGIA—Positive, permanent cure. One dollar guaranteed. A. S. Way, Springfield, Ohio.

## Sows Bred to Meddler Average \$193.15

The spring sale of Poland China sows bred to the mighty Meddler, which took place Friday, May 24th, at the new sale pavilion, Wichita, Kan., was a success from start to finish. There were more than 400 present; mostly breeders from Kansas, Missouri, Illinois, Indiana, Nebraska, Oklahoma and Indiana Territory. The top of the sale went to Mr. W. J. Honeyman, of Madison, Kan., he paying \$1,200 for Perfection Chiefess 3d 223384, a litter mate to his prize-winning boar Perfect Challenger 88403. No. 5 was purchased by W. N. Wingate, of Trenton, Mo., for \$605, after much spirited bidding had been indulged in. No. 4 went to Mr. Frank Dawley, of Waldo, Kan., for \$330. Other buyers also secured good ones, but it would be impossible for us to enumerate all, as every sow offered was good. On Thursday, May 23d, Messrs. Hebbard & Roy tendered a banquet to the visiting breeders, newspaper representatives and their families at the Commercial Club. Short talks were given along the line of improvement to pure-bred hogs and each one was listened to very attentively. Messrs. Hebbard & Roy request us through the columns of our paper to thank their many friends in making their sale the largest attended and most successful one ever held in Kansas. Below is a complete list of all sales made:

1. Perfection Chiefess 3d, sire Chief Perfection 2d, dam E. L.'s Delightful. W. J. Honeyman, Madison, Kan. \$1,200.00
2. Keep On Lady, sire Keep On, dam Black U. S. Yet. J. R. Roberts, Deer Creek, Okla. 162.50
3. Fire Bug, sire Corrector 2d, dam Fire Queen. Frank Dawley, Waldo, Kan. 330.00
4. Sweet Keep On, sire Keep On, dam Miss Perfection, W. N. Wingate, Trenton, Mo. 605.00
5. Early Bird, sire T. R.'s Perfection, dam Darkness Girl 2d J. R. Young, Richmond, Mo. 315.00
6. Lady May, sire Chief Perfection 2d, dam Invinsa. E. S. Davidson,

- St. John, Kan. 300.00
8. Perfection Queen, sire Chief Perfection 2d, dam Kempona. J. C. Larrimer, Derby, Kan. 170.00

50. Chip's Lady 3d, sire Mo's Chip, dam Lady Black 2d. Goodrich Stock Farm. 167.50

## SUMMARY.

46 Head \$8,734, average \$186.00

## OKLAHOMA BREEDERS ATTEND MEDDLER BRED SOW SALE AT WICHITA, KANSAS.

A most noticeable feature which attracted much attention among the breeders in attendance at the Meddler bred sow sale, at Wichita, Kan., May 24th, was the large attendance of breeders from the new state. Among those seen were Messrs. E. G. Barnard, Hennessey; Robert Rounds, Hennessey; A. Hafer, Blackwell; H. H. Kuper, Thomas; J. W. Reed, Jr., Eddy; I. E. Knox, Nardin; Ben Colbert, Tishomingo; J. R. Roberts, Deer Creek, and J. E. Harston, Lookaba. These breeders of Poland China's are always on the lookout for the best of the breed.

Generally speaking, we have got bravely over the idea that a farmer's time isn't worth anything. Ten years ago we remember hearing a farmer say, when asking about some work he expected to do, "I don't care much how long it will take to do it; my time isn't worth anything at this season of the year." It was during the winter. The average farmer's time is worth a good deal now, even if in the winter, for muddy fields is the only thing that usually keeps him from doing work that counts in dollars and cents; manure hauling, for instance,

## OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer, who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to any considerable number of our readers. Subscribers who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should remit \$1.00, addressed as above.

## LAW QUESTIONS CONSIDERED.

## TAXES IN WISCONSIN.

Mr. Milford Johnson, Lee Co., Ill.—What amount of taxes per \$100 valuation, can be lawfully levied in the state of Wisconsin?

Answer.—For county taxes one-half of one per cent, unless a larger per centage is necessary to meet prior indebtedness. The rate of state taxes depends upon the action of the secretary of state, state treasurer and attorney general, who constitute the board for state assessment.

## UNLAWFUL MARRIAGE—INHERITANCE.

A Subscriber, Lawrence, Kan.—A was married in Europe about fifty years ago to B, and they had one child. A then came to America, and after a time married C, and lived with her until her death. C and her children knew nothing of the first marriage of A. Can B and her child get a part of A's property?

Answer.—They are entitled to all of it by law. According to your statement C was never the lawful wife of A. His alleged marriage with C was not lawful, because he then had a wife living.

## INHERITANCE IN NEBRASKA.

A Subscriber, Lexington, Neb.—A was a widow with one child. She married B. She owns real estate. (1) In case she should die without a will how would her property be divided? (2) When these parties were married, B had some personal property, and after their marriage through their joint efforts, they accumulated more property, both real and personal. Suppose then B dies without a will, there being no issue of the marriage, how would his property be divided?

Answer.—(1) If she owned it at the time of her marriage to B or if it came to her otherwise than as a gift from B her child will be entitled to all of it, if she dies intestate. (2) His widow would be entitled to it for her natural life,—it would then go to B's father.

## IMPROVING COUNTY ROAD.

A Subscriber, Chicago Co., Minn.—I own a farm by the main road. B owns a farm back of mine. He had no outlet, so about fifteen years ago I permitted him to have a road through my land, but no improvements were made on it. Two years ago a county road was laid out by B's place, leading to another road; the farmers were paid for the land it occupies, but no improvements have been made on this end of it. (1) How long must I wait for this new road? (2) What steps can I take to have the road opened and improved?

Answer.—(1) We do not know. (2) Bring what influence you can to bear

## FOR SALE.

One Peerless 16-Horse Engine, one Peerless Separator, Self-feeder and Wind Stacker, also one Joliet No. 2 Cornsheller. This machinery is good as new. Will sell for half its cost when new. Will sell for cash, or write what you have to trade.

W. R. HAINLINE,

Blandinsville, Illinois

upon the county board. It has the power to open and improve the road, which you permitted B to use. That might hasten the improvement of the new road.

## DEEDS—DELIVERY

A Subscriber, Courtland, Kan.—A made deeds conveying his property to some but not all his heirs and had said deeds attested by two witnesses, and then put them in the hands of a notary public to hold until A's death, with instructions to the notary to then have them recorded. (1) Does the fact that said deeds were made to a part of A's heirs and not to all of them affect their validity? (2) Does the fact that the deeds were not delivered to the grantees, or recorded affect their validity?

Answer.—(1) It does not. (2) If under A's instructions the notary actually delivered the deeds to the grantees after A's death, that amounts to a legal delivery and the deeds will be good.

## DIVISION LINE—MISTAKE.

Mr. Ira Burnett, Elgin, Iowa.—A deeded to C 100 acres of land, more or less. Afterwards C found that B had a line fence over on C's land three rods for the entire line of 160 rods. This fence has been there for fifteen years. B refused to have a survey made. (1) Can C have a survey made and move the fence over to the true line? (2) What recourse, if any, has C against A?

Answer.—(1) He cannot, without B's consent. (2) If the line fence was placed where it is by mistake of the adjoining owners, and is not on the true division line, C can bring a suit against B in the district court to fix and determine the corners and boundary line between their farms, and by proving that the parties were mistaken as to the line when they erected the fence and proved the exact location of the true line, he can obtain a decree establishing a true line, and ordering the fence moved accordingly.

## CONTRACT ABOUT LAND.

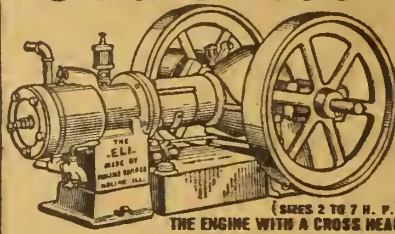

A Subscriber, Hoopetown, Ill.—A and B own adjoining lands. A's farm lies higher than B's farm. A wanted an outlet for part of the drainage water on his farm and he and B agreed that A should pay B the difference in the cost of tile needed to carry all the drainage water from both farms. A paid B the sum agreed upon, and took B's receipt for the money, and now refuses to furnish A the outlet upon the ground that no time was set for him to do so. What recourse has A?

Answer.—Perhaps the only remedy A has is to sue B for the money. He can recover a judgment for that, but it is doubtful whether he can enforce the contract, as it seems to have been an oral one and relates to an easement in land. B's reason is no legal reason at all, for if this same contract was in writing A could enforce it. In such a matter the law implies that performance must be made within reasonable time—what that is, depends upon circumstances in each case.

## RENTING CONTRACT.

A Subscriber, Milton, N. Dak.—A rented a farm from B upon the following terms and conditions: A was to furnish and perform all work necessary, and give B one-third of the grain delivered in his granary at the time of thrashing. A was to break twenty acres of ground, sow it to flax, and to do the road work required, and to pay B \$45 for rent of the hay ground, on the place. B was to pay A \$50 per acre for the breaking. A was unable to do said breaking in the spring, and he got B's written consent to do it in the summer season. (1) Can B compel A to pay for thrashing B's third of the grain? (2) Can A lawfully

## 44 Years Business Guarantee

## ELI Two Cycle GASOLENE ENGINE

Ask the man who owns one and he will tell you that it is the most powerful and trustworthy engine on the market—that it has no inlet or exhaust valves to be frequently reground—no cams, valves, levers or pivots to wear down and spoil a day's work—no compression in the crank chamber to leak and cause trouble—that only a very few parts can ever wear out—that they wear very slowly and are exceedingly inexpensive to renew—and that as long as there is any engine left, it will continue to take in the charge and expel the exhaust on exact time.

For details and prices send for our free catalogue. Anyhow, investigate for yourself. You cannot afford to pay for your dealer's mistakes.

## Wealth in Irrigation

New Opportunities to Acquire Home and Independence  
Cheaper than Paying Rent—Crops Large and Certain

On Tuesdays, May 7 and 21 and June 4 and 18, 1907, I will personally conduct you to this LAND OF OPPORTUNITY, to the growing towns and fertile, irrigated valleys of the Big Horn Basin, Wyo., where you can enter 160 acres of irrigated land at 50c. an acre plus cost of water; also the Yellowstone Valley with its beet sugar factory and irrigated lands. Do you want to go?

The Government is spending millions for irrigation in these localities.

These lands, adjacent to the Burlington Route, are as rich and productive as any the sun shines on, and lie along beautiful streams with an abundance of pure mountain water. Plenty of timber and coal. Climate, ideal.

Why pay rent when for same payments you can own your own home?

I am employed by the Burlington Route to show these lands and my services to you are free.

SPECIAL ROUND TRIP RATES from Omaha, Lincoln and Kansas City, \$20, St. Louis \$25, Chicago \$25. Excursions leave Omaha 4:10 p.m., Lincoln 6:00 p.m., Kansas City 9:50 a.m. and 6:05 p.m., St. Louis 8:02 a.m., and Chicago 9:15 a.m., on dates named.

withhold the cash rent until B pays him for the breaking? (3) Can B recover damages from A because he did not do the breaking in the spring?

Answer.—(1) He can, because that was the legal effect of their contract.—A was to do all work and give to B one-third of the grain delivered in the gran-

ary. He could not so deliver it until it was thrashed, hence the whole thrashing bill should be paid by A. (2) He can, that is one claim can be set off against the other pro rata. (3) He cannot, because he waived the time of the breaking, by giving his written consent that it might be done in the summer season.

## ADOPTION OF CHILD.

Mrs. J., Elkport, Iowa.—We live on a farm and have no children of our own. We wish to adopt a child. Would take one from a children's home, if suitable. We are religious people. What steps can we take to legally adopt a child?

Answer.—You must have the written consent of the child's parents or guardian, or if it has neither, the consent of the mayor of the town, or the clerk of the district court, or if the child is in a home for the friendless, the consent of the officers of such institution. The document containing such consent and the adoption of the child must be signed and acknowledged by all the parties to it, like a deed, and recorded in the county recorder's office.

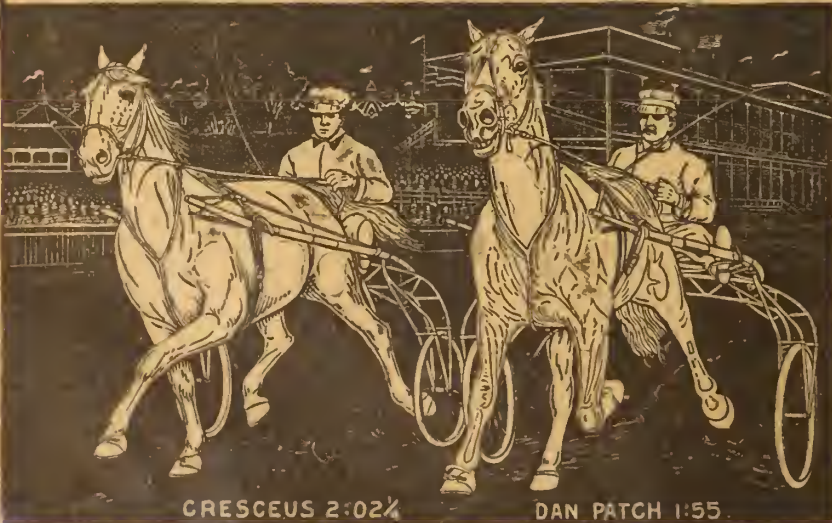

## PARTITION OF LAND.

A Missouri Subscriber.—A, B, C, D and E are joint owners of eighty acres of land with equal rights, each one owning an undivided one-fifth of the land. E is determined to have the land sold and the proceeds divided. At present E is allowed two-fifths of the rent of the land, but she is not satisfied, and wants the land sold. (1) Is there any way for the others to prevent a sale of the land? (2) Could A, B, C and D have the court cause the land to be appraised, and its value fixed, and determine what sum they should pay E for her share?

Answer.—(1) Probably not. Any one of the co-owners can bring a suit in the circuit court against the others, for partition of the land. The court will have the land divided among them if that can be fairly done; but if it cannot be done

INTERNATIONAL STOCK FOOD CO.,  
MINNEAPOLIS, MINN., U. S. A.

## THE WORLD'S MOST FAMOUS HARNESS HORSE FARM.

International Stock Food Farm of seven hundred acres, owned by M. W. Savage, is generally acknowledged to be the most famous harness horse farm in the world because it owns the Four World Champion Stallions, Dan Patch 1:55, Champion Pacer and Fastest Harness Horse in the world; Cresceus 2:02 1/4, the champion trotting stallion of the world; Arion 2:03 1/4, the champion 2 and 3-year-old trotting stallion to high wheel sulky; Directum 2:05 1/4, the champion 4-year-old trotting stallion. Also Roy Wilkes 2:04 1/4, the first stallion to beat 2:10 and world's champion for four years. All of these stallions and the one hundred brood mares and their colts are raised "International Stock Food" every day. You are specially invited to visit this farm at Savage, 10 miles from Minneapolis, and see the every day, practical results of feeding "International Stock Food." 3¢ 3¢ Food for One Cent. We always welcome visitors.

fairly, then the court will order the land to be sold by the sheriff and the proceeds divided among the co-owners. (2) They could not. The only lawful proceeding in such cases is that mentioned in answer to the first question.

#### THAT'S ALL.

A Subscriber, Denison, Iowa.—One corner of A's land is cut off from the balance by a river and cannot be reached without going over B's land. In case B refuses to allow A to go over his land what is A to do?

Answer.—Bridge the river.

#### SALARY U. S. JUDGES.

A Subscriber, Helena, Okla.—What are the salaries of the chief justice, and the associate justices of the supreme court of the United States?

Answer.—The salary of the chief justice is \$13,000 a year; associate justices \$12,500 each.

#### POISONOUS DRUGS.

A Subscriber, Albion, Iowa.—A farmer has discovered something that will cure certain ailments in live stock. It is poisonous. Can the farmer lawfully manufacture and sell such a remedy, without holding a license as a veterinary, or a certificate as a pharmacist?

Answer.—He cannot.

#### CONTRACT ABOUT TIMBER.

Mr. E. C. W., Vinton, Iowa.—I bought the timber growing on a piece of waste land on a side hill, with a written agreement that I should remove the timber from the land in two years. The two years expired on December 1, 1905. Have I a legal right now to go on the land, and cut and remove the timber?

Answer.—You have not.

#### OUTLAWED JUDGMENT.

A Subscriber, Goldendale, Washington.—A and B lived in Iowa in 1894. A owed B a sum of money and was not able to pay. B brought suit and got judgment for it; afterwards A moved to Washington and he and his wife accumulated property. Can B collect his judgment from such property?

Answer.—In Washington a judgment of another state, more than six years old, cannot be collected by law.

#### A WOMAN'S WON'T.

A Subscriber, Vinton, Iowa.—I want to sell my farm, but my wife is opposed to it. She wants one-third of the money, and also a third of my personal property, and demands this before she will sign the deed in case I sell the farm. What can I do about it?

Answer.—Nothing at all. There is no way by which you can compel your wife to sign a deed.

#### INHERITANCE IN KANSAS.

A Subscriber, Osborne Co., Kan.—W has nine children. One of them died leaving a widow, and a son who is now of age. When W dies will the widow and son get a portion of his property, and how much?

Answer.—The widow will get nothing. Her son will get an equal share with W's other children, which will be one-ninth if W leaves no widow—but if W leaves a widow, one-eighteenth.

#### HUSBAND AND WIFE.

An Iowa Subscriber.—A owns land in this state which he wishes to sell, but his wife refuses to sign the deed. Can he set apart the undivided one-half of the land for his wife, and then sell his half, and give a good title?

Answer.—He cannot. The undivided half of land or anything else cannot be set apart. It is a physical impossibility. A's wife is not entitled to her share of the land while A lives. At A's death she becomes entitled to her share of it and not before. A can sell all the land (unless it is their homestead) subject to

the wife's right to claim half of it at his death. If the land be their homestead A cannot sell it at all without his wife's consent.

#### LIFE ESTATE—DEBTS.

A Subscriber, Des Moines, Iowa.—A man willed his real estate to his wife during her natural life, and at her death to be divided equally among his heirs. The will did not make any provision for debts which the wife might incur. She rented the land and lives with disinterested persons, but does not pay her board bill. Can it be collected from the land at her death?

Answer.—It cannot. She cannot encumber the land nor make it liable for her debts.

#### RAILROAD FENCE.

A Subscriber, Newell, Iowa.—I have land adjoining the railroad right of way, which I intend to fence for a hog pasture. Does the law of Iowa require a railroad company in such a case, to build a hog tight fence between its right of way and such hog pasture?

Answer.—It does not. The fence which the law requires a railroad company to make along its right of way is not a hog tight fence, but the owner of adjoining land may make it hog tight at his own expense.

#### HUSBAND AND WIFE—COURTESY.

A Subscriber, Lyons, Neb.—A and B are husband and wife. By hard work and economy they obtained 160 acres of land which was in the name of A. Then they bought eighty acres, which they had put in B's name, and the deed was recorded. B died three years ago, and A married again. Who inherits the eighty acre tract? There are children of A and B.

Answer.—A is entitled to the use of the 80 acre tract for his natural life by what is called curtesy. At A's death the children of B inherit the land in equal shares.

#### AGREEMENT OF HEIR.

A Subscriber, Garden City, Kan.—A has two sons, B and C. A and B have been in partnership for about eighteen years, but all the property has been in A's name. Recently C came home and now wants a share of all the property. A gave C a certain sum of money and in consideration thereof C agreed to waive all his rights, and make no claim as child or heir of A to any of A's estate when he died. C is married and has children. Is it legally necessary for C's wife and children to sign said agreement?

Answer.—It is not. If the agreement is properly drawn and executed by C it will be perfectly valid without the signature of either C's wife or children.

#### OUTLAWED NOTE.

A Subscriber, San Diego, Cal.—In Iowa A gave his promissory note for a certain sum, to B payable January 1, 1902, for value received. A afterwards moved to Wisconsin. (1) When will the note be outlawed? (2) Do indorsements renew a note?

Answer.—(1) January 1st, 1908, if A's residence in Wisconsin began before January 1st, 1902. The limitation on a promissory note in Wisconsin is six years after its maturity. (2) Not necessarily, but payment of either principal or interest on a note by the maker will renew it—indorsement is only prima facie evidence of payment.

#### POLICY RE-INSURED.

A Subscriber, Woden, Iowa.—I was insured in the German Insurance Company, of Freeport, Ill., which became bankrupt, and had its policies re-insured by the Royal Insurance Co., of Liverpool, England. This company has sent me a slip to attach to my policy. The slip reads as follows: "The following clause to attach to policy No. C 2428165 of the German Insurance Company, of Freeport, Ill.—It is hereby specially agreed that this contract has been re-insured by The

This is Huttig.

through your dealer, but an ironclad, legally binding guarantee, signed by the HUTTIG MFG. CO., capitalized at \$1,000,000, and responsible for every promise it makes.

No other roofing gives you a personally signed guarantee as strong as this. No other roofing can AFFORD to do so. Why can I do it?

Simply because my roofing is the only roofing on the market, made from pure, natural, imported Asphalt.

Asphalt comes from the island of Trinidad. A large part of it is used in the exclusive manufacture of HUTTIG'S RUBBER ROOFING.

My roofing is made of long-fibered wool felt, densely compressed and heavily saturated with this specially prepared Natural Trinidad

*H. W. Huttig*

PRESIDENT

## I Stand Back of Huttig's Rubber Roofing

WITH A WRITTEN, PERSONALLY SIGNED, LEGALLY BINDING GUARANTEE.

Yes, sir,—I can afford to stand back of my roofing because it stands back of me, and makes my word good as gold.

I GIVE you a written guarantee that this roofing will do what I claim—not a mere VERBAL PROMISE,

Asphalt, which protects every particle of fiber. Now, mark this carefully: The saturation of Felt with Asphalt in HUTTIG'S RUBBER ROOFING is 150 per cent as against 104 per cent, the highest saturation of ANY of the roofings with the crazy names.

That's the principal reason why my roofing will not "stick" in the hottest, nor crack in the coldest weather.

HUTTIG'S RUBBER ROOFING requires no skilled labor to lay it. Every roll contains enough liquid cement, nails, caps, etc.

It will not run, rust, rot, crack, leak, blow off, require frequent repairs, and is not a fire trap.

Now, here's how I feel about it. If you have

use for roofing—You don't want to fool with a doubtful article, when you can get HUTTIG'S with a guarantee that means absolute protection, both to your roof and to your pocketbook.

Just put the burden on HUTTIG. My shoulders are broad. I will take care of all your roofing troubles, if you will trust me.

Ask your dealer for HUTTIG'S RUBBER ROOFING. If you can't get it of him, ask ME, and I'll see that you do get it.

Anyway, write for a big, free sample of my roofing and let me send you my booklet B and special Ironclad Roofing Guarantee. Write me personally, and do it to-day.

HUTTIG MANUFACTURING CO.,

707 East Second Street, Muscatine, Iowa.

The rich irrigated lands of the Arkansas, Grand, North Fork and Uncompaghe Valleys of Colorado, and the Farmington District of New Mexico, offer exceptional opportunities for the fruit grower. Pears, Peaches, Apples, Grapes, Apricots, Plums, Melons of all kinds and small fruit of every variety are raised with a greater average yield per acre—and a finer quality—than in any other section of the United States. Markets are close at hand and the demand exceeds the supply.

The Denver & Rio Grande R. R.

"Scenic Line of the World"

reaches all the above districts and offers special inducements to those seeking locations.

Write to-day for free descriptive booklets.

## THE SOLE TELLS

THE WEARING VALUE OF THE SHOE. Example: Is the sole of your shoe hard, stiff and unyielding? If so, ask to see

### Kirkendall's Electric Sole Shoes.

In these shoes you have the best Oak-Tanned Leather, unsurpassed for wearing quality by any leather tanned—and requiring three months tanning to properly prepare it. Our Electric Sole Shoes are ideal for people wanting something to actually conform to the foot; it is nearly as soft and pliable as a stocking, and yet gives unexcelled service, as the process of tanning the leather retains in it its strength and fibre, which fibre is in the hide of every healthy animal, but is frequently absolutely destroyed by the quick process of tanning the hide.

Our upper leathers are in lasts and patterns we feel that these shoes, which is important, perfect fitting lasts and patterns on ing, which is a guarantee of strength to the seams. Our rapidly increasing trade on this shoe is evidenced by our sales, which have increased steadily each month, and are now from 200 to 300 per cent greater than the first season. In our large sales of these shoes we have the satisfaction of stating that we never had a single pair returned because of unsatisfactory service or disappointment of any kind. Your attention is, however, called to this feature: So flexible a shoe is apt to be fitted too closely, and the character of this shoe enables it to adjust itself snugly. If properly fitted, its service is unequalled. Made for both men and women.

If your dealer has no Kirkendall Electric Sole shoes in stock, write us and we will learn why; and at the same time advise the nearest place where you can get them.

Royal Insurance Company, of Liverpool, England, against any loss or damage not exceeding the sum insured, and subject in all respects to the terms and conditions of the policy hereby referred to. Royal Insurance Company, of Liverpool, England. W. A. Wilken—State Agent. Is my policy good?

Answer.—V think it is if the English company is financially responsible.

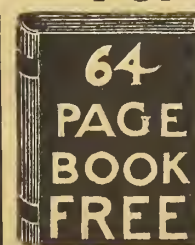

#### ROADS—HERD LAW.

A Subscriber, Liberal, Kan.—(1) In western Kansas the cattlemen have the public roads fenced in, and in some cases have had them so fenced for twenty years. What must the farmers do to have the roads opened? (2) Is there a herd law in Kansas?

Answer.—(1) The law makes it the duty of road overseers to open or cause to be opened all county and state roads in their respective districts, first giving the land owners or their agents notice to open such roads within ninety days. If they refuse or neglect to open the roads within such time then the overseer may enter on the lands and open the roads. If such notice is given between the first day of March and the first day of October, it must designate the first day of the next January as the time for opening the road. After roads are opened the penalty for obstructing them is a fine between \$20 and \$100, and imprisonment in jail not exceeding three months, or both. (2) In every county the board of county commissioners have the power to direct by order what animals shall not be allowed to run at large within the county. See General Statutes of Kansas of 1905, page 1658.

The amount of scientific and executive superintendence to enforce the national pure food law to the letter will be great, no doubt, for some months to come and even after. Secretary Wilson has foreseen all this and has wisely appointed a commission for this purpose. The men

## Free Book For Men

A handsome illustrated book which explains all about diseases of men such as Nervous Disorders, Weaknesses, Blood Poison, Skin Diseases, Prostate, Pelvic and Urethral Disorders, Piles, Kidney and Bladder Troubles, Etc.

This book tells the various stages of these diseases, at what stage they become incurable, and tells of a simple and effective treatment for the cure of the ordinary cases at home. This book tells how men who have broken nature's laws, become weak and run down can regain their strength and vigor and many other important facts which men should know. Those interested should write for the book today. Same will be sent free in plain sealed envelope. Address,

# VETERINARY MATTERS

PROFESSIONAL veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of neighbors. Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of \$1.00. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. All veterinary inquiries should be addressed to this office.

## SYMPTOMS AND TREATMENT.

### TUBERCULOSIS.

I have a full-blooded Short-horn cow nine-years-old that has something wrong with the udder. Since January she has had hard lumps come and go on the udder and the milk is stringy from first one teat and then another. Her eyes water and she is not as fleshy as she used to be. I have given no treatment. It does not seem to affect her milk supply.

The symptoms point to tuberculosis of the udder and system as the cause of the garget and lack of thrift. Under the circumstances it would be wise to have her tested with tuberculin and meanwhile do not use the milk.

### SWEENEY—WOUND.

(1) I would like to know what to do for a sweeney on a three-year-old gelding on the left front shoulder. (2) I also have a six-year-old horse which recently got cut in the wire on the left front foot just above the hoof. It is a very deep cut and no treatment has been given.

(1) Clip hair from wasted parts and blister once a month with cerate of cantharides. (2) Wash wound thoroughly; then sprinkle with a mixture of one dram iodine and four drams each of tannic acid and boracic acid; cover with cotton bandage and apply bandages to bring pressure on wound. Renew dressing once daily.

### SCOURS.

I have some suckling pigs about one month old. They have the white scours and some of them vomit. The sows eat all right. I have been feeding the sows corn and oats and shorts slop. I have about ninety little pigs and they were all doing well until they began to have the scours.

Cut the rations of the sows in half and leave out the corn. To each sow once daily give half a dram of dried sulphate of iron until pigs stop scouring. Separate the scouring litters from those that are well. Clean up, disinfect and whitewash houses. If trouble continues physic each pig with castor oil and then give ten grains each of salol and subnigrate of bismuth twice daily on tongue.

### CANKER.

What is the matter with my pigs and what is a remedy? From four to six weeks old their mouths get sore, their tongues swell and they die in a few days. The food of the sows is sweet milk and ground wheat slop.

The disease is canker of the mouth and it is due to germs in places that have not been properly cleaned, disinfected and whitewashed. Clean up, use disinfectants freely and whitewash once a month. Keep pigs out of filthy places. When pigs are born snip off the little sharp teeth to be found in their mouths and wash faces once daily with a 10 per cent solution of boracic acid as a preventive. Treat affected pigs by scraping each sore and ulcer, then painting each with tincture of iodine and afterward spraying or sponging the mouth and face with a 1-50 solution of coal tar dip once daily until well.

### BULLNOSE.

I am losing quite a number of my young pigs from a disease which I nor anyone else know anything about. The little fellows are all right when first born, but after three or four days some of them get a scab around their mouth, nose, side of head and the eyes. It seems as though the nostrils grow shut as they can't breathe through the nose. Some of them go blind and some lose their tails. They just get scabby and drop off close to the body. If I peel some of the scab off I will sometimes find the flesh under it looking as though it were rotten or some kind of a pus. Those affected seem to have black teeth in the upper jaw. Some get over it in time, but the most of them die. The same thing happened last spring. I have good, healthy sows and keep them in a good hog house. I feed the sows shelled corn, some oats and some ground oats in the slop, which is one-third of skimmed milk and two-thirds water. Could you please tell me the cause and a remedy?

This is a germ disease and in its worst form is incurable and hereditary. It seems akin to rickets and is induced by over feeding, breeding and growing hogs on corn. Stop feeding corn to sows and continue slop of milk, middlings, flaxseed meal or tankage and add lime water freely three or four times a week. Disinfect and whitewash the hog houses at least twice a year. Have the sows exercise daily outdoors and if possible feed some succulent food. When pigs come at once nip off the small sharp teeth to be found in their mouths and wash their faces with a ten per cent solution of boracic acid. Repeat the washing daily.

NO DOSE TO MEASURE. NO LIQUID TO SPILL. NO STRING TO ROT.

Just a little pill to be placed under the skin of the animal by a single thrust of the instrument. You cannot afford to let your cattle die of blackleg when a few dollars spent on Blacklegoids will save them. Write for circular.

PARKE, DAVIS & COMPANY

HOME OFFICES AND LABORATORIES, DETROIT, MICH.

NOTICE.—For a limited time we will give to any stockman an injector free with his first purchase of 100 vaccinations.

At the first sign of the canker sores scrape the part, then paint it with tincture of iodine once a day and afterwards souse well in a solution of one to two ounces of permanganate of potash in a gallon of warm water. Burn pigs that die. Change breeding stock as soon as possible.

### DRESS GOODS FOR SPRING WEAR.

Among the many different dress goods shown this spring are some extremely economical fabrics that make up into surprisingly handsome dresses. They come in a wide range of beautiful colors and attractive designs, and vary from neat pin stripes, polka-dots and plaids to elaborate figures in dignified effects. These fabrics are known as Simpson-Eddystone Prints and are appropriate to wear at any time of the year. The most popular spring and summer styles are in silver grays, indigo and black has a decided call and the black and whites are in good demand. Some of these designs have a new silk finish; all have permanent colors that will not fade, wash out or lose their brightness. Only the very best cloth is used, so that durability is assured. There is no waste of money, time or labor when dresses are made from Simpson-Eddystone Prints because they hold their color and wear well. Simpson-Eddystone Prints have been made by three generations of Simpsons, and have been the standard and calicos of America for more than sixty years. The high standard set by William Simpson when he printed his first piece of calico has always been maintained, and his grandson, William P. Simpson, now heads the Eddystone Manufacturing Company, which manufactures the Simpson-Eddystone Prints. These prints are still made with the same skill and care as in the days of the elder Simpson. A corps of artists is constantly turning out new designs of charming beauty that make these prints climb ever higher in popular favor. Simpson-Eddystone Prints are moderate in price and most economical. They are sold by thousands of first-class dealers all over the country. See page 12.

## OUR DAIRY DEPARTMENT

ALL communications relating to dairy matters should be addressed to this office. Inquiries of general interest regarding dairy management and production will be promptly answered.

### The Bondage of the Dairyman.

To the Editor of The Homestead:

Americans do not take kindly to the idea of chains and slavery, but many a corn belt dairyman has unconsciously drifted into the condition of the man in the illustration given. He is not chained to a fellow prisoner or a post, but to a very common animal, a worthless, wilful cow.

The man doesn't know where he is going; he simply follows the cow. That is how he came to be tied up to this creature; he didn't know what he was doing, nor what the cow was doing—or rather what she wasn't doing. In fact, there has been altogether too little looking and knowing in this man's business. He has worked hard with his hands but little with his head pencil, and the dollars have come his way very reluctantly. As for the cow, the only thing she has done right well is to drag her owner after her and to pick up a living without paying for it.

The cow is not worried or disposed to look on the dark side of life. Thus far she has found no trouble in pulling her owner along without his asking any questions, and she now feels sure that her milk record will never be inquired into. This presuming creature doesn't know about the key within the dairyman's reach.

This cow has been satisfied to make 133 pounds of butter fat in a year, thus retaining a profit of only 77 cents in the 365 days. If the dairyman has 474 cows of this kind, he could make from them a total of one dollar a day, and with that he could keep soul and body together.

But do not mistake this cow for a rare specimen of an almost extinct family. On the contrary, she is very common and popular on all our prairies—a cow of consequence. She is actually a leader; she leads that dairyman (and a great many other dairymen) where she will, while grazing contentedly. She has a following of one-fourth the million cows in Illinois. Two hundred fifty thousand of them have used the dairyman's feed, barn, time and capital, and for these have returned him an average profit of only a cent and a half per week.

## THE SEPARATOR THAT PAYS FOR ITSELF.

Occasionally the intending buyer of a cream separator who has but a small amount of ready cash to invest is tempted to put his money into one of the so-called "cheap" machines which are being largely advertised. Although he recognizes the superiority of the DE LAVAL machine and his need of a good separator, he invests in the "cheap" trashy machine because he does not happen to have ready the full amount which he supposes to be necessary to buy a DE LAVAL. This is where closer investigation of the matter would pay him well. A

### DE LAVAL CREAM SEPARATOR

may be bought upon such liberal payment terms that it will more than earn its cost while the buyer is paying for it. In addition the DE LAVAL buyer has positive assurance that his machine will be good for at least twenty years of service, during which time it will save every possible dollar for him and earn its original cost over and over again. If he purchases the so-called "cheap" separator he must pay cash in advance and then take the chance of the machine becoming worthless after a year or two of use, to say nothing of the cream it will waste while it does last,—all of which means that the buyer has virtually thrown away the money invested in the "cheap" separator and wasted his time, labor and product in the bargain. The DE LAVAL is THE separator that pays for itself,—lasts on the average ten times longer than any other machine and insures the greatest possible profits in the end. This being the fact there surely can be no economy in the purchase of the so-called "cheap" separator, however small its first cost may be. Remember that the DE LAVAL pays for itself. Catalogue and full particulars gladly sent upon request. Write to-day.

## Good Cows at \$15

Almost any man will pay that much for a first-class cow. Thousands of men have the cows but are losing \$15 on each one

because of faulty dairy methods. Government and State Experiment Station reports show that if the milk from every cow in the country was passed through a first-class separator the saving to the cow owners of the United States would amount to \$200,000,000. It looks big but it's a fact. It means just \$15 less on each average cow by the employment of milk pans, cans and other gravity processes of securing the cream. Your cows may be helping to swell this mighty fund. You can stop your part of the loss by the use of our

## Great Western Cream Separator

Our catalogue tells all about this latest improved and most thoroughly up-to-date machine on the market, embodying everything which is best, such as a Perfect Skimming, Self-draining, and Self-washing Bowl, Low-down Supply Can, High Crank, Ball Bearings—hence the easiest running separator made; a machine with shafts that never wear out. Bearings that can be easily and cheaply replaced; a machine with all its gears running in a spray of oil. It fully illustrates and describes a machine that is always ready for service, and will last as many years as you continue in the Dairy Farming Business. This book illustrates and describes all the

essential parts of the machine; it tells of what each piece is made and why. You will get more genuine information reading this book about separators than from any other source. You will get so thoroughly posted that no one can sell you a poor machine and get your good money. You want the very best and will find the GREAT WESTERN to meet every demand.

Our catalogue tells you all about milk, its composition, how and why the cream separates, how and why the milk sours, the changes that take place, why the cream does not separate by gravity when souring begins, why the sour milk is of so little value for feeding purposes, how much cream is lost by all the old methods of milk separation, i. e., the shallow pans, deep setting cans, dilution separators, etc. It explains how the GREAT WESTERN SEPARATOR saves all this cream, making a profit of 12 to 15 dollars for each cow you milk; it tells you of the best methods for raising calves and about the most prominent breeds of cattle; it tells what thousands of men have been trying for hundreds of years to accomplish and how we have succeeded; it tells you how to make your cows keep you instead of you keeping the cows.

If you are milking two or more cows, write us at once as follows:

"I am keeping.....cows. Send me your Book No 4578 of the Great Western Cream Separator." It is free. Ask for it today.

Don't buy a separator of any kind or milk again until you send for our catalogue. Address **Smith Manufacturing Co.,** 159-164 EAST HARRISON ST. Chicago, Ill.

It may be said for this cow that she is not a vicious animal. The dairyman has nothing to fear from her horns or her feet. She is well behaved and usually there is nothing suspicious about her manner. But when it comes to remorseless stealing of the bread from the mouths of the dairyman's family, her tribe may well be classed with the great business sharks and trusts that prey

cow for a year. He would have a vastly easier time of it if he were tied to this cow, instead of the other. And as sure as he uses the scales and test and comes to know each cow's production, he, like all other dairymen who have tried it, will gradually change his herd to this kind of high-producers. And that will inevitably lead to more profit in his business—to better education for

### TIED TO THE WRONG COW

upon the people. She has kept the dairy man of Illinois out of fully five million dollars the past year without the slightest shame or nervousness. And yet they follow this cow as though they had never known freedom from such an incumbrance. The man who says that dairying doesn't pay is ten to one boarding several cows of this kind in his herd.

The chain is heavy and tight, but the dairyman has carried it so long he thinks that burden belongs with his business, or he lays the blame for his failure to ill luck or a poor price for milk; or perchance he says he cannot afford to keep good cows, forgetting that he could much less afford to keep poor worthless ones.

The hand of science has provided him a key to the situation. As soon as ever he sees it, he will make use of the scales and Babcock test and find out what every cow on the place is doing for him—or against him. Armed with that knowledge, he will never again follow that worthless cow.

The cow for this dairyman stands behind him. She is a fine animal that has been bred to turn feed into milk and money. The dairyman should get better acquainted with her; she is a better cow than he thought. The truth is, he had not thought enough about her nor known how many such are in his herd. He cannot know without using the key—weighing and testing the milk of each

his family, to a more comfortable home, and to the conveniences and privileges that go with real prosperity.

The faults and failings of the worthless cow have canceled or concealed the profits of the good cow, just as human idlers are a tax upon their fellows. The good cow has to do the work for both. Not knowing the production of either, the dairyman has over estimated the poor one and underestimated the good one. When the dairyman knows the good cows in his herd—knows how good they are—he will be just as anxious to "tie to" them as they are willing and faithful to serve him.

W. J. Fraser.

Illinois Experiment Station.

At present writing the green bug has not tackled the onion crop, though they say that pie plant is on their bill of fare.

There are two kinds of green bugs; those that walk and those that fly. The government experts say that one is just as bad as the other and worse.

Record 238114: Horse having both Ringbone and Bone Spavin purchased for \$10; purchaser treated him with Fleming's Spavin and Ringbone Paste, and declined \$150 for him later. ## IN THE LIVE STOCK FIELD.

## COMBINATION HEREFORD SALE, SOUTH OMAHA.

On June 14th, at South Omaha, Neb., will be held a sale of Hereford cattle that should attract the attention of leading breeders. This sale is under the management of Mr. W. N. Rogers, of McCook, Neb., who is conceded one of the leading breeders of Herefords in this or any other state. This consignment is one of the very best that he has ever been able to offer the public and among them are cattle of show-yard character. It is the policy of Mr. Rogers to make up sales of nothing but the very best

class of cattle, and he informs us this time that the offering is of the very best, and consigned from the best herds of the business. The offering consists of forty head, twenty-one bulls and nineteen females, coming from such well-known herds as W. N. Rogers, McCook, Neb.; J. G. Von Seggern, Wilsner, Neb.; F. J. Beggs, Coon, Iowa; J. A. Broadfoot, Thayer, Iowa; Clans Bros., Bendma, Kan. and R. D. Morrasy, Dorchester, Neb. These forty head are about evenly divided as to sex, and it is described as the unparalleled bull opportunity of the year, almost every fashionably-bred strain known to this breed being represented. Among them are descendants of old Anxiety 4th predominating and presenting the last great chance to breeders to secure the very best blood obtainable to replenish and improve their herds. There will also be descendants of the great breeding bull, Anxiety Monarch 63204, that is a son of the great bull, Juryman 30279, that attained the weight of 2,800 pounds at the age of five years. Anxiety Monarch was shown at the Nebraska State Fair in 1900, winning first in his class, headed the first prize herd and two of his daughters in the same show. won first and third in their classes. Although this great bull was accidentally killed in a railroad accident he left a number of sons and daughters that were among the most prominent animals known to this breed. Others are the get of the great bull, Monarch of Shadeland 3d, a massive son of the great Anxiety Monarch that weighed 3,000 pounds at the age of four years. This bull was shown at the Nebraska State Fair as three-year-old, winning first and sweepstakes, and his get were among the best ribbon getters that were shown that year. He has been shown several times since, always getting a very prominent place, and his get are heading some of the very best herds now in the Hereford business. In this sale is also included the get of the great show bull, Beau Donald 28th 105168, whose record as a show animal is unequaled by any Hereford bull and whose get won more prizes in the year 1904 in state and national shows than any other family of Herefords. Taking this sale as a whole it is surely one of the great offerings of the year, and those in search of cattle that are richly bred and of show-yard type cannot afford to miss this great opportunity. We will make more of a mention of these cattle individually in our next issue and in the meanwhile it might be well to write Mr. W. N. Rogers, McCook, Neb., for a catalog and look over the breeding. When writing please mention The Homestead.

## COLE'S DISPERSION SALE OF ANGUS CATTLE.

The opportunity to buy Aberdeen-Angus cattle and buy them right will be at the dispersion sale of H. A. Cole, which will be held at the fair grounds, Des Moines, Iowa,

on June 18, 1907. Those of our readers who are intending to buy cattle of this breed should make it a point to attend this sale because there will be some good things offered, and as it is an absolute dispersion sale, it is fair to presume that there will be some good bargains in the sale. He will sell sixty-five head, among which will be eighteen head of bulls, including his richly bred Erica herd bull, Imp. Electrician. This bull is now seven years old, but is just in his prime and he is an excellent breeder, as his calves will show on sale day. Just as a prelude we desire to call the attention of our readers to the bulls that have been used in this herd. His first was the 2d Lad of Emerson, a son of old Gay Lad, that was in his day the most noted Angus bull in America. He was a richly-bred Trojan Erica and he left many good things in the herd. He was followed by Imp. Marmion's Eric, that died early in his career, and Mr. Cole thought enough of him that he at once proceeded to secure his full brother, Imp. Electrician, which did splendid service, and he will be included in the sale. There will be three imported cows in the sale. One of these is a K. Pride, another is a Queen Mother and another is a Drumin Lucy. There will also be a number of their descendants in the sale. There will be nine Prides in the sale, three Blackbirds, two Ericas, three Heather Blooms, five Drumin Lucys, four Queen Mothers, eight Easter Tulloch Duchesses, five Kinochtry Blue Bells, six Rose of Skeen and eighteen Georgians. Of the Pride family that are to be sold is the four-year-old imported K. Pride cow, besides three others that are five, seven and nine years old and one nineteen-months old heifer. Then there will be four Pride bulls in the sale. Two of these are two-year-olds and two are nine months. The imported Queen Mother cow will have a calf at foot by Imp. Electrician, and there will be one five and one six-year-old cow in the sale. The largest representation of any one family will be his Georgians. There will be thirteen cows and four bulls, the oldest cow being nine years and the youngest being nine months. The balance run from two to five years of age. There will be four Georgian bulls, ranging from nine months to two-year-olds. Fifteen head in the sale will be sired by the Gay Lad Trojan Erica bull, 2d Lad of Emerson; twenty are sired by Imp. Electrician and ten are sired by a son of Old Bamboo, a bull that is closely related to Barbara McHenry 13th. The man who wants to buy an imported bull to head his herd should attend the sale and look over Imp. Electrician and also his get, or the man that wants an imported cow will also find things in this sale that will do to put into any herd. A good bunch of well-bred heifers will also be offered, as well as some good young bulls. The thing to do is to secure a catalog and arrange to be at the sale. When writing address, H. A. Cole, 3218-3238 South Western Ave., Chicago, Ill., and kindly mention The Homestead. See page 19.

## C. C. NORTON SELLS HIS GREAT YOUNG BULL, SULTAN.

One of the best private sales that has been made so far this season was recently consummated when Mr. C. C. Norton sold his great two-year-old Cruickshank bull, Sultan, to Mr. A. M. Nash, of Tracy, Minn. Mr. Nash saw this bull last fall, but could not reconcile himself to pay the price asked for him. Since that time he has visited the best herds in Minnesota, Wisconsin, Illinois, Indiana, Ohio and Iowa, and recently returned and said to Mr. Norton that he was now ready to purchase a bull. The price paid is not made public, but is one of the most satisfactory sales that Mr. Norton has ever made. The critical Short-horn men who have seen this bull pronounce him one of the great young bulls of the time. He is a richly-bred Cruickshank Secret, was sired by Imp. Bapton Admiral, and is out of Souvenir by Imp. Salamis. Then comes Bonnie Scot, Imp. Lord Cardinal, Staplehurst, Roan Gauntlet, Pride of the Isles and Champion of England. He is an individual of pronounced show type, and is one of the smoothest and best lined bulls that has ever come from the Norton herd. The price was the only thing that prevented Mr. Nash from buying him when he saw him first, but after visiting all the other leading herds he concluded he was by far the cheapest bull, all things considered, that he had seen. He therefore returned and bought him. Mr. Nash has one of the best herds today in Minnesota and has a high class lot of cows and heifers to mate to this bull. Old Baron Rule, the sire of Village Rose, the only cow that ever beat the great Ruberta, and also Village Rose, the outstanding winner at the International a few years ago, formerly headed the Nash herd. This young bull Sultan will therefore be in good company and considering the class of cows that Mr. Nash has to breed to him he will certainly make good in his new home. Mr. Norton has another great Duchess of Gloster bull left that should also go to some good herd. This is Gloster's Favorite by Imp. Bapton Admiral out of Lady Gloster by Imp. Prince Bishop. He is an outstanding bull and as well-bred a Duchess of Gloster as was ever offered for sale. He also has a young Duchess of Gloster that he offers for sale, a splendid young Barmpton Rose and a Rosemary. If any of our Short-horn men are wanting a herd header it will pay them to go and see these bulls. Kindly mention this paper when writing about these bulls.

## LAWYER WHO COULD NOT SLEEP.

Mr. John M. Leyda, Attorney, Plattsmouth, Neb., writes, under date of Dec. 22, 1904: To Drs. Thornton & Minor, of Kansas City, Mo. "I was unable to sleep at nights from piles and fissure, and since your successful treatment in 1903, I have experienced no trouble whatever from my rectal disease." The institution of Drs. Thornton & Minor has been making a specialty of the treatment of rectal diseases for thirty years, and have a record of thousands of cures in this line. Those who have such trouble should write Drs. Thornton & Minor, 1009 Oak St., Kansas City, Mo., for particulars.

\$1.50 FT. DODGE \$1.50  
Account United Commercial Travelers Convention Ft. Dodge, June 7 and 8, the Minneapolis & St. Louis R. R. has arranged rate of \$1.50 for the round trip to this city. Special train will leave Des Moines 8:00 A. M., June 7th. For tickets see U. C. T. Committee, M. & St. L. ticket office, 512 Walnut St., or Union Depot.

## Lice and Profits.

The one most serious evil the poultryman has to contend with, and yet the one most easily avoided of all evils, is the louse pest. Thousands of farmers think it's impossible to raise hens without raising lice at the same time. They admit lice are a nuisance, but are too lazy, indifferent or ignorant to make the little fight necessary to rout them neck and crop. The surprising part of the whole thing is that farmers don't seem to realize how lice eat the very heart out of their profits. They take them because they come, without figuring the cost of the visit. If a few hens die, or the pullets don't lay, they call it a "dispensation" instead of frankly admitting it the reward of laziness. The actual truth is, lice are easily gotten rid of, and a little energy expended snaking Dr. Hess Instant Louse Killer about will do the business. One thorough application will quite likely be all that's needed, for if the powder goes down into the cracks and dark corners where the little mites hide during the day they will never live to come out at night. The big gray body louse that infests the hens themselves is best killed by subjecting each fowl to a personal dose of the powder; sift it into the feathers, on the head and under the wings for a quick cure. Little chicks, too, need the same treatment, though, of course, in a more gentle and particular way. The best policy for any hen keeper to pursue is to apply Instant Louse Killer before he even suspects the presence of lice. The old maxim about the "ounce of prevention" certainly holds here if anywhere. A few days of heedlessness, or simple neglect of the daily care that fowls require to keep them healthy may bring a perfect swarm of these little blood-thirsty terrors to give you double trouble later. One lousy hen from another flock; a visit on your part to a louse infested house; this or that or some other way may easily bring you the trouble, so we say again, the best way is to get Instant Louse Killer now and use it while you don't need it. Instant Louse Killer is very handy to have about. It's more than a louse killer; there is no better disinfectant or deodorizer known. When you sprinkle it about the henry you are actually guarding your flock against disease, because it kills germs, poisonous odors and gases as quickly as it does lice, and so makes the house healthful as well as louse proof. Then, further, if you find insect pests in the garden, on vines, cabbage plants or roses, Instant Louse Killer is the remedy. Be careful, however, when you go to buy. There are imitations on the market and you may be deceived unless you look for the word "Instant;" that insures the genuine. Dr. Hess backs his preparations with a positive guarantee. If you use this, or any of them, as he directs, and fail to get the results claimed, the dealer from whom you bought will return your money.

## POINTERS.

—For Single Comb White Leghorn eggs write to Mr. Adda A. Picken, Fairfield, Iowa. See page 11 for prices on single hatches or in 100 lots. Mention The Homestead.

—Mr. W. C. Jones, Richland, Iowa, breeder of S. C. White Leghorns will have a nice collection of eggs at greatly reduced prices after June 1st. Strains are the Wyckoff and Blanchard. Write him, mentioning The Homestead. See page 11.

—Now is the season of special prices. Our bargain counter this week holds a fine selection of Single Comb White Leghorn eggs which will be priced to those who will write Mr. R. E. Brown, Richland, Iowa. See page 11 and mention The Homestead.

—Besides having 100 Black Langshan hens for sale, Mrs. Margaret C. Daly, Anamosa, Iowa, offers a fine collection of eggs at popular prices. After June 1st her pens will be given free range. Anyone wanting eggs of this breed should write, addressing as above. Kindly mention The Homestead. See page 11.

—Reduced prices do not necessarily mean reduced quality. Many poultry breeders have made offerings this winter and it has not been difficult to fill the demand for eggs and birds. Mrs. Ella Tharp now offers eggs from her Rose Comb Brown Leghorns at prices that should bring hurry orders. See page 11 and mention The Homestead when you order.

—Two hundred and nine chicks from 224 Single Comb Brown Leghorn eggs is certainly a good record. This is what one of our advertisers claims and those wanting eggs of this kind will find them priced on this page. Sales have been made by this poultryman in eight states with the best of success. Write your wants whether for large or small amounts of eggs to Mr. Orlando Jacobs, Mediapolis, Iowa.

—Mrs. Frank Hart, Danbury, Iowa, informs us that she is all sold out of eggs for the season, and now will sell a few dozen choice Light Brahma hens. These fowls are some of the regular breeders in the flock, and must be sold to make room for young stock. If taken at once they will be priced very reasonably. Anyone who intends to add fowls to their flocks should not delay writing at once, as the offer is certainly a good one. Mention The Homestead when writing. See page 11.

## MINORCAS.

PURE BRED Single Comb Black Minorca eggs, 15 for \$1.50 for \$1.75, 45 for \$2.50, 100 for \$5. Large year's stock at reasonable prices. Nick Loewen, successor to Fitzsimmons & Loewen, Lawer, Iowa.

## COCHINS.

PARTRIDGE COCHIN Eggs, fancy show pens: \$2 per 15, 15 for \$25, 45 for \$75, 100 for \$150. W. H. turkey, 25c each. W. H. Collins, Viola, Ia.

## DUCKS.

COLORED Muscovy duck eggs, \$1.25 for eleven. Mrs. T. W. Glass, Route 4, Sac City, Iowa.

## DOGS.

## DOGS FOR SALE

AND ALL kinds of pet and live stock. Send 10 cents for sixty-page descriptive illustrated catalog. MOUNT PENN KENNELS, Reading, Pa.

Green Food for Chicks.

To the Editor of The Homestead:

It is often a problem to find green food for the early chicks, especially in seasons like the present. It may be new to some that potatoes raw, and finely chopped afford an excellent substitute. The chicks relish them exceedingly and race about after every tiny bit almost as if it were a fine worm or a morsel of meat. A proper amount should be given every day until there is a good supply of real green stuff. It gives a needed variety to the ration, and seem to agree famously with the chicks. At least that is our experience. This is a good way to utilize the very small potatoes. Wash them, and chop them in a chopping bowl without peeling.

One of the very best forms of green food is Swiss Chard, sometimes called Foliage Beet. It has no tuberous root, like its cousin, the common garden beet. The leaves grow large, with a broad mid-rib. These leaves can be pulled just the same as pie-plant leaves, growing again like that vegetable. The fowls will eat every particle, even the thick mid-rib. Swiss Chard is good also for culinary purposes. The leaves make finer greens than the garden beet, while the mid-rib, white and waxy, can be cooked and served like asparagus. It is a showy plant, and is quite decorative in the garden.

Last fall, when the garden was stripped of its varied crop, the fowls were allowed the run of the patch. A few lone plants of the Swiss Chard remained, but they were quickly reduced to mere skeletons, every vestige of the leaf having been devoured by the poultry. Other green things offered themselves to the chickens' appetite, but none of them were touched till the Chard was entirely eaten.

It will be found a profitable venture to add this vegetable to the garden next year, if you have not already tested its value. An increasing number of seedsmen are cataloging it. Peter Henderson, New York, Northrup, King & Co., Minneapolis, are among the number from whom seed may be ordered. One package of seed will plant quite a long row.

Why Poultry Die

An enormous amount of money is lost to poultrymen through simple neglect. Hens die for want of a proper tonic to prevent indigestion or ward off disease. All fowls, especially those in confinement, need a corrective or tonic—something to assist digestion, and compel a healthy activity of each organ.

DR. HESS Poultry PAN-A-CE-A

is such a tonic. It contains iron for the blood, and nitrates to eliminate poisonous matter from the system. Poultry Pan-a-ce-a is not a stimulant; it acts in a natural manner, compelling the organs of digestion to convert the largest possible amount of food into bone, muscle, feathers, eggs, etc. Hence, it makes the hen healthy and prolific.

Dr. Hess Poultry Pan-a-ce-a has high medicinal properties, being a cure for gapes, cholera, roup, indigestion, etc., and by its special germicidal principle, it destroys the cause of nearly all poultry disease. It is the prescription of Dr. Hess (M. D., D. V. S.) and is endorsed by the leading poultry associations in United States and Canada. Sold on a written guarantee. It costs but a penny a day for 30 fowls.

## OUR HOME DEPARTMENT.

LETTERS intended for publication should be accompanied by the name and address of the writer, not necessarily for publication, but as a matter of good faith. All communications intended for this department should be addressed to Postoffice Box 727, Kansas City, Mo.

### WITH THE EDITOR.

This is the day of wonderful happenings, of truth that is stranger than fiction.

The other day a woman met with an accident that caused the loss of so much blood that her life was despaired of. A great physician who was called in consultation looked very grave, but in reply to the husband's agonized "Is there no hope, doctor?" replied, "There is one chance. If we could give your wife blood she might recover." Perhaps there was a suggestion in the great man's eye or tone. At any rate the husband throwing off his coat, said, "Here I am; use me," and a little later physicians were pumping his blood into the arteries of the exhausted woman. Reports to the press a few days later stated that the woman was doing well. She is probably restored to health before this, a walking miracle illustrative of the power of modern surgery.

For ages men have been seeking to discover the secret of transfusing base metal into gold. They are still seeking, but a French alchemist has discovered some wonderful process by which tiny rubies can be manufactured. These crystals defy detection under the microscope, it is said. Even when they are joined so as to produce superb stones only experts can distinguish them from veritable rubies. Science is so clever, so expert, she is outwitting Mother Nature.

Marvelous as the phonograph is we have grown accustomed to—some of us have grown unutterably weary of—bottled sounds which can be uncorked at will, so to speak. We are to be treated to a new and even more wonderful thing. A machine which was invented a few years ago has proved its claim that by it an audience can hear a concert given twenty-five or thirty miles away. This telharmonic instrument so receives and so distributes sound that guests in large hotels and boarding houses are now able to have an orchestra at dinner at expense so slight that dining to musical accompaniment is likely to become quite general. It is the hope of Dr. Cahil, the inventor of this amazing machine, that telharmonic companies will become quite general; that private homes will be reached as they now are by telephone; that daily concerts will be given in large cities, and that thousands of people will enjoy the music comfortably seated in easy chairs in their own homes.

Science has treated us to so many surprises that our faculties have become a little dulled; we refuse to be amazed at anything that is not extraordinarily remarkable. The most jaded will probably start at the announcement that experiments have been made which go to prove that that intangible thing we term the soul has weight. A Dr. MacDougall has been experimenting along the line of weighing bodies just before and immediately after death. The result is that he has established "a loss of substance from the body, not accounted for by known channels of loss." The amount of this loss runs from three-eighths of an ounce to an ounce and a half. As might be expected, Dr. MacDougall found much difficulty in securing human subjects for experimentation. He does not feel that his experiments have been on a large enough scale to establish definite results at all and he regrets that the public should have gotten hold of the facts so prematurely. Students of psychology do not agree as to the value of Dr. MacDougall's discovery, but it is worth while to note that no difference was found in the weight of dogs treated precisely as were human beings.

### HOME AND HOMEMAKING.

#### LITTLE HELPS BY THE WAY.

Plant patience in the garden of thy soul! The roots are bitter, but the fruits are sweet; And when, at last, it stands a tree complete, Beneath its tender shade the burning heat And burden of the day shall lose control—Plant patience in the garden of thy soul!

—Henry Austin.

Heed not the envious tongues! True innocence Despite them all unspotted still remains; 'Tis like the sea, so mighty and immense That naught withstands it and that nothing stains.

Hast thou an enemy? Make him thy friend. So hast thou gained a double con-

## Simpson-Eddystone Black & Whites

quest, for thou hast conquered both thyself and him.

### MAY TIME.

Spring is waking.  
Trees are shaking  
Tasseled plumes to greet the May;  
Birds are cooling  
Ardent, wooing  
Love songs through the livelong day.

Hearts grow tender  
And surrender  
Unto other hearts that sigh;  
Youth and maiden,  
Blossom laden,  
Breathe soft vows of constancy.

O what gladness!  
Care and sadness  
Change to jocund nymphs of mirth;  
We'll go Maying,  
Pipes a-playing;  
Love is king of all the earth.

—Lillie Holliday Kellam.

### HEARD AT THE CIRCUS.

The "perfessor" was assuring his auditors that the strange animal they now beheld was the only one of its kind in captivity. A mild mannered man edged his way to the front and waited for a pause in the oratory. "Is this an amphibious animal?" he asked timidly when his chance came. "Amphibious?" retorted the "perfessor." "Amphibious," nothing. Why, he'd bite you in a minute."

### THE HOME-MADE REFRIGERATOR.

Every housewife can have a refrigerator of this kind: "Make your frame work the size you want the refrigerator. Make the bottom a trifle larger than the top. Cover the framework with ordinary gunny sacking. Stretch this covering tightly and secure with small nails. The door is made of the same material and can be made to open and shut; or you can have a hanging door, which simply drops over the opening. Now, set a vessel of water on top of the refrigerator. Of an old white woolen cloth make strips two inches wide (or wider) and dip them in the water. Stretch them over the side of the vessel, the long end of the strip hanging down the side of the refrigerator. This makes a wick or siphon for gently draining the water onto the gunny sacking. The vessel should be filled morning, noon and night. The object is to have free circulation of the air force evaporation and keep the sides of the refrigerator wet at all times." We have tried it and find that it acts very well. I hope this may benefit some tired housekeeper.

### FRUIT SHORTCAKES.

To make the sweetened dough for these cakes, add to a quart of flour three teaspoonfuls of baking powder, one of salt, and two tablespoonfuls of sugar. Sift twice to mix thoroughly. Rub into this two tablespoonfuls of butter if the dough is to be made with cream, or four if milk is used; a cupful and a half of liquid is required. Mix the dough rapidly, and place it upon a well-floured board. Have ready three huttered pie plates, and cutting the dough into six parts, roll each to fit the plates; place one piece on each plate, spread it lightly with soft butter, then add another layer the same size. Bake at once, ten minutes being sufficient if the oven is at proper heat. When done, separate the double cakes, add the fruit while hot, and serve immediately. If it is to be served cold, put in the fruit about fifteen minutes before it is required. For three cakes, three pints of fruit will be required; when fresh fruit is used, sugar should be sprinkled on the fruit at least half an hour before it is required. Sugared fruit should be kept in a cool place. Arrange the fruit between and on top of each pair of short-cakes, and, if liked, a cupful of whipped cream may be spread over the top. If sour milk, buttermilk or sour cream is used in making the dough, omit baking powder, and use a tablespoonful of baking soda.

### CHILDREN AS CHICKEN RAISERS.

Many a man who takes first-rate care of his stock seems to think that chickens are "too small fry" for him to give any attention to,

so they are neglected or turned over to his wife and children. In many ways a woman can give better care to chickens, little chicks in particular, than a man, but it is hardly right to ask her to attend to the hens in midwinter or at any other time, when there is a large family of children to care for and several hired men to cook for, especially if there is no help in the kitchen, as is too often the case. Children usually take great interest in chickens and like to care for them, especially if a few are given them to be "their very own." I would recommend that fathers give each child a hen or more and let them have all the chickens she raises, also the money they bring for their own; in this way the children are not only led to show greater zeal in their work but also learn to save their money, as they do not when some is given them which costs no labor on their part. Nevertheless the chickens ought not to be turned entirely over to the children, because they may forget some things that will make a material difference in the profits accruing from the hens.

### A LITTLE BROWN TOAD.

I.  
Hippety-hop, little toad,  
Why do you stop in the road?  
Waiting for me to talk with?  
Four little feet to walk with,  
Four little legs to race with,  
Enough to run any place with.  
Why do you sit on the ground  
While I am skipping around,  
Happy with only two feet?  
And I can easily beat  
You with your four, little toad.

II.  
What makes you blink, little toad?  
Sunshine too bright in the road?  
You'd rather sit in the shade,  
Maybe, where eyes never fade.  
Couldn't catch flies in the light,  
Could you, were the sun very bright?  
What do you think, little toad?

III.  
You have no teeth, little toad,  
Can't bite me hard if you would.  
How do you manage your food?  
Mamma tells me it's not good,  
Eating things whole as you do.  
But, if 'twere worms, I'd want to,  
Indeed I would, little toad.

IV.  
Since you can't bite, little toad,  
Good thing for you your warts grewed;  
No one likes them very well;  
Dogs, even, drop you and yell,  
Just as they would if you bit,  
So you are safe when you sit  
Under a leaf to get rest,  
So I am sure warts are best—  
Yes, best for you, little toad.

V.  
How many toes, little toad?  
Shouldn't have guessed, but you showed  
Eight toes in front, ten behind.  
Thanks for the sight. You are kind.  
Why more behind than in front?  
Hind legs must suffer the brunt  
When there's hard toad work to do,  
So I've been told; is it true?  
Hope toads never sucked the thumb,  
Stunting it till it didn't come—  
Hope that isn't so, little toad.

VI.  
Where did you stay, little toad,  
When it was cold and it snowed?  
Under some leaves, so I heard,  
Slept till the song of a bird  
Told you 'twas time to come out  
And see what folks were about.  
When you have found the right spot,  
Nearby in our garden plot,  
Hide every worm, every bug,  
Inside your little brown jug—  
Pa says you will, little toad.  
Forest City, Iowa. —Eugene Secor.

### AMONG OURSELVES.

If the young Indian girl who addressed the circle a few weeks ago cares to reveal her identity to inquiring friends, will she please send the editor her address? A Bachelor Girl may do the same.

Two of the men of this circle have

dropped in this week prepared to say a word on the subject of dancing. For the sake of interest and spirited debate I could wish they had not been on the same side, but as they will bring out somewhat different points, I doubt not both will receive an attentive hearing. A Wisconsin Farm Reader will take the floor first:

I would like to enter the Home Department for just a little talk on amusements, as that subject in the department has attracted my attention of late. Mr. R. Thomas, in the April 25th issue, upholds dancing, but does not want church members to dance because they would be overstepping the bounds of church discipline by so doing, thus insinuating that the church has placed a ban on dancing without good reason for doing so and because of some mere sentiment. It is true that dancing, together with card-playing and theater-going, is under the ban of the highest Christian sentiment, but not without due reason. The church stands for righteousness, truth and purity, and cannot uphold anything that is destructive to these virtues. So we must analyze the dance to see what reason the church has for objecting to it. The conspicuous things of the dance are music and that the dancers always dance with a member of the opposite sex. And we notice that the music is of a particular kind, so composed as to inspire the desire to dance. But if it is the love of music alone that causes one to dance, why always have the mingling of the sexes in the dance? Why do not girls in their clubs and gatherings have music and dancing without the presence of men? They can have their card parties, sewing societies and all other forms of amusement without the thought of having the presence of men in order to have the fullest enjoyment of them. The same can be said of men's clubs and gatherings and a dance of men only would be a subject of ridicule in any community and the idea is never thought of. So we must conclude that the consciousness of sex enters into it and lends it zest and greater pleasure. There are so many amusements that are pure and good that no one need suppress his desire for merriment, and no one need be called pessimistic or narrow who objects to these questionable amusements.

While no one can deny the truth of some of the statements made by "A Wisconsin Farm Reader," I doubt not there are those who know of girls, at least, dancing alone. Some of the merriest dancing I have ever witnessed (I do not dance myself) was that of a crowd of girls, half of whom wore ribbons on the left arm to indicate that they were men for the time being. While there can be little doubt that the contact of the sexes is an element in the pleasure of the dance, I think that music and motion are also elements. When we were girls at home together a younger sister of mine who was studying very hard used to come flying down stairs about half after nine or ten o'clock of an evening and beg some one to play a waltz for her. As the player went to the piano the chairs would be shoved to one side and a moment later the student "all by her lonesome" was moving to the strains of the music. She was finding relaxation and refreshing which enabled her to return to her books for a couple of hours' further work, or, if she studied no more that night, to fall asleep the moment her head touched the pillow. We are to have a further word from Mr. Herschel Short, but before he speaks will the friends pardon me for saying that

more and more it seems to me that what we need is not sweeping condemnation of certain amusements, but such cultivation of our moral forces as shall enable us to absorb the good they hold and at the same time to be immune to their possibilities for evil:

While I have the greatest respect for others' opinions I am not ashamed of my own convictions. Let us hear both sides and hold fast that which is best. I wish to thank our kind editor and circle for the discussion in favor of, as well as against, dancing. I am opposed to dancing because I do not believe it is morally elevating. My observation is that persons are not quite so well respected, in most communities, who attend dances as those who do not. This should be reason enough, but there are many others. True, dancing is about the strongest cure for bashfulness we have; in fact, it produces the other extreme, for which there is no cure. Bashfulness, or modesty is a priceless virtue. The sweetest thing on earth is a bashful girl. I have noticed, too, that dancing makes one walk gracefully, especially the next morning after being up all night. Those who are in favor of dancing should read the book written by a noted dancing master, entitled "From the Ballroom to Hell." How many would attend dances if the boys and girls danced separately and the men had to waltz with their own wives? Not many, I am sure. Carrie Nation says dancing is just plain, unvarnished hugging of the most promiscuous variety.

It is a pity there should not be more of the old-time dancing, the minuet and the lancers and those other beautiful stately dances which used to be popular with our forefathers. The waltz which offers, perhaps, the greatest excuse for "promiscuous hugging" nowadays, used to be danced in an inoffensive manner; it might be so again. Young people will dance; it is as natural for them as for lambs to gambol; it is for their elders to so safeguard them and the amusement that the harm resulting will be minimized as far as possible.

Speaking of safeguarding the young people, Mrs. Polly has something to say:

We cannot be too careful of what our boys and girls read. I was always an omnivorous reader, and began to read everything I could lay my hands on at the age of eight. The stories I read then colored my whole after life. I read the little Sunday school library through and through. Some of these stories were very bad for me. They were too high flown, the "goody, goody" kind, leading me to form false notions of the world. If I had not had the best of mothers, and had not been well sheltered from all outside influences I should certainly have taken many false steps. And that same little Sunday school library, paradoxical though it may seem, would have been to blame.

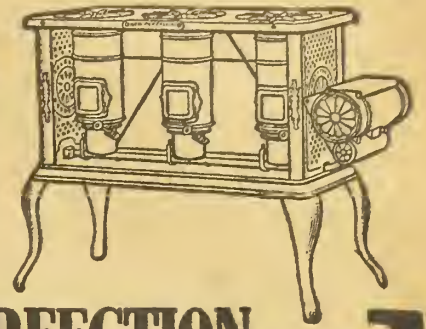

I wish some of the friends who feel that their early reading has helped or hindered them, would come and tell us about the things they read. Let me start the ball rolling by saying that I think no thing that I am definitely conscious of had larger formative power in my life than the books I read not once, but over and over again—because they happened to be in the home library. "The Wide, Wide World," "Queechy," "The Old Helmet," "The Lamp-lighter," "Melbourne House," and "Daisy," and that set of which "Scepters and Crowns" is one did so much to form my girlish ideals that I sometimes wonder how much of me would disappear were their influence to be extracted from my make-up. Then, too, there were those exquisitely spiritual little daily portion books of Frances Ridley Havergal, "My King," "Loyal Responses," "Royal Beauty," and "Little Pillows." But time fails me; some other meeting, perhaps, I shall tell you of other books and authors to which and to whom I am forever indebted for weal and for woe.

I had planned that we should have a book talk from Mrs. Lowater today, but I think I'll hold it over until next meeting and let Mrs. Lowater give us something not nearly so pleasant, but perhaps just as helpful at this time.

Do those who use corrosive sublimate on bedsteads know that its fumes are very poisonous to many people? I was once poisoned by staying half an hour in a bedroom where it had just been applied. My face swelled until my eyes were closed, the skin was red and inflamed, and it was several hours before the pain left me. I knew one woman who slept in such a room who was so badly poisoned that she required a doctor and nurse for two or three weeks, and another who suffered nearly as much. The symptoms are very similar to those of poisoning by ivy, but I think the illness is more dangerous. It is not necessary to use any poison. Kerosene, applied with an oil can to every crevice of bed or room, is a perfectly sure insecticide. I have twice moved into a house which was badly infested, and completely exterminated them by the weekly application of kerosene for a short time. And I have seen inquiries in several papers for something to kill vermin in a child's hair. Grease or oil, fresh lard, castor or sweet oil, is a perfect and speedy cure. Sometimes one application is sufficient, but it is best to repeat it two or three times, at intervals of three days. Saturate the hair and rub it into the roots, and do not wash it off. Wipe with a dry cloth, and let the child wear a cap at night, until the cure is certain. And the oil is excellent for the growth of the hair, which is too often

# A Summer Vacation in Your Kitchen

Don't swelter this summer with the temperature at 110. Get a New Perfection Wick Blue Flame Oil Stove and have a cool kitchen. The

## NEW PERFECTION Wick Blue Flame Oil Cook-Stove

produces a working flame instantly. Blue flame means highly concentrated heat, no soot, no dirt. Oil is always at a maintained level, ensuring a uniform flame. Made in three sizes. Every stove warranted. If not at your dealer's write to our nearest agency for descriptive circular.

The **Rayo Lamp** is the best lamp for all-round household use. Made of brass throughout and beautifully nicked. Perfectly constructed; absolutely safe; unexcelled in light-giving power; an ornament to any room. Every lamp warranted. If not at your dealer's write to our nearest agency.

**STANDARD OIL COMPANY, INCORPORATED**

made dry and harsh by excessive washing.

Sometimes such knowledge is needed by the cleanest housekeepers and the most careful mothers and because needed but seldom, is not available at the hour of need. There should be a scrap book or a scrap box for every house for clippings of this kind.

One of the younger women also comes with practical hints concerning caring for the beds:

It is a good plan to keep a nice, clean whisk broom in some convenient place and give the mattress a good sweeping off every two or three days to keep it free from dust and lint and a small new paint brush is excellent for brushing the back, slats and sides of the bed and these useful brushes can be bought for a trifle. As a feather bed or mattress cannot be aired easily, they should be kept well protected by covering with a mattress pad, made like a comfort of white muslin, and while these can be bought ready-made, they can be made just as well at home and at much less expense. If the beds are covered with dust sheets when sweeping a room, both the woodwork of the beds and the bedding may be kept clean twice as long, and these covers can easily be made from old sheets or from any old soft material. If a white iron or white wooden bedstead simply needs cleaning it can be made shiningly clean by washing with a strong lather of white soap with a tablespoonful of borax in the suds, then it should be rinsed immediately with warm water to which a little of the borax is added, and as fast as a small portion is washed it should be rubbed perfectly dry with clean, soft cloths. After the whole surface has been thus treated, rub briskly, but lightly with a piece of soft silk or flannel, and unless the woodwork or iron is decayed, this cleaning will be all that is necessary to make it look fresh and new. If the furniture has become old or shabby it can be completely transformed by giving it two or three coats of white enamel paint, and any girl can make the furniture look like new with a paint brush and a few small cans of cheap paint.

Apropos of the care of furniture and woodwork, let me second Miss A's plea for the use of the paint brush. Paint is cheap and easily applied and its renovating powers are little short of miraculous; its use should be much more general. Miss A's hints for cleansing are admirable, but I believe furniture treated to borax and soap would be improved by being rubbed with something more than a clean cloth. Who will give us a recipe for a good, home-made furniture polish? Please let us have it soon.

After a little talk on gardening by Mrs. A. Irwin, the meeting will stand adjourned:

I am an interested reader of Among Ourselves column and as Aunt Belle has asked about flowers, I will try to help her by giving my experience. We were leasing a farm and had to make all improvements, so did not wish to expend much money on shrubbery which we must leave. I had a piece of

ground fenced with wire netting, large enough for a garden and the expense of fencing was \$12. We sold vegetables enough to pay for fencing the first year, beside having all we could use for a family of six, and I canned eighty quarts of tomatoes, a large quantity of pickles and other things the housewife likes to have in the cellar. About the flowers: At the front side I planted scarlet runner beans and cypress vines the whole length of the fence. It was a beautiful sight all summer. Then I worked a strip of ground about four feet wide just next the fence inside and sowed flower seeds, pansies, candytuft, four white California poppies, the common poppies, balsam, asters, marigolds, periwinkles and nasturtium. On the west side of the garden next to the road I put dahlias in hills, with a purple flowering bean on the fence and a row of sweet peas on a wire trellis, about two feet inside the garden fence. This row was about one rod long and furnished flowers for the house until frost came. I never let the beds get weedy, and if the weeds are kept down at first it is not hard work to keep them clean. Nasturtiums will give you cut flowers all summer of such cheery colors, and so many shades, and as easily grown as radishes. They are prettier for vases if not mixed with other kinds of flowers, but arranged loosely with their own foliage. In a little bed in front of my west window I had gladioli and verbenas. The gladioli bloomed earlier, and the verbenas covered the ground and bloomed until November. With rose moss for edging my garden bed was a picture and some people from town who were taking views of the country brought their cameras and took a picture of garden and flowers. And there was always flowers for friends who had none. I planted my pansies, asters and verbenas in boxes in the house the first of March, so had plants ready to set out by first of May. My asters bloomed beautifully for a short season, then died down while in full bloom. Can anyone tell me why?

## 12 YEARS OF MISERY

Boy's Eczema Pronounced Incurable--Used 2 Sets Cuticura Remedies

## SKIN NOW SMOOTH AS SILK

"Your wonderful Cuticura has put a stop to twelve years of misery I passed with my son. As an infant I noticed on his body a red spot, and treated same with different remedies for about five years. But when the spot began to get larger I put him under the care of doctors. Under their treatment the disease spread to four different parts of his body. One doctor told me that my son's eczema was incurable, and gave it up for a bad job. One evening I decided to give Cuticura a trial. When I had used the first box of Cuticura Ointment there was a great improvement, and by the time I had used the second set of Cuticura Remedies my child was cured. His skin is now as fine and smooth as silk. Michael Steinman, 7 Sumner Ave., Brooklyn, N. Y., April 16, 1905."

## Dressmaking and Millinery, No. 571.

Sylvia Silverthorne, Muscatine, Iowa. (All inquiries and remittances for patterns described in these articles should be addressed to Sylvia Silverthorne, Muscatine, Iowa, and not to the office of this paper or to the editor of the Home Department.) Among the many dainty and pretty dress accessories the fichu is taking a leading place, and as this is something that may be worn at will with any costume, as may a collar or tie, it is well to add one or more to one's summer outfit, for wear on appropriate occasions, and with the waist or costume to which they are adapted. And when I say adapted I mean that the material of which the fichu is made and the material of the garment with which it is worn determines to a great extent its appropriateness. The fichu seems especially suited to wear with the waist that is at least slightly low at the neck, and many of the season's waists will be cut out in some way to give the low effect. Again for wear with the costume of sheer or transparent fabric the fluffy or ganzy fichu is the appropriate accessory. For wear with costumes of linen, gingham, and other general wear materials fichus of linen or at least of medium weight fabrics are suitable. Handkerchief linen

[5628 Girl's Bertha Collars, 6 to 12 years.]

trimmed with swiss or similar embroidery, or with valenciennes lace and insertion makes up attractively for wear with the shirt waist costume, giving it the needed dressy touch when the occasion calls for the slight change. Mulls, chiffons, uets and soft silks make the dainty creations called for when these are to be worn with very dressy gowns. These fichus may be long enough to extend to the belt where the ends are tucked in or they may terminate at the bust line, and the ends be held in place by a fancy pin, or be knotted and have short ends that hang free.

Quite as popular and somewhat in the same

[5627 Boy's Overalls, 4 to 8 years.]

Now are the cape collars now so much worn, but I need not enter into an extended description of these as they are in a general way modifications of the fichu. The shape is different, of course. Many of them are cut on circular lines, and are wide enough to extend quite to the edge of the shoulder. These are made separate and are to be worn on occasion as desired.

One of the most favored decorations for these and other garment accessories is the application of braid in a pattern, and while this is not new, there is an idea that is new in the use of white soutache braid on thin materials, as chiffon, net, and the sheer muslins. Revers, berthas, and all kinds of waist features are made up in this way, and they add a dressy touch that can scarcely be imagined.

In the design pictured in 5628 is shown a set of bertha collars for girls of from six to twelve years of age, and I may assure you that it will be an easy matter to adapt them to larger or smaller sizes if one desires. The picture shows these so fully that I will not attempt to go into a complete description of each. There are four different collars in the set, the patterns for the four being enclosed in an envelope as one pattern, (or number). One may choose which she will use or may make in the different shapes. These bertha collars may be made of the dress material or of white, or of anything suitable for a fancy collar. They are shown variously trimmed, with lace insertion and edging, motifs, and with embroidery. The trimming described above will prove another charming mode of decoration. These collars are cut for ages 6, 8, 10 and 12 years. Give age when ordering pattern. The schoolboy will want to go fishing,

or work on the farm, when "school is out," and for him then there must be the "brownies" pictured in 5627. I need not take space to describe these, as they are simple and familiar to all. Pattern 5627 is cut in sizes for boys of 4, 6 and 8 years. Give age when ordering.

Send eleven cents in money (not stamps), for any pattern wanted, these or others. Address all orders to Sylvia Silverthorne, Muscatine, Iowa.

## Carpenter &amp; Ross Short-horn Sale.

Breeders from several states were present at the first annual public sale of Messrs. Carpenter & Ross, at Mansfield, Ohio, on Wednesday, May 22d. Col. Bellows opened the sale and introduced in turn Col. W. A. Harris and Mr. I. M. Forhes, both of whom gave valuable information concerning the Short-horn. The recently imported lots were the attraction of the day and were widely distributed to some of the best herds of the country. Mr. Thos. Johnson, of Columbus, Ohio, topped the offering, paying \$905 for Imp. Cadboll Gwynne, a show heifer of the late importation. This heifer was safe in calf to Diamond Star, a winner of eleven firsts and eight championship ribbons, as a yearling in 1906 at the noted shows of Scotland. This heifer will make a valuable addition to the good herd of Mr. Johnson. Mr. D. R. Hanna, of Ravenna, Ohio, was the largest buyer of the day and he secured many bargains; among the number being Imp. Spicy Peggy at \$500, one of the heifers just imported; Imp. Astes, with roan bull calf at foot, by Clarendon, first prize yearling bull at Aherdeen show, at \$600 and Imp. Betsinda, at \$450. Mr. Hanna secured a bargain in Merry Robin at \$480, a candidate for show honors, by Imp. Royal Robin. Col. F. O. Lowden, of Oregon, Ill., topped the bull offering, securing Imp. Keir Sceptre, a yearling bull of much promise. Messrs. W. H. Lincoln & Son, of Woodstock, Ohio, took another of the imported bulls, Imp. Royal Crown, at \$725. Imp. Diamond Victory sold to Mr. E. W. Bowen, of Delphi, Ind., at \$750. Imp. Stronan Star went to Mr. H. Keifer, of Humboldt, Neb., at \$500 and Mr. W. H. Schafer, of Keensburg, Ill., secured Imp. Royal Fusilier, at \$400. This firm are deserving of much credit for the enterprise shown in placing for sale at public auction such a good lot of imported animals. The entire lot of these sold at an average of \$595. The home bred sorts were in demand as well and the get of White Hall Count, a bull used with much success in this herd and afterward sold at public auction for \$1,000, found ready sale. Females safe in calf to Avondale, the noted son of Whitehall Sultan, the present herd bull, found ready sale at remunerative prices. Col. Bellows was assisted by Col. Jones, Lincoln and Urton. A full list of animals sold follows:

## MALES.

Fire King 231873, an all red, Scotch bull that has been retained to use on Lord Bant's heifers. This bull is included in M. E. Jones' sale of Short-horns, at Williams-ville, Ill., June 4, 1907. See advertisement on page 20 of this paper.

# LANDS AND HOMES FOR SALE

## All Aboard for MENDOTA!

### HOMESEEKERS' EXCURSION TO MENDOTA, TEXAS.

A.T. &amp; S.

## Go to Mendota Cheaply and See What Texas Offers You

What's the use of struggling along to make an expensive farm pay when you can move to MENDOTA, TEXAS, now, get good land there for very little—\$8 to \$18 an acre—and quickly become independent, living all the time in the pleasantest and most healthful climate in the United States?

Stop working against heavy odds. Go to Texas, make more money, own a bigger, easier worked and more productive farm. The possibilities there are just as good as you can find anywhere; the climate is better than in most places, and you will still be under the Stars and Stripes.

When thousands of other men no smarter or richer than you are doing all that, don't you think it's worth your while to look into this matter seriously at once?

Now, while prices are very low and before all the best land is taken, is the time for you to get a farm in the fertile, healthful, well watered country around Mendota. The terms of purchase are easy—less than four cents an acre a week.

The Colony Farm Homes Association has just placed on the market a fine tract of rich, virgin soil—25,000 acres—surrounding the new townsite of Mendota, in fertile Hemphill County, on the Atchison, Topeka & Santa Fe Railroad. Until now the land has been used by cattle raisers and not

cultivated. Soil is a rich, deep, chocolate loam. Abundant rainfall, pure water and no irrigation or fertilizing necessary. Free town lot in Mendota to every purchaser of at least 80 acres.

Read all about it in our free book, "Mendota Colony Farms." Learn how farms are producing big crops of corn, alfalfa, wheat, milo, maize, kafir corn, potatoes and cotton. Find out from the actual experience of persons who have lived and farmed in Hemphill County for years just how pleasant and healthful and profitable a place it is to make your home and prosper in.

But, MOST IMPORTANT OF ALL, see the Mendota land with your own eyes and choose right on the spot the land you will buy.

Prepare to go to Mendota on the next Homeseekers' Excursion. Write today for full particulars about MENDOTA and the low-priced excursions to this Land of Promise.

This association is composed of successful business men and land experts. We give St. Louis bank references as to our reliability.

Sending for the big illustrated book will not obligate you in the least, but getting more information about this wonderful opportunity may prove to be the wisest thing you ever did.

Do it Now—today.

THE COLONY FARM HOMES ASSOCIATION, 21 Equitable Bldg., St. Louis, Mo.

**FOR SALE, RENT OR EXCHANGE:**  
Good improved grain and stock farm of 740 acres in Chautauque county, Kansas. Write for particulars. Box 81, Independence, Iowa.

of his sows that were taken away. Gratifying results have been heard from buyers regarding the vigor and fine condition and number to the litter. Messrs. Bennington & Sons, local buyers, who topped the sale as shown below report a fine large litter sired by Jumbo Perfection. The crowd was representative of breeders in that part of the state and as the size, bone and prolificacy of the offering was well advertised those who came were sure to buy. The news of Mr. Custer's returns is pleasing. Below is a list of the sales:

## RICH, FERTILE PRAIRIE LANDS OF WESTERN CANADA

Offer a Golden Opportunity to Both the Farmer and Investor.

We have for Sale

### Over 500,000 Acres.

THE FAMOUS SASKATCHEWAN VALLEY,  
THE GREAT QUILL LAKE PLAINS,  
THE GOOSE LAKE DISTRICT,  
THE YORKTON DISTRICT.

THE FARMER will find here the finest land in the world. Deep, black, loam clay sub-soil, clean, open prairie that will produce 30 to 50 bushels of No. 1 hard wheat to the acre. **THIS IS YOUR OPPORTUNITY—TRY IT.**

THE INVESTOR will find an absolute safe investment. The country is being fairly networked with new railroads, settlers are pouring in and land values will advance tremendously in the next two years. Our advice is to **BUY NOW.**

Write for Maps, Printed Matter, etc.

**STEWART & MATHEWS CO., LTD.,**

187 Water St., WINNIPEG, CANADA. 305 Jackson St., ST. PAUL, MINN.

## LET ME SELL YOU A FARM IN SOUTHWEST TEXAS

THE LAND OF THE POOR MAN'S CHANCE.

HERBERT HURD.

Southwest Texas is the Land of the Poor-Man's Chance. I will sell you a farm on easy terms—about like rent in your country. Be independent—why pay rent to a landlord or interest on a mortgage when you can buy a farm? All southwest Texas needs is people. We have the best of climates and a splendid soil. We have 32 inches of annual rainfall. I want to send to you, free, "Hurd's Pipe and a splendid soil." This is a little illustrated magazine about southwest Texas. I don't say much in this magazine about the land I have to sell—the farmers who have bought land from me do most of the talking. You'll be interested in what they say about the country. Write for "Hurd's Pipe Dreams" now, before you forget it.

I want you to see this country and talk to the farmers who live there. I will pay your expenses of the entire trip if I misrepresent conditions. I can't afford to tell you wrong because I get most of my business in communities where I have operated for years, then the men who compose our company are wealthy and influential citizens of Texas and we could not afford to misrepresent. The facts are we don't need to.

HERBERT HURD, V.P. & Gen. Mgr., The Fidelity Immigration Co., 1046 Union Ave., KANSAS CITY, MO.

**FOR SALE OR EXCHANGE:** 240 acre east prairie and pear orchard, located within 2 miles of growing city of 18,000 population. The owner will sell on easy terms or will exchange for northern farm or city property. Northern Iowa Land Co., Independence, Iowa.

### FORCE SALE

I HAVE three farms in southeastern Minnesota, (Dodge County) which are being sold under foreclosure. My loss will be your gain. If you want a good farm at a bargain come and look them over and make me an offer. The first good offer takes either of them. Write for description. DON'T WAIT. Address J. L. Griswold, Dodge Center, Minnesota.

### FREE TRIP TO TEXAS.

WE offer a free trip to the Panhandle of Texas to one reliable farmer of any township in the state. Always state township and county. For particulars write: Ben L. Tanner Land Co., Cedar Rapids, Iowa.

### A FINE HOG FARM FOR SALE.

14 ACRES, right near town, 6 blocks from car line, 9 room house, barn, hog and chicken houses, corn cribs, in fact everything. A bargain. Write, Sol Frank, Sioux City, Iowa.

### AN INVITATION.

YOU are of course coming to the JAMESTOWN EXPOSITION, at Norfolk, Va. When you do, you are invited to visit and inspect the splendid farming and timber lands offered for sale cheap along the lines of the NORFOLK & SOUTHEAST RAILWAY. No such lands to be had anywhere else for the price. Now is the time to get a home in a good climate, where the soil is virgin and fertile, on easy terms. Write for farm list and descriptive pamphlets. F. L. Morrill, Land and Industrial Agent, Norfolk & Southern Ry., 302 Citizens' Bank Bldg., Norfolk, Va.

FOR sale or exchange, stock farm, central Minn. 820 a.: 620 a.: fenced with woven wire, 1 barbed wire at bottom, 2 at top; 2 mi. of running water, good well, 2 story house, icehouse, barn, sheep shed for 1,000 sheep, 250 a. tame grass, plenty of wood on place, R. F. D. and phone, good roads. Best grass land in N.W., good fishing and hunting. Full blooded sheep, goats and cattle go with place if desired. For best of reasons will sell for \$25 per a. on easy terms. Geo. W. Somerville, Sleepy Eye, Minn.

**FOR SALE** "Glenbury," 900 a. plantation, 750 a. in cult.; new brick mansion colonial style, 14 rooms; 14 tenant houses; best in land; prettiest place in Tennessee. Owner returning to England. Make ideal home, hunting preserve; paying investment; \$33,000. Ad will not appear again. Harry Shaw, Somerville, Tennessee.

**FOR SALE** or trade for South Dakota land, 80 acres in Paloalto county, Iowa, well improved. George J. Sahn, R. F. D., Manchester, South Dakota.

## LAND VALUES IN THE GARDEN SPOT OF TEXAS

Will increase faster and go higher than anywhere else, because the soil is richer and deeper; will produce larger and more varieties of crops; is clear, ready for plow; crop failure impossible, because some crop can be planted any month in year; climate healthy; not cold in winter nor hot in summer; ample rainfall; competing railroads within two miles; close to best markets in world; good neighbors. Save agent's commission by buying direct from us. Do it now. Prices \$10 to \$20 per acre in any sized tract to suit. Next fall will be \$5 an acre more. Write or call for booklet, "Truth About Texas," and state map free. Cheap R. R. rates. Free fare to buyers.

PICKERT-HAMMOND LAND CO.,

Opposite Grand Central Station,

Houston, Texas.

N. W. Branch, 1039 and 1040, Lumber Exchange, Minneapolis, Minn.

## INVESTIGATE

Beltrami and Clearwater Counties, Minnesota.

A grand dairy, sheep and general farming country.

WILL OWN 35,000 acres (UT-OVER) lands never before on the market, with rich, creamy soil, clay sub-soil, natural grasses, timber, lakes, close to good towns, saw mills, railroads, highways, schools, churches, with Duluth, St. Paul and Minneapolis markets competing for our products. To actual settlers we offer choicest lands at from \$10 per acre up, on easy terms, and in such compact bodies that whole communities can locate together if desired. Of this section, Prof. Thomas Shaw says, "The possibilities are away beyond the popular estimate." Good farmers who want homes, will be given every encouragement. Colored map and illustrated folder free. Don't locate till you have seen this country. For full information address Roger C. Spawner, Pres., Donald Land & Lumber Co., Drawer N, Bemidji, Minnesota.

## REWARD!!

I WILL pay \$100 in gold to any person who will furnish me the name of a person who will buy 160 acres of good farm land in southeastern North Dakota, the most famous wheat belt in the world. Canada is frozen out and the southwest has failed. But Dakota, the choicest of all the country, has a bumper crop coming. Fine people, good towns, churches and schools, in fact, everything as you have it at home. Write me for particulars.

**John Mueller, - Lisbon, N. D.**  
(Agents wanted in every town.)

### IOWA

## THE GREATEST CORN STATE.

IOWA beats all other states, Illinois included, in corn, oats, and live stock. It is much like Illinois in soil, climate and surroundings, and is full of Illinois people. Coming here you merely change neighborhoods. Our new catalog gives a fine list of bargains in improved farms, and some to exchange. Send for it early.

Northern Iowa Land Co., Independence, Iowa.

## THE CATTLE RANCHES MUST GO

and we have control of one of the finest fertile tracts of land to be had in southeastern Wyoming where wheat and other small grains are never a failure. Potatoes and other vegetables grow in abundance. We will sell 160 acres or more of this land one-fourth down, balance on deferred payment, 8% interest. Write for circulars and other information. Excursions each first and third Tuesdays. Arctide Land Co., No. 7 News Arcade Bldg., Des Moines, Iowa.

FOR sale—Choice farm lands in central Wisconsin, improved and unimproved. Good soil, well watered, well adapted to stock raising and general farming. Well located near churches, schools, creameries and cheese factories, and none of 12 over 8 miles from a railroad. Don't buy land until you have investigated, as we can give you more for your money than you can get elsewhere. Write for book telling more about this; write today. Mattoon Railway Company, Mattoon, Shawano county, Wis.

LARGE highly improved Eastern Washington farm FOR SALE, including stock and farming implements. Full information upon application. Bevis Brothers, Spokane, Washington.

### FIELD NOTES.

A few good Galloway bulls are offered for sale by Mr. W. W. Scholes, of Onawa, Iowa.  
Shropshire rams and ewes are offered for sale by Mr. Geo. Allen, of Lexington, Neb.

Some excellent Poland China fall boars are offered for sale by Mr. F. W. McIntyre, of Red Oak, Iowa.

Three Duroc Jersey sows bred for July farrow are offered for sale by Mr. Austin Renshaw, of Blair, Neb.

A couple of good Meddler boars are advertised for sale by Messrs. Wm. Ray & Son, of Defiance, Iowa.

Mr. Carl Hansen, of Herman, Neb., offers four fall Duroc Jersey boars for sale at \$20 apiece if taken right away.

A few high-class Cruickshank bulls good enough to head herds are offered for sale by Mr. C. C. Norton, of Corning, Iowa.

Messrs. C. W. Daws & Son, of Harlan, Iowa, have a few good young Scotch bulls for sale. It will pay any breeder to go and see these.

A chance to buy well-bred steers weighing from 800 to 1,150 pounds is offered by the advertisement of some 280 head of the low-cut, blocky sort on page 18. They are de-

horned and must be sold at once. Call or write, mentioning The Homestead. Address Mr. H. I. Ball, Fairfield, Iowa.

S. L. Hopper, Neola, Iowa, offers a good yearling Duroc Jersey boar for sale at \$50 if taken soon. He is worth the money to the man who wants a boar.

A fine bunch of fall Berkshire sows, bred in the purple, and good individuals, are offered for sale by Mr. C. J. Martin, of Churdan, Iowa. If taken soon he will make some special prices on these.

Sale dates listed this week in the Short-horn department include that of Mr. Geo. H. Dietz, of Manning, Iowa. The event will be held in town and will offer, no doubt, some very seasonable numbers.

Mr. W. W. Wheeler, of Harlan, Iowa, of mastodon Poland China fame, claims February 19, 1908, for his bred sow sale. This event, as in the past, will no doubt attract wide attention. It is none too early to plan for your shopping nine months ahead of time.

Village Stock Farm, Carlinville, Ill., is prepared to supply a few October Duroc Jersey boars to those wanting this kind of stock. The spring pigs are doing well and orders will be taken on these. Write your wants to this farm. Address Messrs. Comer & Gilliland, Carlinville, Ill., and kindly mention The Homestead.

Mr. W. R. Bennethum, Madrid, Iowa, who sells some of the most growthy and strong-boned Durocs every season informs us that his crop of pigs numbers seventy-five and are making rapid progress, so much so that it is going to be a problem to pick out the best ones for the state fair this fall. February 6, 1908 is the date for the winter sale of breeding animals.

Ten Percheron mares in foal are wanted by Mr. H. Tucker, Box 603, Mason City, Iowa. The ages of these horses may be from three to eight and the preferable weight is that of a good heavy drafter. If you have a good mare to sell write your best cash price, mentioning the fact that you saw this advertisement in The Homestead. See page 18. Address as above.

Mr. O. A. Olson, Madrid, Iowa, heretofore in a partnership, known as Sundberg & Olson, has chosen February 7, 1908, for the time of his winter sale of breeding Duroc Jerseys. We have not heard whether he will hold a fall sale, but whether he does or not, buyers looking for some real good boars this fall should drop off and visit his farm just a mile or so out of town.

Don't wait if you want a chance at the three Minnesota farms offered for sale, because of foreclosure, on page 15. They are located in Dodge county, southeastern part of the state and the first good offer gets them. Descriptions will be furnished prospective buyers by writing Mr. J. L. Griswold, Dodge Center, Minn. Kindly mention this paper when writing for particulars.

Messrs. Preston & Yustin, Corning, Iowa, breeders of Duroc Jersey swine, are much pleased over their bunch of spring pigs and write that they represent a very choice variety of breeding, being sired by Orion and Proud Advance boars out of high class sows. These breeders expect to sell October 12th and are accordingly making preparations to show the breeding fraternity a good assortment of blood lines and profitable animals. Watch for their announcements later.

Walter Bowen, Neola, Iowa, has a crop of sixty spring pigs this season, together with a goodly number of fall sows, which he is saving for his spring sale. Mr. Bowen is one of the enthusiastic young Duroc Jersey breeders in his section of the state, and has Neola Chief 56455, a son of Ohio Chief, and out of Lady Harris, a daughter of old Duroc Challenger, at the head of his herd. He is a good breeding boar, and there are some nice pigs by him on the farm. The most of the sows sold in Mr. Bowen's last winter's sale were bred to him, and he has the best reports from them. He has a good brood sow called Silene, by Alfonso Wonder, and she has a splendid litter of eight pigs by the Iowa State Fair winner, Kruger Lad. She farrowed ten pigs and is now raising eight, and it is one of the best litters on the place. He has another nice litter of ten pigs out of a Perfection Boy gilt and these are sired by the third prize Iowa State

Fair boar, Crimson Wonder I Am II. Mr. Bowen has a nice bunch of ten pigs by Golden Jim, a son of Junior Jim, and he has six granddaughters of Crimson Wonder that he is retaining for his sale. Mr. Bowen also breeds Chester Whites and has about fifteen nice pigs and a few sows to farrow yet. Much of his Chester White stock comes from the Kerr and Frost herds of Missouri. We will have more to say of this herd later in the season.

Any farmer who wishes to take a free trip to the Panhandle of Texas can do so as follows: The Ben I. Tanner Land Co., of Cedar Rapids, Iowa, will give one free trip to one reliable farmer in each and every township. For particulars, and when the excursion will start application must be made to Ben I. Tanner Land Co., Musquakie Bldg., Cedar Rapids, Iowa. The wise farmer will make application early, as positively only one free trip will be granted from each township. See proposition on page 15.

Hereford bull buyers will find quite a variety in age and breeding in the bull offering made by Mr. A. F. Hager, of Avoca, Iowa. Of the young ones there are quite a number ranging from thirteen to twenty-six months. Two St. Elmo bred bulls are included that are just twelve months and tip the beam close to 1,000 pounds. A five-year-old is also offered, he being the imported Islam. Write your wants to this breeder, or visit the herd and make your selections. Kindly mention this paper when so doing. See page 20.

Mr. Chas. Cooper, Ferris, Ill., writes that the pigs which he has saved for breeding stock from his spring crop of Durocs are very nice ones and the man who can show better ones will need to do the Missouri stunt. The dams represent a wide variety of leading strains of blood and the pigs are mostly the get of Tip Top Notcher, Hanley, Hambletonian, Ambition 2d, Peter the Great and others. Victor Paul, first prize under a year at the Illinois fair is responsible for some of the crop. Orders should be mailed early and will be given good selections. Wonder Boy, the well-known boar, is half owned by Mr. Cooper.

Messrs. Hood & Baker, of Dunlap, Iowa, have 175 head of Duroc Jersey spring pigs this year. These are sired by Dunlap Banker, a son of old Iowa Banker, now doing service in their herd. They also have litters by Kruger Lad, the Iowa State Fair prize winner; Arion, Redwood Chief, Tokio and Kruger Jr., a son of old Kruger. They have a nice line of breeding in brood sows, some of which are daughters of the old sweepstakes boar, Advance, Arion, Tolstoy, Glendale Critic and Junior Jim. They will make a boar sale this fall and a spring sale also, and they always have something for sale, both in the way of boars and sows. They will be glad to show their herd to intending purchasers at any time. Should any of our readers want anything in their line we can recommend the above firm as one of the most reliable.

A representative of The Homestead recently called upon Messrs. J. A. Russell & Son, of Corning, Iowa, who own one of the good Duroc Jersey herds in that section of the state, and found them growing a nice crop of spring and fall pigs. The last couple of years this firm have purchased some high-class sows and these have come from some of the very best herds in the West. The boars that they are using at the head of their herd are Tip Top Notcher Jr., a son of Tip Top Notcher; Proud Lady's Best, a son of Orion and out of the \$1,275 sow, Proud Lady, and Higgins' Improver by old Higgins Model out of an Improver II. dam. All the pigs of their own breeding are sired by these two boars, but they also have a number of litters by other well-known sires. They have two litters by Ohio Chief, one out of a granddaughter of Nebraska Belle, the other out of a granddaughter of old Brilliant. They also have one litter by the sweepstakes boar, Crimson Wonder Again, out of a Top Notcher Again sow; one litter by R. J.'s Proud Orion, out of a granddaughter of Nebraska Belle; one litter out of an Improver II. sow by Iowa Standard; one litter out of an Ohio Chief sow by Crimson I Am, and a litter of four fine fall sows by Tip Top Notcher Jr. out of one of his Lady May sows. One of these gilts is toppy enough to go anywhere and she is going to

## PILES FISTULA NO MONEY to pay UNTIL CURED.

I treat and cure permanently by mild and painless methods, all diseases of the Rectum, such as Piles, Fistula, Hemorrhoids, Ulcer, etc. I do not use the knife nor put you to sleep with chloroform or ether. I guarantee a cure and take no money until cured and satisfied.

**Protection for Life**—Every case when cured and discharged is given a written "Legal Guarantee" of cure which provides for Free Treatment at any time during life, should further treatment ever be needed. In other words, "I agree to keep you cured."

Write me full particulars and I will send New Illustrated Book FREE. Also letters from hundreds of cured Iowa patients.

Write these cured patients:

make this firm some money one of these days. The entire litter is above the average and they demonstrate the fact that they have a good breeding boar in this son of old Tip Top Notcher. They have five litters out of daughters of Proud Advance, two litters out of daughters of Orion, Improver II, Higgins' Model and Ohio Chief. Altogether they have five Proud Advance sows in their herd. It is a collection of the very best breeding and they will have something good to offer the trade this fall, at which time their advertisement will appear in The Homestead.

Mr. E. A. Olive, of Scranton, Iowa, is building up a good herd of Duroc Jerseys and has a nice crop of spring pigs on hand. At the head of his herd is I Am Proud Advance 54843, a son of old Proud Advance, and most of his spring pigs are sired by him. He has three Junior Jim sows in the herd, and one very good one, and all have litters of pigs. He has an excellent brood sow in Kate Kruger, a daughter of old Radiator, that he purchased of Messrs. Manley & Co., and she is suckling a good litter by I Am Proud Advance. Mr. Olive is nicely situated to do a good business, being right in the city limits where he has a few acres. His farm is near Bayard, Iowa, where the most of his hogs are raised. He will make a fall sale at which time we will tell Homestead readers more about what he has to offer for sale.

One imported German coach stallion and one Percheron stallion are offered to trade for land in either eastern, North or South Dakota. The coach stallion is represented to be an exceptionally good horse weighing around 1,400 pounds, with plenty of bone, size and style, and good action. He is only seven years old and a sure breeder. The Percheron stallion is a five-year-old, is sound, and weighs 2,040 pounds. He is claimed to be an exceptionally good styled horse with the best of action. Is nicely turned, and is as good as many horses that have been sold this year for \$1,500 or better. Many companies have sold horses no better than this horse for \$2,000 and over. Write, describing whatever you have to exchange in North or South Dakota land, to Mr. Harry Tucker, Box 603, Mason City, Iowa. Kindly mention The Homestead.

Mr. S. L. Hopper, Neola, Iowa, will be remembered by many of the Duroc Jersey breeders who held sales the past two seasons as the enthusiastic young man who bought liberally of the best sows in several of the prominent sales. He has a bunch of eighty spring pigs sired by his three herd boars, Tip Top Chief by Ohio Chief II, out of a Tip Top Notcher dam; Perfection Again by Perfection Boy, he by old King Perfection; and Hopper's Duroc, a son of Wehr's King, out of an Echo King dam. He also has litters by Grant Hockett's great boar, I Am Advance, A. L.'s Chief, Iowa Notcher, Proud Advance Jr., I Am A Wonder and Golden Jim by Junior Jim. This will furnish him a variety from which buyers can certainly make a selection this fall and winter. He has two good litters by Tip Top Chief, one out of a daughter of Hambletonian, the other out of a daughter of Echo King. The fall yearling sow that he bought of Grant Hockett has four boars and two sows by I Am Advance, and they are very good pigs. Rosebud 2d, a granddaughter of Advance, also a granddaughter of Orion, and a member of the first prize yearling herd at Minnesota, has a litter of six boars and one sow by Iowa Notcher. Orion's Topsy by Orion, has a litter of three boars and three sows by I Am A Wonder, and Lady Perfection by Munson's Perfection, (the first prize Iowa State Fair pig in 1904) has a litter of ten good pigs by Proud Advance Jr. He also has a nice

Hay storing with a Louden Junior steel swivel carrier means the elimination of much hard labor during hay making season. The illustration herewith attached is that of a Louden Junior Carrier manufactured at Fairfield, Iowa. The distinctive feature of the carrier is its strength and ease of operation. Being made of the best steel on the swivel pattern it satisfies every demand made on it whether slings or a harpoon fork is used. In addition it has the superior feature of never failing to lock, at the same time it cannot wedge fast. These two points are perhaps the most important ones to consider in a carrier. The defective operation of either makes no end of annoyance for the farmer. Aside from these points of merit there are others, all of which are fully described in the catalog of barn equipment which will be sent to any who ask for it. Address, Louden Machinery Co., Fairfield, Iowa. Mention The Homestead when writing.

litter of seven by A. L.'s Chief out of a granddaughter of Roycroft's Sensation, another litter out of a granddaughter of Proud Advance and sired by W. D.'s Ohio Chief, and still another litter of seven out of a granddaughter of old Tolstoy; and sired by a son of Glendale Critic. He now offers for sale his yearling boar, Hopper's Duroc, as he cannot very well use him in his herd. He is making the price right on this fellow, and will be pleased to hear from anyone wanting a good yearling boar.

Some extra good year-old Scotch-topped Short-horn bulls are on inspection for buyers at the herd of Mr. Geo. A. Bonewell, Grinnell, Iowa. These bulls are sired by the good Scotch sire, Victor Royal 216553 and will be sold right to make room for new comers. When writing for particulars mention The Homestead. See page 18.

Sixty pigs from the spring crop of Poland Chinas have been selected by Mr. Fred Ebendorf, Strawberry Point, Iowa, for filling his orders for this season. Orders should be booked now as Mr. Ebendorf wishes to ship pigs at three months. At the head of the herd are several very well-bred boars, including Hustle On, Perfect Spellbinder and others. A few sows bred for July and August farrow will be spared for those who want them. These weigh around 225 pounds and are a good-boned bunch. A few good males are still on hand. Recently Mr. A. P. Fox visited the farm and took eight fall gilts away that crated 2,100 pounds. Besides the swine offering, there are several red Short-horn bulls ready for service. These, as well as some heifers, are being priced very reasonably to anyone looking for this kind of stock. Write your wants to this breeder and kindly mention The Homestead.

### SHORT-HORN BULLS FOR SALE.

Anyone wanting a good young Short-horn bull should read the advertisement of Mr. A. B. Clark, of Wayne, Neb., in this week's issue of The Homestead. He can fill a carload order if anyone should want that many.

### HEREFORD BULLS FOR SALE.

A carload of good young Hereford bulls are offered for sale by Mr. A. Spooner, of Mondamin, Iowa. These are sired by Beau Mondamin 12th, a son of the noted sire, Beau Donald. They are making special prices on these bulls for the next thirty days. Write him at once about them and get his prices.

### SOME SPLENDID ANGUS BULLS FOR SALE.

Any of our readers who want a high-class Aberdeen Angus bull at a living price should read the advertisement of Mr. W. H. Jones, of Quimby, Iowa. He offers to sell a twenty-two-month-old Erica bull, sired by the noted bull, Imp. Edward R., also a twelve-month-old Pride bull and a ten-month-old Blackbird. Here is a great opportunity to buy a high-class herd bull at a reasonable figure. Any of our Homestead readers can well afford to pay Mr. Jones a visit and purchase one of these youngsters.

### UNITT'S DUROC JERSEYS.

To those who are in search of a good fall Duroc Jersey boar or a yearling Short-horn or Hereford bull, we wish to refer you to Mr. W. G. Unitt, of Seward, Neb. The fall boars now for sale are sons of Shamrock, one of the great Duroc sires now in service, and are from a daughter of Gold Dust Jim, and a granddaughter of Higgins' Model. They are very growthy, weighing 260 pounds at eight months old. If you are in search of a good fall boar write Mr. Unitt and he will gladly send you description and prices of these boars. He also offers his two-year-old herd boar, Sensation Jr. 1 Am 42689, he by the great Sensation Jr. 22461. Among the bulls offered are some choice individuals, both Short-horn and Hereford, that can be bought at a very reasonable figure. Write him for breeding, description and prices and mention this paper. See advertisement on page 18.

### WARREN'S DUROC JERSEYS.

It takes a lot of nerve to pay \$1,575 for a Duroc Jersey sow, but this is exactly what Mr. H. G. Warren, of Inland, Neb., did at the sale of Gilbert Van Patten, at Sutton, Neb., last February. In this purchase Mr. Warren opened the eyes of the Duroc Jersey world, as it was at that time the highest price ever paid for a sow of this breed. This great sow was Rose Bud Lady, a daughter of Van's Perfection, the boar that won first and sweepstakes at Nebraska, Iowa and Kansas in 1902, and was a winner wherever shown three years in succession. Her dam was Blue Belle by Glenwood King. This sow as a producer has few equals, having produced some of the best show animals that ever came from the Van Patten herd. She now has a fine litter of five pigs by Medoc, a son of the \$6,000 Kan't Be Beat. At the sale of Geo. Briggs & Son, the day following, Mr. Warren topped that sale at \$600 for the great sow, Garnet, a daughter of Morton's Prince, and having for her dam Rose II by Higgins' Model. This great sow has a fine litter by Improver II which are among the very best we have seen this year.

Another of the good sows on the Warren farm is Rose K. by the great show boar, Billy K. This gilt was second prize at the Iowa State Fair in her class and third at Nebraska. She now has a fine litter by Tom Davis. This is the class of sows that can be found in the Warren herd and from here are sure to develop winners that will be recognized in the best shows in the West. At the present time Mr. Warren has about 100 good pigs on his place, mostly the get of Improver's Model, he by Improver II and having for his dam Garnet, the top sow in the Briggs & Son sale last February. This hog is proving a wonderful breeder, as his get will show that are now on the Warren farm. He is assisted in service by Red Rover, a son of Hambletonian's dam, Rosie Perfection by the great Jumbo's Perfection.

Red Rover was the top pig in the Warren sale last fall and Mr. Warren thought enough of him to purchase a half interest in him to place back at the head of his herd. He is considered by all who have seen him a very prospective show hog and those who visit the state fair this fall will have a chance to see Red Rover, if nothing happens to him. We earnestly recommend Mr. Warren's herd as a good place to put an order for a boar this fall, as he will offer nothing but the very best. Get in line with him and when writing mention this paper. See advertisement on page 18.

### LAMB'S DUROC JERSEYS.

A recent visit to the herd of Duroc Jerseys owned by Mr. Elmer Lamb, of Tecumseh, Neb., found him caring for fifty good spring pigs of the very choicest breeding. Although very young in this business Mr. Lamb is starting with the very best material that money could buy and his good judgment has surely been a great help to him in the many good purchases he has made. At the head of his herd is Purple Quality, a son of the great Crimson Wonder 1 Am, and having for his dam Orion Belle by Dandy Orion by Orion. This pig is one of the most promising youngsters we have looked at this year. He has a wonderful back, good even side lines, a good head and ear and extra good limbs and feet. Mr. Lamb has a full brother to this pig that he will price at a reasonable figure if taken at once. Mr. Lamb has quite a combination of breeding on the farm and we think he will be able to supply the wants of those who are looking for new blood. One of the best litters is by the great Hanley, another by Ambition. Others by such boars as Buddy L. by Buddy K. IV, Crimson Jim, Lincoln Top and Tip Top Notcher J. by the \$5,000 Tip Top Notcher. If you are looking for a well-bred pig and a good individual get your order in with Mr. Lamb and mention The Homestead when writing. See page 18.

### RED POLLS AT PUBLIC AUCTION.

A sale of Red Polled cattle that should interest every breeder of this great breed is that to be held at the farm of Mr. W. H. Lake, near Hampton, Neb., on June 12th. The consigners to this sale are two of Nebraska's veteran breeders, namely, Mr. H. F. Stubbs, Bradshaw, Neb., and Mr. W. H. Lake, Hampton, Neb. Mr. Stubbs is consigning twenty head and among them are some very choice individuals. Most of the cattle included in the Stubbs consignment are the get of the great bull, Sprite's Perfection he by Governor McKinley and having for his dam Sprite's 3d, a great show cow and the dam of three of the greatest show bulls in the Red Polled business. This great bull has a show record that few can boast of and among his produce included are youngsters that look equally as good at this age as did their sire. Mr. Stubbs consigns eight young bulls that are extra good and are in just the best breeding condition, ready to go right into service in good herds. They are very growthy, are of the low-down, beefy type and are all the get of the great herd bull, Sprite's Perfection. It is seldom that one gets a chance to see as uniform a lot of young cattle as Mr. Stubbs will offer in this sale, but when one takes the time to look over the many good matrons that he has got together as his foundation and to use as breeding stock it tells the tale without further question. Mr. W. H. Lake, of Bradshaw, will consign twenty-two head from his well-known herd which are mostly the get of the great bull, North Star, which is too well known among Red Polled breeders to need further mention, as his get are doing service in some of the best-known herds in the business. This great bull is by the Ensign. His dam was Nancy and he was good enough to win first and sweepstakes at the Nebraska State Fair in 1900. He breeds a very uniform type and his get are proving very valuable additions to the many good herds in which they are now in use. Mr. Lake has reserved seven young bulls for this sale which would be a credit to any good herd. It has always been a hobby of Mr. Lake to breed for as much size as possible

along with good quality, and if you will take a good look at the many great beefy cows now on the place it will surely look to you as if this great desire had been accomplished. He is offering eight good cows of which the greater part will have calves at foot by the great breeding bull, North Star. He also offers seven good heifers which will all be safe in calf to this great bull. Taking into consideration that these two breeders are combining in this sale we feel safe in saying that we think there will be few opportunities to buy good cattle of this breed that will equal this one and we earnestly request those in search of this breed to be with them on sale day. We will have more to say of the female end of this offering in our next issue and in the meanwhile it would be well to send for a catalog and get acquainted with the breeding of these cattle. For catalog address Mr. H. F. Stubbs, Bradshaw, Neb., or Mr. W. H. Lake, Hampton, Neb. In writing please mention this paper. See advertisement on page 20.

### SOME SPLENDID FALL BOARS FOR SALE.

On page 18 of this week's Homestead will be found the advertisement of Mr. F. W. McIntyre, of Red Oak, Iowa, one of the well-known Poland China breeders of southern Iowa. Just now he is offering for sale about ten head of fall boars, and they are cracking good ones. They are sired by Red Oak Sunshine 104037, a son of the noted boar, Iowa Sunshine. They are out of daughters of P. W. Perfection, R. O. Perfection, Sanders' Perfection, Proud Corrector and other well-known sires. A representative of The Homestead has seen these boars and can say to Poland China breeders and farmers who are wanting a herd boar that there are some extra good bargains among this bunch. They are big-boned fellows, with good backs and hams and good in head and ear. He is offering the pick of these at \$30 and \$40. The first man who sends an order gets the pick of the bunch. He also offers fifteen good fall sows for sale bred for fall farrow to P. W. Giant, a son of P. W. Perfection, out of a daughter of old Nelson. This boar topped the Fred Rood sale last fall and he was one of the best boars ever sold from the Rood herd. He has done a great work in the McIntyre herd and he has a crop of eighty spring pigs that are the best bunch of Poland China pigs we have seen this season. We will have more to say about these later in the season. Just now it is fall boars and sows that he wants to dispose of. Any of our readers who want a good fall boar can get one by writing to Mr. McIntyre and sending him an order. These are all right. Kindly mention The Homestead when writing.

### THE CHERRY GROVE SHORT-HORN SALE--LAST CALL.

There never has been a time in the breeding business when a good bull was as hard to find as at the present time. Breeders are beginning to realize the importance of a good bull at the head of their herds and the offering from Cherry Grove herd of Short-horns, the property of Mr. Milton E. Jones, of Williamsville, Ill., which will be sold at the farm on Tuesday, June 4th, offers exceptional advantages in the bull line. The herd bull which Mr. Jones has used for the past few seasons is the noted show and breeding bull, Imp. Lord Banff, and a number of his sons are listed in this sale. Lord Banff stands today one of America's greatest bulls, and his get have been widely distributed. Mr. Jones has been using two of his sons in the herd, and were it not for the fact that he has an exceptionally good bull out of the champion cow, Cicely, which he bought at the Tebo Lawn dispersion sale last season, he would not offer them for sale at this time. He has refused to price them at private treaty, preferring to offer them for sale at public auction so that some breeder would be able to secure a herd bull at his own figure. Fire King by Imp. Chamberlain's Heir and out of Imp. Scottish Rose, has been used in the herd with very good success, many of the best cows having been bred to him. He has proven a sure breeder

### Big Immigration to Southwest Texas.

Southwest Texas will grow any crop almost, even to fawn, as shown in the picture. The most profitable crops, however, are alfalfa, corn, cotton, sugar cane, rice, as well as vegetables and fruits of almost every variety. This wonderful district, known as the Coast country, has a very prolific soil. In fact, it surpasses any country now known for profitable farming. Thousands of northern farmers are going into southwest Texas and buying cheap lands. Land here is worth \$100 in less than five years, for it is doubling in price every few months. In fact this land would all have been taken up years ago, but for lack of railroad facilities. The farmer that wants land either to farm or for an investment cannot miss it to buy in this country. It will pay and pay big. A representative of this paper called on the Fidelity Immigration Co., at their Kansas City office, a few days ago. This company controls large bodies of land in the Coast country and is made up of some of the leading bankers and large land owners in southern Texas. The company is sending out literature free to all who will write for it, and the statements they make are correct, as they are financially responsible. Read their advertisement on page 15 of this issue and write Herbert Hurd, V. P. & Gen. Mgr., 1046 Union Ave., Kansas City, Kan., for particulars, mentioning this paper.

Fawn captured by the Seasholm children in Ricefield, near Eagle Lake, Texas.

and would not be sold but for the reason given above. This is an exceptional opportunity to secure a tried bull. Cherry Grove Banff 17th is a red two-year-old bull of strictly show-yard merit. He has been used in the herd and is one of the best bulls of his age that will be sold at auction this season. Another son of Lord Banff that will please those present sale day is Cherry Grove Banff 18th. He is one of the thickest two-year-old bulls the writer has seen. He is a straight Scotch bull, and has been bred to many of the best cows in the herd. The breeder in search of a herd beader will do well to inspect this fellow. He will not be found faulty in any respect. Cherry Grove Banff 29th by Lord Banff and out of Ruby of Fairview is a yearling bull from one of the best cows of the herd, she being both an International and state fair prize winner. Cherry Grove Banff 28th is a yearling bull by Lord Banff and out of Imp. Golden Wellcome 3d, one of the best cows in the sale. Mr. Jones selected this cow from the herd of Mr. Duthie and is only placing her in the sale as an attraction. This bull is good enough individually and in point of breeding to head any herd. There are a number of bulls in the offering sired by Lord Banff, that will suit the breeder and farmer, and the offering throughout is one of the best of the season. Mr. Jones has decided to hold the sale on his farm, and breeders will have an opportunity to see Lord Banff sale day and the breeding matrons which have made this herd noted in Short-horn circles. Those who wish to attend this sale will find it an easy matter. Williamsville is one-half hour's ride from Springfield, one hour from Bloomington, two hours from Peoria, three hours from St. Louis and five hours from Chicago on Chicago & Alton railway. The Interurban line runs cars every one and one-half hours from Springfield to Lincoln, passing through Williamsville. Parties from Peoria can take these cars at Sherman. Interurban cars also connect at Springfield with cars from Decatur and St. Louis. Plan to be present at this noted sale. The cattle will please both in point of individual merit and breeding. Look up the advertisement on page 20 of this issue and write for catalog, kindly mentioning The Homestead.

### SOME GREAT SCOTCH SHORT-HORNS AT AUCTION.

In the last issue of The Homestead attention was directed to a very important sale of Short-horn cattle, the dispersion sale to be made by Mr. H. H. Diers, at Farmersburg, Iowa, June 14th. We refrained purposely heretofore from entering into detail relative to this very superb offering, withholding that privilege for this and our next issue. It seldom occurs that any breeder of Short-horns that has been able to build up such a class of cattle as Mr. Diers is offering, is willing to dispose of them in toto, as is the case in this instance. A representative of this paper has recently spent a day inspecting these cattle and was much surprised at the high character, not only of the individual offering, but of the breeding the catalog contained. His sale catalog is now out and is a choice piece of work from the Bedford Catalog Printery, Bedford, Iowa. It reveals the fact that there are twenty beautifully-bred Scotch females and six Scotch bulls consigned. In this article we shall deal with the female contingent, leaving the mention of the bulls for next week. Lot 2 of the sale catalog is Imp. Sunflower 22d. This is a very choice red cow, possessed of true Scotch type and character, sired by Count Sunbeam. She was imported by I. M. Forbes & Co. and was considered one of the choicest things in that importation. Count Sunbeam was by Count Arthur and out of Scottish Sunshine by the celebrated Scottish Archer. This beautiful cow has been carrying a calf since December 18th to the service of Imp. Great North. While this cow is but seven years old, she has a fine lot of daughters to her credit, among which is Snowdrop, Lot 3 of the catalog, and sired by the 2,200 pound bull, Imp. Avalanche. This is a beautiful red cow, dropped Feb. 6, 1905, and was bred January 15th to Imp. Great North. Another beautiful daughter of this Imp. cow is Sylvia D., also a red heifer sired by Crown Imperial; she was calved Dec. 17, 1905, thus demonstrating the great rapidity of Imp. Sunflower 22d's breeding. Snowdrop having been dropped Feb. 5, 1905 and Sylvia D. Dec. 17, 1905, with the beautiful roan heifer Sweet Dreams by Imp. Gladstone, dropped Nov. 5, 1906. Such cows as Imp. Sunflower 22d are rare, and fortunate indeed will be the buyer of this most beautiful and prolific Scotch cow, whose capabilities will make any breeder possessing her rich in a few years. Another splendid Imp. cow is Imp. Minorka Maid, which has three good daughters in this sale. Minorka Maid was by Crabstone 2d out of Minorka, she by Beau Ideal, and is of this famous Cruickshank Mayflower tribe. Her breeding is all that could be desired from the Cruickshank standpoint and she too was imported by I. M. Forbes & Co. and was bred by Alex. Milne of Scotland. A splendid daughter of hers is listed in Lot 7, Minorka's Gem, a red roan calved Nov. 23, 1902, sired by Imp. Cockrobin. Cockrobin, it will be remembered, is the sire of the show cattle that have been shown by I. M. Forbes & Son for several years and Cockrobin himself was a show bull of no mean proportions. This beautiful young cow was bred Dec. 5th to Imp. Great North. Minorka's Pride is a red cow with her second calf dropped Nov. 28, 1903. Her sire was Imp. Avalanche and her dam Imp. Minorka Maid. She is carrying a calf to the service of Imp. Great North since December 12. Lot 9 of the catalog, Mildred, is a very choice roan heifer calved Nov. 5, 1905, and bred April 6th to Imp. Great North. She is by Imp. Gladstone, hence is a half sister to Minorka's Gem and Minorka's Pride. Lot 10 is Duchess of Center, she is a Duchess of Gloster of the true Cruickshank sort. Her sire was Warrior, he by Starlight and out of Lancaster Queen

# HEREFORDS AT AUCTION

AT SOUTH OMAHA, NEB., JUNE 14, '07, AT SALE PAVILION

**40 CHOICE SELECTED ONES FROM THE WELL KNOWN HERDS 40**

Claus Bros., Bendina, Kan. Ferd Friedly, Verdon, Neb. J. A. Broadfoot, Thayer, Ia. F. J. Beggs, Coin, Ia.  
W. N. Rogers, McCook, Neb. J. G. VonSeggern, Wisner, Neb. R. D. Morrasy, Dorchester, Neb.

Their offering will consist of choice breeding and good individuals. 21 Bulls and 19 Females. There are show bulls in this offering and females that have won in the strongest competition at Nebraska State Fair. A good chance for ranchmen and farmers to secure good bulls, and parties wanting show material will find it in this offering. Remember the date and don't fail to be on hand to get some of the good ones. For catalog, address,

Auctioneers: RAY PAGE  
O. I. PURDY  
T. C. CALLAHAN

**W. N. ROGERS, Mgr., McCook, Neb.**

6th by Commander. This was also the sire of the great bull, Baron Gloster, the best bull ever owned by I. M. Forbes & Co. Her dam was the 29th Duchess of Gloster by the Bellows-hred bull, Scottish King, he by Girdle's Hero, a son of Scotland's Pride and out of Imp. Girdle by Pride of the Isles. Scottish King's dam was the great breeding cow Carrie B., a daughter of Imp. Lord Glamis; the next dam was Duchess of Gloster by Imp. Julius, and she out of Imp. 22d Duchess of Gloster by Barmpton Prince. The next Cruickshank sires are Master of Arts, Royal Oak and Lord Raglan. Thus it will be seen that from a Cruickshank standpoint there is probably no better or more desirable family of Cruickshank cattle than the Duchess of Glosters, they being fully on a par with the Victorias, Lavenders, Brawith Buds and Orange Blossoms. Duchess of Center was bred the middle of December to Imp. Great North. Lots 11, 12 and 13 are of this same family. Lot 11 being a half-sister to Duchess of Center, while Lots 12 and 13 are daughters of hers. Lot 12 being by Imp. Crown Imperial and Lot 13 by Imp. Gladstone. Lot 18 is a very select Duchess of Gloster, red, calved September 28th, by Imp. Crown Imperial and out of Lot 11. She was bred December 7th to Great North. Lot 19 is out of the same cow and is a roan calved Sept. 25, 1906, by Imp. Gladstone. Lot 20 is Mermaid, calved Oct. 20, 1906. She is a rich roan, sired by Imp. Gladstone and out of Imp. Minorka Maid. Maid of Honor is listed as No. 21, and was by Imp. Gladstone and out of Minorka's Gem, she by Imp. Cockrobin. This beautiful yearling heifer was bred May 13th to the red bull, Imp. Great North. Lots 22, 23 and 24 are all Brawith Buds, but trace to the imported cow Imp. Foxglove by Perfection. The next cow above in the pedigree is Cuprose by Imp. Cupbearer; then Golden Rose by Imp. Ducal Crown, then Pride of Meadow Ridge by Scottish King. Lot 22 is out of Pride of Meadow Ridge and is sired by Imp. Prince Oderic. Lots 23 and 24 are out of Lot 22, Pride of Center, No. 23, being by Imp. Crown Imperial, while Lot 24 was by Imp. Gladstone. Center Valley Bud, Lot 22, was bred December 12th and Lot 23, Pride of Center, was bred January 13th, both to Imp. Great North. The remainder of the offering, so far as females are concerned, are descendants largely of the one cow, Imp. Adelaide by Magnum Bonum. As has been before stated, we are dealing at this time with the female contingent, and in our next issue will have something to say of the choicely-bred Scotch bulls to be sold. The Scotch topped Adelades, previously mentioned, are from a standpoint of individual excellence, fully on a par with the Scotch cattle. They have been bred for a number of generations by Mr. Diers or his father, and the same character of bulls have been used on them that have been used in bringing their Scotch herd up to its present proportions. The catalogs are now ready to mail and will be sent on application to Mr. H. H. Diers, at St. Olaf, Iowa. This post-office of St. Olaf should not be confounded with the place at which the cattle will be sold. The sale will take place at Farmersburg, the railway station some three miles from St. Olaf. The sale will begin at one o'clock p. m., sharp, June 14th. Kindly mention The Homestead when writing for catalogs. See the advertisement on page 24 of this issue.

## GO TO TEXAS.

For many years to come farmers will be going to Texas. Why? Because of its possibilities. Farming in Texas has all the possibilities that are offered anywhere. But the question of visiting this grand, promising country is a present one. If you are wise you will not wait for the crowd. When the crowd goes, it means that even fools have been convinced of the good things there are to be found there. A fine tract of some 25,000 acres in fertile Hemphill county on the Atchison, Topeka and Santa Fe Railroad has just been placed on the market. Virgin soil it is, and you are to be the first buyer. Mendota is the new townsite and is situated in the center of this tract which grows all of the leading field and vegetable crops of the south. You may read all about this offer in a booklet, "Mendota Colony Farms," which gives valuable information, prices, situation, crops and particulars of excursions to this land. Write for the booklet today. Address The Colony Farm Homes Association, 21 Exchange Bldg., St. Louis, Mo. See page 15.

## CUTLER'S DISPERSION SHORT-HORN SALE.

On Saturday, June 8th, Mr. W. E. Cutler, Corydon, Iowa, will close out his well-

known "Canna Hill herd" of Short-horn cattle at his farm, near the inland town of New York, ten miles northeast of Corydon, and ten miles south of Charlton, Iowa. This has been one of the best herds in southern Iowa. Of the forty-five head to be sold, fourteen will be bulls. Among these is his splendid two-year-old Cruickshank bull, Baron Victor 250111, a richly-bred Victoria and a bull of outstanding merit. This bull was sired by Victor Knight 177893, a son of the \$1,000 bull, Baron Dudding, and of Cruickshank's noted Violet family. His dam is Victoria of Meadow Farm 4th by the noted Forbes hull, Baron Goldust 3d. He is probably one of the best Cruickshank bulls that will be offered at public sale this season and some enterprising breeder who is looking for a bull to head his herd will not make a mistake if they attend this sale and buy this bull. He is a solid red in color, is good in his lines, a splendid head and horn, and a bull of good length. Besides him there will be about thirteen young bulls, mostly all sired by his former Victoria herd bulls, Victoria Maple and Vallency 2d. These bulls are strong, rugged fellows, and the most of them are ready to do active service. There will be a number of Scotch cows and heifers in the sale of the Victoria, Rosemary and Lavender tribes. One of these, Victoria Funke 7th, is a three-year-old daughter of Golden Champion, formerly at the head of the Ernest Funke herd and now at the head of Mr. Hugh Bates' herd at Orient, Iowa. This young cow was purchased at the Funke sale at a long price and she goes into the sale with a heifer calf at foot by Victor Maple. (This bull, Victor Maple, is now used in the C. A. Saunders herd, and he is a half brother to Golden Lavender that recently sold in the George Bothwell sale for \$995.) There will be a couple of Rosemarys in the sale, one sired by Victor Maple, the other by Pilot, the bull that formerly headed the F. P. Healy herd at Bedford, Iowa. Miss Lavender 2d is a six-year-old daughter of Imp. Fairhaven, bred by Messrs. Benj. Whitliff & Sons, of Preemption, Ill. She also has a heifer calf at foot. There will be a great many of the cows and heifers that will have from two to four Scotch tops on them, and among these are some of the best milkers we have ever seen. There will also be a nice bunch of heifers in the sale, mostly sired by Vallency 2d. This herd is uniformly red in color and is as good a working herd as there is in southern Iowa. To Short-horn men who are seeking bargains we will say come to this sale. Southern Iowa is not noted for any exceptionally high prices, and we know full well that the breeder who buys here will buy worth the money and will get full value for his investment. Any of our best breeders can attend this sale and put money in their pocket by purchasing some of these cattle. Mr. Cutler is doing an unusual thing in this sale. Notwithstanding he is making a dispersion sale, he is standing behind everything that he sells, and everything will be guaranteed, and Mr. Cutler's guarantee is worth 100 cents on the dollar. These cattle are in nice condition, and we urge the readers of this paper to

One of the barns and a group of Scotch Short-horns, at Sinsissippi Farm, of Mr. Frank O. Lowden, Oregon, Ill. Sixty-five head of this sort of Scotch Short-horns will be sold at auction in Chicago, June 11th. Write Mr. F. O. Lowden for sale catalog.

## TOO LATE TO CLASSIFY.

### 10 SPLENDID FALL POLAND CHINA BOARS FOR SALE

I AM offering 10 of the tops, the best I have ever raised. These are big boned fellows, are sired by Red Oak Sunshine 104637, and are out of my best sows. I am also offering 10 fall sows for sale, bred to my noted boar P. W. Giant. I am offering the choice of these boars for \$30 and \$40. Address F. W. McIntyre, Red Oak, Iowa.

### FALL BOARS AND YEARLING BULLS FOR SALE

I HAVE a number of good Duroc Jersey fall boars by Shamrock 20473 and out of a daughter of Gold Dust Jim and a granddaughter of Higgins' Model. They are very growthy, weighing 280 lbs. at 8 months old. I will also sell my herd boar Sensation Jr. I. Am 42683, a two year old son of the great Sensation Jr. 22481. I also have some extra good Short-horn and Hereford bulls that I will price right if taken at once. Write me for prices and mention this paper. W. G. UNITT, Bell Phone 133, SEWARD, NEB.

### Walnut Grove Herd Duroc Jerseys

HOME of the \$1,675 Rose Bud Lady with her litter by Medoc, a son of the \$8,000 Kant Be Bear. The \$600. Garnett with her litter by Improver 11. Many others of choicest breeding and individuality. Look me up at the Nebraska State Fair. Nothing priced at present.

H. G. WARREN.

INLAND, NEB.

attend his sale. Write Mr. W. E. Cutler, of Corydon, Iowa, for catalog and kindly mention this paper. See display advertisement on page 24.

### HARDING AND HIS OHIO CHIEFS.

The name of Ohio Chief, today recognized as one of the greatest living Duroc Jersey boars; Nebraska Belle, the undefeated sweepstakes sow, and one of the most noted brood sows living; Proud Lady, the sow that cost \$1,275, and others almost equally noted, are inseparably connected with the name of Mr. R. J. Harding, of Macedonia, Iowa. Few Duroc Jersey breeders of recent times have risen more rapidly than Mr. R. J. Harding, and it has all been brought about by his buying high-class material for foundation stock. Good judgment has marked his buying, until today his herd is looked upon by the entire Duroc Jersey breeding fraternity as one of the most noted in the land. His earlier selections were of the best, but his first noted purchase was when he stood at the ring side of Mr. Smith Brown's sale a few years ago and bought the undefeated sweepstakes sow, Nebraska Belle, at the then unheard of price of \$600. This old matron has made Mr. Smith Brown a reputation and had put him in the forefront as a breeder. She was destined to do the same for Mr. Harding, and has been one of the most profitable brood sows he has ever owned. He next formed a company and they purchased the boar, Ohio Chief, that stands today as one of the greatest living representatives of the breed. As a show boar he won first at the World's Fair and several noted state fairs, but it is as a sire that he is destined to make his greatest reputation. His get have always been in great demand and it was one of his daughters that sold for \$2,000 in the Sam Murphy sale at Savannah, Mo., last winter, making her the highest-priced Duroc Jersey gilt ever sold. His next purchase was Proud Lady, for which he paid in cold cash the sum of \$1,275, breaking the record at that time for a Duroc Jersey gilt. Mr. Harding has sold from her two litters \$1,850 worth of boars and gilts and

### Lawndale Short-horns

SCOTCH and Scotch topped, the best families represented. Imp. Augustina 51st, Victorias, Emmas, Orange Blossoms and Alexandrias, Young Marys. Scotch bulls old enough for service all sold. Some extra Scotch topped bulls for sale, will weigh about 1,000 pounds at year old, sired by the good Scotch bull, Victor Royal 216553. Will be sold right to make room for the young calves. Address

George A. Bonewell,

Grinnell, Iowa

### NORTON'S Cruickshank Herd Headers

I HAVE two excellent Duchess of Gloster bulls, a very choice Barmpton Rose, a Rosemary and several others, sired by Imp. Bampton Admiral and Banker's Victor. I also have some Secrets, Lavenders and Charity tribes. Come and see me.

C. C. NORTON,

CORNING, IA.

### TO EXCHANGE FOR LAND

ONE Imp. German Coach stallion 7 years old and sound. Also one Percheron stallion 5 years old and sound, weighing over a ton, for a good piece of land in eastern N. or S. Dakota. These horses are absolutely all right and sure breeders. Address Harry Tucker, Zoller Bldg., room 5, Box 603, Mason City, Ia.

### Smith Brown's Duroc Jerseys

THE home of the winners, 125 pigs by Echo King, Red Chief I Am, Crimson Wonder 2d, Waterloo Prince and other well known boars. I have the pigs this year; if you want a good one write me. Address, SMITH BROWN - Waterloo, Neb.

### LAMB'S DUROC JERSEYS.

HERD headed by Purple Quality, a son of Crimson Wonder I Am, dam Orion Belle. I have a full brother to him for sale. A fine bunch of spring pigs on hand by the most prominent sires. Litters by Hanley, Ambition, Bully L. by Buddy K. 4th. Book your order early. Elmer Lamb, Tecumseh, Neb.

### Village Stock Farm, Carlinville, Ill.

HAS a few October boars. Will also take orders for spring pigs. Write your wants.

Comer & Gilliland, Carlinville, Ill.

### STEERS FOR SALE

286 HEAD well-bred steers, the low-down, blocky kind, dehorned; weight 600 to 1,150 lbs. Must be sold at once. Call on or write

H. I. BALL, FAIRFIELD, IOWA

### MARES WANTED

WANT 10 registered Percheron mares in foal; ages from 3 to 8 years and sound. Weight from 1,500 lbs. to 1,900 lbs. Give lowest cash price. Address H. Tucker, Box 603, Mason City, Iowa.

### TOP CHIEF 52177

HEADS my herd, assisted by Perfection Again 52179. I am offering a good yearling boar for sale. Address S. L. Hopper, Neola, Iowa.

he has two of her best left in the herd. These will be seen in his show herd this fall. One of these is Proud Chief by Ohio Chief, and Mr. Harding considers him the best pig he has ever raised, and he is a good one from end to end. He has 125 spring and twenty-five fall and winter pigs now on hand. These are sired by Ohio Chief, Brighton Wonder, R. J.'s Proud Orion and Keep On Protection, a boar that is proving an

# Dispersion Sale of the Entire Herd of Aberdeen Angus Cattle

Belonging to H. A. Cole at Iowa State Fair Grounds, Des Moines, Iowa, June 18, 1907.

THERE will be 65 head in the sale. Among these will be 18 bulls, including my herd bull Imp. Electrician, a richly bred Erica bull, weighing 2,200 lbs. The rest will be two-year-old bulls. There will be 47 head of cows and heifers in the sale, 15 of which will have calf at foot. Among these are several Imported Cows of the Pride, Queen Mother and Drumin Lucy families. There is also an excellent representation of Ericas, Blackbirds, Barbaras, Heatherblooms, Easter Tulloch, Duchess, Georgians, Kinochtry Blue Bells, Rose of Sken and Lady Fern families. There never was a better opportunity offered to buy good Angus cattle, as we only bought the best for foundation stock. There will be a splendid lot of young heifers in the sale and some excellent young bulls. A change in business and having sold my farm necessitates my disposing of the herd. If you want to buy Angus cattle here will be the greatest opportunity of the year to buy right. Write me for catalog at once. Address,

COLS. F. M. WOODS AND CO AUCTIONEERS.

H. A. COLE, 3211 S. WESTERN AVE., CHICAGO, ILL.

excellent breeder in the Harding herd. He also has litters by Perfection Chief and Kruger Lad. His Ohio Chief litters are out of the following sows: Hoffman's Pride, a granddaughter of Tolstoy, saved four good gilts; Improver Lady, by Improver II, has seven; Harding's Beauty, a daughter of King Perfection, has ten; Crimson Queen, a Tolstoy sow out of a King Perfection dam, has eight; Fancy Belle by Red Chief I Am out of Nebraska Belle, has eight; L. H.'s Choice by King Perfection has nine, and Nebraska Belle has five, all by Ohio Chief. Old Belle did not suckle her pigs this year,

are great prospects and should fall to herds where they will be given every opportunity. The years spent by Mr. E. K. Thomas, of Paris, Ky., the senior member of the firm, in founding this herd and the thirty or more years of improving it, should add to the value of each and every animal that passes through the ring. Mr. S. D. Mitchell, the junior member of the firm, shares with Mr. Thomas the later laurels won by their cattle, as he has been actively managing the herd for some years and no one regrets more than he that the cattle must be scattered. Of the fifty head sold the two herd bulls,

is a wonderfully well-developed cow, showing a magnificent front, is smooth over shoulders, covers well over back and loin and is set on legs of the proper length. She was got by Blood Royal, a Princess Royal bull that won as a calf at the International, and was out of Rose of Strathendrick by Imp. Sittytton Stamp. Her second dam was by Imp. Vice Consul. Then follow an unbroken line of Cruickshank sires for several generations. Another valuable breeding cow is Imp. Bessie 51st, dam of White Goods. She was got by Sittytton Pride and out of Bessie 33d by Athasca; second dam, Bessie 21st by Cherub 4th; third dam, Bessie 14th by Heir of Englishman. Bessie 51st is well along in calf to Orange Viscount and should find an appreciative buyer, as brood cows of her equal are rarely exposed at public treaty. Lavender Bud, a Canadian-bred cow got by Oswald, and out of Lavender Blossom by Victor Hugo, is another of the valuable breeding cows of the herd, as is proven by her two-year-old daughter, Lavender Bud 2d, got by Orange Viscount. Lavender Bud 2d was the junior show heifer last year and has made great improvement within the year. Another show heifer is Victoria Queen 4th, picked by Mr. Mitchell for this year's show. She was got by Orange Viscount and out of Victoria Queen by William's Cruickshank. Then follow such sires as Grand Master, Lord of Linwood, Earl Marshal, Favorite, Roan Gauntlet, etc. The Brawley and cow, Gratitude 2d, with roan bull calf at foot by White Goods, should please some critical buyers. She was got by Scottish Prince and out of a full sister to Lavender Viscount, sire of Orange Viscount. A clipper, Cowslip's Pride and roan heifer calf at foot by White Goods will be found a desirable pair to buy. Cowslip's Pride was got by Lavender Viscount and out of a daughter of Imp. Patriot. Other desirable things among the Scotch sorts will be found and the twelve daughters of Orange Viscount will be found great things from which to select. The Barrister Young Marys cannot be appreciated until seen. Every cow or heifer of breeding age is bred to one of the herd bulls, Orange Viscount or White Goods, unless it be a heifer or two held open for show purposes. Catalogs with illustrations of many of the animals that sell and full information are being mailed to all who make inquiry for sale. See page 22 for advertisement and when making inquiry for catalogs kindly mention this paper.

in America, Canada and from foreign countries when he was shown on two occasions at the International at Chicago, will be sent through the ring. In our last issue we made some effort to give the reason for the sale of this bull, but for fear that we were not clearly understood, we again repeat that after this sale the cattle left at Sinnissippi will be the old and unsalable matrons, or some young calves, and as Ceremonious Archer, the other herd bull, is not as youthful and salable as Cumberland's Last, he will be retained as lord of the harem. Cumberland's Last needs no introduction nor encomiums from us, as his history made by intrinsic worth and merit speaks for itself. We will say, however, that this great bull never looked so thick and massive and bore the mark of the great Short-horn bull that he is, more forcibly than at this time. He has made great growth and is in the pink of condition for the sale. His breeding is all that can be desired by the most critical. We shall not enter into the detail concerning his pedigree at this time, as the catalog fully explains that. Second to Cumberland's Last, among the four bulls to be sold in this sale, is Lavender Archer 242432. He is a son of Ceremonious Archer, a beautiful, rich roan, two years old January 4th. His dam was the splendid-bred Lavender cow, Lavinia 2d. She was sired by the Campbell Mina bull, Martinette, and he by Imp. Northern Light. Lavinia's second dam was the imported Lavender cow, Imp. Lavinia by First Choice. First Choice was a roan bull bred by Mr. Sylvester Campbell, sired by Gravesend, and belongs to the famous Scotch Claret tribe. The breeding of Lavender Archer is without a flaw and he is one of the most desirable families in the old Sittytton herd. Individually this bull is an exceptional animal. He has a splendid head and horn, great length of body and will unquestionably make a star herd bull for some critical judge. Already at private treaty \$1,100 has been refused for this bull, Mr. Lowden preferring to hold him for this sale without regard to what he may bring at auction. Another bull that will certainly command attention is one of the herd bulls that has been used in conjunction with Ceremonious Archer and Cumberland's Last. We refer to the thick roan son of White Hall Sultan, Gladstone. This bull belongs to the Campbell Mina tribe, as bred by Sylvester Campbell, but is founded on the same identical cow, Mary Ann of Sillery, on which Mr. Cruickshank founded his Bashful or Crocus family. This thick bull, Gladstone, has a wonderful back and loin and has every indication of being a great sire, as he is possessed of much masculine character, being very vigorous, robust and rotund looking. Certainly his breeding could scarcely be improved upon, and being sired by White Hall Sultan, the great show bull whose sons are in such active demand, that his owner cannot supply the orders, should certainly not go begging in this sale. He is a rich roan, not quite three years old, on sale day. Nevertheless he has been used and proven satisfactory in every way. The remaining sale bull of the four offered is Sinnissippi Nonpareil. This bull was sired by Imp. Nonpareil and out of Imp. Missa Dorothy, she by Prince of the Vale. Her dam was Lady Dorothy Fox by the Duthie-bred bull, Scottish Victor, a son of Scottish Archer, out of Sittytton Victoria by Gondolier. This is a splendid type of Scotch bull, a rich roan, calved January 3, 1906. This Dorothy family is founded on Mary Ann of Sillery, the same as Gladstone, the top of the pedigree being different. We wish to say to Homestead readers that it seldom occurs, if ever, in any sale, that four as good bulls pass under the auctioneer's hammer as will be the case in this sale. It would seem useless to take the time and space for a more extended description of these bulls. It is

WHITE GOODS  
234975

White Goods, the subject of the accompanying illustration, was got by the champion, White Goods, and out of the Marr Bessie cow, Imp. Bessie 51st, she by Sittytton Pride. In 1905 and 1906 White Goods was seen at all the leading western shows. As a yearling he made an enviable record. As a two-year-old he was a stronger factor, winning first in several shows and standing well up in others. In his three-year-old form he shows a greater improvement than was made from calfhood to yearling or from yearling to two-year-old. If shown at the coming fall shows he will be a factor to be reckoned with in the aged bull class. As a sire he is fulfilling the highest expectations of Messrs. Thomas, Jameson & Mitchell, of Allen, Kan., who on June 13th make a partial dispersion of their herd of Short-horns. White Goods sells, and it is hoped to an appreciative buyer who will carry him on and let him gain the laurels justly due him. See page 22 for sale advertising.

owing to lack of milk, and Mr. Harding had to take them away and put them on another sow, but they will come on all right by fall. Proud Belle by Proud Advance has eleven good pigs by Ohio Chief II.; R. J.'s Pride has a nice litter by Keep On, and Our Model by Lafollette out of S. F.'s Model 8th has one of the good litters on the place. Ohio Belle by Ohio Chief has one of the most fancy litters by Ohio Chief, making them line-bred Ohio Chiefs on both sides. He also has a daughter of Crimson Wonder I Am with a nice litter by Kruger Lad. He has just three good fall Ohio Chief boars on the place now, and he is not caring to sell any of them. One is out of Proud Lady, that he intends to show; another is out of Harding's Beauty by King Perfection, and he is a toppy, fancy, well-lined pig, excellent in color and full of quality. The other is out of one of his good sows and will make a good boar later on. He has some winter pigs, but he is not caring to price these just now. By fair time they will be all right. He is breeding Nebraska Belle back to Ohio Chief for fall litter and he is also breeding the Iowa State Fair sweepstakes sow, Royal Blossom 5th, and Minnie Watson. These last two sows belong to outside parties and are two of the best sows in the West. Litters from these by Ohio Chief will be worth something. Mr. Harding will be out to the fairs this fall with a nice show herd and has several good things that will be a credit to his herd. His advertisement will be found in these columns later in the season when he will have something to say about what he has for sale.

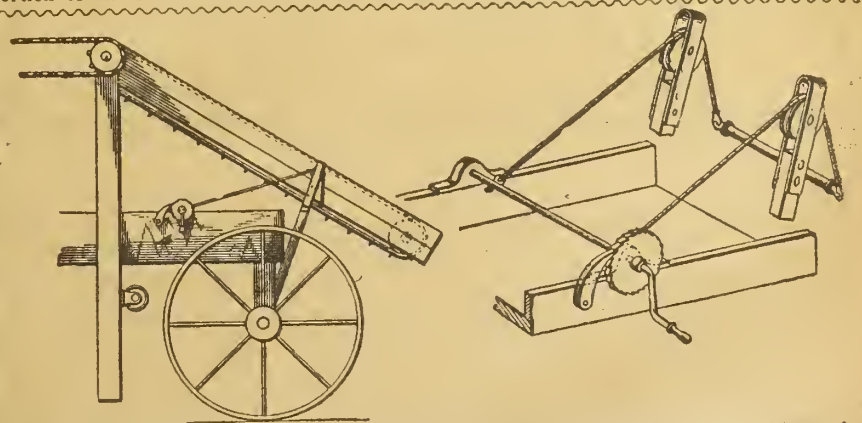

## MORE OF THE THOMAS, JAMESON & MITCHELL SHORT-HORN SALE.

It is only in dispersion sales, such as that of the greater part of the herd of Short-horns owned by the firm of Thomas, Jameson & Mitchell, of Allen, Kan., that buyers get a chance at stock that is ordinarily held above price and that would not under any circumstances be sold except that this firm must settle all partnership affairs. The sale is to be held at Kansas City, Mo., in the fine stock pavilion, on June 13th, and not in recent years, if ever, has there been offered a like number of cattle as well bred and of as great individual merit. There is not an animal in the sale but whose pedigree, or individuality, will bear the most careful inspection. Only in the Tebo Lawn sale last June were there more show animals offered than will go in this sale. Some of these have been winners and should be carried on for the coming shows. Others

Orange Viscount and White Goods, both show bulls of great merit, and breeding bulls second to none, should attract attention of the entire breeding fraternity in America. Their past records are such that mention here is unnecessary. Orange Viscount should go where a great sire of thick-fleshed, low-down cattle is needed. White Goods should be carried on for the coming shows, as he bids fair to make all kinds of trouble in the class for three-year-olds and over. As a breeding bull he is in a class with the absolute high-class sires of America. In the female section of the offering there will be found probably more absolutely high-class females than have been sold in recent times—breeding and individual excellence considered. Not one for which the slightest apology is necessary is listed, and if breeders are hunting either high-class breeding matrons or show cattle a better place to buy cannot be found. Selecting the best from the forty-five females will be no easy task. Thirty are either pure Cruickshank or Scotch, the balance being the Barrister Young Marys. Among the most valuable of the Cruickshank sorts is Duchess of Gloster 45th, with bull calf at foot by White Goods. She was got by Symmetry, one of the best sons of Barbister, and was out of 41st Duchess of Gloster by Imp. King James; second dam, 37th Duchess of Gloster by Imp. Indian Chief; third dam, Imp. 34th Duchess of Gloster by Dunblane. She is probably as valuable a brood cow as goes in any sale this year and is herself a desirable individual, being an evenly-built cow with good lines and a most desirable head. Her daughter, 47th Duchess of Gloster, a two-year-old show heifer, is undoubtedly the greatest heifer to sell in the West this year. Last year she stood first and second at each of the leading shows and had the distinction of beating every heifer that had at any time been placed over her. She shows the value of her dam, Duchess of Gloster 45th, as a brood cow, and if carried on will make the strongest show of her life this fall. The Secret cow, Sunbeam, and roan bull calf by White Goods, will be found one of the double-decker sort, massive and smooth, with a wonderful back, deep through the heart and a cow that impresses one as being the type to tie to. Her calf is a great herd bull prospect. She was got by Scottish Prince and out of Sunflower 3d by Baron Lavender 3d; second dam, Imp. Sunbeam by Royal Violet. Rose of Strathleven, with red heifer calf at foot of the sale, as a more promising three-year-old cow that should be carried on for the 1908 shows would be hard to find. She

## SHORT-HORNS FROM SINNISSIPPI FARM.

As was announced in last issue, Col. Frank O. Lowden, of Oregon, Ill., will sell at the new pavilion in Chicago, on June 11th, the choicest lot of Scotch Short-horn cattle (numbers considered) that has ever passed through a sale ring in America. The Homestead is not unmindful of the fact that many great Short-horn cattle have been sold in America in the auction ring during the past twenty-odd years and that this country has been reaping the benefit of the north country cattle. Yet the writer has been familiar with practically all the important sales since the Scotch Short-horns were first used extensively in America, and he can say unhesitatingly that he cannot call to mind any offering of strictly high-class Scotch Short-horns, the cream of Aberdeenshire and America, that compare with the Sinnissippi offering to be sold as above stated. It is needless to enter into more detail at this time concerning why Colonel Lowden is letting go of the choicest matrons at Sinnissippi. The fact is, nevertheless, that the cream of this great breeding establishment will be offered at auction to the highest bidder without any apology. As has been stated, Mr. Thos. Stanton, superintendent for Mr. Lowden, has topped the major portion of all the best and choicest offerings

The above illustration represents an attachment for the adjusting of the feeders of corn shellers, manufactured by C. E. Armstrong, Lewis, Iowa. Those who have operated shellers have long felt the want of something whereby they could raise and lower the feeder at will. For a sheller to shell fast the feeder must be the right height. With this attachment you can raise or lower the feeder with the aid of a crank, and it is all done in a minute. This attachment can be readily adjusted to all kinds of shellers, is very simple in construction and easily operated. Write to Mr. Armstrong for prices and further particulars.

in America during the past three years. It is also true that Mr. Lowden was compelled to part with a good stiff sum of money in order to secure a herd of Short-horns of this high character. We find the bulls occupy the first position in the new sale catalog, being only four in number. Some will doubtless wonder why Cumberland's Last, the great white show bull that has provoked favorable comment from the best breeders

sufficient, however, to say that they must be seen to be fully appreciated. Of the many great matrons to be sold we must say they are a distinguished lot. In reviewing the offering the writer asked Superintendent Stanton how he had cataloged the offering, and if he had put in ten or a dozen of the best cows in the forefront of the catalog. Said he, "If you can tell me which are the best ten or twenty of the sixty-one females

# THE LORD BANFF SALE

WILLIAMSVILLE, ILL., TUESDAY, JUNE 4.

60 Scotch-Bred Short-horns 60

You will notice this sale is unique in character inasmuch as the great show and breeding bull, Imp. LORD BANFF, is connected in some way with almost every lot. This warrants me in calling this a strictly Lord Banff sale. You know what Lord Banff blood is worth to your herd and there will be sixty head in this sale. You certainly cannot afford to lose this opportunity to secure some of this breeding. I would suggest that you watch the advertisement of this sale from week to week, as it will contain much of interest to you.

**Cattle** here for Farmers who want to buy the best at reasonable prices to improve their stock; cattle not loaded down with fat.

**Cattle** suitable for Short-horn Breeders who want the best. Sale includes both Imported and home-bred Scotch Cattle.

**MILTON E. JONES**

Address after May 10, for catalog or other information,  
HENRY DODGE, Secretary, Box 68, Williamsville, Ill.

WOODS, JONES, BELLOWES AND MERRIMAN, AUCTIONEERS.

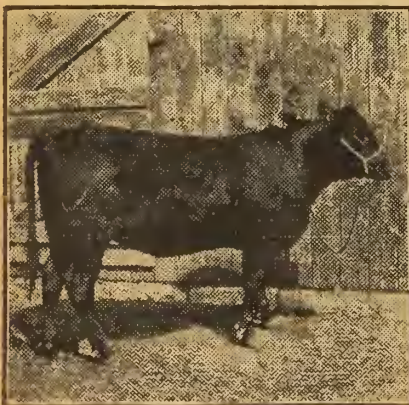

## GREAT COMBINATION SALE OF

# RED POLLED CATTLE

To be held at the W. H. Lake farm  
Hampton, Neb., June 12, 1907

42 HEAD

OF RICHLY BRED RED POLLS CONSIGNED  
BY TWO OF NEBRASKA'S OLDEST BREEDERS

**AMONG** them are young bulls good enough to head the best of herds. The cows and heifers are the best selections from our herds and those not with calf at foot are bred and safe in calf to as good bulls as are known to this great breed. Write for catalog and arrange to be with us at the sale.

Bradshaw, Neb.

## POLLED DURHAM CATTLE.

# Botna Valley Herd Double Standard Polled Durhams

BULLS all sold large enough for service. Oct. 30 we will sell forty heifers and fifteen bulls, as good a lot of Polled Durhams as ever went through a sale ring. Forty head of them sired by Marshal of Orange, one of the good polled bulls. James Wilson & Sons, Avoca, Iowa.

to be sold, I would then be able to catalog according as you have asked." This led us to consider that there was a great deal of force to this question, as it would certainly take a very superior awarding committee to make the distinction of the twenty or twenty-five best cattle in this offering. For this reason we do not deem it essential or possible to individualize on any of these females without doing an apparent injustice to those not mentioned. The student of Scotch pedigree will find rich reflection and instruction by studying the sale catalog. The best of the life work of Cruickshank, Duthie, Marr and the best breeders of Scotch cattle in America is represented within the pages of this sale catalog. The so-called plain cattle, both individually and in breeding, are entirely missing. When we say that there are plenty of cows in this sale closely approaching the type of Princess Alice, Gwendoline, Miss Ramsden 9th and 11th, Lady Emma, Imp. Lavender 34th and many other celebrities of the earlier importations

of Cruickshank cattle, the old-time lovers of Scotch cattle will fully appreciate the high character and quality of the Sinissippi offering. We make the above statement unqualifiedly and without fear of successful contradiction. To make this offering doubly valuable, nothing is contributed but what has calves at foot or is bred to one of the great herd bulls at Sinissippi. What would make a more attractive purchase than one or more of these great Scotch matrons with calf at foot or bred to Cumberland's Last or Ceremonious Archer, two of the best among latter-day American-bred Scotch Short-horn bulls? The sale will be held at Chicago, for the reason of convenience, and we trust that every reader of this article will apply to Mr. Frank O. Lowden, of Oregon, Ill., for the sale catalog. It is nicely illustrated and is a volume of rich information that should be in the hands of every lover of Short-horns. It will be sent free to all who say they saw this article in The Homestead. See page 24.

## HEREFORD CATTLE.

## BERKSHIRE HOGS.

1907 Crop of Berkshires  
at Chapel Hill.THE spring crop of big-boned English Berkshire  
pigs, has been arriving at Chapel Hill for some  
time, and to my Homestead patrons and others who  
wrote for bays and brood sows bred, only to find  
me entirely sold out, I would say "get your orders  
in early for the present crop." Address,  
W. D. McTavish, - Coggon, Iowa

## A PARTIAL DISPERSION

— OF THE —

Thomas, Jameson and Mitchell

HERD OF

## SHORT-HORNS

In Sale Pavilion, at Kansas City, Mo.,

Thursday, June 13, '07.

50

HEAD. 30 straight Cruickshank and Scotch; also  
the famous Barrister Young Marys.45 Cows and two year old heifers, all in 45  
calf to or with calves at foot by our great  
herd bulls. Orange Viscount or White Goods.

50

Attention is called to the following great brood cows: Duchess of Gloster 45th,  
and bull calf by White Goods; 47th Duchess of Gloster, a show heifer that has  
always stood first or second in the big shows; Imp. Bessie 51st, bred by Mr. Marr.  
She is the dam of White Goods; Sunbeam, a Secret, with bull calf by White Goods;  
Rose of Strathleven and heifer calf by Orange Viscount; this is one of the greatest  
cows of the breed; Cowslip's Pride, a Clipper, with show heifer by White Goods;  
Gratitude 2d, a Brawith Bud, with bull calf by White Goods; Lavender Bud, with  
bull calf by White Goods; she is the dam of our 1905 and 1906 show heifer.  
Ten two-year-old daughters of Orange Viscount all alike and all in calf to the  
show bull White Goods. Such a line of pure Cruickshank and Scotch cattle have  
not been offered in recent years if ever in a single sale in America. The famous  
Barrister Young Marys, all of one type will be found as great a lot of square  
framed, thick-fleshed cattle as are often found.

## 5 - BULLS - 5

Our herd bulls, Orange Viscount, a straight Cruickshank Orange Blossom bull,  
got by the Champion Lavender Viscount, and White Goods got by the champion  
Choice Goods and out of Imp. Bessie 51st, by Sittytton Pride are included. Two such  
herd bulls will not soon again be exposed at public treaty. The others are desir-  
able young Scotch bulls, just of serviceable ages. Write today for illustrated cat-  
alog which gives complete information mentioning this paper.S. D. MITCHELL, MGR.,  
ALLEN, KANSAS.

Auctioneers, Col. Bellows and others.

## LARGE YORKSHIRE HOGS.

LARGE YORKSHIRES, the Bacon Hog. BREEDING STOCK FOR  
SALE AT ALL TIMES.Pairs and trios, not axing. My Foundation herd was selected in Canada of the best breeders by me  
personally. There is no breed of hogs in existence to-day that makes better mothers and can raise  
more pigs in a litter. Try this breed if you want to make money. Write for prices.

F. RABELER, LEIGH, NEBRASKA.

HORSES.

FRANK IAMS'

"Peaches and Cream"

"Black Boys"

Largest pair of Stallions in U. S.

Sweepstakes Winners. -:- A Whole Horse Show

All of Iams' "Superb bunch" of "show stallions" are offered for sale. Dad, it's a "100 to 1" they are the "best ever." Get into "Iams' band wagon." All railroads lead to Iams' Importing Barns at 2 cents a mile, and Iams'

SUMMER PRICES

are pushing competitors "off the roof" hypnotizing buyers with "top notchers" at "LET-LIVE-PRICES." John, if you pay cash or bankable note you will buy a stallion of IAMS. IAMS' "SELLING CLOTHES" "FIT" "all the boys." He saves thousands of dollars to stallion buyers. He is not in the "STALLION TRUST." He places \$1,000 or \$1,500 Insurance.

\$1,000 — SAVED AT IAMS — \$1,000

Ikey! what a rich graft these "SLICK STALLION SALESMEN" are working on the honest farmer, selling fourth rate stallions at \$2,000 to \$5,000. Iams sells "top notchers" so good, big and cheap THAT THEY DO NOT NEED TO BE PEDDLED TO BE SOLD. Mr. Buyer, see Iams' stallions yourself. Take no "GOLD BRICK STALLION SALESMAN'S WORD." Iams has "THE GOODS" you read about. His establishment is worth going 2,000 miles to see. Iams makes his competitors "HOLLER." He is knocking "HIGH PRICES" out of the Xmas tree. Iams saws wood, "BUTTS IN," sells more stallions each year. He makes every statement good. Georgie, dear! Buy a stallion of Iams. His 1,200 stallions are MUCH BETTER than our neighbors paid those Ohio men \$4,000 for. Then I can wear the diamonds. Iams speaks the languages, buys direct from BREEDERS, pays no buyers, salesmen or interpreters, has no two to ten men to divide profits with. Iams guarantees to sell you a BETTER stallion at \$1,000 to \$1,500 (a few higher), than are sold to Stock Companies at \$2,500 to \$5,000 by SLICK SALESMEN, or pay you \$100 for your trouble, you the judge. Iams pays horse's freight and buyer's fare; gives 60 per cent breeding guarantee.

Write for eye-opener and greatest horse catalog on earth.

# OFFERING OF SCOTCH SHORT-HORNS

## EXTRAORDINARY

..... FROM SINNISSIPPI FARM AT CHICAGO, ILLINOIS, JUNE 11, 1907 .....

On June 11th I will sell 65 head, 4 bulls and 61 cows and heifers. All of breeding ages. Forty females have calves at foot, and all are bred to Ceremonious Archer, Cumberland's Last, or other noted bulls.

**JUNE  
11,  
1907**

**E**VERY female is fit to grace any herd and every bull a herd header, including Cumberland's Last. Many of the best imported females from Aberdeenshire and the cream of America's best breeding establishments are to be found in this consignment. I am told that no breeder ever offered at one day's sale the equal of this selection (numbers considered). Every animal is of breeding age. It has been my ambition to sell an offering of Scotch cattle second to none. In parting with Cumberland's Last I am selling what I believe to be the best individual Short-horn bull I have ever seen. His calves are very promising. Every breeder and admirer of Short-horn cattle in America is earnestly invited to be with me at Chicago, Ill., June 11, 1907, to inspect these cattle.

**JUNE  
11,  
1907**

**F. O. LOWDEN,**  
THOS. STANTON, MANAGER.

**OREGON, ILLINOIS.**  
COLS. WOODS, BELLOWS, JONES AND GARDNER, AUCTS.

## Dispersion Sale of Scotch and Scotch Topped SHORT-HORNS

**ON JUNE 14th**  
at Farmersburg, Clayton County, Iowa,

I will disperse my entire herd of Scotch and Scotch topped Short-horn cattle, consisting of

**29 FEMALES AND 12 BULLS**

**T**HERE will be 20 Scotch females and 6 Scotch bulls in the offering, among which are as good Scotch Short-horns as are to be found in America to-day. The cows are in calf to Imp. Great North 179848. This is the best lot of Scotch cattle ever offered in this section of Iowa. Farmersburg is on the Elkader branch of the Milwaukee system southwest of North McGregor, Ia. Parties from Illinois, Wisconsin and Iowa will find this a convenient point to reach by way of the Milwaukee system. Good judges pronounce much show material in this offering. All parties from the west coming the night before the sale should get off at Monona, where free livery will be in waiting the following morning for the sale. All others from the southeast and north get off at North McGregor and arrive at Farmersburg at 10 o'clock the morning of the sale. Send for catalog, now ready. Mention Homestead.

**H. H. DIERS, Proprietor.**

Auctioneers: Cols. F. M. Woods, R. W. Barclay and F. O. Cubbage.

## SCOTCH AND SCOTCH TOPPED

**New York, Ia., Saturday, June 8, 1907**

Located 10 miles south of Chariton, Ia., 10 miles northeast of Corydon, Ia.

**LOT 1. BARON VICTOR 250111.**  
Red; calved Oct. 2, 1904. Bred by M. L. Logan, Lineville, Iowa.  
Dam Sire Breeder  
Got by Victor Knight 177893....J. W. Smith & Son  
Victoria of Meadow Farm 4th Baron Goldust 3d 127367....Forbes Bros.  
Victoria of Meadow Farm .. Lord of Linwood 93476.....W. A. Harris  
Victoria of Glenwood 5th .. Earl Marshall 92167 .....Wm. Duthie  
Victoria Veach ..... Favorite 5641 .....Wm. Duthie  
Imp. Victoria 73d ..... Roan Gauntlet 45276 .....A Cruickshank

**45 HEAD--13 bulls including my Cruickshank  
Herd Bull, 20 cows, 12 choice  
two year old Heifers.**

BARON VICTOR 250111, considered one of the best Cruickshank Victoria bulls in Iowa, will also be sold. There will be eight head of Scotch cattle of the Victoria, Rosemary and Lavender tribes in the sale. The rest are well Scotch-topped. Most of the young things are sired by Victor Maple, a son of George Bothwell's Grand Victor, and Vallery 2d both richly bred Victoria bulls. My cattle are good milkers and there will be some excellent cows and some very choice heifers in the sale. While I am dispersing my herd I am also guaranteeing everything, and it will be a splendid opportunity to buy Short-horn cattle. Parties from a distance can come to Chariton and stop at the Bates House or at the Rhea hotel, Corydon, Iowa, at my expense, and there will be free conveyance to and from the farm. Address me for catalog as follows:

**W. E. CUTLER, - CORYDON, IA.**

Col. Geo. P. Bellows, Auct., Fennell and Hasbrouck, Assistants.

### SETTLING THE RAILROAD QUESTION.

From the earliest settlement of the middle West, the transportation problem has been a matter of prime importance to the farmer. At first, the vital question was how to secure railroads. Later, when this great, prosperous section had become a network of railroads, the issue became one of equal and reasonable rates. More recently, the questions of speed and facilities of service have been uppermost in the public mind; scarcity of cars and slow trains being the subject of more complaint than excessive or discriminating rates. All these problems have had their political as well as their economic side; and the action or non-action of congress and the state legislatures respecting their varying phases has kept public opinion more or less in a ferment for the life-time of a generation.

For a long time, the railroads vigorously opposed legislation placing the carrier under either state or federal control. They successfully resisted, for a time, even legislation prohibiting discriminations between shippers and localities; prohibiting the granting of rebates and making it unlawful to issue free passes to favored shippers, public officials and others. Little by little, however, the pressure of public opinion secured the incorporation into the national and many of the state laws of provisions recognizing the public character of transportation and the obligation of the carrier to give adequate and equal service to all at reasonable rates. The "granger" legislation of the early '70's; the uprising of the people twenty years ago which resulted in the enactment of the interstate commerce law and a long series of judicial decisions established these principles at least in theory. To an impatient public, however, it often appeared as if little real progress had been made in bringing the common carrier under the domain of law.

Such was the situation at the opening of the Twentieth century; but since that time, the most thorough and radical revolution in public conditions respecting transportation that ever occurred in this country has occurred. The vast official influence of the president of the United States has been thrown into the scale in favor of strict public regulation of railroads. The interstate commerce law has been made far more stringent in its provisions. The interstate commerce commission has been given increased power over rates. The whole power of the government has been used to enforce these new laws and the neglected prohibitions of the older statutes. The free pass has been done away with. The railways have been given to understand that they must scrupulously obey the laws against discriminations of all kinds. The entire course of the government has added emphasis to these admonitions. For a time, there was a great outcry against the new policies. Next, entreaties were addressed to the president, who was told that if he persisted in his course a financial crisis would result. A violent panic actually took place among the speculators of Wall street and it was pointed to as proof of the damage to business which would result from firm regulation of the railroads. Through all these demonstrations, the president adhered to his original position, declining to modify his policy or make public any statement indicating that it was to be abandoned or changed.

A large proportion of the legitimate

railroad interests of the country have now apparently accepted the new situation as foreshadowing a permanent change in the attitude of the government. They have been led to accept this view in part from the conviction that, unless they accepted regulation, they would ultimately have to face the alternative of government ownership. It now seems probable that the last vestige of the railroads' opposition to federal regulation will soon disappear.

An address delivered by the president at Indianapolis on Memorial day has attracted wide attention by reason of its emphatic reiteration of the president's well known views on the entire railroad question. There was nothing radical in the president's contentions. He maintained only that the railroads must submit, once for all, to government regulation as to their rates and that they must be subjected to additional regulation such as would prevent the further watering of their stocks. He expressed the opinion that their methods of operating their properties, issuing securities and keeping accounts should be as strictly supervised as the affairs of national banks are now controlled. This, he believed, would safeguard the interests of their stockholders, greatly increase the disposition of the public to invest in their stocks and bonds and thus provide capital for the added facilities so badly needed. He emphasized the importance of refraining from doing anything which would cripple this great and important

interest or deprive it of just and even generous rewards.

The president's Indianapolis speech really settles this greatest economic problem of the generation. Details will have to be worked out in the next few years, but there is no reason to doubt that the problem will be speedily and completely solved. It is a safe prediction that railroad opposition to the president's policy will gradually cease, and that the railroad question will be measurably removed from politics for the future.

Of all the great industries of the country, none will derive greater benefits from the settlement of this vexed question than that of agriculture. Assured of just, reasonable and equal rates for the transportation of its products, and of the general prosperity of other interests upon which it depends for a market, a prosperity which reasonable rates of transportation cannot fail to promote, the future of agriculture becomes permanently brighter and better.

### GRAIN FOR GRASS CATTLE.

The following communication has been received from a Missouri subscriber:

I am a beginner in the pure-bred stock business and would like a little advice concerning methods of feeding young stock during the summer months. I am handling the Short-horns and have on hand cows, calves and also some yearling heifers and bulls. What I would like to know is this: Where pastures are good, do you think it will be necessary to feed yearlings and calves over six months old grain during the summer

months? My stock has been brought through the winter in good shape and they are fairly thick-fleshed at this time, so that the question with me is, will they hold their flesh on grass alone or will it pay to feed some grain in addition? I would like especially to be informed as to what is the custom among breeders who have established herds about feeding in the summer months.

The condition of the herd itself is the best index by which a man must decide whether it is advisable to feed grain or not. This year, because of short rainfall during the spring months, pastures are rather shorter than usual, and under the circumstances where one is ambitious to keep his herd in good shape for inspection at all times, we believe that it will pay to feed grain, not only to the cows, but to the calves, under as well as over six months old, and also to the yearlings. The breeder who has a reputation to maintain finds it necessary to do a good deal of grain feeding the year round, and we see no reason why the same rule will not apply to the man who has his reputation to make. There is only one way to determine whether a Short-horn will flesh up evenly or not, and that is to put on the flesh; and this is why men in making their purchases generally take the so-called "fat" ones. In the case of the heifers not intended for sale, but to be kept for breeding purposes, there is nothing to be gained in making them overly fat, but we do think that it pays to keep them at all times in a thick-fleshed condition.

On a very well managed farm the feeding of grain during the hot summer months should not be regarded as an extravagance, apart from the labor involved, because every pound of grain fed simply means that the equivalent in food elements will be saved in grass. Of course, where one is better fitted for the growing of grass than grain, it will cost more to feed the grain; but, as said before, on the average farm the one almost balances the other apart from the labor involved.

When it comes to handling young bulls nothing but heavy grain feeding will bring them into that condition of flesh where they will sell well on inspection, or satisfy the purchaser if sold on a mail order. One can hardly ever make a mistake in judiciously feeding a young bull about all the grain and succulent fodder that he will consume during the summer months. Their general characteristics, together with the fight they must make against flies and the effect of the hot weather, makes it a question that calls for considerable skill if the young bulls are brought through the summer and fall in a thick-fleshed condition.

The beginner in the pure-bred business generally makes the mistake of under-feeding his young cattle and the presentation of this fact alone should answer this subscriber's inquiry. There is little danger of making the mistake of going to the opposite extreme.

Seeing that small towns rely absolutely on the support they draw from the surrounding farms, it is surprising that better provision is not made for rest rooms for farmers' wives and daughters. In many towns the only place where women can rest and wait for the men folks is the office of the feed barn. It is a wonder that some of these smart club women haven't caught onto that idea and done a little work along that line.

The subjects of our illustration are the two beautiful white heifers, Sinnissippi Lady and Sinnissippi Rose 2d, daughters of Ceremonious Archer. They were bred and are owned by Col. Frank O. Lowden, of Oregon, Ill., and are consigned to his forthcoming sale on June 11th, at Chicago, Ill. This pair have provoked favorable comment by every one who has seen them. It falls to the lot of few breeders to produce as good a pair as these; one of them is a straight Scotch heifer out of Imp. Guelder Rose, and the other is a Scotch-topped Lady Elizabeth, being one of the two animals in the entire sale that are not Scotch. Her daughter was Lady Hamilton by Imp. Marquis of Zenda, a full brother to the famous Imp. Missle cow, Missle 153d, sold by the late Mr. W. S. Marr in Chicago, in 1901 for \$6,000. This pair look near enough alike to be twins, and we believe that no man can tell from their picture which is the Scotch heifer and which is Lady Elizabeth. These are only fair samples of the other sixty-three head consigned.

## CLASSIFICATION FOR CARRIAGE HORSES.

The National Department of Agriculture, in co-operation with the American Association of Trotting Horse Breeders, has prepared a classification for American carriage horses to be used by the various state and national fairs. The type desired for the American carriage horse is as follows: Not under fifteen hands for mature horses; smooth, compact and symmetrical conformation; neck of good length, inclined naturally to arch; sloping shoulders, well set legs of medium length; sloping pasterns and good feet; short, strong back; well sprung ribs, well ribbed up to coupling; smooth loins; full flanks; straight croup with well set tail; full, round buttocks.

The classes are as follows:

- Class 1. Stallion four years old or over.
- Class 2. Stallion three years old and under four.
- Class 3. Stallion two years old and under three.
- Class 4. Stallion one year old and under two.
- Class 5. Stallion with three of his get of either sex; get need not be owned by exhibitor.
- Class 6. Mare four years old or over.
- Class 7. Mare three years old and under four.
- Class 8. Mare two years old and under three.
- Class 9. Mare one year old and under two.
- Class 10. Mare with foal of either sex.
- Class 11. Foal under one year old, either sex.

Classes open only to horses of American blood.

Stallions in classes 1 and 5, inclusive, must be registered either in the American Trotting Register as standard; in the American Morgan Register or the American Saddle Horse Register, and certificate of such registry must be shown in the ring if required.

Entries in all classes for mares, entries as get of sire in Class 5 and produce of mare in Class 10, and entries in Class 11 must be sired by a stallion registered as above, but the dams of such entries need not be registered mares; the breeding of dams, however, so far as known, must be given when entry is made.

No mare having any draft cross will be eligible.

Any exhibitor falsifying the breeding of entries will be barred.

Entries in all classes must be practically sound.

The following percentages will govern judges in Classes 1, 2, 3, 4, 6, 7, 8, 9: General conformation and all round suitability as a carriage type, 60 per cent; style, action and manners, 40 per cent.

The following percentages will govern in Class 5: General conformation and all round suitability of sire as a carriage type, 30 per cent; style, action and manners of sire, 20 per cent; general conformation and all round suitability of get as a carriage type, taken as a whole, 30 per cent; style, action, manners and uniformity of type in get, 20 per cent.

The following percentages will govern in Class 10: General conformation of dam as a brood mare of the carriage type, 50 per cent; general conformation, style, action and manners of the foal, 50 per cent.

The following percentages will govern in Class 11: General conformation of entry as a carriage type, 70 per cent; style, action and manners, 30 per cent.

The purpose of adding this new class is to encourage the production of the "full-made" driving horse of combined speed and action—action in this case referring to free knee and hock movement. It is the type of horse that the government is trying to produce and "fix" at the Colorado Experiment Station.

### IOWA SWINE BREEDERS' MEETING.

As announced previously in the columns of The Homestead, the summer meeting of the Iowa Swine Breeders' association will be held at Des Moines, on Tuesday, June 11, headquarters being at the Savery Hotel. The secretary, C. C. Carlin, has prepared the following program which will be carried out on the date mentioned:

#### TUESDAY AFTERNOON.

- President's Address, Wm. D. McTavish, Coggon, Iowa.
- "Influence of Proper Sanitary Conditions in Prevention of Disease Among Swine," Dr. J. H. McNeill, I. S. C., Ames, Iowa.
- "Piggy's Troubles," Harvey Johnson, Logan, Iowa.
- "Care and Management of Litters," J. M. Stewart, Alnsworth, Iowa.

#### TUESDAY EVENING.

- "The Iowa State Fair and Its Object; the Duties and Privileges of Exhibitors," R. S. Johnston, Columbus Junction, Iowa.
- "Relative Value of Spring and Fall Litters," Geo. S. Prine, Oskaloosa, Iowa.

The farmer who is not making progress is retrograding. It is practically impossible to stand still. If it were possible to remain stationary, the effect of it would be the same as going backward; for the rest of the world is advancing, and the farmer who knows no more today than he knew yesterday is just that far behind the rapidly moving procession of agricultural knowledge and practice. Your knowledge of soils, seeds, methods of cultivation, harvesting and marketing your product; your information regarding live stock and the breeding, feeding and disposal of the same; and your ideas of farm management in all of its details should always be distinctly up-to-date. A scientific writer has defined life as the capacity of an organism to readjust itself to its ever changing environment. The live farmer is he who constantly readjusts his theories and practice so as to keep abreast of the best wisdom of his times. The Homestead is the exponent of agriculture of that kind. It speaks to and for the farmer who is constantly learning and applying, with practical common sense, the principles of agricultural science.

The Homestead is proud of its great constituency of progressive farmers and stockmen. It believes in them and has faith in them. Thousands of its readers rank as the leaders of their respective communities, for the very reason that they are intelligently progressive. The Homestead is edited with special reference to the needs of such men. Every one of its departments; every editorial and contributed article, is written largely with the view of serving their interests. At the same time, we aim to make our pages so clear in meaning, so definite in teaching, so simple, direct and straightforward in doctrine, that the young and inexperienced will find The Homestead a safe and reliable guide, while the expert will be benefited as well by its solid instruction.

It is our ambition to have readers who carefully read and digest every word of The Homestead, from first page to last. He who glances over a farm paper, skimming its contents or selecting an article here and there as it may happen to catch his fancy, falls much short of being our ideal subscriber. The farmer who is a thorough reader is much more likely to be a thorough farmer than he who turns the leaves of his paper casually and selects a few articles for special consideration. The very act of mastering every part of a paper helps to fix the habit of thoroughness upon the mind of him who practices it. The subject which, at the first glance, appears unfamiliar and unattractive will become interesting upon closer familiarity. Your mind is broadened by study of new fields of thought; and every new

subject you master gives you new views of the old subjects which are most familiar. Do not get into ruts. Read every line of your Homestead. You will like it better; and it will help us to realize our motto, of making every issue of the paper worth the price of a year's subscription to every thoughtful reader.

Do not omit the advertisements when reading The Homestead. Both the live stock announcements and the commercial propositions exploited are worthy of your attention. This is an age of new ideas; and many of the best ideas are developed and exploited through advertising, and can be learned only by reading advertisements. Good advertisements contain much information about processes of manufacturing, different strains of stock, and new phases of a multitude of subjects. Do not despise the advertising columns. They may mean both financial and intellectual gain for you.

Mr. William Lampmann, of Omaha, Neb., land and immigration agent of the Oregon Short Line railroad, is pleased with The Homestead's methods of doing business and says so in a recent cordial note to the publisher. "You may feel assured," writes Mr. Lampmann, "that I shall always say a good word for The Homestead. I have done it in the past simply because the results from my Homestead advertisements were much greater than the same advertisements in other farm papers and dailies of large country circulation; but since I have become acquainted with your broad-gauge business methods, I have still greater incentive to recommend your paper." Live stock, land, poultry, commercial and all other advertisers write us in a similar spirit of appreciation.

Mr. George C. Mosher, of Kansas City, Mo., owner of Hillcrest Farm herd of butter-bred Holstein-Friesian cattle, president of the Missouri State Dairy Association and vice-president of the Missouri Live Stock Breeders' Association, recently made a crucial test of the advertising value of The Homestead and its allied publications, using them alone so that weak and inefficient mediums did not get credit for Homestead results. He writes: "Please discontinue my classified advertisement of Duroc pigs in The Homestead, Farmer and Stockman and Wisconsin Farmer. These publications are the only ones which have carried this advertisement; and to show you their value as advertising media, I would simply say, we have booked orders for our entire spring crop of pigs, and shall probably have to return the money to some of our correspondents."

The above is cited to prove a fact which is sometimes disputed—the fact that papers of large circulation are much

better mediums for the live stock advertiser than papers which reach but few farmers and breeders. Absurd though it seems to the rational mind, some breeders insist that circulation cuts little or no figure in live stock advertising. If one of those who put forward this contention were at a county fair, for example, and there was a crowd of five thousand people present, to whom he wished to distribute circulars on some important subject, would he feel just as certain of results if one or two thousand circulars were distributed in the crowd as if five thousand were placed in the hands of those present? If he distributed catalogs by mail to five hundred breeders, would he expect the same results as if he sent out a thousand? It is self-evident that a paper which is read in a hundred thousand farm homes, as The Homestead is, will sell more horses, cattle, hogs, sheep, poultry, lands, farm machinery or any other property desired by farmers than would be sold by a paper of small and scattering circulation. It should be remembered that The Homestead has a larger circulation by many thousands in Iowa alone than any other weekly agricultural paper published in Des Moines has in all the states of the union combined—not to mention The Homestead's vast circulation in Illinois, Nebraska and other neighboring states.

Mr. Mosher's results from a classified advertisement in The Homestead, Farmer and Stockman and Wisconsin Farmer are a striking proof of the value of this department of our paper. We cordially recommend our classified department to advertisers of land, poultry, live stock and all classes of miscellaneous articles. The three papers reach nearly a million farm readers, in the great states of Iowa, Illinois, Wisconsin, Minnesota, North and South Dakota, Nebraska, Missouri, Kansas and Oklahoma. An advertisement of not more than twenty-four words is inserted in all three papers for \$1.20. The rules governing the department are printed at the top of the page on which it appears.

It is not too late for those who have not availed themselves of our Red Letter combination offer to do so. This combination consists of The Homestead, the foremost agricultural weekly in the world; The Chicago Weekly Inter-Ocean, a splendid general family newspaper, teeming with interesting news and miscellany; The Kansas City Weekly Star, a courageous and independent general newspaper; The Homemaker, a delightful monthly for farmers' wives and daughters, and The Farm Gazette, a beautiful monthly magazine of profitable agriculture. All five of these great publications are sent to any address in the United States for \$1.25 a year. Send your order to The Homestead.

"Which is Most Detrimental to the Business, the Breeder Who Undersells or the Boomer and High Seller?" J. A. Benson, Primm, Iowa.

"Care and Treating of a Crop of Pigs for the Greatest Profit," R. J. Harding, Macedonia, Iowa.

On the following day, Wednesday, June 12th, the National Association of Expert Swine Judges will hold its annual meeting. Scoring exercises and examination of candidates for certificates as expert judges will take place in the forenoon beginning at 9 o'clock. In the afternoon, beginning at 1 o'clock, a practical demonstration of the value of the score card as an index to the market hog will be given under the direction of Prof. J. J. Ferguson, of Chicago.

The Homestead desires to emphasize the importance of a large number of swine breeders attending this annual meeting. No man is so successful in the business or so well advanced in the art and science of feeding and breeding hogs but what he will learn much from the splendid program that has been prepared, while, in addition, there are always benefits derived from men of the same calling meeting together in a social way. We have said before, and we repeat it again, that there are hundreds

of swine breeders in Iowa who can scarcely afford not to attend a meeting of this character, though the excuse is often given by men that they cannot afford to lose the time required to attend this meeting at this time of year. We put it the other way and again repeat that many breeders cannot afford to miss the meeting.

The Western Passenger Association has made a reduced rate and persons buying a ticket to Des Moines at the regular rate should take the agent's receipt, thereby entitling them to a return ticket for one-third fare, plus 25 cents.

### THE HORSE DEPARTMENT OF THE IOWA STATE FAIR.

We are informed by the superintendent of the horse department of the Iowa State Fair, Prof. C. F. Curtiss, that the classification has been so extended and the premiums raised so that now they aggregate the sum of \$3,000. The stall fees have been reduced to a merely nominal fee.

A new classification has been added for American carriage horses. This is the first time that such a class has been made at any state fair or public show. The contract has just been let for a

new \$10,000 horse barn to be erected on the Iowa State Fair grounds this year. This will constitute the first section of a barn that, when completed, will have a capacity of over 600 horses and will cost from seventy-five to eighty thousand dollars.

### Iowa Climate and Crop Bulletin.

The following climate and crop bulletin is issued by the United States Department of Agriculture, Iowa section, from the central station at Des Moines, Iowa, for the week ending May 27, 1907:

The week began and ended with temperature at or near the frost line, and the average ranged from 2 to 4 degrees below the normal. There was an excess of cloudiness with copious rainfall, and reports indicate that the drouth has been effectually broken in all parts of the state. In extensive areas there was considerable excess of rainfall, which caused damage to crops in some localities, and retarded farm operations several days.

On the whole the week was favorable to the growing crops. The weather was sufficiently warm two to three days to quicken germination of seed in fields, meadows and pastures. Early planted corn appears to be coming up fairly well, and there will be not more than the usual amount of replanting. Cultivation is in progress, and the general crop situation is encouraging.

## Farm Furrows

Turned by a Practical Farmer.

Wire grass should make attractive feed for goats.

House-warming has been a pretty regular entertainment at our home this spring.

Some steers are built for feeding while there are a much smaller number built for fattening.

The remote effect of licking a boy may be straightening; the immediate effect is certainly not.

Success is always achieved by the sacrifice of others. One could think up a big sermon along this line.

If the foretop of a horse's mane does not meet with your ideas of good looks, then cut it off. Hair wouldn't feel good over my eyes.

It is said of churches that the average congregation is as a company of old women sailing close to shore instead of being courageous seamen.

The all-absorbing idea of to-day is to catch up with the future. Men are wrecking their lives to do it. Eventually they recruit our sanatoriums.

Milk and honey are the only two commodities which seem to exist exclusively for good purposes. Every other food product plays a part in its own reproduction.

I have this advice for boys: If you must sow wild oats, let the seeding period be short or the harvest may be monotonously long. If you cut the seeding operations out altogether a good

## 397,000 Bu. of Corn in 4 Yrs. Without a Hitch!

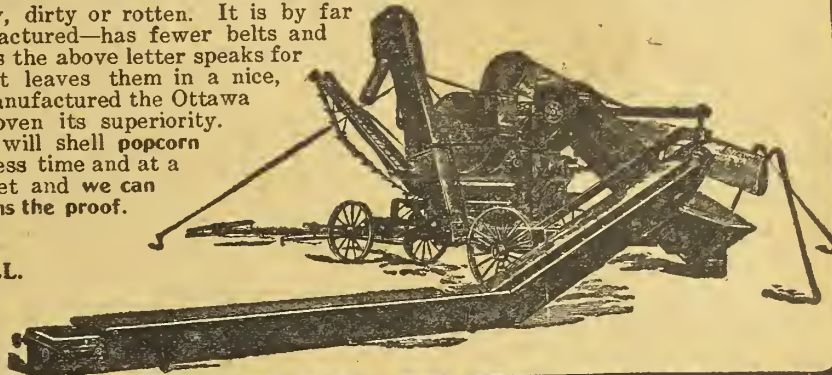

That is only one of the many good records made by the Ottawa Dustless Cylinder Corn Sheller. Here is a letter from a man who knows—a man who has used an Ottawa Sheller for four years. We have many more just as good.

Dear Sirs:—I turned the cylinder around as you told me and it works like a new one. I never run a sheller with which I could do anything I wanted to until I purchased an Ottawa "C" Sheller. I never found any corn I could not shell from the cob. I have operated this sheller less than four (4) years and shelled 397,000 bushels of corn and these are the first repairs I have ever ordered, amounting to \$14.44, so let the good work go on. Yours truly,  
OMER KINSEY, Minier, Ill.

## The Ottawa Dustless Cylinder Corn Sheller

will shell corn in any condition—wet, dry, dirty or rotten. It is by far the simplest corn sheller ever manufactured—has fewer belts and less gears. As to durability and repairs the above letter speaks for itself. It does not crush the cobs, but leaves them in a nice, clean condition for fuel. We have manufactured the Ottawa Sheller for 50 years. Time has proven its superiority. Absolutely dustless. Only machine that will shell popcorn perfectly. It will shell more corn, in less time and at a less cost, than any sheller on the market and we can prove it. Our illustrated catalog contains the proof. Write for a copy now and be convinced.

job may be offered you and as you are not busy harvesting your crop you will be at liberty to accept.

Every farmer should know how to ground his wire fences. Simply thrust a length of heavy wire down the side of the post several feet and staple to the fence wires where they cross.

Asparagus is being greatly improved in quality at some of the experiment stations. It is said that stalks ten inches long and one inch through may be grown and still be as tender as any on the market.

Those who have found that cement floors in hog houses tended to keep the bedding damp and subjected the animals to colds, have found the objections speedily overcome by placing a false board floor on the cement.

Farm folks bewail, as a rule, the seclusion of their homes. In the city, on the other hand, this very seclusion is persistently sought at the expenditure of thousands of dollars. How little we appreciate our advantages.

Right at present I would rather have my money invested in plain black dirt than in the finest fruit orchard in the frost-belt. The past winter and present season has been unusual in many respects. People in Iowa report ideal weather, and it seems that that state has been favored at the expense of those around it with Missouri as a possible exception. The spring weather so far has been a "frost," figuratively and literally.

I recently heard a boy laughed at by his companions for calling the color of a horse red. He ended his discomfiture by saying, "Well, what's the difference 'tween red and bay, anyway?" How many grown folks can tell?

No doubt every person has known individuals who have lived a lifetime with a bullet in their brain. It is a still more remarkable fact that there are individuals who live long lives with nothing in their brains.

A good horseman does not spend all of his time with the brush and comb. He regularly inspects the feet of his charges. I have known a piece of corn cob to lodge in the grooves of the sole and cause acute lameness.

The acme of unwillingness in hired help is pretty well suggested in the commonly heard phrase, "I wasn't hired to do that." It is a most-grating sentence to an employer, for it marks at once a discontented spirit.

A young farm-lad said to me the other day: "I wish I could learn to be able to know a good animal from a bad one at first sight." Little did he realize how big a subject he had taken in hand—a worthy ambition nevertheless.

Butchers in the West are seldom asked to remove the blade from a shoulder of

You can secure a genuine JONES 5 Ton \$45.00 Wagon Scale, all steel trussed levers, brass complete beam without loose weights, beam box, platform 14 x 8, for pit or without. Warranted against all defects. I, EDWARD F. JONES, personally guarantee this scale. Pay balance when ship comes in. Send me a postal for my new plan.

Address only JONES He Pays the Freight. Box 418-A, Binghamton, N. Y.

## FRUIT GROWING

The rich irrigated lands of the Arkansas, Grand, North Fork and Uncompahgre Valleys of Colorado, and the Farmington District of New Mexico, offer exceptional opportunities for the fruit grower. Pears, Peaches, Apples, Grapes, Apricots, Plums, Melons of all kinds and small fruit of every variety are raised with a greater average yield per acre—and a finer quality—than in any other section of the United States. Markets are close at hand and the demand exceeds the supply.

### The Denver & Rio Grande R. R.

"Scenic Line of the World"

reaches all the above districts and offers special inducements to those seeking locations. Write to-day for free descriptive booklets.

**S. K. HOOPER,** GENERAL PASSENGER AND TICKET AGENT, Denver, Colo.

mutton for a stuffed roast. Few, indeed, know how to do the trick properly. By detaching the flesh around the joint, the blade may be neatly withdrawn, leaving a cavity for stuffing.

A close coupled driving horse is the conformation to be desired, nevertheless there is such a thing as a driver being too short in the body. In such cases there is a constant tendency for the rear feet to hit the fore feet in action. A long stride is hindered.

The life history of the salmon as portrayed in a recent popular weekly is a most interesting piece of nature study. This fish dies, without exception, after depositing its spawn and tons of the

dead bodies are used as fertilizer along the Columbia river in the state of Washington.

There is nothing more disgusting than to see hogs compelled to root for feed submerged in six inches of mud. It seems to me that the man who throws ears over the fence under such circumstances possesses sensibilities not much superior to the beasts themselves.

A thorough change is the idea of a vacation. The country is refreshing to the city man because everything is fresh-air food and nature. The farmer often finds an enjoyable vacation in a few days spent in the very busy city which the business man seeks to get away from.

# THE HOMESTEAD

A Practical Journal for the Farmer,  
Stockman, Fruit Grower, Poultryman,  
Gardener and Housekeeper.

BY JAMES M. PIERCE.

JAMES ATKINSON, Editor in Chief.

ESTABLISHED IN 1855.

Entered at Des Moines Postoffice as second class matter

PUBLISHED EVERY THURSDAY.

**SUBSCRIPTION RATES**—Single subscriptions, \$1 a year; ten copies one year, \$10, and an extra copy to getter up of club. In clubs of fifty or more, 30 cents a year; in clubs of one hundred or more, 25 cents a year. Single subscription three years in advance, \$2; five years in advance, \$3; ten years in advance, \$5. Subscription price in Canada, \$1.50 a year. Remit by draft, registered letter, post-office or express money order. In renewing subscription, use same name and initials as address on paper, or explain why you change. In changing your postoffice address, send your old address as well as the new. Errors in address or failure to receive paper within two weeks should be promptly reported to the publisher.

Address all communications and business letters to  
**THE HOMESTEAD COMPANY,**  
Des Moines, Iowa.

## CLASSIFICATION FOR INTERNATIONAL EXPOSITION.

We are informed by General Manager B. H. Heide of the International Exposition that at the last directors' meeting the classification for the 1907 exposition was passed on. In the main the classification will be the same as in 1906, though several horse and sheep record associations that have never been recognized in the past at the exposition have been admitted and liberal premiums have been set aside for the newer breeds. A number of special awards in the shape of silver cups, gold medals and cash premiums were offered by firms and individuals, and a list of these will be furnished in the near future.

It was decided, owing to the danger of disseminating disease, not to add classes for breeding hogs this year, and the show will continue to exhibit barrows only.

The International will be held this year from November 30th to December 7th, and so far as present prospects indicate, it will be larger than ever before.

## A POST-MORTEM EXAMINATION RULING.

The large packers of Chicago have made a ruling by the terms of which they will on and after a certain date buy cows and heifers subject to post-mortem examination. They plan to pay the commission houses full value for the animals on foot, the responsibility for settlement with the producer being placed upon the commission firm by withholding payment until after the post-mortem examination.

The Chicago Live Stock Exchange is resisting this innovation with all the forces it can command, claiming that the questions involved are much more far-reaching than the loss on condemned cows and heifers. The Drovers Journal points out that the ruling is unfair as between the seller and the independent buyer who does not ask for this favor. It upsets the time-revered cash market system which has worked so satisfactorily since the market was established. It is thought by the Exchange that the ruling, when once placed into force, will soon include steers, sheep and hogs. It will tend to throttle competition by eliminating the shipper, speculator, butcher and small packer.

At the present time about 2 per cent

of the animals slaughtered at the Union Stock Yards do not pass government inspection, and this loss is of course borne by the packers. It has always been considered that prices were fixed after due allowance has been made for this percentage of loss, so that even at the present time the producer and not the packer shoulders the loss finally that results from government condemnation.

Members of the Live Stock Exchange, of Chicago, have always prided themselves on the fact that their customers were paid on the very day that a given consignment of animals were sold, but if the packers are able to enforce the ruling that is now contemplated delay in settlement will result, and this will unquestionably tend to discourage the feeder who has not for years made more than a small margin of profit on his feeding operations.

In their attempts to resist putting into force this seemingly unreasonable ruling the commission merchants of Chicago unquestionably have the support of producers, not only in the corn belt, but throughout the range territory.

## SOCIAL PROBLEMS OF THE FARM.

The farmer is used to being misunderstood. His life is so different and is lived under conditions so distinctive that it seems difficult for most persons engaged in other callings to put themselves in the farmer's place and look at matters from his point of view. One of the strangest aspects of this tendency to misunderstand the farmer is the forgetfulness shown by many who were themselves reared on the farm, but who have permitted later impressions and experiences to obliterate their understanding of farm conditions. Some of the worst cases of wrong views of farm life we have ever observed have been among people who once lived on farms but have in later life been absorbed by activities amid other scenes. It is, indeed, so rare that men engaged in other pursuits show a clear view and strong grasp of conditions in the rural districts that the exceptions to the rule are gratifyingly refreshing.

One of these pleasing instances of true appreciation of the farmer's position in and relation to the social structure came to light last week at the celebration of the fiftieth anniversary of the founding of the Michigan Agricultural College. President Roosevelt was the principal orator of the occasion; and his address revealed an insight into farm life and its internal and external relations as commendable as it is rare, and the more so because the exalted station of the speaker insured a wide reading for his remarks.

The president showed a surprising familiarity with the problem of education in general and technical agricultural training in particular. He predicted that agricultural education would still accomplish a vast amount in the way of increasing production; but he insisted that "the best crop is the crop of children; the best products of the farm are the men and women raised thereon," and strongly enforced the lesson of history, that "the permanent greatness of any state must ultimately depend more upon the character of its country population than upon anything else."

As to the problems of keeping the boys and girls on the farm and making the life of the farmer's wife not only endurable but happy, the president expressed deep and earnest convictions. He made no pretense of wanting a life of ease and idleness for either the children or the women folk on the farm; but, while favoring those genuine forms

**We Pay You to Inspect This Hay Press**

Instead of paying a salesman's railroad fare to show you a small model of a hay press, we will pay your railroad fare to the nearest one of our many agencies to examine our New Century, full circle, all steel, self feed, Hay Press, and all the others on sale. It makes no difference which hay press you buy, we pay your railroad fare just the same. We are so sure that the New Century is the best hay press that we know you will agree with us after you have examined it and every one of the other 25 hay presses on the market. It has 7-inch stop-over, pull power, high balancing chamber, positive plunger rebound; it stands up to its work, no taking off of wheels; 2 or 3 strokes to the round. All we ask of you is to see it. If you can't come we will send you a New Century for ten days' free trial. We pay freight both ways. Write for literature now.

**Western Steel & Wire Company,**

105 Osage Avenue, Kansas City, Kansas

of happiness which arise from duty performed, he insisted that everything practicable should be done to make the strenuous life of farm folk bright, pleasant and well worth living. He spoke of the mission of the farmer's wife with an intelligence and sympathy which bespoke remarkable familiarity with his subject. He pleaded for better social and economic conditions on the farm as well as elsewhere. He demonstrated the worth of manual labor and urged the establishment and conduct of industrial technical schools for the rank and file of our great industries, not simply for the leaders of the people. Incidentally, he spoke a word for the right sort of light and entertaining literature.

The time was when such homely questions as those discussed by the president in his address were ignored by statesmen, who thought that statecraft had to do only with statistics, and tariffs and dry economic problems. It is a matter for congratulation that a new school of politics is arising which comes close to the people and deals intelligently with the sacred interests of the home and family, on the farm as well as elsewhere.

## All Knowledge Summarized in One Great Work.

One of the great writers of France has said that "history teaches everything, even the future," and a more recent American writer has declared that to study history "is to familiarize ourselves with the whole realm of literature, science, art, philosophy, conquest, exploration, romance and human biography."

This being true, a complete history of the world from the remotest antiquity to the present day would be a summary of all knowledge; and to master such a work would be, in a real sense, a liberal education.

Unfortunately, however, most of the great historical works of the past have dealt with a brief epoch of periods, so that many years of reading, covering numerous large separate works, were once necessary to give one a complete mastery of the world's history as a whole.

"Ridpath's History of the World" has supplied this long-felt want. This great work, charming as a delightful novel, yet historically accurate, embraces all history from the earliest days down to the present. All the fabled greatness of Egypt, Assyria, Babylon; the more recent, but still remote wonders of Greece,

Rome and Carthage; the marvels of medieval and modern times are unfolded with the skill of a master hand. Our own country, its colonization, its heroic revolution, its enthralling history as a republic, the growth of its possessions down even to the acquisition of Panama, its struggles over slavery, the tariff and other problems—all this is told, and in its true relation to all other events. The work—it embraces nine handsome volumes—is in every sense of the word complete. It is complete as a history and also as a review of science, art, literature, politics, war and peace. To follow Dr. Ridpath through its luminous pages is to acquire that eminent scholar's broad grasp of human progress in all its aspects.

The Homestead heartily commends this splendid work to its readers. We wish that it might have a place on every farmer's book shelves. It will prove a mine of instruction to any family wise and fortunate enough to secure it. It is published by the Western Newspaper Association, No. 204 Dearborn Street, Chicago, Ill., who make interesting announcements respecting it on page 12 of this issue.

## A Book on Plant Breeding.

Plant breeding is no longer a mysterious science to the farmer of the corn belt. Those who have not done scientific work along that line themselves are familiar with the character of the work as conducted at their experiment station.

The subject has recently been brought up to date in the most excellent work by Hugo DeVries, professor of botany in the University of Amsterdam. This book is devoted especially to the work of two men, namely, Dr. Nilsson, director of the Swedish Agricultural Experiment Station, and the noted Luther Burbank of Santa Rosa, Cal. The horticulturists will be specially interested in the author's description of Mr. Burbank's work, while the farmer will find much that is interesting in the description of the plant breeding work as carried on at the Swedish Experiment Station. The book is not so technical as to be beyond the reach of the average intelligent man, but it is sufficiently scientific so that its accuracy may be depended upon.

This book at its regular price, \$1.50, postage prepaid, is for sale by the Homestead Company.

## CENTURY RUBBER ROOFING

Durable, easy to lay, permanent, inexpensive to maintain, better and far cheaper than shingles, outlasts metal roofing, costs less than any other roofing. Most durable, economical roofing for barns, sheds, houses, stores, churches, poultry houses, cribs, etc. Cheaper and will last far longer than any other material. Write for our FREE Catalogue.

**CENTURY MFG. CO.,**

Department 770 R

East St. Louis, Ill.

June 6, 1907.]

Direct  
from  
Mills  
to  
You

Beacon-ite is a ready roofing made of the finest long wool fibre thoroughly saturated with a special preparation that makes it absolutely water-tight. Wind, rain, snow or sleet has no effect on it whatever. It will not rust like tin or rot like shingles. It can be applied by anyone to any kind of roof; we furnish all necessary nails and cement. All you need is a hammer. Beacon-ite roofing will save you money in two ways:

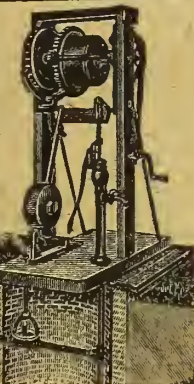

First. By buying direct from the mills you save the jobbers and dealers profits. Second. By putting it on yourself you save the expense of hiring a roofer.

We want to quote you our Beacon-ite prices. You will find them to be about one-half the cost of tin or shingles, and considerably less than any other ready roofings. We want to send you FREE samples of Beacon-ite so that you can compare its quality with others. If you want better, cheaper roofing send for our FREE samples.

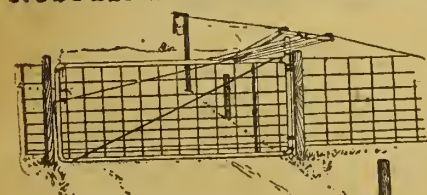

BEACON-ITE MILLS, 154 Olive St., ST. LOUIS, MO.

## Fresh Water

Get our Automatic Pumping System to supply fresh water as needed in feed lots, barns and under pressure, in house all at same time. No Tank; No Stagnant Water. Great demand for machines everywhere. Agent wanted in each county. For information write or call WESTERN PUMP & MFG. CO. Best Building, 6th & Wyandotte, Kansas City, Mo.

## Nebraska Automatic Gate.

OPENED from wagon or carriage. Any lady or eight year old child can operate this gate. All steel. Can be hung on any gate post. Nothing to get out of order. 12 ft. gate \$10. You can't afford to be without this gate for the price. Hog and cattle proof. Also Rice's Automatic Tilt Gate. Ornamental steel. Gates and rod fences a specialty. Catalog upon application. RICE BROS. MFG. CO., HARVARD, NEBRASKA.

## THE Hoover Digger

Clean, fast work. It stands the wear and tear.

Favorite in every great potato growing district. Get free catalog. The Hoover-Prout Co., Lock Box 41, Avery, O.

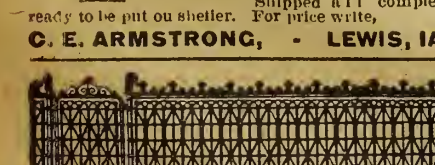

## MONEY WITH BEES

KRETCHMER, from his 45 years' practical experience, can tell you how. Write for his Hints to Beekeepers, and his illustrated catalog. It is FREE for the asking; it describes the BEST, practical, up-to-date goods, required to make MONEY with BEES.

KRETCHMER MFG. COMPANY COUNCIL BLUFFS, IOWA

## Armstrong's Sheller Adjuster

NO shell fast sheller must be right height. With this device can raise or lower sheller to any desired height. Easily operated and can be attached to any sheller. Shipped all complete ready to be put on sheller. For price write, C. E. ARMSTRONG, LEWIS, IA.

Ornamental Fence cheaper than wood—for lawns, churches and cemeteries—also heavy steel picket fence—sold direct to consumer. Catalogue Free. WARD FENCE CO., MARION, IND.

## The Jewell Nursery Co.

(Box 16), Lake City, Minnesota Capital \$500,000.00. 1200 acres. Largest Nursery in Northwest. Established 1868. Hardy seeds, trees and plants. Agents wanted—Good pay.

When writing to advertisers please mention this paper.

## OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer, who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to any considerable number of our readers. Subscribers who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should remit \$1.00, addressed as above.

### LAW QUESTIONS CONSIDERED.

#### WIDOW'S DOWER.

A Subscriber, Monroe, Neb.—A married man died leaving a widow and also children by his first wife. What share of his real estate does his widow get?

Answer.—One third of it for and during her lifetime.

#### BREACH OF CONTRACT—TEACHER.

A Subscriber, Ottumwa, Iowa.—A school teacher made a contract with a school board to teach school for eight months. At the end of four months he quit, after giving the board three or four days' notice. Can the board recover damages from him?

Answer.—It can recover damages for the teacher's breach of his contract. How much, would depend on what amount it could prove.

#### INSANE PERSON—REAL ESTATE.

Mr. A. W. W., Novelty, Mo.—A is an aged single person and has always been mentally deranged and is now in a hospital, hopelessly insane. A is the owner of real estate in Missouri; B has been appointed by the court guardian of A. Has B the right and power as such guardian to sell A's real estate, and give good title to it?

Answer.—Not without an order of court. B must petition the court for an order to sell, setting forth good reasons why such sale should be made, before he can obtain such an order.

#### EXPENSES OF DRAINAGE DISTRICT.

A Subscriber, Boone, Iowa.—A slough has its source on A's land; it runs thence down upon B's land; then on the lands of C and D. Some time ago A wished to tile drain his land, and tried to make arrangements with B for an outlet. He did not succeed in this, so he discharged his drain on his own land at the division line between his land and B's, which made a good outlet. Now B, C and D wish to establish a county or district drain in this slough. Can they have part of the cost of it assessed to A?

Answer.—If B, C and D succeed in having a drainage district established, the expenses will be assessed upon all property within the general benefit caused by such improvement. In such cases the county auditor appoints three persons one of whom must be a civil engineer, to inspect and classify the lands which will be benefited, and apportion the assessment of expenses upon them. If these persons find that A's land will be benefited, they have the power to make an assessment on it.

#### VAGUE LANGUAGE.

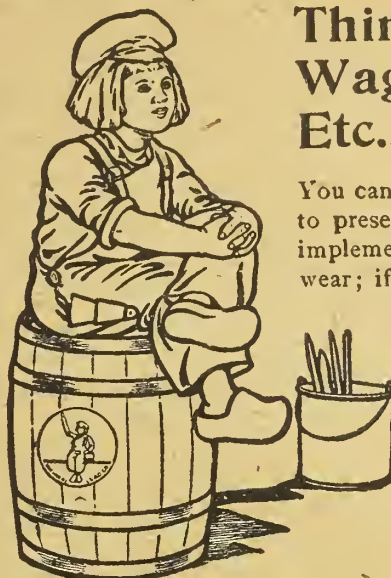

A Subscriber, Kellerton, Iowa.—At a public sale recently held by A, he sold to B the successful bidder, a sow represented to be "a thoroughbred Poland China sow," and agreed to furnish "the papers." On settlement A offered to B all necessary blanks, but not filled out or recorded. Another case, C is a breeder of Poland hogs, and sold D some brood sows, agreeing to furnish "the papers." After the hogs were paid for, and taken home by D, the papers were filled out and handed over to D, but were not recorded. In these cases what would legally be implied or meant by the term "the papers?"

Answer.—In the first case we think that probably a court would decide that "the papers" meant that A should furnish to B such a certificate of pedigree duly executed as would entitle B to have the sow he bought registered as a pure bred Poland China sow. The facts stated in the other case are so vague and dim that it is difficult to say what a court would decide in such a case. Men get into such fool trouble as this by paying no attention to the language they use in a deal. It is astonishing that men who make important deals about fine stock do not say exactly what they mean,—for instance, certificate of pedigree instead of "the papers."

#### HUSBAND AND WIFE—REAL ESTATE.

A Subscriber, Allen, Neb.—A made a deed to his wife, conveying to her certain real estate. A clause of said deed reads like this:—(hereby relinquishes his right of curtesy instead of dower) the word dower being scratched out, and the word "curtesy" written in its place. (1) What does the word curtesy mean? (2) Does that deed give the wife good title, so that when A dies his children have no lawful claim to the land? (3) If a man has good title to land can he deed it to his wife and bar out claims of his children as heirs when he dies? (4) If a deed to land is made to husband and wife does it have a different legal effect from what it would if made to the husband alone?

Answer.—(1) When a married woman owns real estate and dies without issue her surviving husband becomes entitled to a life estate in said real estate. If she leaves children by him the husband

## Think What Your Wagons, Tools, Etc., Are Worth

You can then see how necessary it is to preserve their value. Good farm implements will stand a great deal of wear; if they don't stand as much of

it as they ought to, the manufacturer will usually make good.

But no farm implements will stand continued exposure to weather without a protecting coat of good paint; and there is no one to make good loss by rot and rust but the farmer himself.

Preserve your wagons and tools, maintain their value, by keeping them painted with Pure White Lead and Linseed Oil. Pure White Lead and Oil is the best paint for wagons and farm implements because it gives a firm, protective coat, and does not flake or scale off.

Pure White Lead is such a good paint pigment that it needs no other pigment with it. Every other pigment is admitted to need white lead before it has any value at all as a paint. Buy your white lead and oil separately, and mix them as you need them. It is the only way to be sure of purity.

The Dutch Boy trade mark shown here is the hall-mark that identifies Pure White Lead made by the Old Dutch Process. Look for it on the side of the keg.

## Send for Book

"A Talk on Paint," gives valuable information on the paint subject. Sent free upon request.

### NATIONAL LEAD COMPANY

In whichever of the following cities is nearest you:

New York, Boston, Buffalo, Cleveland, Cincinnati, Chicago, St. Louis, Philadelphia (John T. Lewis & Bros. Co.), Pittsburgh (National Lead & Oil Co.)

## GRAIN FREEMAN BROS. & CO., HAY

COMMISSION MERCHANTS, Established 1886, 68 Board of Trade, Chicago. Your shipments to this market and orders for the purchase and sale of grain for future delivery solicited.

## BINDER TWINE FACTORY TO FARM at Lower Prices than Dealers Must Pay the Trust. Farmers wanted as Agents. AUGUST POST, MOULTON, IOWA.

is entitled to a life estate in one third part of such real estate. These rights which the husband has in land owned by his wife are called curtesy; that is, he is said to have an estate by curtesy, or to be a tenant by curtesy. (2) It does. (3) He can. (4) It certainly does. In one case both husband and wife become owners of the land. In the other case the husband alone is vested with title.

#### SUBSCRIPTION FOR CHURCH.

A Subscriber, Massena, Iowa.—If a man subscribes his name to a subscription for \$100 on a subscription list for the purpose of building a church, and later refuses to pay, can it be collected by law?

Answer.—If the man is financially responsible it can. A judgment can be recovered against him for the amount.

#### MARITAL TROUBLE.

An Iowa Subscriber.—A and B are husband and wife. They have a child about six months old. B deserted A without just cause, taking the child with her. In case A should sue for divorce after two years, could he be made to support the child? A has no real estate, but has some personal property. What is best for him to do?

Answer.—(1) A could be compelled to support the child in such a case. (2) Effect a reconciliation with his wife if possible, for the sake of all concerned, and especially for the child's sake.

#### BREACH OF CONTRACT—DAMAGES.

A Subscriber, Reedsburg, Wis.—A signed a contract by which he agreed to plant one acre of cucumbers for the H. J. Heintz Pickling Co. (1) Must A plant the cucumbers, or is he liable to pay damages if he does not plant them? (2) In case A is liable for damages how much would they amount to?

Answer.—A cannot be compelled to plant the cucumbers, but if he does not do so, he will violate his contract and be liable to pay damages. (2) Whatever

amount the Heintz Company could prove it suffered by reason of A failing to perform his contract.

#### LAWFUL FENCE IN NEBRASKA.

A Subscriber, Sparland, Ill.—I have a farm in Nebraska, and wish to fence it with a hog-tight fence. An adjoining owner has a three barbed wire fence on the division line; the other adjoining owner has no fence at all on the division line. Suppose they refuse to put up a hog-tight division fence, what can be done?

Answer.—You cannot compel the owner of land adjoining yours to make his part of the partition fence hog tight, but only what is deemed a lawful fence which is not hog tight. For instance: A wire fence with four barbed wires well fastened to posts one rod apart with a stay between posts, wires not to exceed one foot apart, and the fence four and a half feet high, is a lawful fence.

#### LAND AGENT—COMMISSION.

A Subscriber, Rosedale, Ill.—A employed B, a land agent to sell real estate at a certain price, and agreed to pay him therefor a certain sum as commission. B was unable to make a sale at that price, and A agreed to take \$1,000 less than the price, and if B would effect a sale at such reduced price within ten days, to pay him a commission, but if no trade was made within that time, the deal would be off, and A would consider something else. B failed to effect the sale within the ten days, and after four more days, A listed the property with another agent, reserving the right to sell it himself. Afterwards A sold the property to C for \$500 less than he authorized B to take. The contract between A and B was oral. B claims a commission. C is the man to whom B tried to sell the property. Can he recover?

Answer.—We think not. There were two contracts between A and B. The first one was abandoned and the last one was made upon a price basis of \$1,000 less than the first and limited in time to

ten days. B failed to comply with the terms of the last contract—to sell the property at the reduced price within the time agreed upon, therefore he cannot recover commission.

#### HUSBAND AND WIFE—CHILDREN.

A Nebraska Subscriber.—I own land in Nebraska, on which there is scarcely any improvement. The title of the land is in my name. I inherited the money with which it was bought, from my father. (1) In case my husband should put improvements on the land at his own expense, could he recover the value of them from me by law? (2) Where the home of a family is on land owned by the wife can the husband lawfully take the girl children away from the mother?

Answer.—(1) He could not, unless there be an understanding between you to that effect. (2) He cannot without an order of court based upon a good cause.

#### A DEAD SOLDIER.

A Subscriber, Plator Lake, Minn.—A soldier who served in the civil war, died five years ago. He drew a pension for several years before his death. I have the number of his regiment, places of enlistment, and discharge, dates, etc. I do not think he applied for or filed on any claim for government land. Let me know whether or not he is entitled to a claim?

Answer.—While living he was entitled to enter a homestead and count the time he served in the army to reduce the time required for residence and cultivation under the homestead law, but being dead he is not in a physical condition to perform the things required of a homesteader, and therefore is not entitled to a claim.

#### FRUIT TREE DEAL.

A Subscriber, Peru, Kan.—Last July a fruit tree agent came to B who is a farmer, and sold him a bill of fruit trees. About the first of September B countermanded the order by writing the agent a letter telling him that he would not take the trees. B received no answer to this letter, and in November the agent came to B's place with the trees. B was not at home, but his wife told the agent that B had countermanded the order, and would not take the trees, and to not leave them. The agent did leave the trees and said he would be back in two or three weeks, to settle about it. The agent did not come back, and B has so far heard nothing from the nursery represented by the agent. The agent claimed he did not receive the letter of countermand and can prove it by his postmaster. B has not touched the trees. They remain where the agent left them. Can B be compelled to pay for the trees?

Answer.—B could not legally get out of his contract by merely countermanding the order by letter. We suppose that the agent took a written order signed by B for the trees, to be delivered at a certain time. If this be so, B could not rescind such

contract merely because he had changed his mind, and did not want the trees. So if the agent and the nursery he represented delivered the trees according to the order given for them B is liable for the price and a judgment can be obtained against him therefor.

#### FENCES—HERD LAW.

A Reader, Glen, South Dakota.—A and B own adjoining farms. A has valuable horses. He does not want them to get cut and injured by fighting across a partition wire fence on the line between his farm and that of his neighbor, so he built his partition fence four feet inside of the line, and he wants his neighbor to do likewise, thus making a lane eight feet wide between their farms. (1) Can A compel his neighbor to do so? (2) Can the neighbor build a partition fence on the line against A's objections? (3) Can the neighbor join his fences to the fence that A built without A's consent? (4) Has that portion of South Dakota east of the Missouri river, a herd law?

Answer.—(1) He cannot. (2) He can. (3) He cannot. (4) Except as to the counties of Lawrence, Pennington and Custer, which are exempt from the herd law, it applies to all counties organized since the 12th day of March, 1885, and to all counties which were unorganized at the time of its passage in 1891.

#### TEXAS LAND.

Mrs. L. M. N., Spickards, Mo.—A and B are husband and wife. Each one owns land in Texas. (1) In case the husband should die first how would the lands be divided? (2) In case the wife should die first how would the lands be divided? (3) Can each of them make a will that will hold good? (4) What division would be made of personal property?

Answer.—(1) One-third of the husband's land would go to the surviving wife for her life, then to her children. The other two-thirds would go at once to his children. (2) In case the wife should die first, her land would be divided the same way between her children and her surviving husband. (3) Each one can make a good will. (4) If they live in Texas, one-third of the personal property of the deceased one would go to the survivor, the other two-thirds to the children of the deceased one.

#### WASTE OF RENT CORN.

A Subscriber, Lamoni, Iowa.—A leased his farm to B for grain rent, reserving only the right to store corn in the crib, which was located in the hog lot on the rented premises. B put the rent corn in the crib; then A bought corn and finished filling the crib. (1) B's hogs ate the overthrow corn and A demands that B pay him for it. Can A recover? (2) The corn is to be moved. While this is being done, must B shut his hogs up?

Answer.—(1) There should have been no overthrow corn at all. If B, in putting the rent corn in the crib, allowed his hogs to eat part of it, he is liable to A for its value. B is not liable for the corn eaten by his hogs while A was finishing the filling of the crib. (2) He is not required by law to do so. If A in moving the corn allows some of it to drop on the ground so that the hogs get it, he must bear the loss.

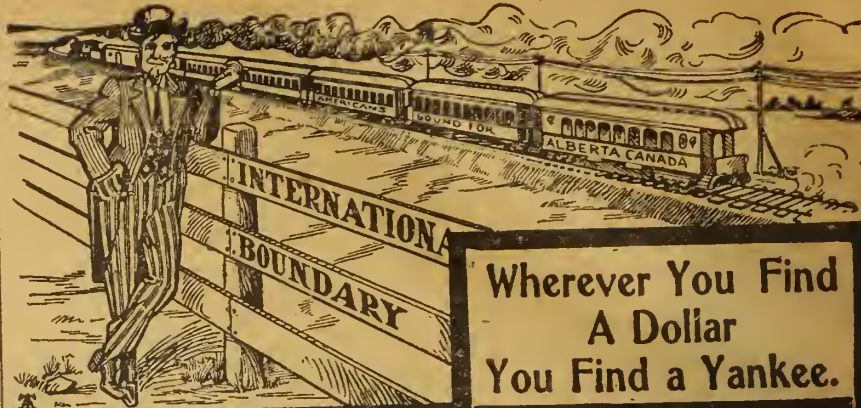

#### U. S. CITIZENSHIP.

An Iowa Subscriber.—A has been in the United States five years, and has his first naturalization papers. (1) Can he vote at a common school election? (2) In case he does, could B cancel his vote, and oust the director elected at such election? (3) Can A be lawfully elected and hold the office of director?

Answer.—(1) He cannot. Section one of Article two of the constitution of Iowa provides that every male citizen of the United States of the age of twenty-one years, who shall have been a resident of the state six months, and of the county sixty days, shall be entitled to vote at all elections. The same qualifications are required of a voter at a school election that are required at other elections, except that women may vote at a school election. A foreigner does not become a citizen of the United States until he is admitted to citizenship. First papers are not sufficient. (2) If a foreigner, with first papers only, should vote, his vote should be cast out, but that would not necessarily oust the director then elected. (3) He cannot.

#### R. H. Hadley's Sale of Short-horn Cattle.

May 22d was a fine day on which to hold a public sale and Mr. R. H. Hadley, of New Providence, Iowa, was favored with the best of weather. A splendid crowd greeted Col. A. P. Mason when he ascended the auctioneer's block. While the sale was in the name of Mr. Hadley, yet several of his neighbors contributed to the sale. The sale was well conducted and all was done that could be to make the sale pleasant and agreeable to the visitors. There were no so-called straight Scotch cattle outside the herd bull, Golfman 2d, owned by Mr. Hadley. This great bargain went to Mr. Henry Swart, of Eldora, Iowa, at the bargain-counter price of \$160. This was perhaps the greatest sac-

Wherever You Find  
A Dollar  
You Find a Yankee.

And the Yankee usually connects with the dollar.

Hundreds of Yankees have found the dollar they were looking for on the rich plains of Sunny Southern Alberta, Canada.—They have not only found a dollar but they have found fortunes.

There never was such an opening for the farmer anywhere as is offered on the great irrigated tract of the Canadian Pacific railway in Southern Alberta.

Thousands of farmers are raising good crops in Southern Alberta without the help of irrigation but with its help the results are almost fabulous—Always plenty of water for crops and live stock.

All kinds of grain, root crops, live stock and poultry thrive and produce enormously in this fertile soil when a sufficient supply of moisture is furnished.

In the Canadian Pacific tract there are about 3,000,000 acres, one-half of which will be irrigated when the project is com-

pleted. Thousands of acres are now under irrigation ditches and are being offered for sale at prices so low that every man should have a farm.

In a few years more the low priced land will be gone—settlers are entering the last great west in hundreds and thousands—Prices of farming lands are bound to rise by leaps and bounds and the man who buys now in the right spot is the man who will reap the harvest of dollars.

The right spot is the great irrigated tract of the Canadian Pacific and anyone who takes the trouble to write and find out about it cannot help but acknowledge that the best opportunity for investment in farming lands is here.

We don't ask you to buy until you are thoroughly satisfied—The only way you can be satisfied is to send us your name and address and let us tell you how to visit this favored locality at small expense and see for yourself.

31 females . . . \$2,301.50; average . . . \$74.29  
15 bulls . . . 238.50; average . . . 72.13  
46 head . . . 3,383.50; average . . . 73.55

### 10 Points to Consider When You Buy A Buggy.

Buy direct from the factory. My \$45 Knox Special Top Buggy is sold that way. No dealer's profit for you to pay. No salesmen or jobbers for me to pay to sell my buggies. I sell direct to you. Get my Knox Buggy on 30 days' trial. Use it a month, test it in every possible way, and send it back if not satisfied. And I will pay the freight both ways.

Be sure your buggy is guaranteed by a reliable maker. I guarantee the Knox for two years. That is another advantage of dealing directly with me.

My \$45 Knox Top Buggy is a comfortable rider. It has a wide, roomy seat. That very same buggy at your

local store sells from \$75 to \$90. So you easily save \$30 in jobber's and dealer's profit.

The body is 24 inches by 54 inches. The gear is oil tempered. Long distance, full clipped axles. Easy riding spring. Full plated reaches.

The shafts and wheels are guaranteed to be split hickory. Oval edge tires.

My Knox buggy is handsomely painted and tastily upholstered.

It has a four bow leather top. In short, it's the leader of my big line of buggies, carriages and vehicles of all kinds. Remember, I sell them all straight from shop to buyer, guaranteed, and a big saving to you.

Send for my big buggy book. It's free. Tells more about my line. But order my \$45 Knox Buggy now, right from this advertisement. You are safe. Address

R. M. Knox, President, Western Harness & Supply Co., 613 Commercial St., Waterloo, Iowa.

P. S. Have been advertising in The Iowa Homestead for six years.

**SELL TOBACCO AND CIGARS** locally or travel. Selling; salary or commission. Full time or part. Steady work; good pay; promotion. Address: Cigarette Tobacco Works, Box 118, Danville, Va.

## OUR DAIRY DEPARTMENT

ALL communications relating to dairy matters should be addressed to this office. Inquiries of general interest regarding dairy management and production will be promptly answered.

## Story of Gold and Gilt.

To the Editor of The Homestead:

At the Illinois Experiment Station are two cows, the story of whose work is well worth telling. They were brought up alike on a farm near Elgin, Ill., and obtained their early education in the same herd of 100 cows. Here at the university, with the very same surroundings and equal opportunities, they have drifted far apart in character, and their progress has been in opposite directions. It is not a difference of hide, or horns, or temper; it is not that one is wild and the other a pet. It is not a difference of beauty or intelligence, but solely a difference in the way they have worked, a difference in the money they have earned for the owner.

All the milk of these cows has been weighed and tested for three years. A record has been kept of every pound of feed consumed by each animal, both summer and winter.

Each year Gold produced on the average 11,390 pounds of milk containing 405 pounds of butter fat, but during the

same time, Gilt averaged only 3,830 pounds of milk with 138 pounds of butter fat.

These cows were both cared for in the same way; they were given the same kinds of feed and allowed to eat all they wanted. Gold ate one-half more than Gilt, but produced nearly three times as much milk.

Equal amounts of feed made in the one case 188 pounds of butter fat, and in the other 100 pounds. The one cow produced nearly twice as much as the other from exactly the same feed in kind and amount.

Counting the butter fat at twenty-three cents a pound, and taking out the exact cost of feed in each case, the one cow brought in a profit of \$34.59, while the other lacked \$5.62 of paying for her board at market prices of feed, each year.

This comparison, exact and complete for three years and including the record of both milk and feed, means a great deal more than a single year's comparison or one in which it is necessary to introduce an estimate.

It would be very gratifying indeed if it could be truthfully said that these two records are extreme and exceptional and therefore do not stand for any general condition of the dairy business in Illinois. But the very opposite is true. Illinois Exp. Station. W. J. Fraser.

## Butter Fat Variation.

To the Editor of The Homestead:

The following questions asked by one of your subscribers living at New Hampton, Iowa, have been submitted to me for reply:

Can you explain why the test of butter fat should fall from 50 to 80 per cent on the same amount of feed and the same quality? Will milk produced from corn, oats, barley and hay test lower than milk from timothy alone? Also, will milk produced from corn and hay test lower than corn, oats, barley and hay? Why should milk test 4.20 at one creamery and the same milk test 3.20 at another? Where can I send my milk samples to have them correctly tested? Why should a man's milk test lower last month than in five years, including winter and summer, with the same cows and feed?

The increase in flow of milk at this time of year, due to an abundance of green feed, might cause a slight decrease in the test, but not to such an extent as you speak of.

A sudden change from corn, oats, barley and hay to hay alone would reduce the flow of milk materially, and as a consequence the fat test would be abnormally high for a while but would come down to the normal test in a short while. It has been found by experiment that it is possible to increase test of milk by feeding foods rich in fat content. However, as was shown, cows poorly cared for and receiving scanty food often test very high although the yield is very low.

The same milk should test the same wherever it is tested, although great care must be exercised if a representative sample is to be secured. The milk should be thoroughly stirred before sampling. The fat comes to the top with surprising rapidity, so it is essential that the sample be taken directly after stirring. If not, the sample taken from the bottom and the one taken from the top will have a variation in test, the

IMPORTANT  
CROP FACTS

Farmers generally in almost every section are very "blue" over the unfavorable grain crop outlook at this time, but there is one crop that they need not feel doubtful about and which becomes of more than usual importance to them by reason of the uncertain outlook as to other crops, and this is the MILK CROP, which continues month in and month out and of which it has well been said "the harvest never ends."

There is nothing doubtful about the outlook for the MILK CROP. Dairy product prices have been high and promise to continue so. The uncertainty about other crops makes it all the more important to make the most of the one that is sure. There is only one way to make the most of it, to be certain of recovering all the butter-fat with the least effort and under the most favorable conditions, and that is with the help of

## A DE LAVAL CREAM SEPARATOR

Every farmer with milk to separate needs a separator, and there never was a better time to make the purchase of one. There can hardly be good reason to defer putting in a machine or replacing a poor one with a DE LAVAL. Machines are made in all sizes to meet all conditions, and may either be bought for cash or on such liberal terms that they will actually save their own cost while you are paying for them. Catalogue with full particulars is to be had for the asking.

Clean Skimming  
Means Good Living

The hog trough is no place to put butter.

Wide awake farmers want the cream separator that skims the cleanest. It means more profit—better living. That separator is the Sharples Dairy Tubular—the separator that's different.

Sharples Dairy Tubulars have twice the skimming force of any other

separators—skim twice as clean.

Prof. J. L. Thomas, instructor in dairying at the agricultural college of one of the greatest states in the Union, says: "I have just completed a test of your separator. The skimming is the closest I have ever seen—just a trace of fat. I believe the loss to be no greater than one thousandth of one per cent."

That is one reason why you should insist upon having the Tubular. Tubulars are different, in every way, from other separators, and every difference is to your advantage. Write for catalog S-121 and valuable free book, "Business Dairying."

## Like a "National" Bank

The National Cream Separator is  
—More CERTAIN Than Others

You put your money in the strongest, safest, "most certain" bank you can find—a National Bank—because it's backed by the Government. That's the only kind of a Cream Separator you will find it safe to buy—a "National" because it is backed by 40,000 satisfied users, 1000 dealers who heartily endorse it, and by us, the reliable makers, who Guarantee it to you. Let us send you 100 Reasons why The National Cream Separator will do for you everything that any other Separator can do—do it better and in three-fourths of the time. Let us tell you what others say—how it pays for itself faster—gets more Butter-Fat—runs easier than others so even a boy can run it—why it's the easiest cleaned with only 2 parts to clean in 3 minutes. Read what this man says:

"We have used a NATIONAL for 7 years and it is doing as good work as ever. Have made the price several times in extra cream it saves. Simply could not get along without The National. We sell cream for ice cream. It runs light and is easy to clean."  
—M. W. MORELAND, New Haven, Pa.

Don't skim your milk and lose 1/2 of it. Write us and let us arrange for you to have a demonstration of what a National will do saving cream and money and hard work for you. We are perfectly willing to have you try a National for 30 Days before buying it.

We Manufacture the Davis

amount of which will depend upon the time the milk was allowed to stand.

There might be several reasons for your test being low last month. A large number of fresh cows would reduce the test some, as milk tests a little lower at the beginning of the lactation period than at the end. The early spring with its abundance of grass would suddenly increase the flow of milk to such an extent that the test would fall off a little. The variation would probably be no more than about 4 per cent.

Because the test falls off a little is by no means any reason for thinking that your cows are not doing well, for the increase in flow of milk would make the actual number of pounds of fat very much greater. Herman Horneman.  
Story county, Iowa.

Early cultivation is what does the most good. Plow the berry middles as early as possible, throwing the dirt away from the plants. Then go over the rows with hoes to clean out weeds and grass. Next, work the earth back to the plants with harrow and cultivator. A one horse disk is a fine tool for this. If your raspberries need a support, stretch a single wire about two feet high over the row and tie the canes to it or bend them over to the opposite side so they will stand up. Red raspberries need no support. Instead of drawing a furrow, try planting raspberries and blackberries with a spade. Prepare the ground fine and well compacted, as for strawberries, mark the rows with marker or line and then set with the spade exactly as with strawberries, making a cleft in the ground, slipping the roots in and closing it with the foot. This is far the quickest and easiest way and is just as good as planting in a furrow.

The Homestead and the Homemaker  
\$1.25 per year.

SILO AND ENSILAGE  
CUTTER.

I EXHIBITED a Silo and Ensilage Cutter at Iowa State Fair, seasons of 1905 and 1906. There were about 10,000 farmers who saw the exhibit and who told me they were thinking of building one this season. Anticipating some shrinkage I have arranged to take care of 5,000 of them, and am now ready to hear from you.

## LIVE STOCK SALES

## The Fair Acres Dispersion.

The dispersion of the Fair Acres Herefords, owned by Mrs. C. S. Cross, of Emporia, Kan., on May 15th, may well be classed among the successful sales although prices might have ruled higher and yet come within the limit of conservatism. Every animal sold bids fair to give good returns to the purchaser. Mrs. Cross did not murmur, but showed plainly that the scattering of the herd was to her a loss of work in connection with a business to which she was thoroughly devoted. The top of the sale was the herd bull Christy, bought by Miss Lou Goodwin, of Blue Rapids, Kan., at \$530. The next highest price was \$300, paid by Mr. C. G. Steele, of Barnes, Kan., for the yearling bull, Bellairs. Mr. Steele was the contesting bidder on Christy. The top on females was \$250, paid by Prof. R. J. Klnzer, of the Kansas Agricultural College, for Lot 45, a Tranquility heifer. She is a free martin heifer and goes to the college for demonstration purposes. Professors Mumford, of the Missouri Agricultural College; Smith, of the Nebraska Agricultural College; and Professor Kinzer were looking after Mrs. Cross' steers. Matchless went to Missouri at \$86, Cleo went to Nebraska at \$57.50 and Albion Real went to Mr. R. M. Hall, of Cambridge, Neb., at \$50. Mr. Hall was one of the good bidders on the breeding stock. Colonels Woods and Bellows conducted the sale. Following is a list of all sales over \$100 and the averages, the steers not included:

## BULLS.

Bellairs 234414, twenty months, C. G. Steele, Barnes, Kan.	\$300

44 females	5,635; average	128.00
64 head	8,235; average	128.67

## Kuper Makes Good Short-horn Sale.

The sale of Short-horn cattle made by Mr. Henry Kuper, of Humboldt, Neb., on May 28th, was a very satisfactory one, the whole consignment being disposed of at an average of \$127.55. In no one sale outside of Omaha has so many good, high-class Scotch cattle been offered in one auction, and the great crowd of breeders that gathered to this sale showed that this was the kind of cattle that is being appreciated at this time. The top price of the sale was \$570 paid for the great cow, Scottish Daybreak, by the great breeding bull, Imp. Prince Oederic. She is conceded the greatest pure Scotch milking cow known to the Short-horn breed. The Scotch females that were safe in calf to Mr. Kuper's herd bull, Secret Champion, seemed to be in good demand and any man getting one of these surely has something that he can be proud of. Below is a list of those selling at \$100 and over:

## Gudgell &amp; Simpson Held a Successful Sale of Herefords.

Messrs. Gudgell & Simpson, of Independence, Mo., held another successful sale at Kansas City, Mo., on May 2d. Representative breeders were present from Illinois, Missouri, Nebraska and Kansas. Col. Edmonson opened the sale with very appropriate remarks, introducing to the audience Mr. John Gosling, of Kansas City, Mo. Mr. Gosling's connection with the Hereford breed dates back beyond the date on which old Anxiety was led on the boat for shipment to America and his remarks were received with deep interest by all, even to his experience of personally leading this grand old father of all the Anxiety's onto the boat for shipment to America. The offering was composed of two-year-old heifers and young bulls just passing one year of age and were presented in just nice breeding condition. More flesh

## Hay Makers Implements

### Clean Sweep Loader

The business hay loader, but not the kicking kind. Does not bunch, wad, tangle nor thresh hay, and does not elevate manure nor trash. Divides a swath—the only machine for satisfactory cloverseed gathering. Works on hillside or level, in wind or calm. Carrier raises as load increases. Detach without getting off load. Light draft, strong and durable.

## SANDWICH Side-RAKE

### TEDDER AND RAKE IN ONE—BETTER THAN EITHER

Does not rope the hay, but teds it into light, fluffy windrows so it cures perfectly. No need for second stirring, which breaks up stems and leaves. It rakes clean and it requires no damping. The easiest of all rakes to operate, a boy old enough to drive can do it. Best Pair Hay Making and Saving Tools on the Market. Send for catalog and get all particulars.

**SANDWICH MFG. CO.,**  
143 Main St., Sandwich, Ill.

might have brought Gudgell & Simpson a few more dollars, but the buyers got these cattle in the best possible condition for future usefulness. Prices ruled very even and on the forty-seven lots an average of \$149.70 was made. The top of the sale was \$385, paid by Geo. F. Smith, of Craig, Neb., for Beau Roosevelt, a thirteen months son of Beau President. The \$300 mark was reached on three other animals and the evenness of prices throughout the sale indicates the uniformity of the Gudgell & Simpson cattle. Cols. Edmonson, Sparks and Zaun were the auctioneers. Following is a list of all sales of \$100 and over:

## FEMALES.

Bonny Lulu 22d, 2-years; M. J. Hildebrand, Lostant, Ill.	\$145

47 head sold for \$7,035, average	149.70

## HAY PRESS SALESMAN LOSES JOB.

Every prospective buyer of a hay press is now his own salesman. Formerly the salesman came to you. Instead of that you go to see the real full sized press as it stands set up in the shop of your nearest agent. In other words every buyer is given the best deal that any arrangement can give. The company that is making this offer is a large Kansas City firm. Their leader in hay presses is what they call the "New Century." It is a full circle, all steel, self feed press. It stands up to the work which saves the work of removing the wheels. Two or three strokes to the round may be had. Now you will want to know more of this offer and if you will write the company they will tell their nearest shipping point and other things for you to know. Address, Western Steel & Wire Company, 105 Osage Ave., Kansas City, Kan. See page 4.

## THEY WANT YOUR WOOL.

The Adams Seed Company has made arrangements to contract for a large eastern firm all the wool they can secure. To that end they are prepared to buy your crop of fleeces and will pay the regular market prices, generally better than can be secured at home. Sacks and twine will be furnished shippers on request. See their references on page 15. When writing kindly mention The Homestead. Address, The Adams Seed Co., Decorah, Iowa.

OHIO

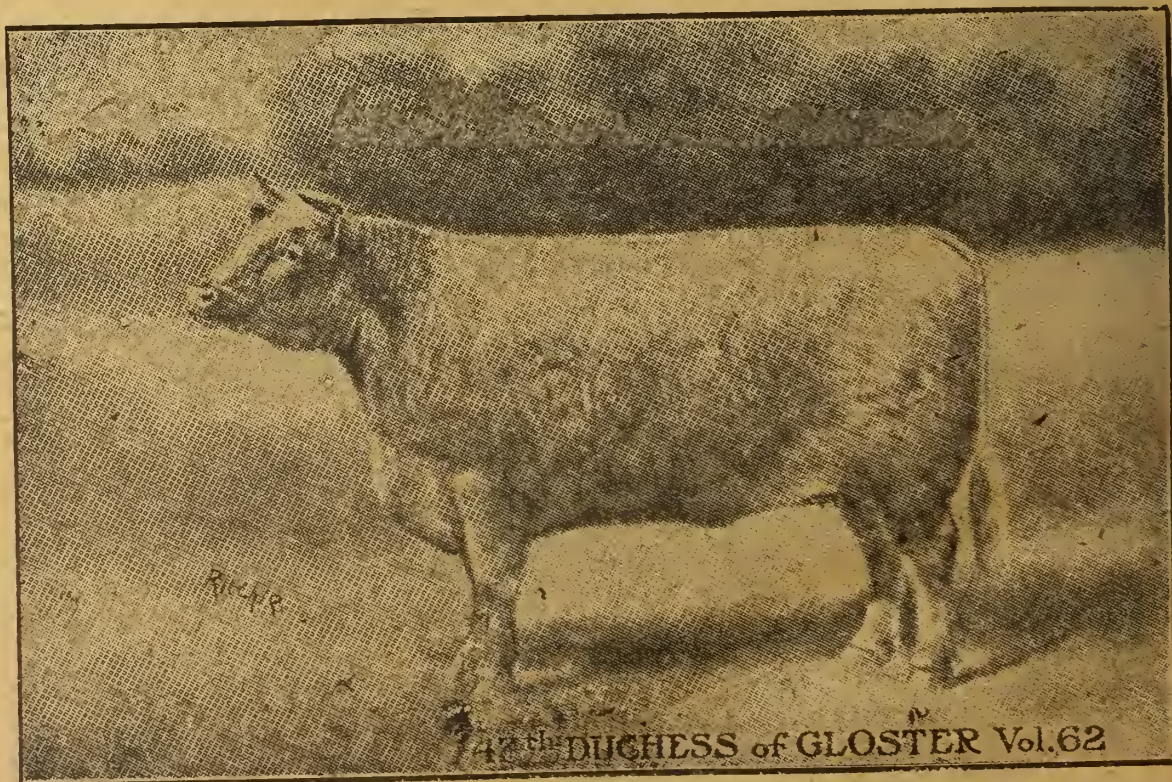

80 BALES AN HOUR IS EASY

and they are smooth and solid. It's an all-steel press, angle steel frame with angles turned out. Strong where strength is needed.

## Automatic Friction Clutch

stops press instantly. FOOT BUTTON BLOCK DROPPER, drops right time and right place. Returns automatically. "New Idea" feeder—no play or lost motion and no rolls to run through. When you start up with an Ohio Power Press the work goes right along. No chance for breakage and no repair bills. No question but that it is the press of durability, speed and economy. Send for catalog and investigate.

THE OHIO CULTIVATOR CO.,  
DEPT. 13  
BELLEVUE, OHIO  
Our two-horse self feed press is the best built.

47th Duchess of Gloster. Illustrated above was got by the pure Cruickshank bull, Orange Viscount, and was out of 45th Duchess of Gloster. She was the senior yearling shown by Thomas, Jameson & Mitchell, of Allen, Kan., in 1906 and sells in their sale at Kansas City, Mo., June 13th. As a two-year-old she promises better than ever before and should be carried on for the fall shows. Her dam sells with roan bull calf at foot, a full brother to the 47th Duchess of Gloster.

# CLASSIFIED ADVERTISEMENTS

ADVERTISEMENTS are inserted in this department of The Homestead (and, by special arrangement, also published in The Wisconsin Farmer, of Madison, Wis., and The Farmer and Stockman, of Kansas City, Mo., without additional charge) for the low price of five cents a word for each insertion, no insertion being accepted for less than \$1.20; and cash must invariably accompany the order, as we keep no books for this class of business. No display type or illustrations are admitted. Each number and initial letter or abbreviation, including the address, counts one word. Form for printing this page closes on Saturday of the week preceding publication, hence copy must be mailed so as to reach The Homestead on or before Saturday morning. Guaranteed combined circulation of the three papers over 190,000, reaching a farm population of at least 950,000 in the states of Iowa, Illinois, Nebraska, North and South Dakota, Minnesota, Wisconsin, Missouri, Kansas and Oklahoma.

## HORTICULTURE.

CELERY PLANTS—500,000 transplanted Celery plants. 15 varieties. Send for price list. W. B. Dutrie, Rahway, New Jersey.

## Forbes-Prather-Ayres-Hanna Short-horn Sale.

Good values were the rule in the sale of Short-horns from the herds of Messrs. I. M. Forbes & Son, J. F. Prather, F. W. Ayres and D. R. Hanna which was held in Chicago on Thursday, May 23d. Messrs. Carpenter & Ross, of Mansfield, Ohio, topped the sale, paying \$725 for Moss Rose 4th, a show cow consigned by Mr. Hanna. Mr. Thos. Johnson, of Columbus, Ohio, secured a bargain in Queen of Scots 19th, consigned by Messrs. I. M. Forbes & Son, at \$535. The bull offering was topped by Mr. R. C. Jones, of Oregon, Wis., who secured the good son of Imp. Bapton Diamond, Diamond's Mariner, consigned by Mr. D. R. Hanna, at \$600. No sensational prices were received and those present were able to get good Scotch cattle at very reasonable prices. Colonel Woods conducted the sale and was ably assisted by Colonel Bellows and Jones and Manager McGavock in the ring. A list of animals selling for \$100 or over is given below:

### FEEMALES.

NEURALGIA—Positive, permanent cure. One dollar guaranteed. A. S. Way, Springfield, Ohio.

POST CARDS—For 10 cents we send you biggest and best pack. John Henderson, Medford, Okla.

In six places to the bone and after healing up was three times its natural size. Today you can scarcely tell he has a blemish, and at the time he was cut, two veterinary surgeons told me that the first time I had ever used it. To all I see in need of a liniment I recommend Absorbine to them. I would not be without it for double the price. I just cured a pup of the itch, or some other breaking out, with the first application. The last time I wrote you, I asked about removing a spavin on a colt. The colt had caught its leg in a fence, and in struggling caused a spavin. It belonged to a friend of mine. I gave him your letter to me and he got the first bottle of Absorbine. After using about two-thirds of it the enlargement was all gone. He says now that he will never be without it. The colt is as sound as a dollar. My neighbor had a colt with distemper; its jaws and throat badly swollen and he was almost choking. I loaned him my Absorbine to bathe the throat with. He says that it gave instant relief, the enlargement has broken and the colt doing nicely." Many customers write of the satisfactory results Absorbine gives. You try a bottle. Price \$2 at druggists or delivered. Manufactured by W. F. Young, P. D. F., 40 Monmouth St., Springfield, Mass. See advertisement on page 13.

## A VALUABLE BUGGY BOOK FREE.

Mr. H. C. Phelps, president of the Ohio Carriage Mfg. Co., Station 31, Cincinnati, Ohio, who is the originator of the famous free trial plan of selling buggies from factory to consumer and who is doing the largest business of this kind today, has just published a remarkable buggy book, giving the facts of buggy making as never before placed before the public. He has sent out over 150,000 of these valuable books to interested buggy buyers throughout the United States and would be glad to send you one free if you are interested and wish to learn something about how buggies are made. Write Mr. Phelps for one of his famous books today on a postal card and you will receive it free by return mail. Address, Mr. H. C. Phelps, Station 31, Cincinnati, Ohio. See page 6.

CIES.

Mr. Daniel I. Diehl, of Roosevelt, Okla., writes December 12, 1906: "I used Absorbine on my stallion's leg when it was cut

## DAY BY DAY

Agricola

Memorial day has come and gone again. This is the most pathetic holiday of the year. Fourth of July comes close on its heels, and this is the noisiest and least reflective holiday we have. A family or neighborhood picnic generally proves the best observance of our nation's birthday. The public observance has become largely a farce.

Memorial day was inaugurated by Gen. John A. Logan, the first commander-in-chief of the Grand Army of the Republic. It was at the close of the war of the rebellion.

Thanksgiving day was first observed by the Pilgrim Fathers in 1621. Half the pilgrims were dead from exposure and disease, but a good harvest had been secured and they invited the Indians to join with them in giving thanks.

The northern states were alone in observing Thanksgiving until after the civil war, and the governors of the states issued the proclamations. Since the war the president has done so and it has become a national holiday.

The originators of Thanksgiving day were opposed to observing Christmas as a religious holiday. They thought it savored of paganism, but they could not kill the Christmas spirit, and so we have not only Christmas, but the Thanksgiving which they instituted to kill Christmas.

Agricola believes in observing holidays, and he believes in being up and doing between them. Were life one holiday it would be wearisome and useless. Activity, "going around doing good," and staying at home doing good, are features of good citizenship and of genuine Christianity. Idleness here or hereafter has nothing to recommend it except passively. The good old lady who hoped Gabriel would not blow his horn for a thousand years after her decease, so she could have a needed rest, had evidently been deprived of the earthly holidays to which everyone is entitled.

Agricola is firmly convinced that the inventors of the road graders are all brainy men, and that the King drag inventor stands at or near the head of the whole class. There is another idea interwoven with this, and this is that the value of any road drag or grader is in direct proportion to the brains of the man using it.

This has been forcibly and disagreeably brought to recognition once more just now. The road past this farm was graded and a mass of loose dirt left piled up in the middle. Along came a soaking rain and there was no road left, just a quagmire spread all over the pike.

Where the grader man did not get in his work the road remained firm and good. Grading should be done after a rain rather than before it, and to keep a graded road in repair, frequent shaving off of the small ridges and filling the ruts is the proper thing, not a once or twice a year digging up of the whole pike. Yes, brains are required to run machines designed by brainy men.

Does a riding plow draw easier than a walking plow? It is claimed that it does, but I notice that two horses with a walker seem to make as easy work as three horses with a rider, and yet I have seen a demonstration of showing that a plow with the weight carried on a greased axle has less friction than where the weight is dragged on the ground, consequently a riding plow is lighter draft.

This is the theory. The demonstration was in offering to have a riding plow, with rider on the seat, and the plow cutting a furrow of full depth and width, drawn by one man. That was a bold challenge.

Well, at the appointed time and place, with a big crowd of farmers present, the demonstrator made a well memorized speech, took one of the farmers, harnessed his light team to the plow, then

unhitched the two horses and harnessed up the farmer, and he did pull the plow all right, and turn over the regulation furrow.

Why, then, in practice, do we see three horses worn out pulling a riding plow, if it pulls lighter than a walking plow? And if one man can pull it and cut a full furrow, does not that prove it light draft? Yes, but this plow was adjusted by an expert. The hard running plows are adjusted by farmers who do not understand just how to adjust, and the weight of plow, frame and rider all have to be dragged on the ground.

And the blacksmiths,—too often when a riding plow goes to the shop to be sharpened it is returned all out of adjustment, out of line, and pulls hard as a result. Educated blacksmiths are needed to repair modern machinery.

There is in Minnesota a man who has pushed fodder corn to the front, and his name is Prof. Haecker. Two things about fodder corn are due to his teaching,—drilling it thick in the row, and planting it late.

After hearing the professor speak two different times in advocacy of these two points, Agricola tried them, and the results have fixed the methods as a permanent practice.

Planting late—the first half of June—makes it grow from the start and get ahead of the weeds. It makes it hustle to "get there" and when harvested it has relatively more protein (because it did not have time to form so much carbonaceous material) and it is therefore better dairy food.

Planting it thick makes the stalks softer, easier to masticate, and there are no large ears but a host of "nubbins" which are easy to swallow. About three pecks to one bushel of seed per acre is the right quantity for best results.

Last summer a neighbor mowed hay, plowed the sod and planted to fodder corn the 22d of June. He had two crops, hay and fodder, and both of them good.

## Palmer &amp; Son's Short-horn Sale.

The dispersion sale of Short-horns owned by Messrs. J. W. Palmer & Son, of Albion, Ind., attracted the attention of breeders from Illinois, Wisconsin, Indiana and Ohio. The cattle were sent forward in good breeding condition, and in most cases good bargains were the rule. Messrs. Herr Bros. & Reynolds, of Lodi, Wis., topped the sale, paying \$750 for Choice Master, a grandson of Choice Goods. They also secured several head of good females at bargain prices. Messrs. Carpenter & Ross, of Mansfield, Ohio, secured a good heifer by Whitehall Sultan in White Sultana at \$200. Col. Carey M. Jones conducted the sale and was ably assisted by Colonels Reppert and Bowers. Mr. T. E. Adams, of Columbia City, Ind., consigned six head to the sale. A list of animals selling for \$100 and over is given below:

## FEMALES.

## Harvey &amp; Son and Wray &amp; Son's Short-horn Sale.

The dispersion sale of Short-horns held by Messrs. Bellows and Forbes, of Maryville, Mo., and Messrs B. T. Wray & Son, of Hop-

## SOUTHERN ALBERTA---THE SUNNIEST PLACE IN CANADA.

It may seem strange, but it is nevertheless true that not only agriculturists, but men of business are going northward to the "New Ohio" of North America, sunny southern Alberta, commonly spoken of as the California of Canada, on account of the delightful and invigorating climate and the remarkable productiveness of the soil.

What surprises the newcomer more than anything else respecting this country is the mild winter. Men frequently go about in their shirt sleeves in the winter months.

The city of Lethbridge is usually described as the railway and commercial center of southern Alberta; and, being situated in the heart of the most prolific agricultural district, is sure to be one of the largest cities in Canada.

Aside from the climate the visitor is particularly pleased with the excellent quality of the "home-grown" beef. He is surprised when he learns that this prime beef is range fed; nothing but the native grass and lots of pure water being fed cattle in this country of sunshine and warm winds; and they top the European market. The prairie is covered with a tall, luxuriant growth of wild hay, or "buffalo grass," which has been growing up and dying for ages, food for the buffalo and wild animals, that, with the red men, roamed over and ruled this vast expanse of country up to a few years ago.

Horse raising, mule breeding, sheep ranching, poultry and dairying as well as winter and spring wheat raising are bound to be the leading branches of agriculture followed in this country; not to overlook sugar-beet raising, an industry that is very profitable.

It is surprising the number of Americans that have found "gold-mines" in this new country, in farming or business. The facts that soil is better than that of their home state, a climate highly agreeable and conducive to bumper

crops, and land at \$8 per acre is offered the settler on very easy terms, are quite sufficient to induce investigation. The absence of stone and timber wins the visitor. It is certainly a grand sight to watch the undulating prairie being broken up by the plow for miles and miles as you can do on a clear day. The soil is principally a deep rich loam top soil with a clay or sandy subsoil.

The fuel and market topic is a very important one to the intending settler. In southern Alberta the whole country is more or less the possessor of the richest veins of coal in America. Upwards of fifty coal mines are being worked and will be supplying coal to the consuming millions for hundreds of years to come. In the city of Lethbridge the famous Galt Coal Mines and the Pioneer Mines ship car load after car load of the black diamonds all over the country. The farmer can buy at any of the local mines at \$3.00 per ton.

The local market is consuming much more of the farm produce in the way of poultry, eggs, butter and vegetables, than can be produced. This over-draft is, no doubt, due to the big lumber camps in the mountains to the west and the many new mines being opened up almost every week.

Speaking of crops, some of the heaviest crops of alfalfa that have ever been grown have been cut from the fields of southern Alberta, while the Alberta Red Winter Wheat which has never been defeated at any exposition for quality or weight is in great demand by bakers, while only a small portion of the call for this grain can be met.

At Raymond, quite near the city of Lethbridge, is located the famous Knight's Sugar Factory, which takes all the sugar-beets that the farmers care to raise. It would be well for readers interested in southern Alberta to write the land men who advertise this country in other columns of this paper.

## ROOF FREE BOOK

Illustrated ROOF BOOK, just off the press, tells how to lay durable, water-proof, weather-proof and fire-resisting roofs on residences, barns, cribs, poultry houses, outbuildings, stores, etc. How to cover old shingle roofs. No tools necessary but a knife and a hammer. Tells all about the famous

## NO-TAR ROOFING

which is better and cheaper than shingles, slate or tin. Water-proof, fire-resisting and acid-proof. Contains no tar but is made from asphalt and cannot dry out or run in the sun. Flat-roofed, flexible and easy to lay. Best dealers sell NO-TAR ROOFING. Special mails and liquid cement FREE in every roll.

FREE SAMPLES TO TEST. When we send you the Free Samples of NO-TAR ROOFING, we will tell you TEN WAYS TO TEST IT and PROVE its superiority to any other roofing.

DEALERS—Write for our Roofing-Business Promotion Plan. Address THE HEPPESS CO., 2481 Fillmore St., Chicago

## If You Want to Increase the Value of Your Land

get rid of the quick grass in it. We are manufacturing a machine to do that work. Write for circulars.

AUSTIN WEED EXTERMINATOR MFG. CO., 300 West Main St., Austin, Minn.

Kins, Mo., at Maryville, Mo., on May 29th, may well be classed as a successful sale. No high prices were paid and on all an average of \$99.40 was made. The top of the sale was \$325 paid by Mr. Geo. McMaster, of Bedford, Iowa, for lot 7½, a Good Choice bull calf, eight months old. After the sale Messrs. Bellows and Forbes, of Maryville, became the owners of this calf and he will probably be seen at the fall shows. His dam went to Mr. H. R. Coffey, of Savannah, Mo., at \$150. Mr. Coffey also took Scottish Victoria, the top female of the offering at \$200. Both Mr. Harvey and Mr. Wray expressed their appreciation of the support of the breeders who attended the sale. Col. Bellows was in good form and worked hard for their interests. Following is list of all sales over \$100:

## FEMALES.

Scottish Victoria, 2-years, Gallant Son, H. R. Coffey, Savannah, Mo. . . . .	\$200
Violet Rose Victor, 9-years, Scottish King, and b. c. Jno. Brady, Lowell, Neb. . . . .	165
Longbranch Sybil 4th, 11-years, Victoria Baron, Bellows Bros., Maryville, Mo. . . . .	100
Lady Aberdeen 2d, 8-years, Columbian Lord, Jno. Brady. . . . .	100
Lady Aberdeen 4th, 4-years, Capt. Ramsden, same. . . . .	150
Elsie's Darling, 3-years, Morning Flash, H. R. Coffey. . . . .	150
Highland Gem, 5-years, The Lad for Ugly, and c. c. C. C. Fuller, Mound City, Mo. . . . .	100
Rosegold 3d, 3-years, Rosemont, and c. c. Dr. E. W. Bishop, Ravenwood, Mo. . .	150
4th Valley View Beauty, 6-years, Valley Knight, and c. c. C. Wells & Son, Maryville, Mo. . . . .	100
Minnie, 6-years, Oxford Barrington, and c. c. J. S. Gross, Maryville, Mo. . . . .	130
Rosana, 3-years, Rosemont, and c. c. E. H. Payne, Maryville, Mo. . . . .	100
7th Norwood Rose, 8-years, and b. c. C. E. Shumaker, Corning, Iowa. . . . .	155
Rosetta, 4-years, Rosemont, and c. c. Shumaker, Corning, Iowa. . . . .	110

## MALES.

Baron's Gloster, 3-years, Baron Barmpton, Jno. Brady. . . . .	300
Bull by Good Choice, 9-months, Geo. McMaster, Bedford, Iowa. . . . .	325

## SUMMARY.

31 females sold for \$2,900.05, average. . .	\$93.55
14 bulls sold for \$1,572.90, average. . .	112.35
45 head sold for \$4,472.95, average. . .	99.40

## Cancer of Breast Cured.

Mrs. Harriet Chandler, 44 Blanch St., Battle Creek, Mich., recently returned home from Indianapolis, where she was treated, and cured of an advanced case of cancer of fifteen years' duration, covering the entire breast. Dr. Benj. F. Bye, Indianapolis, Ind., will mail a free book of his method of curing with soothing Balm Oil.

## Short-horn Herd Book.

Vol. 68, of the American Short-horn Herd Book, is now ready for distribution. It contains the pedigrees of bulls numbered from 263115 to 265186, and also the pedigrees of 6,483 cows. The price of this volume is \$3.00 to non-members at the office, or \$3.30 prepaid. Vol. 69 is in the hands of the printer and current receipts of pedigrees are being filed for Vol. 70. Address Jno. W. Groves, Sec., Union Stock Yards, Chicago.

## A CHANCE TO MAKE MONEY.

Since making my big hit in a Mexican gold mine, I get so many letters that I cannot answer them, and ask you to publish this statement:—

I believe any man or woman can make big money, with absolute certainty by buying stock in any of the rich operating mines, because Mexico has the richest mines in the world, and the Mexican laws do not permit fraudulent mining schemes. Be sure to invest in a mine that is actively operated, and owned by a reliable company, whose officers and directors are known to be men of integrity and honesty; a few dollars invested with such a company now, will bring you thousands in a year. The Pittsburgh-Oaxaca Mining Co., Block 1028 Pittsburgh, Pa., is absolutely reliable, and through them I made over \$20,000 in less than a year, having only a few dollars to begin with. A friend of mine invested \$10, and is now getting a dividend of \$5 a month. You do not have to go to Mexico; write to the above company, and you can rely implicitly on the information you receive. Jack Marston.

## POULTRY DEPARTMENT.

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

## June and July Hatchings.

To the Editor of The Homestead:

The long continued cold of early spring greatly reduced the usual output of chicks. If anything like the needed amount are raised, it must be by extending the hatching season into June and July. And there is no reason why such hatching should not be successful. People are learning how to overcome the summer difficulties, and each year sees an increase in the late hatchings.

If shade, either natural or artificial, can be provided, chicks need not suffer greatly from heat. Great care must also be taken in regard to the water supply, to see that it is clean and fresh. Never allow the water dishes to stand in the sun. It makes the water not only hot and unpalatable, but almost poisonous. Frequent renewal of the water supply in a hot day will help greatly in relieving the situation.

Given shade and fresh water, chicks will grow faster than in the chill and uncertain weather of early spring, their feed should be carefully chosen, sloppy food being especially avoided. It is in summer that dry feeding shows its greatest value.

Extra precautions need to be taken against lice and mites when hot weather is upon us. But with all the lice destroyers that are available, there is no need of being worried in the battle against insect foes. Care and watchfulness are always necessary, and at no season do they pay larger dividends than in the heated months.

The summer months also offer a rare opportunity to those desiring fine stock, but who are ill able to afford the cost of eggs earlier in the season. Nearly all breeders cut their prices in two June 1st.

Many ambitious men and women have gotten their start in fine stock by taking advantage of this opportunity. The possibilities of summer hatchings were impressed upon me by a letter recently received from a well known breeder of Rose Comb Rhode Island Reds in Iowa. He said that his egg trade had been so heavy, that he was expecting to set eggs from his best pens for his personal use during June and July. If he, with all his years of experience, is willing to risk his birds for next season from summer hatches, why should not the rank and file of poultry raisers increase their flocks in the same way?

Subscriber.

## Milk for Young Chicks.

To the Editor of The Homestead:

In a late issue of Successful Poultry Journal, an Indiana poultryman tells the story of an interesting experiment with young chicks. He had met with considerable loss from bowel trouble, and attributed it to the free use of water. He tried providing plenty of sweet milk, withholding water entirely for the first few weeks. Since milk is a food as well as a drink, he cautions against the use of both at the same time, since this will make their rations too liquid. Last season he raised a brood of twenty-five chicks that never saw water till they were almost two months old, and a fine lot of husky little fellows they were. They grew and matured more rapidly than any brood before in his experience. Milk was provided for them constantly. All the milk was boiled, and every drop that was left was thrown out. Sour, stale milk would have spoiled the whole business. Not a chick died of bowel trouble, and the result was most gratifying.

To continue the experiment farther, this season he is going to try boiled sour milk, wheat bran and cornmeal, sprinkled with pulverized charcoal for chicks more than two months old. He thinks that in this he will find a palatable, inexpensive and wholesome food. This will not do away with the feeding of grains, as these will be alternated with the milk mash, as it might be termed.

This Indiana poultryman has definite ideas, and his experiments are here given that others to whom bowel trouble in young chicks has proved a loss, may follow in his experiments, and perhaps at-

## KEEP THEM HEALTHY

Don't lose the chicks now. Success with poultry depends not so much on the number of chicks hatched as on the number brought to maturity. They need a tonic—a medicine—a preventive of disease; something to reduce to a minimum the dangers from Cholera and Bowel Complaint, their greatest enemies during the hot months of June, July and August.

## GERMOZONE

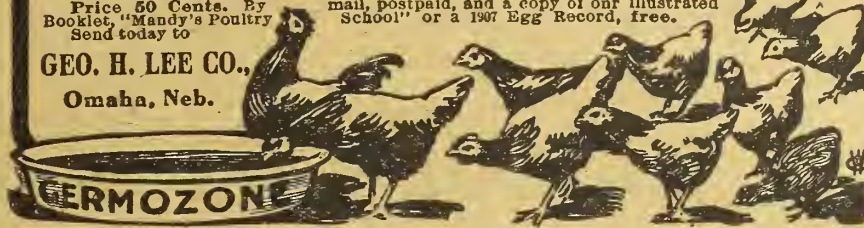

is a germicide—the best cure for poultry diseases such as Cholera, Bowel Complaint, Chicken Pox, Canker, etc., which cause so much trouble at this time of the year, and is used and endorsed by poultry-raisers all over the world.

Give it in the drinking water twice a week. It prevents disease as well as cures, keeps fowls healthy and insures profitable, vigorous birds later in the season. You can not afford to be without it.

Price 50 Cents. By mail, postpaid, and a copy of our illustrated Booklet, "Mandy's Poultry School" or a 1907 Egg Record, free.

GEO. H. LEE CO.,

Omaha, Neb.

## LEGHORNS.

50, \$2.00; 100, \$3.50. Satisfaction guaranteed. Mrs. Nelson Hyde, Manson, Iowa.

## DOGS.

## DOGS FOR SALE

AND ALL kinds of pet and live stock. Send 10 cents for descriptive illustrated catalog. MOUNT PENN KENNELS, Reading, Pa.

tain the gratifying success which he reports.

Dry feeding combined with the milk would seem an ideal method. By boiling the milk, there is less danger in its use.

Great care is necessary to keep the drinking vessels clean and sweet when they have contained milk. In hot weather it is especially necessary to know (not guess) that they are always in sanitary condition. This means added work, of course, but it also means added profit.

Mrs. S. B. Titterington.

## POINTERS.

—Mrs. Laura Mather, Clarksville, Iowa, advises us that she is now filling orders from customers for the second and third time from her flock of Rose Comb Brown Leghorns. Mrs. Mather attributes the fact to the high number of chicks which have resulted from her hatches. (With not a single complaint to date, is a record of which anyone can certainly be proud. On this page eggs are priced. Kindly mention The Homestead when writing.)

—Fair and honest dealings" is the motto of Mr. H. W. Chestnut, of Centralia, Kan., who advertises "White-faced Black Spanish" cocks and hens on this page. As it is rather late, the eggs are being priced very low as will be seen by quotations in the advertisement. Mr. Chestnut has bred this kind of poultry for eleven years exclusively and should surely be able to satisfy the wants of any of our readers. His flock contains World's Fair and other prize winners. Kindly make mention of this paper when writing.

## PLYMOUTH ROCKS.

## 25 BARRED PLYMOUTH ROCK

## COCKERELS CHEAP

**PRESIDENT WM. MCKINLEY SAID:**  
"I am familiar with Ridpath's History of the world, and cordially commend it to the scholar as well as to the plain people generally."

**PROF. W. F. WARREN, Pres. Boston University, said:**

"I should be glad to see it placed in the library of every young person in the United States, and even in the English-speaking world. In families where there are bright children it will render excellent service."

## THE Publishers Failure IS Your Opportunity

**PRESIDENT BENJ. HARRISON SAID:**  
"Dr. Ridpath's labors are deserving of the highest praise. I most heartily recommend his History of the World for study and convenient reference."

**Prof. E. H. LONG, Supt. Public Schools, St. Louis:**

"I unhesitatingly commend Dr. Ridpath's 'History of the World' as the ablest work on that subject which I have ever examined."

The Homestead Readers are Offered the Opportunity of a Lifetime  
To place in your homes The World Famed Publication

# Ridpath's History of the World

Brand new, latest edition brought right down to date, including Peace Treaty of the Russia-Japan War, beautifully bound in Half-Morocco. We are selling them while they last, first come first served,

**At LESS than even DAMAGED SETS were ever sold**

The Homestead in reviewing this great work said: "Ridpath's History of the World may be regarded as a complete library in itself. In those nine volumes may be found the equivalent of thousands of ordinary books. Right in this statement lies the value of such a set of books. The average individual desires to have his library as well stocked as possible. To select from the maze of books of numberless subjects now on sale, those which will be the most useful and cover the most ground is a task not for an ordinary person. Dr. John Clark Ridpath is generally admitted as America's greatest historian. We cheerfully recommend this famous History of the World to our readers. It is a work that should be in every home."

Here is your opportunity to secure Ridpath's History of the World at the lowest price ever offered—and on easy terms. It will cost you nothing to inspect the beautiful specimen pages and let us give you full particulars of our offer.

Dr. Ridpath is dead, his work is done, but his family derive an income from his History, and to print our price broadcast for the sake of more quickly selling these few sets would cause great injury to future sales. We will name our price only in direct letters to those sending the coupon below. Tear off the coupon, write name and address plainly, and mail now before you forget it.

9 massive royal octavo volumes, encyclopedia size, 11 in. tall; 8 in. wide; 2 in. thick; weighs 55 lbs.; 4,000 double-column pages; 2,000 superb illustrations.

**RIDPATH'S** enviable position as an historian is due to his wonderfully beautiful style, a style no other historian has ever equaled. He pictures the great historical events as though they were happening before your eyes; he carries you with him to see the battles of old; to meet kings and queens and warriors; to sit in the Roman Senate; to march against Saladin and his dark-skinned followers; to sail the southern seas with Drake; to circumnavigate the globe with Magellan; to watch that thin line of Greek spearmen work havoc with the Persian hordes on the field of Marathon; to know Napoleon as you know Roosevelt.

**RIDPATH** in your home means you need never spend a lonely evening. You can associate with the world's heroes; you can cross the Rubicon with Caesar, after which Rome was free no more. You can sit at the feet of Socrates, the loftiest genius of the ancient world. You can kneel at the shrine of Lincoln, "the greatest character of all time; the gentlest memory of our world." It is ennobling to commune with these children of destiny. To be associated with great men and events is to be great one's self, and you will add to your store of knowledge, which is power, and to the richness of your life. You owe it to yourself and family to place this work in your home.

**RIDPATH** takes you back to the dawn of history, long before the pyramids of Egypt were built; down through the romantic, troubled times of Chaldaea's grandeur and Assyria's magnificence; of Babylonia's wealth and luxury; of Grecian and Roman splendour; of Mohammedan culture and refinement; of French elegance and British power; of American patriotism and religious freedom, to the dawn of yesterday. He covers every race, every nation, every time, and holds you spellbound by his wonderful eloquence. Nothing more interesting, absorbing and inspiring was ever written by man.

**RIDPATH** throws the mantle of personality over the old heroes of history. Alexander is there; patriot, warrior, statesman, diplomat, crowning the glory of Grecian history. Xerxes from his mountain platform sees Themistocles with three hundred and fifty Greek ships smash his Persian fleet of over a thousand sail, and help to mould the language in which this paragraph is written. Rome perches Nero upon the greatest throne on earth, and so sets up a poor madman's name to stand for countless centuries as the synonym of savage cruelty; Napoleon fights Waterloo again under your very eyes, and reels before the iron fact that at last the end of his gilded dream has come. Bismarck is there, gruff, overbearing, a giant pugilist in the diplomatic ring, laughing with grim disdain at France, which says, "You shall not." Washington is there, "four-square to all the winds," grave, thoughtful, proof against the wiles of British strategy and the poisoned darts of false friends; clear-seeing over the heads of his fellow-countrymen, and on into another century, the most colossal world-figure of his time.

## VETERINARY MATTERS.

PROFESSIONAL Veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of one dollar. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. All veterinary inquiries should be addressed to this office.

### SYMPTOMS AND TREATMENT.

#### WARTS.

I bought a six-year-old white cow last week that has warts on her teats. I do not think she has ever been treated for same. She will calve soon and is almost dry now. Please tell me through your paper how I can remove the warts without hurting the cow.

Rub the parts thoroughly once daily with castor oil or goose grease. If this does not cause the warts to drop off in time, clip them off with scissors, a few at a time; then touch the bleeding places with lunar caustic pencil.

#### PERIODIC OPHTHALMIA.

Is there such a thing as wolf teeth making a colt go blind? I have a two-year-old bay filly that is blind in one eye, and a large spot on the other eye. Some of my friends tell me that it is caused by wolf teeth. Please answer this question and give me advice what to do for the colt.

Wolf teeth have no possible effect for good or bad on the eyes of a colt or horse, public opinion to the contrary. This disease is periodic ophthalmia (moon blindness), incurable and due to breeding from affected stock. The disease, therefore, is hereditary.

#### WHITE SCOURS.

Please give me information describing white scours in little calves. Can anything be done for a little calf that has it? How is the best way to eliminate the disease? If it once gets started, will it go through the whole herd?

The name indicates the nature of the disease which is characterized by liquid passages of bad smelling feces, soon followed by rapid emaciation ending in death. This disease is contagious (in some forms) and in such cases is due to a germ which enters the body by way of the raw navel cord at birth or by way of the mouth when the calf sucks a cow whose udder has come in contact with germ infected manure or other matter. Clean up, disinfect, ventilate, and whitewash the cow stable and calf pen and be sure that sunlight can freely enter both places. Wet navel of calf at birth and twice daily until fully healed, using a 1-500 solution of corrosive sublimate and wash belly of calf and nd-

der of cow daily with a 2 per cent solution of coal tar disinfectant for at least two weeks. Give affected calf a teaspoonful of the following mixture in each pound or pint of milk fed daily: formaldehyde, half ounce; distilled water, fifteen and one-half ounces. Keep solution in an amber colored bottle.

#### PUFF.

I have a two-year-old colt that has a wind puff in the hock. It has been there about a year. It is on one leg only. Does not lame him, but it is getting larger and spoils the sale of him by about \$25; that is, it takes about that much off the price of him. Can you tell me how to take it off, or how to reduce it?

Simply give the joint a thorough dressing with green tar and turn out in yard or pasture. Repeat when dressing becomes rubbed off. In young colts such swellings tend to disappear if treated in this way, as the tar acts as a truss when matted with the hair.

#### PAWING.

I have a seven-year-old pony, weighing about 700 pounds, that has one colt a year old and is due to foal in a day or so. For the last three or four months she takes spells at different times and stamps her front feet down and hits herself behind the front feet. Do you think it would hurt to breed her again? Please give me some advice.

By all means breed here again and in future see that she has a roomy box stall when in foal and is driven, worked or exercised thoroughly every day right up to foaling time, and has soft food to keep her bowels operating freely. It is probable that lack of exercise and constipation due to that cause and the feeding of too much coarse or rich food causes the collection of gas which induces pain and pawing.

#### BONE TUMOR.

We have a one-year-old colt that had a hard swelling come on one side of his nose last winter. It was about half way between the eye and the tip of the nose. It is now raised up in sort of a lump and seems sore to the touch. It affects his breathing, making him snore. He seems healthy in every other way. Within the past week one of our old horses has a swelling starting in the same location. Can you tell me what is the matter and if the disease is contagious? The old horse and the colt have not been running together.

There is no association between the two cases. In the old horse a diseased molar tooth gives rise to the tumor and will have to be removed by trephining, which will have to be done by an expert veterinary dentist. In the colt the tumor is associated with teething and may be relieved by painting with tincture of iodine or blistering with a mixture of one dram of biniodid of mercury in

# Blacklegoids

Simplest, Safest, Surest Vaccination  
for the prevention of

## BLACKLEG IN CATTLE

NO DOSE TO MEASURE. NO LIQUID TO SPILL. NO STRING TO ROT.

Just a little pill to be placed under the skin of the animal by a single thrust of the instrument. You cannot afford to let your cattle die of blackleg when a few dollars spent on Blacklegoids will save them. Write for circular.

**PARKE, DAVIS & COMPANY**  
HOME OFFICES AND LABORATORIES, DETROIT, MICH.  
NOTICE.—For a limited time we will give to any stockman an injector free with his first purchase of 100 vaccinations.

an ounce of lard. Whichever is used great care will have to be taken to keep it out of the eyes and to tie the colt so that he cannot possibly rub the part. The iodine tincture may be applied several days in succession; the blister should be repeated in three or four weeks if required. There is a possibility that the colt is afflicted with osteoporosis (big head) which is incurable.

#### YEAST TREATMENT—CUT THIS OUT.

Several months ago I noticed in your paper a new method of getting mares with foal. It was some preparation of yeast, but I have forgotten what it was and cannot find the paper containing it. I have a mare which I would like very much to get with foal and I would appreciate it if you would reprint the information again.

A fee of one dollar must accompany an inquiry to which an answer is desired by mail. The yeast treatment formula has been repeated several times and it is therefore hoped and expected that this time the following will be cut out and preserved for future reference by all interested in the matter. Stir to a paste, with a little warm water, one cake of compressed yeast and allow to stand for twelve hours in a moderately warm room; then stir in a pint of luke warm, freshly boiled water and allow to stand for eight to twelve hours, as before, when it will be ready for use. Inject this mixture into the vagina of the mare or cow as soon as she is seen to be in heat and have her served when period of heat is about over. The injection may be made by means of any large syringe or a hose and funnel. The vagina may first be flushed out with warm water and if possible the mouth of the womb (os uteri) should be opened by hand before the injection if an examination shows it to be tightly closed. Re-

## NO MATTER HOW BAD

**HE CUTS UP** If he's hitched to a Champion Cart, the driver can dismount instantly in perfect safety as there is nothing to interfere with his legs or clothes. Absolutely no Horse Motion. That's why the Champion Cart is so pleasant and agreeable to ride in. It's surprising how smooth it rides over rough roads. The adjustable seat makes it self-balancing without hitching to horse or matter how heavy the driver. This takes all the load off the horse. Booklets free.

**CHAMPION CART CO.,**  
107 Calvin St.,  
Ligonier, Ind.

## Bog Spavin

Cure the lameness and remove the bunch without scarring the horse—have the part looking just as it did before the blemish came.

**Fleming's Spavin Cure (Liquid)** is a special remedy for soft and semi-solid blemishes—Bog Spavin, Thoroughpin, Splint, Curb, Capped Hock, etc. It is neither a liniment nor a simple blister, but a remedy like any other—doesn't irritate and can't be limited. Easy to use, only a little required, and your money back if it ever fails.

**Fleming's Vest-Pocket Veterinary Adviser** describes and illustrates all kinds of blemishes, and gives you the information you ought to have before ordering or buying any kind of a remedy. Mailed free if you write.

**FLEMING BROS., Chemists,**  
210 Union Stock Yards, Chicago, Ill.

## Scar Tissue can be removed and hair grown on by

# ABSORBINE

used as directed on page 19 of Pamphlet with each bottle. Absorbine will heal a Cut quickly without leaving a Scar, reduce inflammation or any soft bunch without blistering, and horse can be used. \$2.00 a bottle delivered or at dealers. Book 9-C, Free.

**ABSORBINE, JR.,** for manking, \$1.00 bottle. Cures Strained, Torn Ligaments, Varicose Veins, Varicocele, Hydrocele, enlarged Glands and Ulcers. Allays pain quickly. Book "Evidence" free.

**W. F. YOUNG, P. D. F.,** 40 Monmouth St., Springfield, Mass.

## IN TIMES OF EMERGENCY

When a bad burn, scald, sprain, wound, cut, bruise or other accident demands instant attention **OLEO CUREINE** (guaranteed under the Pure Food and Drug Law) is invaluable. It is antiseptic—allays pain instantly—stops inflammation and cures with great rapidity. Indispensable in every household. By mail 35 cents a bottle. Send for booklet. Agents wanted everywhere in rural districts.

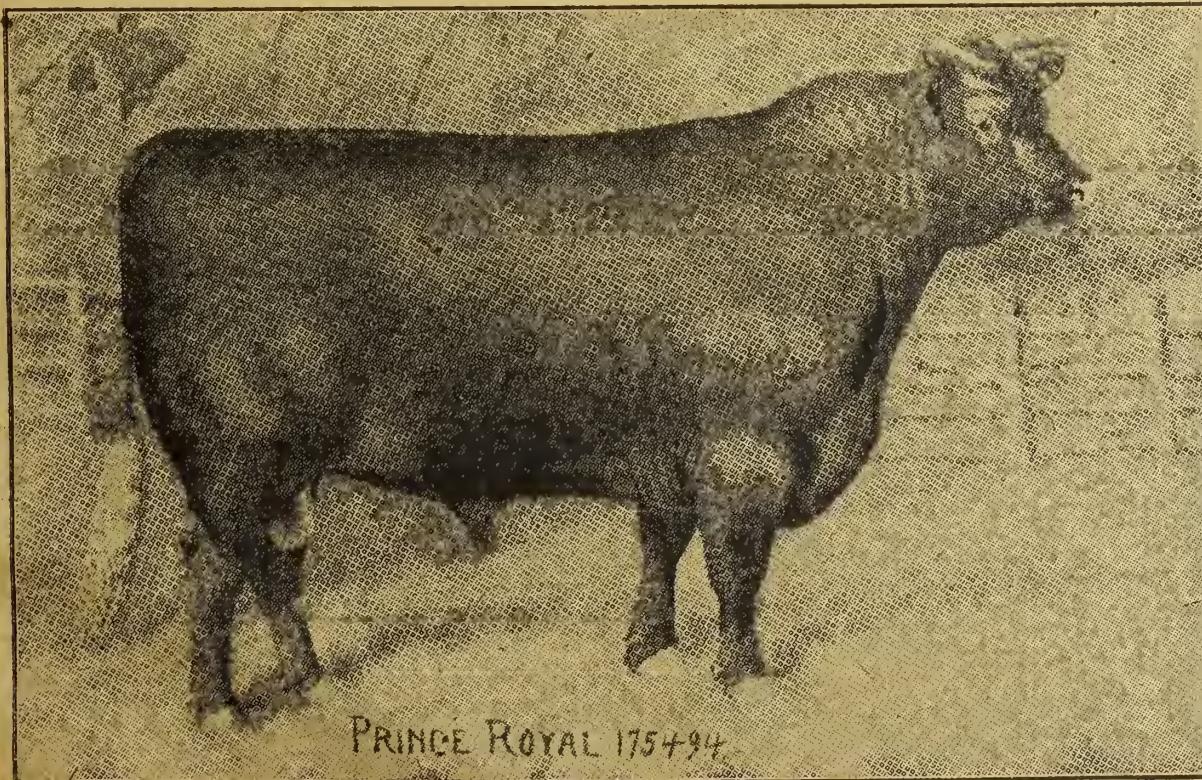

**THE OLEO REMEDY CO., 132 E. 23d St. NEW YORK, N. Y.**

peat the treatment each time the animal is seen to be in season. In chronic cases the mixture may be injected as soon as ready and again when the first period of heat is noted. If compressed yeast cannot be obtained use any yeast suitable for the making of bread.

All kinds of bee supplies are manufactured and sold by the Kretschmer Manufacturing Company, of Council Bluffs, Iowa. This is one of the most important and reliable bee supply firms in the West. See their advertisement on page 5 and write them for free catalog. Kindly mention The Homestead.

### A GOOD SHORT-HORN BULL FOR SALE

The subject of our illustration is the splendid Scotch Short-horn bull, Prince Royal 175494, owned by Mr. N. P. Halgren, of Vinton, Iowa, and consigned to his sale, June 19th. This bull's picture is interesting at this time from the fact that practically all of the younger cows and heifers listed in this sale are sired by this bull and those not sired by him are bred to him. He is six years old, but is still in his prime; is active and is a sure and good breeder. His pedigree is exceptionally choice from a Scotch standpoint. He belongs to Mr. Cruickshank's famous Miss Ramsden family and is only three removes from the imported cow, while he himself was sired by the Marr bred bull, Imp. Prince Oederic. Prince Oederic belonged to the famous Upper Mill family of Princess Royal. Prince Oederic was sired by Sittytton Pride, he by Scottish Archer and out of Guelder Rose by Pride of the Isles and out of Princess Royal 39th by the Upper Mill's greatest sire, William of Orange. The catalog of this forthcoming sale has the accompanying picture of this bull with his pedigree in full; they can be had for the asking by addressing Mr. N. P. Halgren, Vinton, Iowa.

## ADVERTISING NOTES.

An unimproved quarter section of land, practically all tillable, is priced on page 19. The owner will make easy terms and will be glad to correspond with prospective buyers with the view of meeting them and showing the farm. Address Mr. A. N. Kane (owner), Ger. Am. Bldg., St. Paul, Minn.

Good wild lands and farm lands, also town property in Saskatchewan, Canada, is listed on page 19. These lands are offered by a well-known real estate firm and further particulars may be obtained by writing, mentioning The Homestead, to Mr. J. Morrison Bruce, Real Estate and Insurance Agent, Lashburn, Saskatchewan, Canada.

On very easy terms is offered a 313 acre Tennessee farm in our columns this week. It is situated within a few miles of Memphis, and is equipped with tools for working besides having a herd of Jersey cows. Write for terms and description, mentioning this paper, to Mr. H. M. Anderson, Capelville, R. F. D. No. 1, Tennessee. See page 19.

There is such an apparent shortage of pasture and hay crops everywhere that an unusually heavy demand has developed for millet and other seeds required for late sowing and it is stated that in some of the leading seed markets the supply is already exhausted. The Iowa Seed Company, of Des Moines, Iowa, however, still have some seed in stock which they purchased early in the season and they are enabled to offer same at reasonable prices. See advertisement on page 14.

Des Moines, Iowa, real estate is offered in trade or exchange for California property on page 19. The property in question consists of four double brick flats within five blocks of the business center of the city. Anyones having California property to exchange should write for consideration, describing what they have to trade. The same advertiser offers fruit and nut ranches in California. Write them for proofs and information. Address Shannon with Western Realty & Investment Co., 434 So. Hill St., Los Angeles, Cal.

Mistakes in business in any new country are common. As a rule they are the result of business ventures founded on illogical grounds by persons who are new to the ways and methods of the country. On page 19 is an offer made by a resident of California which should interest every person who has intentions of going West. Young men are bound to go. Big salaries and splendid opportunities for investments are awaiting those who know and can find them. Mr. John I. Stafford, G. 2421 Downey Ave., Los Angeles, Cal., is in a position to help people find these good things. Write him, mentioning this paper.

## TWO 320-ACRE FARMS

are offered in our columns on page 19. One farm is in Manitoba, Canada, all under cultivation and the other is near Regina. Prices are quoted in the advertisement. Mention this paper when you write. Address for particulars, Avery Casey, Barrister, Regina, Sask.

## ADVANTAGES OF STEEL ROOFING.

Steel roofing of good quality has many good points as a roofing. It is easy to put on, and requires no tools other than a hammer and a hatchet. With ordinary care it will outlast most other kinds of roofing. It is suitable for any building. It is fire and water proof, and does not taint the rain water. It is a protection from weather when used as ceiling or siding material. Steel roofing may be purchased in any quantity from the Chicago House Wrecking Co. Freight will be paid on all shipments.

sast of Colorado. This makes it an inducement to corn belt buyers to write for quotations. Prices are the lowest and a sample is given on this page. Ask for catalog W E 500, as advertised. Address, Chicago House Wrecking Co., 35th and Iron Sts., Chicago.

## 160 TO 20 FAVOR OF CALIFORNIA.

It is not an uncommon statement that as much can be grown on twenty acres in California as on 160 acres on an eastern farm, that is, east of California. The ways and methods of farming in that state are intensely interesting. Full descriptions are set forth regarding these methods and the profits to be derived in six booklets. They will be sent if you write for them, mentioning this paper. Address, California Farmland Co., 58 Grosche Bldg., Los Angeles, Cal. See page 19.

## SAVE WASHDAY WORK

should be acceptable advice to any household. Far too many women in the land have ruined their health over the washtub. If the Royal Blue Washer had been in existence when our mothers started housekeeping their lives might have been much happier. Cut out the drudgery of washday. Get an up-to-date, easily operated washer like the Royal Blue. Write for descriptive booklet. Address, H. F. Brammer Manufacturing Co., 1457 Rockingham Road, Davenport, Iowa. See page 16.

## TIMBER AND UNCULTIVATED NORTHERN LANDS.

Fifteen thousand acres of uncultivated land, located within sixty miles of the great market centers of St. Paul and Minneapolis, are offered for sale to farmers on page 19. While the soil is a clay loam, it is the kind that produces the best of grasses, grains and vegetables. This land is partly timbered and well watered. It may be purchased in lots to suit the buyer and direct without commission from A. T. Moe, Midway, St. Paul, Minn. Mention The Homestead when writing for particulars.

## EIGHTY SMOOTH, SOLID BALES

is a good hour's work. But that is what the Ohio all-steel angle framed hay press can do in that time. All the modern and recognized improvements are embodied in the Ohio press. It is equipped with an automatic friction clutch which stops the press instantly. The foot button drop block dropper, drops right in time and place. It returns automatically. The Ohio is the press for durability, speed and economy. Send for catalog and investigate. Address, The Ohio Cultivator Co., Dept. 13, Bellevue, Ohio. See page 8.

## THE COMFORT SWING CHAIR.

On the lawn, under a cool shade tree, on the front porch, in seclusion of vines, or on the restful back veranda after the day's toil is over, there is a place for the comfort swing chair that no other reclining seat will fill. The Comfort chair that is advertised on page 16 is one of the kind that is just waiting for you to drop into at anytime, morning, noon, or night. It fits you everywhere. You should drop a postal today for a guide which tells how to make country summer days comfortable. Address, Haggard & Marcusson Co., Factory 427 So. Canal St., Chicago, Ill.

## JONES SELLS GOOD SCALES.

A genuine five-ton, all steel trussed, complete and carefully made wagon scales may be purchased of Jones for the moderate sum of \$45. Jones is the man who has made scales for forty years in New York. He is pretty well-known to our readers. He has a world of friends who are the best advertisement he has. Jones is still selling as high a grade of farm scales as ever. They are warranted against defect. What more could any buyer desire. See what is said about this scale on page 3. Write for the new plan of buying. Address, Jones, He pays the Freight, Box 418A, Binghamton, N. Y.

## SHELLED 397,000 BUSHELS OF CORN IN FOUR YEARS.

This is the record made by Omar Kinsey, of Minier, Ill., with an Ottawa Dustless Cylinder Corn Sheller Model "C". What is more wonderful about this feat is that Mr. Kinsey never had a breakdown during the entire four years. He recently mailed his first order for repairs to the King & Hamilton Co., of Ottawa, Ill., the manufacturers, amounting to \$14.44, with which he expects to put the sheller in such condition as to fit it for four years more of continuous work. This record, we believe, tells its own story regarding the high efficiency, durability and reliability of these shellers. The Ottawa of today is the culmination of fifty years experience in building cylinder corn shellers. It has many valuable features exclusively its own. For instance, it shells corn perfectly in any condition—wet, dry, dirty or rotten. With its perfected dust collecting apparatus it is absolutely dust proof. Unlike many other shellers it does not crush the cobs, but leaves them in a nice clean pile, making them ideal for fuel. By changing screens it will shell pop corn as perfectly as it does field corn. These are but a few of the many good features of the Ottawa Dustless Cylinder.

# PILES NO MONEY TILL CURED.

FISTULA, Fissure, Contraction, Ulceration and all Rectal Diseases treated on a positive guarantee of permanent cure.—Established 29 Years.—See thousands of prominent names with statements that they paid nothing till satisfied of a cure in our free 832-page illustrated treatise, also our 132-page illus. book for women; both sent free and postpaid.

DRS. THORNTON & MINOR, 3639 Olive St., St. Louis, Mo., and 1010 Oak St., Kansas City, Mo.

der Sheller. Sheller men or others interested should not fail to write for complete catalog and particulars. These shellers, we understand, are sold on an iron-clad guarantee, eliminating all risk to the purchaser. This company also claims that their shellers show the purchasers from 25 to 50 per cent more profits than other makes, which is no small item in making a selection. However, as the proof of the pudding is in the eating, we would advise our readers to investigate their proposition before placing their order elsewhere. For catalog address, King & Hamilton Co., Ottawa, Ill. See page 3.

## SOMETHING OF INTEREST TO EVERY-

## ONE.

There is no kind of roofing quite as cheap in the end as one which can get along without having to be painted. Such a roofing is Amatite. This roofing has a mineral surface, which is much more durable than paint, and as a result Amatite does not need any paint at all. If you have never seen a mineral surfaced roofing, you should inform yourself at once about this latest development in ready roofings. The manufacturers of Amatite will be glad to send you a free sample. Address this nearest office of the Barret Manufacturing Company, New York, Chicago, Cleveland, Allegheny, Kansas City, St. Louis, Minneapolis, Philadelphia, New Orleans, Cincinnati. See advertisement on page 17.

## PRESERVE FARM TOOLS.

With all the care you can give farm tools, there is nothing that adds so much to their usefulness and longevity as a coat of good paint now and then. Good farm tools will stand a great deal of wear when properly cared for. None will stand exposure to the elements for any length of time and remain efficient. In painting wagons, and other tools use only pure white lead paint. It requires the best kind of a paint to stick to surfaces exposed to much wear. A good reliable paint for this use is the brand called the Old Dutch Process of pure white lead paint. "A Talk on Paint" tells all about this process and about the colors, and other paint pointers valuable to know. (Write for the booklet to the National Lead Co., Chicago, Ill., or any of the points given in the advertisement on page 5 that is nearest you. Kindly mention The Homestead when asking for the booklet.)

## HAY MAKERS' PLANS.

Nothing is so disconcerting to the plans of the hay maker as to find his hay loader, tedder, rakes, or whatever the tool, breaking down frequently. In such cases the best thing to do is to throw the old implement away and buy a new one. When hay is ready to stack, delay is dangerous. Why not look over the tools now and plan to replace the old loader or the out-of-date tedder with a good Sandwich machine. The Sandwich tools are known the country over. Their announcement regarding their models for the season is made to readers in this week's issue on page 8. Sixteen years of successful operation is behind every Sandwich loader, tedder, or rake that goes to the hay field. Stop and consider whether prestige means anything in farm tools. If it does, then write for illustrated catalog of Sandwich hay tools. Address, Sandwich Mfg. Co., 143 Main St., Sandwich, Ill.

## "PAYS FOR ITSELF EVERY YEAR."

That's the experience of hundreds of users of good cream separators. It takes but little figuring to prove it, too. Say that the person who skims by hand or uses a poor machine loses one-fourth of the butter fat. This estimate is not an extreme case either. It is a common experience. Suppose a farmer sells 200 pounds, a little better than the average, of butter from every cow in a year. Fifty pounds is one-fourth and it represents the part that will go into the swirl harrel with the skim milk if a separator is not used. It further represents a value of ten dollars, and anyone can soon calculate how many cows it will be necessary to save this amount on to pay for a cream separator. "We have used a National for seven years and it is doing as good work as ever," writes a Pennsylvania dairyman, "simply could not do without it." So it goes with users of the National. It is said that a good account in a National bank and a National separator are inseparable. Details of the construction of the machine are fully outlined in the handsome catalog No. 133 which is free to any interested person. Address, The Hastings Industrial Co., Chicago, Ill. See page 7.

## HAVE YOUR WASHING DONE FREE.

What next! One of our advertisers, Mr. R. F. Bieber, general manager of the famous 1900 Washer Co., of Binghamton, N. Y., is so enthusiastic over the work done by his wonderful Gravity Washer that he makes a wide-open, unlimited offer to let the machine do all the family washing for a month on free trial. Everybody who has tried his washer has been delighted with the work it does. He not only takes all the risk of the full month's free trial, but even pays the freight. You don't need to send him any money in advance or sign any bonds or make any deposits. The hard part of the washing is all done by the machine itself. It washes a big tubful of dirty clothes spotlessly clean in six minutes. It washes fine lace curtains without tearing them. Yes, and it will even wash carpets! Any responsible person wishing to let the Gravity Washer do a month's washing as a free test can get a machine on free trial, without being obligated to keep it unless perfectly satisfied. Mr. Bieber will let you pay by the week or month out of what the washer saves. You can get full particu-

lars of this liberal free trial offer and "Pay as it Saves for You" plan by sending your name and address in a letter or on a postal to the General Manager of the 1900 Washer Co., Mr. R. F. Bieber, 289 Henry Street, Binghamton, N. Y.

## ARMSTRONG'S FEEDER ADJUSTER.

Those of our readers who are interested in a corn feeder adjuster should read the advertisement of Mr. C. E. Armstrong, Lewis, Iowa, on page 15 of this week's issue. This is one of the devices that saves time and money to those who operate corn shellers. Write for his free circular, giving detailed description and prices, and kindly mention The Homestead.

## A GOOD HOG FARM FOR SALE.

This man who wants a good hog farm right near town, and with a good business already established, should write to Mr. Sol Frank, of Sioux City, Iowa. He offers for sale this splendid place of fourteen acres with a good house and outbuildings, fenced and cross fenced, with an abundance of fruit, and just the place for some man who wants to raise hogs and fruit. Here is a great bargain. Write Mr. Frank about this place and mention The Homestead.

## HOW TO DESTROY QUACK GRASS.

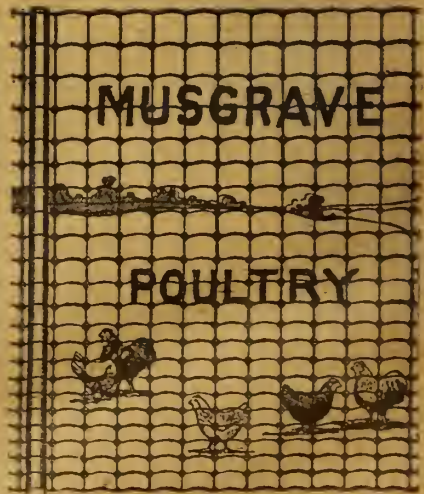

If you have a crop of quack grass it is time to harvest it. Those who are acquainted with this variety of grass will need no introduction to it. On page 10 one of our advertisers offers a machine which is guaranteed to accomplish more destruction to this pest than any farm tool that can be used. This company will be glad to answer any inquiries which our readers may wish to write them. They will be glad to explain the merits of this machine fully. If you have any of this pest on your farm you should investigate this machine. When you write for circulars address, Austin Weed Extirminator Mfg. Co., 300 West Mill Street, Austin, Minn.

## THE RIGHT SPOT

For you, Mr. Farm-seeker, may be exactly the country which we are going to call attention to right here. A good part of the farming population of our country is shifting around. One of the reasons for this is that people do not get started right to find the right spot. A good deal of the expense of traveling can be saved by a bit of study. Never has there been so much literature on the farming lands of the country available to the farmer as at present. The man who intends to buy a farm in the Northwest can learn probably more about the conditions of crops, climate and country by the descriptive material now at hand than could be learned from a summer's trip through prospective territory. In view of this fact, the proper thing then for Mr. Farm-seeker to do is to supply himself with some of this literature pertaining to lands in the great northwest. It consists of full descriptive circulars of prices, crops, people, irrigation and ways of visiting this country at the least expense. In the Canadian Pacific tract there are now the best of opportunities for investment. Write for these aids to find the right spot. Address, Canadian Pacific Colonization Co., Ltd., 71 Ninth Avenue West, Calgary, Alberta, Canada. See page 6.

## FENCES, GATES AND WIRE STRETCHERS

The accompanying illustration shows a section of the famous poultry fence handled by the Musgrave Fence Co., of Des Moines, Iowa. This reliable firm handles not only this high-grade poultry fence, but a large assortment of lawn and hog fences, orna-

mental gates, and the kind of all wire stretchers. Mr. Musgrave sells direct to the consumer, so can save you a large per cent on your investment. If it is anything in the fence line you wish, the Musgrave Fence Co., of Des Moines, Iowa, can fill the bill. Write them for prices and mention this paper.

## THE GOLDEN PRAIRIE COUNTRY.

When we look back fifteen or twenty years and remember that all that portion of northern Iowa that was then only pasture land, selling at \$5 to \$15 per acre, is now developed into high-class farms; when we note that during that period lands in central Ne-

## BALES 15 TONS HAY A DAY

Say "Baler Book" on a postal to us and we will send you free a book telling the results of our experience since 1867 making hay presses. You want profit, so should spend a penny to learn about our Gsm Full Circle Steel Baler and how we save you about \$5 in price and sell you a press which will save you as much more each year in repairs and do the most work. Patent power head, short trip levers arms, long plunger stroke with quick rebound, large feed opening and two charges for each round of the team are advantages of our presses.

Geo. Ertel & Co., Quincy, Ill.

Cane, Kaffir Corn, Flax, Buckwheat, Rape and other seeds for late sowing. Ask for samples and prices of anything wanted.

### IOWA SEED CO.,

Des Moines, : : : : Iowa.

Most economical and durable roof covering known. Easy to put on; requires no tools but a hatchet or a hammer. With ordinary care will outlast any other kind. Thousands of satisfied customers everywhere have proven its virtues. Suitable for covering any building. Also best for ceiling and siding. Fire-proof and water-proof. Cheaper and more lasting than shingles. Will not taint rain-water. Makes your building cooler in summer and warmer in winter. Absolutely perfect, brand new, painted red two sides. \$1.50 is our price for our No. 15 grade of Flat Semi-Hardened steel roofing and siding, each sheet 24 inches wide and 24 inches long. Our price on the corrugated, like illustration; sheets 24 inches wide x 24 inches long \$1.60. At 25 cents per square additional we will furnish sheets 6 and 8 feet long. Steel pressed brick siding, per square \$2.00. Fine Steel Beaded Ceiling, per square \$2.00. Can also furnish standing seam or crimped roofing. **WE PAY THE FREIGHT TO ALL PORTS EAST OF COLORADO** except Oklahoma, Texas and Indian Territory. Quotations to other points on application. Satisfaction guaranteed or money refunded. We will send this roofing to any one answering this advertisement C. O. D., with privilege of examination if you will send us 25 per cent of the amount of your order in cash; balance to be paid after material reaches your station. If not found as represented, you do not have to take the shipment and we will cheerfully refund your deposit. Ask for Catalog No. W-500. Lowest prices on Roofing, Eave Trough, Wire, Pipe, Fencing, Plumbings Doors, Household Goods and everything needed on the Farm or in the Home. We buy our goods at sheriff's and receiver's sales. **CHICAGO HOUSE WRECKING CO., 36TH & IRON STREETS, CHICAGO**

braska and Kansas that were hawked about in trades at \$50 per quarter section are now changing hands at \$50 to \$90 per acre; when having visited southern and central Minnesota in the early nineties finding there a vast sparsely-settled plain we revisit that country now and find it all changed into improved farms with white houses and big red barns and find that land that we refused to buy at \$10 per acre has recently changed hands at \$65 per acre, the realization is forced upon us that the unoccupied area of agricultural land is almost if not entirely a thing of the past. Steadily, al-

This tract of land, about thirty-five miles square, is peculiarly situated both as to soil and crop conditions, and to the circumstances which have conspired to prevent its settlement in the past. Each alternate section of the land was granted by the government to the Union Pacific Railroad Company about forty years ago. It was immediately purchased by the ranchmen who fenced their ranches, including in their pastures the alternating government sections, thus preventing the homesteaders going in and taking up the land. These ranchers have prospered and have monopolized the country, with the ex-

The Golden Prairie Country is shown in shaded lines.

most imperceptibly, the population is increasing and land that only a few years ago was considered fit only for grazing is now in cultivation and is yielding large and profitable grain crops, providing homes for thousands of thrifty families. As we view these rapidly changing conditions the question arises as to where the man of limited means can avail himself of opportunities such as were presented a few years ago for investment in cheap lands. This is a difficult question to answer, for all the agricultural lands on the public domain have been appropriated with the exception of a few limited areas that for some special reason have been withheld from settlement and in this connection we call attention to what is known as the Golden Prairie district of southeastern Wyoming.

SHEEP.

WOOL

WE have made arrangements to act as agents for one of the largest wool concerns in the East. We can pay you more money than you have been getting. We furnish wool sacks and twine to our shippers. We keep your shipment separate until you are satisfied. Get our prices. Reference—*Iowa Homestead*, Citizens Bank, Decorah, Iowa, and farmers in all parts of the state. Write today.

THE ADAMS SEED CO.,  
DECORAH, IOWA.

ception of a small settlement of Swedish people, until last year the national government determined to permit the settlement of the country, and all fences surrounding government land were ordered removed. This order forced the ranchmen out of business and the Federal Land & Securities Co., of Des Moines, Iowa, purchased the Gilling, Thomas, Hunter, Baxter and Wilkinson ranches, consisting of about 130,000 acres of deeded land. The company are now farming extensively, 10,000 acres of the land having been reserved for this purpose, and in their operations are using a large steam plow with seeder attachment, putting in hundreds of acres of oats, wheat and flax. A large number of farmers from Iowa and other central states have located there during the present spring, while many well-informed retired farmers and capitalists have purchased land there which they are having put into cultivation. In the neighborhood of 300 homesteads have been taken within the past few months, a new town established and developments are going forward rapidly. Many people have gained the erroneous impression that the Golden Prairie country is in the Northwest, but a glance at the above outline map of the central states will reveal the fact that it is farther south than Des Moines or Chicago. This is an important feature which should not be overlooked by the man wishing to secure for himself a home, as climatic conditions should always be considered. The Federal Land & Securities Co. are probably the largest and best known land corporation engaged in the development and colonization of agricultural lands. It is a Des Moines institution. The board of directors consist of Edwin A. Nye, editor of the *Des Moines Daily News*, who has also large holdings in banks and other commercial enterprises; Alex Hastie, president of the Hastie-Carrell Abstract Company, and for thirty-five years a prominent citizen of Des Moines, identified with many movements for the building of her industries. Mr. Hastie is also treasurer and assistant secretary. J. R. Carpenter, a native of Illinois, is the third director and also president of the company. Mr. Carpenter came to Des Moines from Monmouth, Ill., six years ago, and has large property interests in the city. He is known among land buyers both as a competent judge of soil and values and as a man whose integrity is unquestioned. The other officers of the company are H. J. Tillia, vice-president, formerly of Buda, Ill., where he owns a fine, highly-improved farm and where his standing is as high as the highest. Dr. S. O. Stockslager, secretary of the company, is a physician and capitalist of Boone, Iowa, where he has practiced medicine for thirty-five years, and is known as a man of sterling qualities. Mr. C. L. Beatty, general sales agent, has been actively engaged in the fire insurance business for sixteen years and is well and favorably known throughout the entire state. In addition to their holdings of land in the Golden prairie district this company own a large number of improved farms, as well as much property in the city of Des Moines, including Bryn Mawr Heights Addition to the city. The company are strong both financially and in business integrity, and its management is in the hands of men of high standing and large financial interests in the community. In dealing with them our readers can rest assured that they will receive fair and liberal treatment, while those who have visited their lands on the Golden Prairie of Wyoming are united in saying that that country is all that is claimed for it, and to use the words of Mr. C. H. Ainley, president of the Des Moines Fire Insurance Company, who returned from that country a few days since after purchasing some of the land, "As with northern Iowa, eastern Nebraska and other portions of our country, all that is required is time for development to place that portion of southeastern Wyoming in the same class as to price of lands, with other and older agricultural districts."

The Martin Angus Sale

The first public sale of Aberdeen Angus cattle ever made by Mr. C. J. Martin was held at the farm, near Adaza, Iowa, on May

Diseases of Men  
IS OUR SPECIALTY

In this branch of medicine we have built up an extensive practice. First, because our policy is frankness and honesty with our patients. Furthermore, because constant study and research and contact with thousands of cases each year enables us to give our patients the results they want without experimenting and at little expense.

If you are afflicted with *Blood Poison, Weakened Vitality, Prostrate or Urethral Diseases, Kidney or Bladder Troubles, Varicocele, Hydrocele, or any other weakness or diseases of men*, don't waste time and money on uncertainties. We can

cure you, make you healthy and strong quickly and at little expense. We mislead no one or give any patient false encouragement. No exaggerated promises simply to get your money. Honest services and treatment that we know will cure when we promise a cure, are the best reasons in the world why every afflicted man should consult us about their case. Call or write today.

28th, and it proved one of the most successful sales of the season. This herd was one of the most noted in the West, and was the great World's Fair herd, besides winning at the International, American Royal, and the leading state fairs. The sale, while a good one, certainly offered some splendid bargains. The leading Angus breeders of the West were there and the home attendance surpassed all expectations. In fact the tent could hardly hold the crowd. The cattle were in excellent condition, much to the credit of Mr. Sam Johnson, the herdsman. The sale opened with Blackbird Eclipse 2d, a seven-year-old Blackbird cow, and she went to Messrs. White Bros., Perry, Iowa, at \$300. Two of her daughters went to the same parties at \$275 and \$250. The highest priced animal of the sale was the great cow Blackbird 26th. She sold for \$2,010 and was purchased by Messrs. P. J. Donahoe, Matt Donahoe and Patrick Leahy, of Holbrook, Iowa. Her seven-months old son, Blackbird Defender, was purchased by that veteran breeder, W. A. McHenry, Denison, Iowa, at \$1,500. The fifty-two head averaged \$270. The bulls averaged \$338.75 and the females averaged \$256.86. Not in recent years has a better lot of Angus cattle been sold at public auction, and every man who bought in this sale got his money's worth. Mr. James Williams, Marcus, Iowa, was one of the best bidders and buyers in the sale, and secured some of the bargains. Mr. R. M. Anderson, Newell, Iowa, bought heavily, also Mr. Stanley Pierce, of Creston, Ill., Messrs. White Bros., Perry, Iowa, and Mr. J. M. Graham, Des Moines, Iowa. Col. F. M. Woods cried the sale, assisted by Cols. Luther, Judy and Binnie. Below is a detailed report of the sale:

The South Omaha Sale.

The Short-horn sale at South Omaha, under the management of Mr. F. P. Healy, on May 27th, brought out a good crowd of breeders from Iowa and Nebraska, and everything went at fairly good prices. The cattle were sold on their merits, without any future guarantee, and this prevented some from paying more money for the better sorts. However, it was a good, clean sale, and buyers got their money's worth. A few of the bulls, while very good, were a little too young to bring any big prices. Mr. Wilson's old herd bull, Straight Cruick, was a bargain at \$185, but it is only another instance where animals with a little age on them do not bring their real value. Red President, a yearling son of Imp. Roan President, topped the bull offering at \$275, and was purchased by Mr. O. N. Overton, of Nebraska City, Neb. The Secret heifer, Secret Princess 6th, belonging to Mr. F. P. Healy, topped the female offering at \$210, and was purchased by the same firm. Col. Geo. P. Bellows cried the sale. Below is a list of those selling for \$100 and over:

W. R. WILSON—BULLS.  
Straight Cruick 191132, five years, Ira Dawson, South Omaha, Neb.....\$185

## WITH THE EDITOR.

Sometimes while admitting the value of honesty as a virtue we are tempted to doubt the wisdom of honesty as a business policy. At such times we are apt to pity ourselves for having inflexible principles if we do not go farther and swerve from the line of absolute rectitude. Two little happenings of recent date have such a distinct bearing upon the unwisdom of dishonesty as a business policy that I have decided to disguise them a little and pass them on for the benefit of tried, tempted or discouraged ones.

It chanced that Mr. A, who was not a smoker and knew nothing of cigars, wished to make a present of a box of cigars to an old friend who was a habitual smoker. Now Mr. A had a neighbor and old-time acquaintance in the wholesale cigar business and chancing to meet him—we shall call him Mr. B—he asked his advice as to the brand of cigar he should purchase. "Why not buy from me?" asked Mr. B. "Because I have found that it interferes with a friendship to have business dealings with my friends. I make it an absolute rule not to buy or sell, lend or borrow to or of one whom I wish to keep as a friend."

## Comfort Free?

At noontime—or when you've done your hard day's work—you'll appreciate the kind of easy, restful comfort you can get from just throwing yourself down in a Comfort Swing Chair—like this. Fits your tired muscles—rests your mind and body all over. Makes you "free of care" while you sit in it. Think of it!

## Send No Money—But Just Write a Postal Card

to us today. We'll send you interesting illustrated "Guide to Country Comfort"—Free. Tell you how easily you can get and try one of these strong, comfortable, chairs. Guaranteed durable and to please you—delivered freight paid to you. Why not in this way for once in your life—have something that will always make you "feel so good!"—Then write today HAGGARD & MARCUSON CO. Factory: 427 So. Canal St., Chicago, Ill.

## FRUIT FREE.

This magnificent, artistic reproduction of Newton G. Wells' \$5,000 picture of deliciously tempting grapes, peaches, etc., given absolutely free with every three months' trial subscription to The Mother's Magazine at 10 cents. The Mother's Magazine is the handsomest large illustrated home and family magazine published—artistically illustrated, colored covers, and 48 pages of reading every month. The picture is 16x20 inches in size, is reproduced in many beautiful colors, and is finished with a magnificent litho, facsimile gold and scroll frame. It will add much to any dining room or parlor. Ready for the wall when received. Send 10 cents to-day (stamp or silver) for the Magazine three months, and ask for picture number 610. Both will be sent you at once. Money back if you are not delighted. Address,

THE MOTHER'S MAGAZINE, EGIN, ILL.

## Save Washday Work

Ask your dealer to let you see how this easy running machine not only cleans the clothes but actually protects them from the slightest injury.

**The Royal Blue Washer**  
A child can operate it. Built to last a lifetime. Write today for our Free Book, telling how to make washday work easy.

## Going to School or Learn a Trade?

If so, write for our fine new catalogue giving complete information about the special opportunities offered for obtaining an education in almost any subject and learning some of the best trades. Address O. H. LOSOWELL, Free, Highland Park College, Des Moines, Ia.

## KEELEY CURE.

CURES LIQUOR, Neurasthenia, Drug and Tobacco habits. Send for free booklet. Address

KEELEY INSTITUTE, INC.,  
408 Fourth St., Des Moines, Iowa

"I dare say you are wise," returned Mr. B. Then, after a moment added, "Here we are at Smith's. Let us go in. He is a patron of mine. He will give you a good article." Mr. Smith himself happened to be behind the counter, and he and Mr. B conferred as to the brand, then on the box of cigars being produced, Mr. A inquired the price. Before Smith could reply, Mr. B named a figure whereupon Mr. A handed over the money. It might have been a week later that A decided to give cigars to another friend and naturally enough went to Smith's. This time he was served by a clerk, and to his surprise, on paying for a box of the same brand, he was charged fifty cents less than he had paid the week before. Asking the clerk if there had been a "drop" in tobacco he was told, no, that the price of cigars had not changed for some time. An explanation of some kind was necessary. Seeking it, Mr. A remembered the interexchange of glances between B and Smith at the time of the previous purchase. The fact flashed upon him that he had been "done" by his neighbor, for the sum of fifty cents. Some years later B went out of the cigar business and into that of real estate. Shortly after making this change he called upon A with a proposition which promised unusually good returns. "I haven't forgotten your objection to doing business with your friends," he said, "but this thing is so good you can't afford to miss it." A listened and finally agreed to consider the matter. That night he told his wife of B's call and she asked what he intended to do. "Do you remember that cigar business?" She nodded assent. "Well, remembering that, I've decided it is unsafe to have business dealings with B. He is not to be trusted."

The Atkins had only lately come to town, but as they occupied a good house and kept a carriage they were already making acquaintances and being invited out. One morning at breakfast, Mr. Atkins remarked that he had half a notion to put some money in the L & O Investment Company; that Mr. Thompson, the president, had been talking to him, and that he impressed him as a good business man and quite a decent fellow. "Have nothing to do with him, Harry," advised Mrs. Atkins. "The man is not honest." "Not honest!" echoed Mr. Atkins. "What do you know about him?" "I know that he is not to be trusted. and I'll tell you why. You remember the day we played croquet at the Spelman's? Well, he won the game by cheating on the sly. At two different times, I saw him slip his ball, which was wired, into position, and once he claimed to have gone through the cage the previous time when I distinctly remembered that he did not. It is easy to cheat when six are playing, you know. He simply took

advantage of that fact to get ahead and win the game. You may say it was only a game, and that it don't matter, but I say it's not safe to invest money with a man whose principles can't stand the strain of a game of croquet." Mr. Atkins whistled softly half under his breath, and then he said, "Well, you surprise me, but I am glad you told me. I guess I'll not place money with Thompson!"

## HOME AND HOMEMAKING.

To be courageous like Joshua.  
To be self-reliant like Nehemiah.  
To be obedient like Abraham.  
To be persevering like Jacob.  
To be decisive like Moses.  
To be administrative like Solomon.  
To be above reproach like Daniel.  
To be long suffering like Paul.  
To be self-disciplined like David.  
To be prayerful like Elijah.  
To be master of passions like Joseph.  
To be hold like Peter.  
To be self-surrendered like Noah.  
To be God-like like Enoch.  
To be faith-acting like Abel.

## JUNE.

When the waters dance with gladness,  
And the blue skies, bending over,  
Bear no trace of clouds or sadness  
And the fields are spread with clover;  
When the feathery dandelion  
Stars with gold the emerald grasses,  
And each tip of hough and scion  
Droops with bloom in snowy masses;  
When the birds with joyous singing

All their bliss and hope are telling,  
And the south wind halm is hringing,  
All the name of June are spelling.  
—Ninette M. Lowater.

## RED BRIDAL GOWNS.

The choice of white for wedding gowns is of comparatively modern origin. The Roman brides wore yellow, and in most Eastern countries pink is the bridal color. In the middle ages and during the Renaissance, brides wore crimson. Most of the Plantagenet and Tudor queens were married in that vivid hue, which is still popular in parts of Brittany, where the bride is usually dressed in crimson brocade.

It was Mary Stuart who first changed the color of the bridal garments. At her marriage with Francis I. of France, in 1558, which took place not before the altar, but before the great doors of Notre Dame, she was dressed in white brocade, with a train of pale blue Persian velvet six yards in length.

This innovation caused a great stir in the fashionable world of the time. It was not, however, until quite the end of the seventeenth century that pure white, the color before that worn by royal widows, became popular for bridal garments.

Bride cake is a relic of the Roman Confarreates, a mode of marriage practiced by the highest class in Rome. In Confarreatation the bride was led to the altar by bachelors, but conducted home by married men, and the ceremony took place in the presence of ten witnesses by the Pontifex Maximus, whereupon the contracting parties mutually partook of a cake made of salt, water and flour. Only those who were born in wedlock were eligible for the high sacred offices. But the custom of breaking a cake over the bride's head when she enters her husband's home is borrowed from the Greeks.

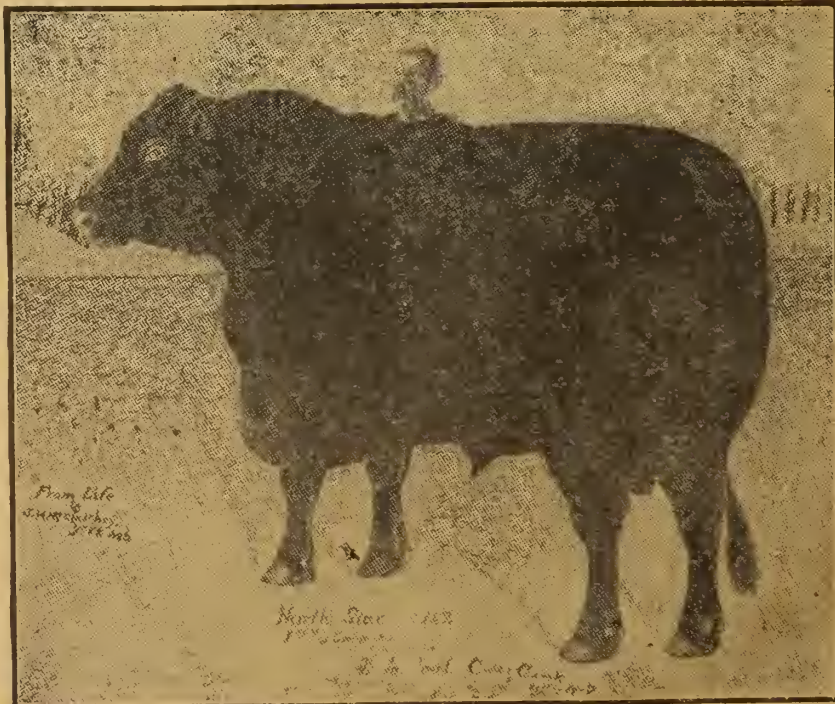

## DOMESTIC HINTS.

Rice and Strawberries—Boil half a cupful of well-washed and dried rice in one quart of boiling water for twenty minutes. Drain it and put into a double boiler with a little salt, a tablespoonful of sugar and milk enough to cover it. Cook until the rice is thoroughly soft and the milk is all absorbed. Make a thick sirup of one cupful each of water and sugar and let it cool. In the center of a glass dish heap strawberries, arrange the rice around them, and over the whole pour the sirup. Serve at once.

Tapoca Pudding with Strawberries—Cover a cupful of well-washed tapoca with cold water and let stand over night in a double boiler. In the morning add two cupfuls of boiling water and cook slowly until the tapoca is clear. Then add two cupfuls of strawberries and one of sugar. Pour into a serving dish and eat with whipped cream. This is delicious and far handsomer if served cold.

Rhubarb Cream Pie.—One cupful of rhubarb chopped fine or grated, one cupful of sugar, a pinch of salt, a grating of nutmeg or lemon peel. Moisten a tablespoonful of cornstarch with a tablespoonful of cold water; then fill the cup up with boiling water, stirring until clear. Beat the yolks of three eggs until light, and add them with the corn starch to the other materials. Line a pie plate with good, light paste, fill with the mixture and bake in a moderately hot oven until custard is set. When done and cooled, cover with a meringue made with the whites of the eggs and half a cupful of confectioner's sugar. Brown delicately in the oven.

Codfish balls are prepared in so many various ways that at times it is hard to distinguish them. The following recipe, if carefully followed, will convince you they are worth the pains: One pound brick salt codfish procured at any good grocer's, one-quarter pound suet. Remove all stringy parts, put on in deep saucepan in one-half gallon cold water, let boil one hour. While boiling the fish and suet together, have boiling five medium-sized raw potatoes in separate stew pan. Time all this so as to have them done at the same time, as it is very essential to mix together while hot. Remove all bone from codfish, place in pan. With potato masher pound until of a fibrous substance, suet to remain in fish. Then mash your potatoes perfectly smooth. If you have properly boiled them, they will be entirely free from lumps. Mix the pounded fish with the mashed potatoes, one teaspoonful of

## RED POLLED BULL OF W. H. LAKE, LAKE HAMPTON, NEB.

On June 12 there will be a public sale of Red Polled cattle held at the W. H. Lake stock farm near Hampton. There will be a number of heifers sired by this bull and most of the cows will have calves at foot or bred to him. This bull was sired by the imported bull, The Ensign 3096, out of the dam 6591 Nancy. The Ensign was a winner at the English Royal and also at the American state fairs. He was imported by Captain T. Hillis, and was sold to Mr. Bordon for \$1,000. North Star is one of his very best sons. This bull was shown at the Nebraska State Fair in 1900, winning first and sweepstakes. At the time he was owned by W. H. Hill, of Cedar Creek, Neb. He was purchased by Mr. Lake three years ago and has been a valuable addition to this herd. In writing for catalog mention this paper.

onion, slight pinch of nutmeg, yolks of two eggs, chopped parsley, salt and pepper to taste.

To fry form into cakes the size of a muffin, drop into egg batter, then into grated bread crumbs (stale). Fry in drippings of sweet salt pork. When nicely browned on both sides, remove from pan, drain on clean paper for a moment.

This is the recipe of the famous Lovejoy, who was located for so many years at the corner of Park Row and Beekman streets, New York city. He made a specialty of cod-fish cakes.

#### FOR THE CHILDREN—FIVE LITTLE FOXES.

Among my tender vines I spy  
A little fox named—By-and-By.

Then set upon him quick, I say,  
The swift young hunter—Right away.

Around each tender vine I plant,  
I find the little fox—I can't.

Then, fast as ever hunter ran,  
Chase him with bold and brave—I can.

No use in trying—lags and whines  
This fox among my tender vines.

Then drive him low, and drive him high,  
With this good hunter, named—I'll try.

Among the vines in my small lot  
Creeps in the young fox—I forgot.

Then hunt him out and to his pen  
With—I will not forget again.

A little fox is hidden there  
Among my vines, named—I don't care.

Then let I'm sorry—hunter true—  
Chase him afar from vines and you.  
—Sunshine and Shadow.

#### AMONG OURSELVES.

At the request of our worthy editor I am pleased to give my views on the prohibition question. To all parents who wish to see their children grow into noble men and women the law forbidding the sale of "booze" is a blessing. To those who give their children beer and whisky at home while they are young, helpless and don't know any better, no law that God or man can make will keep some of them from becoming drunkards. The greatest crime that man can commit is to form an unnatural appetite in his children for strong drink. Most all other crimes injure one generation only. The evil of intemperance is transmitted to an endless posterity. Parents, if you rear your children rightly the prohibition law will help keep them in the right path by removing the temptation of gilded saloons and by placing the traffic of spoiled corn juice in disgrace. A drunkard was never made out of a total abstainer. The appetite is formed by degrees. Young man, just because your "dad" can take a drink and not always get down in the gutter is no reason why you should try it. You may not have as strong self control as he, or you may have inherited a greater appetite and commence where your father left off. In this, as well as in most things, women can exercise great good. Parents should see to it that their daughter, even when quite young, avoids as a rattlesnake the young man who is wild and drinks liquor. Let them do this and demand purity for purity and there will be fewer drunkards, fewer "fallen girls" and fewer ruined homes in our land. But, alas, the more worthless a man gets the better the women seem to like him. "Women like moth are ever caught by glare," and mammon wins where seraphs would despair.

Men toned up on booze seem to have the "glare." A good man is too slow and tame. Women like to marry men to reform them. Let prohibition reign in the home, our state, and finally in the whole nation and then—the Millennium will be nigh.

Mr. Herschel Short, of Kansas, has said some good things, but surely he is hard upon the women. Some women there are who are attracted by appearance, who are regardless of man's morals, but the mass of women look beyond externals. There is also a word of ex-

tenation which should be said for those who are attracted by what the verse terms "the glare." For some reason it frequently happens that the man, who is virile and magnetic is immoral if not actually immoral; we all know men who neither drink nor smoke nor swear, but are such "sissies" that no buoyant, healthy woman could possibly find them attractive. I have in mind at this moment a male person who is a member of the church and a worker in the Sunday School, but such a namby pamby that young girls will have nothing to do with him. Young men must understand that young women are not seeking husbands nowadays. What they desire is the company of bright attractive persons of the opposite sex. If a good young man is to be "in it," as the young folks say, he must be not only good, but attractive.

When I say young women are not seeking husbands I do not forget that marriage is the natural destiny of woman, as of man, and that woman is made for love. It is for her sake especially that I proposed the discussion of love, to which I. R. M. B. will now contribute.

What is love? A force of nature. What is gravity? A force of nature. Can we ever hope to get beyond that? I have heard it said there were many different kinds of love, but would we not as well say there were many different kinds of whisky because it affects no two people exactly alike? Is it one of the laws of this mysterious force which holds the universe together, that in it there is no place for reason? I sometimes think it must be. In talking with a friend a short time ago, she said, in speaking of a young couple whose engagement we were discussing: "Yes, they are admirably suited, one to the other. They are exactly alike, and so will always agree and will be very happy. They have displayed judgment and reason." I said, "There are different brands of happiness, then; for I should hesitate to consider that happiness which eliminated from my life all possibility of daily growth through contact with an opposite, or at least different nature; all necessity for a reshaping of myself, but just gradually sinking deeper into the rut in which I had always traveled. Their children cannot be normal. Their lives cannot round out the 'Perfect One' God intended man and woman to be. And while they may look back on their lives with a sort of bland contentment, it will not be the happiness of achievement, the happiness of harmony with life and its intent." I do believe it was intended that the good should marry the bad and the bad the good, that we do not separate into two irreconcilable classes, and that the learned should marry the ignorant, and the weak the strong, thus maintaining the balance of nature in the progeny. And whatever shall predominate, good or bad, ignorant or wise, it must be strong, for regardless of whatever grace it may possess, weakness is the one thing most irrevocably weeded out. The individual happiness is and always must be lost sight of in the happiness of the masses. And a few cannot by seeking, through reason, their own individual happiness, elevate the masses, but rather must they put the ban on future generations by bringing them into the world out of harmony with its laws, out of normal proportion. Do you not think that is the hardest lot that can be imposed upon one? Is it not probable this is why so often a nice, sensible girl is unmarried until late in life—she is not normal, she is out of proportion? Not that I would decry niceness or sensibility in girls, but I am simply stating a fact. They are paying the penalty of prematurity. The world must advance together. But it will advance faster if we teach our children to so abhor the bad that they may love right, without reason, but by instinct, as it were.—I. R. M. B.

There are a number of points in I. R. M. B.'s statement which are open to discussion. I am tempted to express my own views, but think it better to wait awhile until after the circle has had its say. I wish some grandfather or grandmother who sits aside from active life and watches things would come and talk to us about these things. There must be many such in our circle. I specially invite them to discuss love and also I. R. M. B.'s statements.

It is not often that we have friends from Indian Territory speak in meeting. I have pleasure in introducing Mrs. Ada E. Erwin, of Tulsa, I. T.:

I have enjoyed the reading of your paper so much this last year, and have promised myself many times to write something, but I am a busy woman and so neglected to do so. So many good things have been said and the questions so fairly discussed that there was little left to say on some of them. The Sunday ball game talk interested me, as I have had a family of nine children—five boys—and so far we have made the Sabbath a day of rest and church going, and I know if parents plan right that children can be kept from such things by counter interests. Good books, music, good companions, a feeling of mutual interest from early childhood will lead them aright. My four daughters are all married and in homes of their own, but my youngest said a few days ago, "I shall never be too old to think." "What would mother say was best?" about the questions which come up for me to decide on. I have always given them the privilege of reasoning and deciding questions of importance for themselves, then if their decisions were too far from what I thought was best, I talked it over with them, trying to show them why I thought it unwise, and

# Amatite

## ROOFING

**Warm, Dry and Tight  
in any Climate**

If you put this roofing on your buildings it matters not whether you live in Maine or Florida, your stock, grain and implements will be absolutely protected from wind, rain and storms of every kind.

Amatite doesn't freeze in zero weather, nor does it "run" when the thermometer is high. It's the best roofing for use the country over.

It comes ready-to-lay. We send nails and cement for laps with every roll so you don't have to send to the store for anything.

As Amatite has a *real mineral surface* you don't have to spend any time patching, painting or repairing it. Once down, it's there to stay. It won't leak—it won't blow off.

As compared with shingles, tin, and most other ready roofing, the price of Amatite seems ridiculously low. Yet it makes a better roof than any of these.

*Investigate for yourself.* Don't take our word for it. Send to-day for a **FREE SAMPLE**. If you once see Amatite—how pliable, tough and solid it is—you will never buy any other.

**Barrett Manufacturing Co.**

New York Chicago Cleveland Allegheny Kansas City  
St. Louis Boston Minneapolis Philadelphia  
New Orleans Cincinnati London, Eng.

but few times in our lives have I had to say, "You must not." A mutual love and that feeling of comradeship that mother is my best friend is necessary, and as girls come to the age where secrets are a part of life, as every girl will, mother should be so much a part of her life that she naturally is the first one to hear them. Well, I did not start to write a whole article, but to thank you for your work in making the paper what it is—a looked for visitor each week in the home.

It is very pleasant to hear such kind words as well as get a glimpse into the life relations of a wholesome home. Because of what Mrs. Erwin has said and the two who are next on the program will say, let me say that it seems to me mothers would do well to cultivate more intimate relations with their children. "One Who Thinks and Reads" will follow Sister Mae:

I have been reading the different letters in the Home Department with much interest. And have just read the views of a Daughter and Mrs. Beatrice. Well, such things are all right to read and talk about and a very nice theme for a poet's song, but is there really such a thing? I do not ask it cynically or sarcastically, but I just really wonder. I am a girl twenty years old and I have had a good woman for a mother—as women generally go. She was a good woman, always ready to do anything she could for a sick child or a neighbor, but I never felt any of that wonderful love from her or for her that other girls write about. As for being a chum—bah! Such letters make me weary, for I do not believe them. Of course, I suppose there are mothers and mothers, just the same as there are children and children, and some mothers might be like that. I wish mine had. I expect my life would be happier now. I am married to a man my mother advised me to marry, and as a sample of our life will say he will not permit mamma to come to see me. I suppose I ought to feel ashamed to say such a thing, but I don't believe I really care so much for not seeing her as it is the idea that I am forbidden to do so. If some of you good people could help me to pick up the tangled threads and make my life something worth living, believe me, I would be grateful. One thing I will say: I have plenty of money, most of which I use in church and missionary work. Now, I will say right here, I am not a fraud as some thought of Cousin Hardmaster. This is just my real ideas. I wish they were different.

If all mothers were like Mrs. Beatrice's they might well have the confidence of their children. I know some who would tell the contents of their children's letters and boast of them to those who were not at all concerned—things that were strictly private affairs and which in reality only concerned the writer and the one written to. And as to Grey Eyes on dancing, I cannot agree with her. I think that dancing carried on properly is all right, and physicians say it is very healthful if not carried on to excess. The harm is not in the dancing, but in pure, innocent girls being compelled to associate with all the low trash who wish to attend and in the smaller town and certain places they are in the city. This may also be applied to the women, for some of them are worse than the men. There are just as true Christians who dance and attend balls and dances as some who never saw the inside of a dance hall. The Bible commends dancing. In one place it says, "A time to weep, a time to laugh; a time to mourn, and a time to dance." If the Lord did not intend this to be, why did He cause these

words to be placed in His Book and before the people? I don't want any of you kind readers to think that I dance, for I do not. I have never been to a dance, but for all of that I say let those who wish to enjoy themselves so, do it if they conduct themselves properly. I have had no experience in this, so will change my name from One Who Has Had Experience to One Who Thinks and Reads.

Some things are almost too sad to talk about. Sister Mae's views, position, condition, is of these. And the saddest part of it is nothing can be done about it. Sister Mae's views are the result, the outgrowth of her circumstances and these we are powerless to change. All we can do is be sorry for her, and hope that not many are as unfortunate as she. To have missed the joy of having a real mother and then to be married to a man without genuine affection is surely hard luck. But as I use the word luck I remember there is no such thing, and that Burroughs says

"Nor time nor tide nor deep nor high,  
Can keep what is mine own from me."

A new scheme in the enforcement of humane laws is being tried in the East. Women deputies are being tried out. Armed with a camera and revolver, and fully versed with the powers and duties of the office, the feminine deputy sallies forth. The plan is said to be succeeding.

## BLACK, ITCHING SPOTS

All Over Face—Physicians Called it Eczema  
in Its Worst Form

## CUTICURA CURED THE DISEASE

"About four years ago I was afflicted with black spots all over my face and a few on my body, which produced a severe itching irritation, and which caused me a great deal of suffering. I was forced to call in two of the leading physicians of ——. After a thorough examination of the dreaded complaint they announced it to be skin eczema in its worst form. Their treatment did me no good. Finally I became despondent and decided to discontinue their services. My husband purchased a single set of Cuticura Remedies, which entirely stopped the breaking out. I continued the use of the Cuticura Remedies for six months, and after that every spot was entirely gone. I have not felt a symptom of the eczema for three years. Mrs. Lizzie E. Sledge, 540 Jones Ave., Selma, Ala., Oct. 28, 1905."

# A WONDERFUL OPPORTUNITY for the Homesteader and Investor

## TWO HUNDRED THOUSAND ACRES

### Of the Famous Golden Prairie District of

# Southeastern - Wyoming

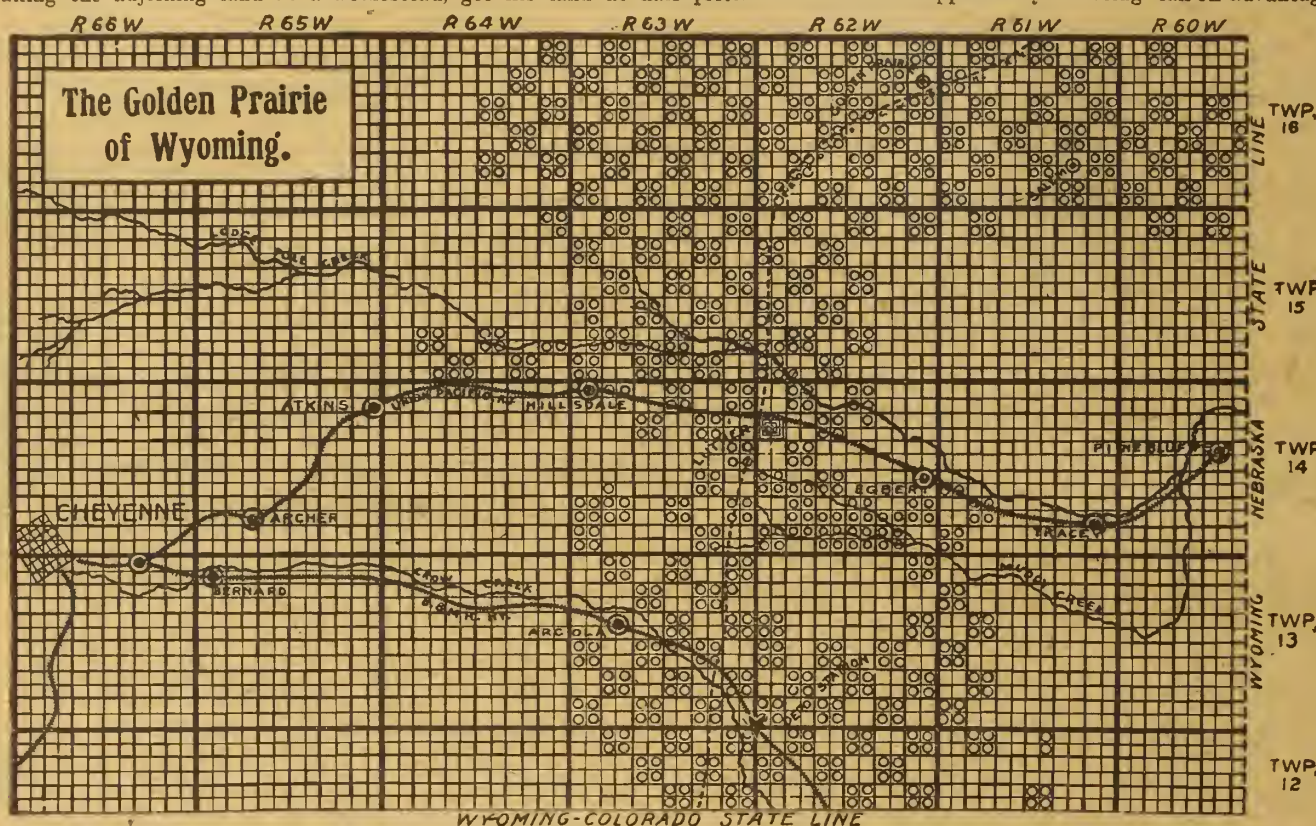

Now Thrown Open for Settlement.

The recent order of the National Government compelling the removal of all fences surrounding homestead lands has forced the stockmen of Laramie County, Wyoming, out of business.

We have purchased the deeded land as shown on the map found on this page, 10,000 acres of which we are keeping and improving, while the balance is being placed on the market in tracts of 160 acres and up, with prices ranging from \$8.00 to \$15.00 per acre, with small cash payment and balance distributed over a period of 10 years with low interest.

### A 160 ACRE HOME FREE TO YOU.

The even numbered sections, except school sections, are subject to homestead entry so that the purchaser of a quarter section of our land can, by taking the adjoining land as a homestead, get his land at half price. This unusual opportunity is being taken advantage of daily and those desiring free homesteads should not delay.

free homesteads should not delay.

This sectional map shows the Golden Prairie District. Our lands are designated by a circle in each quarter section. We are now marketing that portion of the land south of the main line of the Union Pacific Railway. None of this land is more than six miles from railway station on either the Union Pacific or the B. & M. R., while the proposed C. W. & N. is projected north and south through the middle of the tract.

The land lies level to gently rolling and is good rich soil with no alkali, brush, gumbo or other imperfection. The whole tract is underlaid with pure sheet water at a depth of from 20 to 80 feet.

### AMPLE RAIN-FALL. NO IRRIGATION REQUIRED.

In the Swedish settlement adjoining our lands, large crops have been raised during the 20 years the settlement has been located there. These people follow the ordinary farming methods of the central states and their harvests of wheat, oats, barley, potatoes, etc., are remarkable, both in quantity and quality. Our literature, which is sent free for the asking, contains testimonials of a number of these people. They will be a revelation to you.

Fill out and mail us without delay, the coupon found on this page. It will supply you with much valuable information.

#### Words of Praise From Leading Manufacturer.

Swigert & Howard, of Des Moines, are leading garment manufacturers, employing largely both capital and labor. Mr. Swigert, whose letter follows, was reared in Knox county, Ill., and knows good land when he sees it.

May 22, 1907.

Mr. H. J. Tillia,  
Vice-Pres. Federal Land & Securities Co.,  
Des Moines, Iowa.

Dear Sir:—Ever since returning from my western trip which I made last month and during a portion of which I was accompanied by you, I have thought of writing you and thanking you for courtesies extended and for the favor you did me in showing me the 1,120 acres of Golden Prairie, Wyoming, land which I purchased from your company.

I have been thinking for some time that one should not delay in buying land as the tendency all over the country is rapidly toward higher prices. Having accumulated some money which I decided to invest before values got higher, I last month made a trip through the west, visiting Colorado, Kansas, Nebraska and finally, having promised you that I would look at the Golden Prairie country, I reached Cheyenne where I met you by appointment. I shall always remember the automobile trip we took and the surprise I experienced when I visited the improved farms in the Swedish settlement in Laramie Co., Wyoming, adjoining the lands owned by your company, and saw there the evidences of prosperity and remarkable crops raised by these people.

I am frank to say, Mr. Tillia, that I found your land far better than I had ever hoped to be able to find at so low a price, and the fact that I bought one and three-quarter sections should be sufficient evidence that I am satisfied with what I saw there.

I, like most other people, before going to look at the country, classed it with the plains country of eastern Colorado and western Nebraska and Kansas. I found, however, a beautiful, undulating prairie with remarkably fertile soil, no possibility of hot winds, with plenty of evidence that for twenty years past or during the entire time farmers had been settled in the Swedish neighborhood, there had been no crop failures, and during no season insufficient moisture for the production of grain and grass crops, while an unlimited supply of pure water is obtained at very shallow depth.

Added to these advantages when you consider the additional fact that my land is only three miles from a station on the Burlington railroad and six miles from the new town of Luther on the Union Pacific, while every acre of the land is smooth and ready for the plow, you cannot blame me for being enthusiastic and predicting to my friends that inside of five years my land will be worth \$50 per acre.

I am,  
Very truly yours,  
(Signed) A. M. Swigert.

The following is taken from the "Daily Chief," of Perry, Iowa, issue of May 18, 1907. The location selected by Mr. Fagen is surrounded by our lands. You can do likewise. Not AFTER WHILE but NOW.

HE LIKES THE STATE OF WYOMING.  
M. E. Fagen Tells About The Country He Has Just Recently Visited.  
HE THINKS THERE IS NO PLACE LIKE IT.  
Mr. Fagen Will Return There Next Tuesday and Take up Some Land.  
M. E. Fagen, who recently made a trip to Wyoming to look at some land, comes home enthusiastic over it, and, in fact, is so much so that he and three members of his family expect to go there next Tuesday and take homesteads.  
Mr. Fagen went there in company with Howard Rouse and they spent several days in the eastern part of the state. He thinks that the mau who said that country was the Golden Prairie certainly gave it an appropriate name as he had never seen

prettier land anywhere and he has traveled all through the northwest.

The first thing which attracted his attention was the healthful climate, as the Perry men had been there but a short time before Mr. Fagen noticed the difference. The water is also exceptionally good and there is no alkali in it whatever. He thinks that for a young man or a poor man there is no place better. For several decades the cattle men have been using the land for pasture and it was only a few years ago that the land was cultivated. When the government officials saw what could be raised on the land, they ordered that the cattle men tear down all of the fences on the government land which had previously been used for cattle, in order that they could have the country settled. It will be surprising to many to know that since the land was first cultivated they have had no failures in crops. There are no hot winds to burn up the grain and there is no extreme cold. Without irrigation the land has yielded such crops to the acre as forty to sixty bushels of oats, fall wheat twenty bushels, spring wheat thirty bushels, and large crops of barley, speltz, etc. The soil there is as fine as can be found anywhere in Iowa. There are plenty of streams and they abound in fish. Through the country they visited the Union Pacific has a network of tracks. The B. & M. is also a prominent road there. Mr. Fagen says he has never seen a new country like that, where one could secure homesteads and farms so close to the railroad. In very few instances is the railroad ten miles from the farm. At one place where he stopped he saw five U. P. passenger trains going in one direction in one day.

The farmers there are very progressive and many of them use the steam plows with all the attachments.

Mr. Fagen expects to go west with Mr. Rouse next Tuesday, and if possible take the four homesteads which he picked out when he was there a few days ago. Mr. Rouse is very much taken up with the country also. He had never handled any Wyoming land, but a few weeks ago, when he had an offer from a company to come there to look over the land and take the agency for it, he thought it well to go.

Howard says it doesn't pay to make an occasional farm sale when he can list such good land at from ten to fifteen dollars an acre and be sure of many sales. On the train with Mr. Fagen and Mr. Rouse when they went out there were several Iowa men, and while they were there they met Chas. Ainley, of Des Moines, and Mr. Musselman, of this city, both of whom had gone there for the purpose of getting land. If anyone starts Mr. Fagen talking about Wyoming land they can make up their mind that they can't get away without a half hour conversation as M. E. is full of praise for the place.

#### THE FEDERAL LAND & SECURITIES CO., Des Moines, Iowa.

Gentlemen: Please send me at once, free of charge, sectional map and literature of the Golden Prairie District of Southeastern Wyoming.

NAME.....

ADDRESS.....

Acres wanted.....state if for home or investment and if free homestead is wanted:

Iowa Homestead June 6th, 1907.

**Federal Land & Securities Company, 210 Fifth St., Des Moines, Ia.**

## IN THE GREAT SOUTHWEST.

Rainfall in amounts from a drizzle to two inches fell over Kansas last week generally. Coming slowly as it did, the greatest benefit will accrue.

Kansas is now in the midst of a grange movement which promises to form a strong organization of the agricultural interests of the state. There are now 134 lodges in the state and there is no end to the operations which are proposed in commercial and other lines.

A syndicate of Kansas City men has contracted to purchase 73,000 acres of Texas farming land. The land includes the Bush and Tillar ranches in Scurry, Borden, Howard and Mitchell counties, and the Pyron ranches in Scurry, Wheeler and Gray counties. The investment will approximate a million dollars.

In Spring river, northern Arkansas, there is a luxuriant growth of water-cress, moss, flags and rushes. During the winter and in early spring, when the neighboring hills are bare of vegetation, cattle wade into the stream and feed on the aquatic growth. The animals frequently plunge their heads entirely beneath the surface of the water in their quest for succulent roots and tendrils.

Two car loads of heifers, fed and marketed last week by H. J. Hazell, of Sabbath, Kan., did a season record-breaking feat, selling at \$5.55. These heifers averaged 795 pounds and had been corn-fed for a period of four and a half months.

Thirty cars loaded with strawberries from southwest Missouri and northern Arkansas, passed over the Frisco to northern markets one day recently. The berries, however, are not as good a quality as those of other years. If the berry trains are any criterion, the crop that was reported to have been ruined by the frosts and cold weather, has certainly revived itself to such an extent as to keep the railroads hustling in order to get the crop to the markets.

The demand for green bug parasites continues unabated, about 1,000 boxes a day being sent out as ordered. Each box contains 30,000 parasites, it is estimated, so the total number of bug destroyers sent daily is enormous. It is estimated that 350 bushels of the destroyers have been scattered in the wheat fields of Kansas by the university thus far. Over 18,000 packages had been sent out up to date. Almost all of these have gone free by express, under the department's frank.

New high records for the wheat crop were made in the wheat market last week, July selling at \$1.03½ and December at \$1.05½. September reached its high mark at \$1.04½. Killing frosts reported from parts of the wheat belt are the cause of the rise.

Owing to the late frosts and dry weather, plants which furnished honey bees with food in the early part of the season have been killed and many farmers who had bees are reporting that the insects are dying for the want of food. The alfalfa, which always has furnished plenty of broom, failed and there has been nothing else to take its place.

The specifications for the new weather building to be erected in Iola, indicate that it is the purpose of the government to build a modern home for the weather station, with every convenience and even

luxury. The building is to be thirty-six feet square, two stories in height, with basement. The basement is three feet above ground. The foundation walls are to be of concrete blocks, and the building is to be constructed of red Coffeyville pressed brick, with Carthage stone water tablets, sills and window caps. The entire building is to be lighted with gas and electricity.

The Farmers' Terminal Grain Company has been organized with a capitalization of \$50,000. A board of directors comprise: R. T. Andrews, White City, Kan.; J. S. Kennedy, Minden, Neb.; J. Y. Callahan, Enid, Okla.; S. H. McCullough, Solomon, Kan.; James O'Neil, Maxville, Kan.; W. T. Harris, Solomon, Kan.; H. A. Heath, Topeka, Kan.; B. R. Beall and P. W. Goebel, of the West Side. S. H. McCullough was elected president; J. S. Kennedy, vice-president; B. R. Beall, secretary and manager, and P. W. Goebel, treasurer. It is the understanding that this grain company will not belong to any board of trade, but that it will carry on business with the Kansas Board of Trade through representatives the same as other companies on other boards of trade.

A tri-county thrasher's association was organized at Emporia Kan., recently. About thirty thrashers from Lyon, Morris and Chase counties were at the meeting, and the following officers were elected: J. M. McMillan, Dunlap, president; Coyle Spillman, Plymouth, vice-president; Harry Stuttle, of South Lyon county, secretary. The object of the association seems to be to establish a uniform price for thrashing, as well as to come to a better understanding as to territory. The question of securing better bridges was also up for consideration.

The production of squabs for the Kansas City market has taken such a start in Leavenworth as to form a valuable adjunct of the poultry business. Squabs that weigh ten pounds to the dozen are bringing in Kansas City \$6 a dozen, and a number of dealers are offering to take from a local producer who has several hundred all that his place will produce. A single pair of pigeons will produce from seven to nine pair of young pigeons or squabs a year. The best results are obtained from feeding whole wheat, cracked corn, kafir corn, cracked peas, millet, hemp, buckwheat, shells, grit and coarse salt.

The deadlock between commission men and the meat packers in Kansas City regarding the transfer of cows and heifers under the recent post-mortem rule made by the packers continues. Receipts have dropped to one-fourth of the regular volume. All arrivals are being purchased, however, by speculators who will return the stuff to the country. The Co-operative Live Stock Commission Company, the independent exchange, is the only agent selling to the packers. The hope is for a changed condition soon.

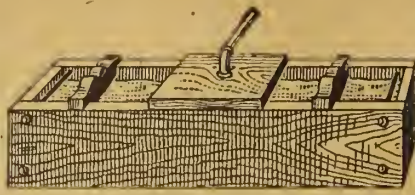

Reports of diminished area under cultivation and unfavorable crop prospects has resulted in an advance in the price of cotton. The price is over a dollar a hundred greater than at the same time last year.

One hundred horses, much feed and the equipment of the Piper-Irwin horse market at Fort Scott, Kan., was destroyed by fire last week.

Col. W. A. Harris, of Short-horn cattle fame, recently returned from a trip through old Mexico, where he studied conditions and their bearing on the live stock industry and the relation to the pure-bred cattle business. Cattlemen of that country look favorably on the plan of introducing pure-bred bulls.

The millers of Kansas who have been proceeded against by the attorney-general for violation of the anti-trust laws are preparing to make a hard fight. The millers are basing their fight on the ground that their organization was not a trust, even if the officers did quote prices to each member, because the millers were not required to sell their flour at the prices quoted. The Kansas Millers' Commercial Club was one of the organizations proceeded against. The information imparted to members, it is claimed, is no more harmful than where one merchant knows the prices of his competitors' goods.

Secretary Coburn, of Kansas, is said to have a hobby for collecting old horse-

shoes. An extensive collection has been gotten together and every shoe must be intact before it will be honored by a place in the collection.

Tuberculosis in its many forms and phases was discussed by the Missouri Medical Association at its recent meeting at the capitol. Constitution and by-laws for a state-wide association for the prevention and control of the disease was adopted. Any person may become a member.

The anti-treating bill for election days is also now a law and applies to all schools, municipal, primary and general elections.

The new Missouri law which places a twenty-five-cent tax upon each transaction in futures will drive many grain operators out of Kansas City. Many independent operators will move to Kansas City, Kan., before the new law goes into effect June 16. A number of the members of the national board of trade have already been elected members of the Kansas Board of Trade, recently organized in Kansas City, Kan. Besides a number of the largest bankers and merchants of Kansas City, Kan., the Kansas Board has among its members a number of independent wheat growers in all parts of the state.

A large party of Chicago men took a trip through parts of the Southwest recently. The party was made up of leading stockmen, paper men and representatives of commercial associations. Every large city along the route was included.

The second annual meeting of the National Cotton Congress has been called for the week beginning June 17, at Monte Ne, Ark. The membership of the congress included men interested in all branches of the cotton industry, from the growing of the crops, through the marketing to the manufacturers of fabrics. The purpose of the organization is social and educational. The meeting will afford a common ground upon which planters, ginners, warehousemen, buyers, sellers, bankers, spinners and weavers of cotton can meet and discuss questions for the common good.
